

626th Knowledge Seekers Workshop January 22, 2026

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

ENGLISH TRANSCRIPTION

(:15)

K- Thank you very much. Good morning, good day to you, as usual, wherever and whenever you listen to these series of Knowledge Seekers programs of Keshe Foundation Spaceship Institute, we welcome you back.

As we explained last week and the week before, we are on a track to understand the connection between us and Central Energy of our creation, and the creation of whatever we see. One of the most important part of this equation is, how does one connect, and how does one recognize the position to connect to? (:16) What this means is, by the law of physics, by the law of understanding the plasma energy, a system, a field, a magnetic (M) field, a current, will flow in a direction to meet a resistance, or encounter an interaction, that in that interaction in feeding back the source understands has a line of connection, that it can deliver to. You have a battery, the cable is there, the battery doesn't discharge, doesn't supply anything. The minute you connect the two ends of the battery to an entity, doesn't matter what it is, then the system recognizes, "I'm connected, I need to give, but I see what I can take back."

In the world of cosmology and Space technology, we call it Gravitational (G) and Magnetical. In electronics and electrical currents, we call it current and Eddy current. We have created many, many names for this. We hear different words, that in certain ways, you have fields which they go out, and if you make a box nothing can be leaked out, you make a Faraday box. And then now, we have built what we call, Magnetical Gravitational (MG) boxes with Nano materials. (:18) And so we have come up, at the end of it, with the same result. Doesn't matter we go on a field, we go on a current, we go on a gravity, whatever we do, there is a need for giving and taking back. See what I'm giving, what is more needed to be done. And in that giving I run out of energy myself, I need to gather from somewhere else. In the world of what we call, state of matter, we call it Gravity, which means we pull in what is there for us and then we give a connection back, we call it Magnetical. There is no difference between the current and the Eddy current. There is no difference between what we saw with Professor Miles and we saw with what we call Tesla.

So if we understand this principle there is no connection till there is a feedback. So the Soul of the Man (STM) is the same. The Rays of the Creator has found a source, and in the same way we feed back to it where we are what we do who we are and the rest of it. There is no difference between the location recognized by the rays of the Universe (U) in respect to the Sun of the Solar System (SS) and the Sun of the Man we call the STM. But for them to be recognized, for them to be in a position to be understood, the Creator

transmits always on H, what we call Fundamental Plasma energy, which is Him, which is the Source, the center of the Universe. (:20)

So, when this field moves around, we call it rays of light. In religions we have found different names for the same thing, because we robbed the people in on the different titles, is the connection which the Creator sends out across the Universe, irrespective of position and place, and then when a matter state created, then the response goes back, here I am, but I have to digest it, I have to transfer it in a plasma condition, which at the Soul level, at the Central Energy, but lower level down, we call it Carbon 14 (C14). Therefore, it's our feedback, it's an eddy current, is that what we call the, I call it "Mr. Miles." We have found differently, in the world of plasma technology, we call it magnetic, but it's that feedback.

So the Creator comes to us, the line of connection comes at the Fundamental Plasma magnetic field level, which is the Creator, is the source, is the center, does not matter what name you put to it. And in interacting with the plasmatic condition, we call it C14 as a feedback. And then this C14 travels the whole span of Universe, and in this way travels and interacts with the other materials and positions, and other Souls and other Magnetic field plasma centers, which in the condition of environmental field condition, changes to matter state, and the C14 becomes Carbon 12 (C12), in the Amino Acid (AA) of the Man, (:22) in the vacuum condition of the body of the Man, in the atmospheric condition of the this planet, becomes Carbon as we know it, and we call it C12, and the rest of it.

So, we have to understand that we as scientists, as cosmologists, as those who deal with what we call Universal fields, we understand the whole levels, in a battery, in a plasmatic field of the condition of the Earth, and in the condition of the STM, it's all the same. In a way, we send a message to the Creator, "I'm here, I'm here." And in sending a message, as a C14, we have a spectrum. So, the field doesn't go directly back to the Creator on his way, trying to find his way back, even though he finds his way back, it interacts with other elements, which with other fields, which they, in a way, saying hi to the Creator, same as what we are doing, and this leads to the creation of new conditions, new cells, new organs, new planetary system, new moons, and then, and then, and then, and then.

And then in the future, one day we explain something very deep in the knowledge of the cosmology, knowledge of the universal, what we call magnetic fields, what we call Fundamental Plasma (FP), as we've seen the structure of every plasma has to have another plasma to balance with, then it'll come to a very fundamental understanding that you have the Sun and then it creates the Earth and the Moon, (:24) and then you have the neutron and protons which will use the balance of the electron for the feedback. Our Universe has a parallel Universe, it's a twin. It's a law of physics, it cannot be done any other way. It has to give its energy to a position that it gives back to it, that it can keep the stability. And if this Universe of us has been here for billions of years, trillions of years, then it has a twin. In the same as our solar system has a twin, in the same as our atom has a twin, has electron and proton and neutron in the structure of the atomic understandings, and the same way they feedback, they receive and they give back. And in all that

connection, there is a connection to the center, because it is what we call Fundamental Plasma magnetic field elements, we call it the source or the God and the Creator and the rest of it.

If we see in the bigger picture it becomes much easier to understand smaller picture, which is the STM and then we call it the twin Soul, and then we understand in the smaller field, we have that twin part of our Soul, we call it the Soul of the Physicality (STP), they have found different names for it, the Soul, the Spirits, the ?? and the rest of it. And when these two interact, meet within the condition of environmental, as one of the, what we call, the environment, leads to manifestation of the physicality (P) of the Man. The physicality of the Man is actually that electron. (:26) The STM is a neutron, and the STP of the Man is that proton. Because bits of it is flushed out, which becomes the physical manifestation of the Man.

If you understand the whole process, and look at it scientifically, look at it and understand it, not with the eye of trying to connect it to an event which suits us, but understand the whole process as a natural, fundamentally the same, right across different strength field of the Creation, then we come up with one answer. There is only one process in the World of Creation. And, depending on the Place, Position and what we call, Possession (PPP), creates the cell of the Man, the STM, the star, the galaxies, the Universes, the parallel, what we call, Twin Universes, and the rest of it. Because, in the World of Creation, cannot be exceptions. The exceptions are, where we don't understand. And now we have to look for it. We have to understand how this come to be. We call it the Soul of the Solar System. But where is the STP of the solar system which in the manifestation of physicality becomes the Earth, the Moon, the Mars and the rest of it, ?? are the matter state of physical condition. This is where most of you as Knowledge Seekers fail in understanding the whole process to be the same, does not matter what.

So when it comes for you to move across the Universe, when you come to transmute, you have not seen any engine on the solar system, have you? (:28) You have not seen no rockets hanging around it, have you? Still does 10,000 kilometers in the solid body state, and travels beyond the speed of light in the dimension of the energy. It cannot be that difficult? If we understand this, there's one fundamental, one fundamental point which is need to be understood. What is the outcome between the, what we call, the fields of the Creator, and the fields which we send back to our Creator, as C14, as our extension of the Magnetical system and the rest of it?

You have two opposite fields, one of the lower and one of the lowest, which comes from dimension (D) of the plasmatic field interaction. What's the difference between the two? In the world of electronics we call it voltage. In the language of the physics we call it Potential Difference. In the understanding of the Totality of the Creation, Man has not understood the power of magnetic fields interactions. In a funny way, Man understood, but the greed of physicality 'threw him to the wall.' What do you do? What is actually ever understood? You go to a shop, you buy a generator, you buy a motor, what is in it? A magnet which rotates and then a crazy part which stands there and says, "I don't take you." (:30) What does the magnetic field do in hitting you releases its energy? Doesn't

this happen when a wave hits a block? When you run and hit a Man who's stationary, you transfer your energy. But Man has to understand in the World of Creation, the same thing happens in the dimension of plasmatic energy fields.

The rays from the Creator are not a singularity, they are more like a field. And then, as we say, they create vibration, they create waves. And it's the same when the C14 travels back. And then now you understand, you hit them together, what are you going to get? A bit of dust, a bit of debris, and a massive amount of energy. Cosmic Ray (CR) energies, which runs in the principle of the whole rotation of this planetary system, this solar system, this galaxy and the Universe and the Unicos, it's only this and nothing else. World of science have not understood the beauty of this. They've gone to get the magnet to rotate it and then they say they got a perpetual rotation. Plasma is, works on the perpetual rotation. How come Man has not looked into the depth of the knowledge to understand this? It is the lack of knowledge in half cooked ?? knowledge which has brought us here. And scientifically we can blame only one person for this in the cycle of the recent knowledge of the Man, because our ancestors understood this, they worked on the plasma. We see it right across the planetary system in different locations. (:32) We see how Man achieved this knowledge but could not pass on, because Man used to live in a village. Now Man has a communication system that every village is connected to each other.

You Knowledge Seekers (KS) worked on MaGravs, but you never understood. Why do we coil it? Isn't it the structure of the plasma? Isn't it how light travels from one point to another? So, it's important for those who come to be part of understanding the totality, have to understand this transfer of energy. This change received in energy as in dimension of the Hydrogen (H), in interaction with the STM in reversing back with the what we call, C14 creates the energy which the brain of the Man uses you call it ?? ketone ?? energy. This is what the Man has not understood, this is what the problem sits with understanding of the physiology, the biological structure of the Man and everything else, because always one bit missing. We don't have scientists which can cross the line of the knowledge in physics and chemistry and everything else. Narrow minded, given a PhD and a professor and we locked them there, that's it. Where in the future the Man has to educate his children to understand the full structure of the work of the Universe, be it the chemistry, biology and show them the connection, everything ends up to one dimension, the light of the created, the dimension of the creation of the rays which comes to Man. (:34)

That Hydrogen is that magnet rotating in the middle of the generator, and that copper coil is C14 on the way out, and the interaction of these two leads to so much energy, that leads to operation of the energy of the brain of the Man. So does the same work in the structure of the Universe. In a way, in the world of the matter state, we call it Iron and its isotopes. In the dimension of the magnetic fields we call it fields, magnetic rays, and Cosmic Rays, but with different strength. In the matter state you have one maybe electron connected here, you have one proton extra, you have one neutron extra, we have come with all sorts of crazy names for these combinations, and part of it we call isotopes. And it's one way, if you have one more neutron. But, in the dimension of the plasma, the C14

return has a spectrum of energies, which covers the whole of the Universe spectrum of energies. And depending on this return from the interaction of the fields of the fundamental energy, with what we created as a plasma, but in a jellish way, we call it the brain of the Man, we deliver different magnetic field strength back out to go back into the Universe, in connection to our creation, to our Creator, (:36) then in different density of the plasma, we call it this part of the brain is for emotion, this part of the brain is for this and that. Because Man never understood how you mix the plasma, that's why the brain is soft, that's why the brain has such a structure, because it's again itself another dynamic plasma conversion station.

If the world of science understood how this energy comes out, scientifically today we know, as I explained many times before, we have measured the energy of the Man at a point of death, releases, especially in accidents, now we can measure, it's up to 18, 20, up to 50 times Hiroshima bomb energy release from not the brain, it's from the energy which comes from the Soul which gets released. If that was not energy from the Soul which releases from the head of the Man all your organs would have flushed out. It's energy level not a matter level, you get crushed. What happen? The heart jumps out, legs pops out and everything else, but doesn't touch the Soul. But when the Soul is touched, the energy release is what we see is the dimension which what has been gathered over the life creation point of inception of the energy of the STM within the womb of the mother to that point.

Now if you understand this, Man for the first time understands how the brain does not need the heart, the physicality, for it to exist, because it creates his own energy, his own dimension of life. And then it transfers it through two dimensions of energy fields, down to the body of the Man. (:38) How it does that, the body of the Man brings the blood to keep things cleaned up from clogging up, but the body of the Man again creates the two neural system, one which goes down the spine and one which two covers, comes through the front of the brain of the body of the Man that it creates an interaction between the Twinity, the spinal cord nerve system and frontal part nerve system, which the interaction of the two. One comes from the emotion, one comes from the physicality, needs the creation, maintenance and every part of the organ of the body of the Man with the energy and what does happen? The Inertia, which is your blood, converts it back into the matter state of the energy between the two.

Once Man understand this and once Man understand the totality of the creation of life, Man understands how the whole transmutation and transportation exists and how he can control it. Ask yourself one question if you don't understand this. How come you're in an accident you get your spinal cord cut but you still live. But the energy transfer is still the same. But you lose connection with some of the limbs and arms or whatever it's been disconnected from, but you don't die. Because the front part nervous system which comes from the brain from two sides of the head, creates that magnetic field, uses the line of whatever is not cut, to create to maintain life.

This is one of the reasons when you cut a head, life goes out of, because the whole thing disbalances the frontal nervous system backwards and system has no more connection to

the STM and then voila, you have no connection. (:40) ?? End for one, the physicality. But the energy release through the brain, through what we call the STM, carries on. If Man understands how the energy within the structure of his body works through plasmatic magnetic fields, and don't come up with all the rubbish we hear from biologists that how the energy is created, except transfer of the energy through unbalances of the fields, then you as Knowledge Seekers understand the difference between the communication and transmutation.

And in that process, this is why in the recent weeks we announced sometime this month and for next three months, we teach you, we work on, we are trying to help you to find transmission, how we transmit information within the structure of the plasma to lead to a correct condition for transmutation. This is what we saw missing. We had to set up our systems that it can match. For past few months you had no sessions and now back. But you're going to get 'hit by the hammer' when you go back this time. Because we take control of teaching you how to transmute in the dimension of and how to create energies, what you call the current, you call it nuclear power stations, you call it everything else, creation of the Cosmic Ray current energy.

There is a huge difference between Cosmic Ray and Cosmic Ray energy. (:42) Energy comes from interaction of the Cosmic Rays, where itself becomes the current and becomes the source of the dynamism of the body of the Man, become the source of the dynamism of the solar systems, becomes the dynamism of the galaxies and the Universes. Nobody has plugged our solar system to energy that it rotates itself. Man has not understood the principle of the difference between the Gravity and Magnetical. And the difference between the two is the same as the Hydrogen and C14, it's the same as what we call in the higher level, in the universal level, stays Hydrogen, Fundamental energy plasma. And the division and interaction and separation. And the bigger the gap, but the narrower the bandwidth of the gravity, the more powerful it is.

This is why we see some of the galaxies rotating much faster. This is why we see some of the stars rotating with a higher speed. Is the difference in conversion of the energy from the source, and their return back to the source, or to the environment which they interact, which is partially connected back to the source. They create a high energy. The difference, the plasma, the center, the core, has this difference. And then, because of that, because of the combination of the fields, it's like a running away, or runaway motor. It just goes, you cannot stop it, because it's creating too much energy gap. It goes on C20, it goes on C48, which Man does not have any clue about it. Then, you still have Fundamental Plasma energy, which is the Hydrogen, we call it. (:44) Now, the 48 is so high. Now, this, why you get 48? Because the matter tries to combine itself through what we call, the structure of the Carbon into C14, double itself as a C12, which is created the matter state, four times structure, create a ?? primate, create what we call the Star Formation, which this energy converted, creates the planet, gives a star high speed, high energy, in comparison to its environment, in trying to reject or feedback as Magnetical to its environment.

If Man understand, one star scientist understand, how to control the initial magnetic field of the what we call Cosmic Rays, then Man will be able to transmute in seconds, then Man will be able to create power stations which are in the size of an atom. This is how the brain of the Man works. This computer which is a structure, the brain of the Man consumes megawatts of energy, but Man doesn't understand it because it is at the level of the magnetic field plasma. This is the purpose of that center, what we call the STM. Receiving the energy from the source and then in reference point, in comparison to what the environmental itself has created for it to absorb, feeding back as C14 of the brain structure of the Amino Acid of the body of the Man plus the whole of DNA structure of the Man. (:46) There is a big difference. If Man understands how to use the amino acid in the DNA structure, Man can change anything. It's not genetic modification, it's correction, it's adjusting, and this is how different races in the Universe are created. Magnetic field positioning, magnetic field understanding of the totality, which leads Man to a new knowledge, new understanding.

And this is the breakthrough in 2026 Keshe Foundation will bring out forth. We have already started submitting documents for the confirmation of this technology to government. Now, in... at the moment, the Americans have got no silver, they cannot run their cars, and Chinese have got something else. The evolution in the science and technology will come within next 12 months, maybe two years, that we'll introduce new systems, have no battery, they don't need. Now you can hold all the silver you like, because we use, we create energy through what we call, Cosmic Ray understanding work of the system. Our scientists are working on this patent. It's not something, and it's in the patent which was given. We bring the change. No government, no Man will be more powerful than the other, because every Man will have access to everything he needs at source. We trade, we build tools, we build houses and everything for the joy of living, not for it, for us to earn something to live.

The whole structure will change, once Man understands how he can tap into the Universal energies, which has been hidden from the Man, in a simple way. (:48) Once you understand the difference between the Source energy and difference between the isotopes, of the, what we call, feedback of the energy, that Eddy current. It's the Eddy current which dictates what voltage is taken from the battery, not for the equipment that you put in front of it.

The change of the evolution in 2026 will complete the promises of all the path of the beliefs of the past. We are the return of the Christ, we are the return of Messiah, in the knowledge of the Man, not in dimension of physicality. Where Man will get access to the Knowledge of the Creation and it's him, independent investigation brings him to that point, in how to use that energy. In coming months we'll touch the Soul and physicality of every living things on this planet. Not by talk, but by delivery of technology (T) that every Man understands. Every Man can comprehend that the source energy of the Creation comes from the Source Energy as one, but in how we interact with the feedback and what feedback we produce gives the current that that current creates a dimension in the structure of the knowledge, enlightenment of the Man in dimension of understanding the world of the Creation.

Once Man understands and taps to this energy, understand its working, then Man has no problem with transmutation, with transportation, with understanding how to transfer across the Universes and how every shape and body which will be manifested according to the Time and Place and Position will have the same Soul. (:50) This is how our Soul becomes a seed in the World of Creation because in essence it always keeps in touch, it's always connected to the source in the dimension of the Hydrogen, Fundamental Plasma energy and what it converts itself back in respect to this feedback as spectrum to isotopes of C14.

As I said the knowledge and teaching of today in the past few weeks is the knowledge for the future of the Man as the Messengers, we teach for Man to have as reference in what to look for, what to aim for and what has been said as guidelines for them to expand the knowledge of the Man in the Space. The cornerstone of the transmutation and transportation is what you create as emotion, which is again itself as a part of the isotopes of that C14 and gives you the speed of the dimension of the travel the span of the Universe and you call it transmutation.

Now for you as Knowledge Seekers, those of you who understand and work on this structure, have to understand how we will in the coming months and years deliver technologies that Man has never understood. We are not a religion and a cult. We are a scientific organization. We teach the science of the Creation from the Universe and not Man of what we call the magnets and the Chips and the 'chops.' Understand the science of the Hydrogen. Understand the work of the C14 on the energy plasma level and you have tapped into the knowledge of the Universe. (:52) It's you who has to decide what isotopes of energy and what condition that you can add to yourself as a knowledge of understanding. And if you understand what was explained about this on the STM, then you understand how you connect to your mother who died 20 years ago, and you connect to the child which is going to be born in a hundred years time. Because you understand the interaction of the dimensions.

Try to understand the teaching of today. I have given you the secret of Creation. But how to do it, is the matter for Man cannot do. As long as the President like Trump exists, Man cannot tap to this knowledge, as these Souls are evil in the dimension of Creation. They use it on the cover of damaging the Soul of the others. Those leaders who kill have stand the same position, shall not be given this knowledge, as they will use it to harm more. This is why we brought the Game of Peace. This is why you play the Game of the Peace, to understand the knowledge comes through the dimension of the creation for peace, and not to the Gun Policy and the Religion Policy of one to the other. I hope you understood the teaching of today and what breakthrough in knowledge in past two or three weeks I've been setting up for you to understand.

One day I'll explain the knowledge of the Source, how the Source gives that field that is fundamental in giving and not having none, stays at lowest but at lowest reaches all. I hope you understood the teaching of today and I hope those who listen to this in the centuries to come understand that the key, the path to the Creator and the Creation is

given. (:54) It's for Man to understand, comprehend and use it in a peaceful manner for existence of the Universe and not just the Man on this planet. We go for a break, come back, and I hope mankind will move forward with the new knowledge. Rick, can you take us for the break. (:55) ... video ..

>> **BREAK** >> 626 KSW January 22nd, 2026 ... (:57).

R: Okay, we are back again with the 626th Knowledge Seekers Workshop here, in the second part. And I expect Mr. Keshe will have a few things to say, before we begin. (:58) But I'll just mention to him, that I do have about 40 images, ready to be viewed here, when you are ready.

K- Can you show me, because I'm sure I want to see from the website.

R: ... Okay, these are from the Keshe Foundation store, and it has to do, it has to do with Valentine's Day and Easter and Mother's Day. So, the first image I have is a Happy Easter image. (We have another... I think I'll have to do this differently). So, I'm assuming these products are also embedded with... (..we cannot see them)

K- ... These are Cosmic Ray, what we call, materials, which we have launched as packages before, in different, what we call, occasions. (1:00) And now we are releasing these on a, what we call, continuous basis. These are all, what we call, resin product for different locations, which is coming up. They'll be priced in the next day or so, hopefully. And then you should be able to purchase it directly. We do not do the, what we call, the packages as we used to do, like a Christmas and a New Year packages. These are individual pieces, and if you go through all of them, and then you can see what it is. And it's per occasion, you can, what you call, order per piece. Then, as we did in the 500 and 200, 500, 1000 packages. This way every individual person can choose, they are made of different mixture of, what we call, Cosmic Ray and Gans's. And, it's a new, what we call, a structure, which goes with this one.

I'm sure in next day or so, or very soon, you will see a launch of a new pen, what we call the Pain Pen, on the same structure. It's not plastic anymore, you actually hold the whole direct contact with the material. The new, what we call, Cosmic Ray Pain Pens, are a solid state. What it means, in the present Pain Pens, you have a plastic container, which still filters energy between the body and what is to be taken out. Now you actually hold

directly the two energies, you create a closed circle. And, these are the new extensions of the energy systems which we have put out. (1:02) And, you will see it, it's been sent to you, but has not been, what we call, put out or priced out. But, it's part of the new product range, which the Keshe Foundation ?? lives there. You don't need necessarily to buy it for Easter, because it's a rabbit. These you can buy it as a decoration and put it in the house for transfer of energies. And, they all have confirmation. Because we had a lot of problem with people, transferring (sending packages through Customs) like Cosmic, what we call, Ray materials. But now, as a resin, it's inside, it's within. For example, in the past we had a problem with Pain Pen. In some countries, because of the liquid inside it, or whatever, could not be done. Now is a resin. Anybody around the world can buy the Pain Pens. And, or is, this is part of the structure of bringing in peace, bringing in, what we call, happiness into the house. Change of the energies. You just put it as per item. And this allows us to be able to transfer a lot of it. You have a child which is sick, we can, we are developing technologies to be able as a toy to bring that change. Children don't like to take medicine. It will be coming the same way.

In the coming months, as part of the Keshe Foundation reorganization, we will receive documentation and materials, worldwide license, for the first time for the viruses. Which means we'll handle through a structure how to overcome the viruses. In a way, it does not exist in the world of medicine. And this will become part of our structure of the work. And you will see massive amount of pictures and items, which will be continuously be added to. (1:04) And we try to keep it in a way workable for all of us, in so many ways of understanding how things work. You can use it for Valentines (Day). And you can make it for Easter. But at the end, at its final point, is how we enjoy connection, and then starting of the use of the energy field.

In the next couple of days, we already made this offer to some of the retailers. If retailers, if those who are in the retail side of the Keshe Foundation, have access to charities or whatever, that they can give the resins freely in the hand of the, what we call, people who need it. The Keshe Foundation has set up a structure to support that. And all the, what we call, our Gel packs (from the Store), as of this week you will see, will be reduced to 10 and 20 Euro per pack, depending on the size. And we have a large number of the pillows, which we want to through restructuring of the Keshe Foundation, changing the pillows to 29.99 for some, for the small ones, and to 40.49 for the larger one, that we can move a lot of things out of the way, that we can accommodate the new changes on the new product range, which is coming into the structure of Keshe Foundation.

So, in the next few days, look for what we call, the Keshe Foundation pages, and see what you want from it, and what suits you. And everything will be priced down to come in through. There is a lot of other, more products, (1:06) which is already been produced, and will be added to this range. And it's mainly to change, because we understood, a lot of people have problems, even in partnerships, that they want to change the environment of the house, but the partner is allergic to this and that. These are decorative items, they will do the same. You have a child which is disturbed, this does the same. Put it around the bedroom. We've done this in different ways, in different trials, where we just leave the bottle of Gans's, and people don't like to see this. This is a decorative, but does the

same thing. The size, the shapes, brings the dimension of the change, and then it's for you to see how things done.

In a what we call, a structure way, we introduce new materials, and as I said, we are looking for, what we call, resellers of the products of Keshe Foundation worldwide. It has to be a continuous, not just buying order for me to buy, and just for what I want. This is a new product range, our manufacturing side for distributing, and new product range will come, which part of it will be high advanced technologies. This is the new way we spread the knowledge and the technology, and in the mass production. You will understand soon.

As I said, we don't release much more about what the Keshe Foundation does, because of what we saw in the past. But the Foundation is working to become one of the largest structures in the scientific world. Step by step, very quietly, with its support from Knowledge Seekers who can support us, both financially, scientifically and the others. And we have said this time, not to talk, but to show, and this is part of the structure you see, (1:08) and you'll see more amazing things coming out of the Foundation in a very, very clever way. But, as we said, for example, the Gans's are now in the, what we call, energetic bottles can be bought from all the chemists (pharmacies) you can order through EU. In Austria and the rest, in the pharmacies you can ask for Keshe Foundation materials, as part of the 'Energetic Liquids,' as a, what we call, Wellness products. So, this is going to be the same. So, the ?? you can buy these, as an energetic unit from the resellers and the same forward.

Those of you who take part in the sessions of this month and next month, please make sure you have at least two headphones with you, we need that, and try to be ready for an experience, which we would like you to tell us how you went through the session. This is for information transfer, which means we give, we send the information in a different way, for your Soul, as I said in the teaching, to convert it in, to understand the position of the transmutation. And the whole structure of the sessions for next 3 months, is to define how exact we transfer this information to you, that your Soul or your energy uses it for transmutation.

A lot of people had a problem with this. Now, we have what we call, developed a technology on the back side of the what we understood and what we saw from the performance of the 3I. (1:10) And the world of science has forgotten about this thing, came and went. We're still analyzing data we received from the encounter. Because they looked at the physical, if they changed something. We look at how actually was doing, hiding on the... interacting with the Souls, with the energy fields of the body of the Man. And this is something very, very important for us to extend, to understand. And, implied and apply it in the new systems which is coming. Which allows for a faster transmission, even those who don't know how to transmute. It brings a dimension of transfer. So, these sessions are important for us. And then we'll see how fast you will do the transmutation, how fast you can merge into the transfer of energy, and how you use it, not necessarily for transmutation, for your self-awareness, how things change in you. You don't need to transmute ?? there and transmute energy to go somewhere. You can transfer that energy

to change something within you, emotionally, physically, and the rest of it. This is part of the expansion of what we said, we... the production of the, what we call, the systems. And this is part of what it needs to be understood in totality.

Gradually, we are moving into technologies which is not known, and will bring a lot of controversy with it. And we'll see how things can work in the total application. And these resins, Cosmic Ray material resins, as part of this structure.

Any questions? (1:12)

K- ... There's more of it will be added in next few days. And then the whole restructuring of the Keshe Foundation starts. We are restructuring after nearly 7 years. All the Gel products has to... is there at literally below what cost us manufacturing. We want to empty (the) shelves and move on. And the same with the pillows. The pillows, a lot of you, there was 120 out, will be reduced to a price that is affordable. You can give it as a gift to anyone and at the same time has the effect of to be. And it's part of our work to be done. And then we announce gradually as things comes up, the next steps of the work of the Keshe Foundation. And the most interesting thing is for us is the Sugar Bead and the what we call, the new Pain Pens which are now direct, directly as a what we call items. The Sugar Beads were tested heavily by, and it's getting manufactured by some organizations and now is part of the Keshe Foundation. You just wear it and you'll see the effect of it. It's like a bracelet and it's been well tested in China by people who have used it and produced it.

R: What do you mean Sugar Bead? What's the... what's...

K- We had Sugar Cups, is on the same basis. (1:14) We had the Pressure Cups and the Sugar Cups. It's the same thing but in a very direct way. If you bought a Sugar Cup, you take these, it'll create that dynamic system to help or to work with Wellness. It's part of the structure of the work of the Keshe Foundation which comes in.

It's like the UBESU Units now will come in a totally different way and proposition in the next few months. The development is on its way to complete it. We expect before the end of this year to change the world of what we call, Material Production in a way that you want to produce at the moment a cup, you go and buy a 3D cup maker and then you buy a resin and you make it. The new system which we are working on, it should be hopefully done in the near future, is that you produce the material you want in your system. You want to make a cup from copper, you produce the copper to produce that cup. It should be able to be done on a table type size, but the industrial size for the factories and production, this changes a lot of things. So, there's a lot of things gradually being feedback and we are in a position to be able to do this. The same is what we saw, the flight systems, energy systems. We have taken a new course and gradually you will see as the products will come into the market, but we will not produce 20-50 for Knowledge Seekers. There will be mass production for the nations. And you'll see it as it comes up. (1:16)

Any other questions?

...

Q: ... I was just having a question on the twin, like our solar system, you said we have a twin. Is there like a magnetic connection between the two?

K- Yes, it's a plasmatic, it's a Cosmic connection, yes.

Q: So distance doesn't matter how much?

K- Not really, because it's instantaneous. If you look at it, we have two arms, two legs, two ears and the rest. Partially, this is the reason, this is the Twinity, because the fields from the right hand and the left hand creates a continuous rotation of the fields. This is a vertical confinement of me. The hand of the Man, the arm of the Man and hanging on both sides is not just for you to reach. It has a plasmatic reason. It's the boundary. The energy sits not to lose and this is what it is. (1:18) It's the same with the legs. This is partially, but we have everything in twos. Partially is due to Carbon structure of our body. But, Twinity is not just with the Soul. The body of the Man carries it. That allows the working, the physical working. It goes right across the Creation. The stars, the body of the Man, the STM, and the same.

Everything has to be connected to something, that it can find its position. So, if you are here as a body, as an energy, it's not just you, it has to be a confirmation of connection, interaction. You interact with the field of this planet on the physical side. But the energy of the Soul connects to the Soul of the, what we call, central field of this planet, plus its own connection at the field strength of itself. We have dimensions, numbers if you call it, of what we call, Soul connections. And each one performs its own work. Energy level, you still connect with the Soul of the Earth, because it's the same essence Hydrogen connection, and interaction of it in respect to the energy of the Soul, which is created, creates your physicality.

And the more energy you put into this dimension of the outer layers of the STM, you dictate the height. Have you seen why the Chinese and Japanese are going through the roof, with their height? Because the energy level on the physical side has found a match which is a stronger. (1:20) You eat too many McDonald's. You create, you absorb a lot of fake, what we call, energy, which sits on the outer layer of the STM, on the dimension of his physicality strength, and so it's a bigger energy, further distance. It's logical, it's the way it's done, because it comes across the totality of the work of the STM, and the STP of the Man. And, what it needs to be understood is how we further understand the work of the interaction of the fields. And once we understand this we move on amazingly. And we will understand the proper interaction of the fields. We work too much on the physical condition.

And if you understand this, what is something nice for you to consider, which is beyond a lot of understanding of us, but... you have a behavior, I mean you as a human race, (1:22)

and your behavior affects your Soul, and the Soul affects your physicality, we call it, psychosomatic. But, one thing which Man has not understood yet, and maybe it's time for Man to start looking into it, is that, if the behavior of your physicality, or the people around you, affects your Soul, which reacts to cancer in the prostate and the rest of it, psychosomatic, what, and you understand this, that you have a twin Soul, somewhere. What does this change, changes that Soul that affects the physicality of that Soul (the Twin)? We are too concerned about our Twin Soul, we have a Twin Soul. But if you understood psychosomatic, understood the emotion of the fields of the body of the Man, affects the STM, affects the physicality of the Man. And you have a Twin Soul, you change the energy of the Soul and according to what we call, the phenomena of the, you twist (flip) one atom, the other one twist, you transfer this energy to other Soul. So you affect the structure of that Soul, which is your twin Soul, on the other side. Could be anywhere on the other Universe or on the side of the galaxy or on this planet. We are responsible, not just for our Soul, but if you keep on talking about the twin Soul and Twinity and the rest of it, you turn one the other one turns. You are responsible now for that body as much as yours. (1:24)

And this is what we cannot talk about because people only like to stick to half of the story. But the full story, since understanding the interaction of the Souls and you're so happy saying "Oh it's my twin Soul." What do you do in your Soul in respect to the effect on your physicality and STP does the same. We ate too much McDonald's, we increased the height, you put too much pressure on the Soul, keeps a distance between the Twin Souls. Increasing it, transferring the energy. How does this energy you're transferring, added to your Soul, has affected that Soul which has absorbed the energy. Now you understand. It's much, much deeper than what we think.

This is what I love, the message of Zoroaster. It's Do Good, Think Good and Act Good, because when you do that, not only you save your own Soul, but the Soul which you call Twinity which is connected to the Soul of the Creator and no Man needs to understand this. You're not anymore if you understand in deeper way my own. I am part of a structure which I don't see. What would I ... Do you like to hurt your child? Why do you do so? One day I'll open this Pandora box, but Man is not ready for it. Thank you very much. (1:26)

Q: ... I know a charity working with prisoners. Could they be working with the Foundation, using the products to... for research purposes...

K- What do you mean by that.

Q: They're working with young prisoners, that have to go back to society, and it's a charity, that works with these prisoners, apparently. And, could the Keshe Foundation work with a charity like that, using the products for a research purpose, perhaps, to see what the effect might be.

K- Yeah, we have probably done this before, with orphanages in Iran, during the Corona, and we've seen the changes in the children.

R: Yes, I remember that. So, how would that be? Could, does the Stefania facilitate that, or perhaps, put the charity in touch with the Keshe Foundation?

K- Yeah, put them in touch directly to Dr. Kern. That's the channel to go and then, the medical side, the doctors will decide how we do it. Because this has to go through scientific side.

Q: ... Good morning Mr. Keshe. You once talked about the brain as a mayonnaise made of Hydrogen. Can you give us a further comment on this? (1:28)

K- Every... I use Hydrogen as a Fundamental Plasma. And we talk about two different kind of Hydrogen. One Hydrogen which is the Twinity system, which is the Hydrogen we call it one .. and one ?? electron and one central point. And then we speak about the Hydrogen in the matter state which is called Deuterium. Somewhere between the two energy and matter it creates a foggy structure, still within the same structure of the plasma of the Hydrogen, which we call the brain of the Man. And then you come up with everything else, whatever you like to see. The reason the brain is white, or creamish color, whatever you call it. It's one reason only. These are highly active plasmas.

And the way you see the daylight, bright white, these are the interaction of the cells together continuously at high power, creating that gel and the color of white. Science have not understood this yet. Then you understand how this thing with what we call, interaction of the fields from the STM, which is a C14 reaction return, gives it this ?? creamish color. You can make it yourself, I've made it many times, I've tested this. We made it in Trani, (Italy) in a very, very simple way, in buckets. (1:30) This is understanding the process. But as what we call magicians of the science, we hide it under different names of Gans's. But in reality, it's working with Hydrogen. You can interact when you have a connection line. You cannot interact when you don't have an interaction line. And that interaction line in the world of plasma is magnetic fields, not electrons and all the terminologies we have in the world of chemistry for that.

Any other question?

Q: ... Good morning Mr. Keshe. Does Earth's gravity exert its force equally on all beings living on this planet or does it act according to the magnetic fields in Cosmic Ray fields that each Soul carries? Do beings who are more attached to matter suffer a greater attraction from gravity?

K- Gravity on its own is not working the body of the Man. You have a combination of field forces, which works on the body of the Man, and depending on its position and field strength. You have central gravitational field points, which is the Hydrogen center of the planet, which is a plasma, you call it the hollow center. Then, this interacts with the Inertia, which is the matter state of the condition, which is C14 dependent. Then you have the cell of the body of the Man, which is another satellite on its own, (1:32) in the vacuum of the skin of the body of the Man, which both of them work on this system. The

central magnetic field energy of the planet dictates the shape of the Man. The Inertia dictates the color, dictates the height, dictates everything else of the Man.

So physically we walk around, we are on here and here, we have a different shape according to the Inertia of in interaction with the gravitational field off and then come both combined interaction with the cell energy amino acid of the Man. Short height standing the different color skin. And then you bring them down into the valleys of the European side, different structure, different material on the ground. You get a white blue eyes and everything else. It's like scientists have proven that anyone, any creature of a human being with a blue eye comes or come from one being. We don't know if it's a man or was a man or a woman. But without a fail, you have a blue eye, all of you. You're Arab, you're Scandinavian, you are in Himalayas, you are in China or wherever you have a blue eye, you have one father or one creator. You are connected to one. And scientifically we know how. Because the combination of the environment, stress, and it was a very, has been, and there's a lot of research going on, especially the research in the past two years, three years, (1:34) brings a lot of light into this. That created one Soul to create a blue eyes for a condition he was in. And that suits certain environments and came through the bloodline. You have a blue eye. Scientists, scientifically it's proven now you all have one mother or father. We can't say which one it was. Not yet.

It's like the shape of the color of your hair and the color of your eye dictates certain behavior. Red hair, because of the combination of the fields which led to the creation of the red hair, gives certain psychological, emotional behavior. It's because of the content of the material, plasmatic field. We understand this more and more.

Try to spend time on research papers. I spent a lot of time looking into these researches, especially the latest one. They are becoming very, very interesting. Now a lot of things getting sorted, backed up, made it what we could not see with AI. And researchers are coming with amazing data, which was not looked at, but AI has opened our eyes to it. Or collected data, it connects somewhere and then when they go backtracking how it came to this point, they see new light.

So it's a combination of the interaction of your Soul, STP, Inertia, and what I call the Soul of the planet, and then on top of it, the fields which comes from the Solar System. Solar System has a direct effect on how we look, we talk, we are the magnetic field of it. (1:36) And then you have again traces of the galaxy. In this galaxy this is the behavior. Most probably we find other creatures like us with two legs and two arms, because it's the characteristics of this galaxy. The galaxy, there's been looking for life, you don't see anybody walking, but they're crawling in six legs. You know, this is how it does, and that's how when your Soul goes there, that's how you're going to look.

So, when you talk about these things, as Knowledge Seekers, start opening your horizon, look at the bigger picture, not narrow-minded to what you've been told, and what you think it is. We need to do that, we need to open our eyes, and then when you do this, then you can tap into Universal knowledge. If you learn how to connect and be impartial in knowledge, and then you receive the knowledge of the Creation.

Any other question?

Q: ... It seems that government leaders are now changing their minds and actions almost daily. Would Mr. Keshe like to comment on this sudden change in world politics?

K- We have a beautiful set, I think it's in on many languages, we have it in different way of... They say, "It takes one crazy guy to throw a stone in a water well." And it takes 40 intelligent men trying to find a way to get the stone out, to be able to use the water. And that one at the moment, he's become the President of United States. He's throwing everything everywhere, trying to leave a legacy of name for himself, (1:38) and with it, a lot of people had to do rethinking. And, in a way it's good, in a way this one, what we call, dynamic, has changed the norm of everybody following like a sheep.

In a way we see it, it's part of the promised, what is to come. It's not just him, he's just a tool. And, as I said in the New Year, what we call, what we disclosed, you'll see a lot of changes. A lot of people come to understand the method of leadership. I think the most idle way we look at Norway, we look at Finland, especially Finland. If you look at the structure of the way this country is run, as one of the richest nations on this planet, per capital run by a hundred thousand Euro per head, is because the way is run by the way the investment is done for the nation. Arabs put everything in their pockets, it's theirs, for leadership, then the, what you call it, the rulers, and, and trickle down to nothing to the people on the land. Where, when you look at especially Norway, the way it's done, that anything capital found or developed with the oils in Norway the same, mostly goes into investment for the nation and the interest from the income, is spent on the nation, not the capital. And this has shown to be one of the best ways, then you have equality, you have a rich structure in the families, and then the nation stays solid. (1:40) And we need to bring this back, taking things off the singularity of one Man, taking what we like by itself. Why should a world leader holds 14, 20, 30 trillions, not billions, in accounts of them, themselves, their daughters and their sons?

I don't know if you, many of you remember going back to the Yeltsin time, when they tried, not the nation, to go back to communism because the miners were going on a strike and they were short of the money, and the Americans decided, the Senate, that they send some money, a few billions to Russia that the Yeltsin will pay to the workers. We talked about this years ago, if you remember. And money arrived nine o'clock in Moscow Central Bank, and 9.30 was in Switzerland in the name of the daughter of Yeltsin. Miners got nothing. And then the Americans had to come up with another phase of different way to get it done, that the communism doesn't come back. And we've seen the same thing.

These American leaders has to... the leadership, the structure of American politics in the world through SWIFT and the banking and dollar has to be changed and part of it is correct the way it's done by the Chinese and the Russians. And if what we see today as the Iranian revolution or what is happening in Iran, does anybody know the truth behind it, how it happened? And why the "Peanut Man" (Carter) brought this on the whole humanity and the structure we changed the whole view of the Man about one of the

oldest nations in the world. And now they're going to back to it again. Mr. Peanut Man decided, Mr. we know who he is, (1:42) decided that to stop the expansion of the communism, to come down south toward the Arab nation, was to create the Islamic belt. And they brought Ayatollah Khomeini in. We saw radicals in Turkey, we saw in Afghanistan and the rest of it. And a nation went and still going through, because one 'Peanut Man' decided we create a religious belt. And now that religious belt does not work. Russians shattered Afghanistan, we saw what's happening to Iran, we got problems in Turkey hidden to come up. And now, if they can't get this, what you call it, 'donkey back on his leg.'

This single power from one Man, calling himself the 'Superpower', which now the China is changing, is one of the best things which has happened. And, this is part of the world politics. And we see what's the next, what's going to happen in the next 7 days, 10 days in Middle East. And what will be the ratification of it? Would the State of Israel exist by end of this affair in the next few days or weeks on the rest? And would the Islamic revolution will continue, or somebody else will come and the nation is rich and they rob it for themselves? Doesn't matter who it is in power.

The only solution to bring balance is Keshe Coin (KC) and we are working on it. You will understand soon. We have, hopefully, completed in next few weeks. We bring in from 21st of March a position, full transparency, across the currencies around the world. And you will understand how it works. (1:44) Through Keshe Coins, as a committed to, it's like a club, you become part of the, what I call, Keshe Games, and then with it you earn a living. But that living, it brings that your dollar does not go on which war, your dollar goes on, how I want to spend it, and brings peace. It needs to be done.

Unification of technology, which means what we have, as we see, we do in China, we share with America in the stock market, We do through our, what you call, company in Austria, and we spread it, and it's been part of the work of the Keshe Foundation. Unified technology, unified currency, unified understanding of the need of the Man, will bring these things to an end. And you are part of it. You are helping us to finance it, or you are helping us to set it up.

The biggest change will come when a boy in Africa gets two Coins a month, maximum he can earn, about 2,000 Euros, the same as the boy in New York, and the same as the guy in China. And they know from the beginning, they have to pay part of that for taxes, part of it for what it brings them. And then, I don't need to travel from Africa as a doctor, to move to America that I might earn 2,000 a month, by cleaning toilets and the rest. I stay as a doctor in my nation. Because, I still earn my money, what I do is on the top. The game which we brought in and the process is coming up, we'll understand, the greed of the Man we used to bring the peaceful Man. (1:46) Just watch, let the 'teething' problem finishes, a lot of you are helping us in the background. And I was talking to a Man behind us, he's pulling his hair out, he doesn't have enough time to get it all done, but we're trying to sort it out, then you will understand.

You cannot change the culture of thousands of years of men abusing each other with a coin, the color of the metal. We have to give enough that everybody has enough. And the beauty of it is, we are not changing currency in central banks. African guy once asked, "I have two coins, would you like something else, but I can give you this. I give you a part of my coin." The need, gift becomes a part of the entity to create a new cycle of life. Is 9 billion people on this planet, and we give two Coins a month, 24 times 9, 200 Coin, 200 million Coins a year. We got plenty more to come. And then, we on the back of everybody having exactly the same thing, I don't need to change it. But, my two Coins in Africa buys me luxury, education, everything else, and the guy in America still pays two Coins and gets one tablet. Then you understand how things will change.

We need these leaders to bring Man to the position of change. Estimated 42,000 people lost their lives in the past week, in one event. Why? And then other idiots are going to bomb them to free them, killing another 100,000, 200,000. Since when killing has brought more freedom? (1:48) Ask Mr. Trump. Trump go and bomb his own house in Florida and see if he likes it. Whose children is he going to kill? The root of living on this planet has to change and we are on that course. Then you understand what ?? leaders we need, and where are we going. If we force it, it's from outside. If we bring it and you do it yourself, that's your job. And we are relying on the greed of the Man. The greed of the Man makes Man peaceful, so it's a good greed.

Any other question?

Q: ... Hello Mr. Keshe, would it be beneficial to add the new resin products to the bath water? Could one harmonize the body more intensively?

K- If you don't use chemicals, suppose that it doesn't damage the structure, why not? Resins are now used as table, floors and everything else, depends on what corrosive material you use on it. Test one and the chemicals you use for hair shampoo or bath soap, and make sure your bath is not made of metal.

Q: ... As we affect our Twin Soul, then our twin can also affect us?

K- Yes, of course. (1:50) But we don't know where that Soul is and how it does. Connection does not mean Twinity. Twinity is locked into. Just because you have one friend, you don't need other friends. I was walking in a mall, very recently, past few weeks, and homosexuality or showing love to another Man in this country is forbidden. Strictly controlled. There were two boys walking in front of me. And I was with somebody else, and I said just watch. One of the boys was carrying a handbag of a little girl's, which means I'm the female part. And the other guy was carrying a Man handbag, as you call it. But, they were so hidden and softly touching each other at the tip of fingers. And every time they did, you could see their fears, they were looking around. And, is that a Twin Soul? Is that what we think, or when we see the lovers kissing and cuddling in public? Which one is closer? Which one had to value, assess the risk? And, it's the same with our Twin Souls. What do they value? (1:52) What effect they have on

us? What they do on the other side? But do we know who they are? If we allow it, we build it. If we don't allow it, cannot be built.

Any other question?

Q: ... Does the Twin Soul have a relative physical location to our body as we go along or is it called in when in real need?

K- Really you don't need to call it. ?? The essence of the fields doesn't need confirmation of physicality.

You hear helicopters in the background, I hope you can hear. These helicopters have been running all past days and this is a sign of war coming up. And I saw the same thing when we used to live in Italy when they were planning to invade Libya. These in the past they used to do the 'drum of war,' nowadays they move helicopters and planes for wars, and this is horrendous what we see is about to come. (1:54) Let's see if ?? they can lift the stone in the well.

Any other question?

Q: ... The greed is the muscle that's been overworked, we have to use in order to help balancing. When we had 7 billion you said we needed about 500,000 MaGrav reactors for peace. What's best now for peace?

K- It's the same, it doesn't stop. It's the combination. The ONN Units, the MaGravs Units. We will introduce a new system for MaGravs very, very soon. Very, very soon. And you need to work on combination. Life is not one, it's just. I was explaining this recently to a child. You can't just eat apple, body needs combination of foods, minerals and everything else to be able to sustain life. We need combination. MaGravs, Communication System, the money structure, the political structure on the, what you call, the international level. All has to be considered.

I've seen very recently, my name again, for the second time, being put forward as a minister of a cabinet. (1:56) I said, I don't know the nation, how could I be a minister? Because my name has influence in the nation. Why? Why should we, as scientists, get involved in something which benefits no one? When the time comes when one decision applies to all humanity equal, then that's governing. As long as you have bits of land passing orders and things for themselves, for them to be, Man will have this problem of the power, this problem of division, and this problem of everything else. And it has suited a lot to feed it this way. Suited those who with the greed of money. And then again greed has a frequency. Greed has a magnetic field strength and ?? Cosmic field strength. And we know it. And soon will be handled. It has to be done in all three levels, otherwise it'll break up.

Any other question?

Q: ... Is the prerequisite for transformation, that we are consciously connected to our twin flame, (1:58) provided that the Soul of the physical body is connected to the Soul?

K- You are independent as much as the other Soul. What you whisper does not mean the other one acts the same. But it's got its arsenal. If it needs to, what it can do, if it has to. Simple as that. We don't need to go and look for it. It's a connection ?? which delivers to.

Any other question?

Q: ... In the 624th Knowledge Seekers Workshop (KSW), you said that the placenta is the father's energy. What leads you to this statement, please?

K- It's scientifically proven.

R: Scientifically proven, is that what you said?

K- Yes it's scientific .. Look at the research in the past three years. A lot of research has been done. And secondly, it makes sense, it's correct. What we said.

And then, as I said, when we do some work, we're going to find the scientific relevance to it, that is correct. And I, when I put this out, originally years ago, especially when we started speaking about the Children of Mitra, it doesn't need that dimension of. (2:00) A lot of things I pass on or explain to you in a simple way, takes a lot of research behind. It's not just a talk. You got to realize in these teachings, when we teach, you're doctors, agriculturists, physicists and everything else. And the data and the information put out for every single one of you, it has to be 100% correct. Even you don't understand it now, later on it'll be proven to be correct.

R: Well it seemed like a very strange idea to me, so I put it just into Google, "The placenta is the father's energy", that's the phrase I put in. And sure enough, I'll show you here what came up is as you say, it says the... The claim that the placenta is the father's energy, is a metaphorical way of describing the significant role, paternal genes play in building and directing this organ. As highlighted by scientific research from Cornell University and other institutions. While the placenta develops within the mother, it is largely constructed using the father's genetic blueprints. Wow, that's, that's, that's a totally new idea to me.

K- Not an idea, it's the truth, it's the fact of it, isn't it? That's why it gets rejected, it gets rejected. The womb of the mother uses it as a, as a... "I accommodate you, I tolerate you, till the child is born, and after that, get out." That's the... Well, now we see more and more of it. (2:02)

This is what I was saying, when we put something out in the past, or in the future, there's a lot of research behind it. .. And it's the same as I explained before. When I came from England to Belgium, and I met with the son of the king of Belgium, then they brought 'Red Circle.' We had two tables of 10 people sitting in each room, and other round tables,

and they were piled up, some of them a half a meter high with research papers on everything which I claimed. We carried suitcases of documents confirming scientific research which confirms what I say is correct. And then they agreed to do the patent, or to write the patent. And as I told you a few weeks ago when we went to the divorce the same lady said this Man copies other things just .. because everybody else, they don't understand. When you make a statement it has to be backed by research. Of course the lady being ignorant with no education, not even their first class, made such a great answer to the Judge. And the Judge and the lawyers laughed.

And it's the same here. When we make a statement, it has to be, you are a lot of you are doctors and scientists and you search, now you go on AI like what Rick just did. And it has to be, it has to be understood that we are part of this structure (?? of the scientific world), and we put, and because we release the knowledge, mass production, delivery of technology, we'll bring the change. Doesn't matter who copies us. (2:04) Don't forget, at the end of it, with the Keshe Coins, we'll control the economy to bring a balance. So we're not worried who copies what we put out. It's just to bring a new knowledge. Step by step.

I carry a mandate, and I carry that mandate. No king, no scientist can stop the process we started because it's the freedom of the Man access to the Knowledge of the Creation and it's not a religion. Since when? As I wrote to the Knowledge Seekers in the past few days. You join a political group, nobody objects. If you join a scientific group nobody objects. But if join the Keshe Foundation, then it becomes a cult because it opens your eyes to reality and they cannot fool you, rob you, abuse you. Anything, anyone objects to you that you are with the Keshe Foundation, you just explain to them how come you are a conservative, liberal, in this and that group, and they can abuse you and you need to put your energy. When I put my energy to bringing balance to humanity and knowledge, there's something wrong with me. This means you are threatened with your ignorance. Thank you very much for being here...

R: Mr. Keshe, we have a hand up with Claudia, could we have her question, her comment first please?

K- Yeah.

Q: ... Hello, yesterday we were discussing about the last teaching and came to my mind, I think you said today that when we expand our Soul don't have limitation, (2:06) go, and for all of our Universe. But, when you say like, "When I want to transmute, and I expand my Soul." So, it's not a travel, I am already there. That's correct?

K- In a way. It's your decision.

Q: So leave, take my physical body, it's only a desire, because my Soul is already there.

K- In a way, yes. In a way you, you, I've explained this before, and many, many humans have done it, it's not exclusivity, that you can be physically in two points and people say

you are here at the same time. Because... In a way expand your Souls, and the confirmation of time of the STP confirms in the presence. Very simple. You don't split it, you expand it. It's a big difference.

Q: And when we do like a meditation, how can I know that I am expanding my Soul in my physical body?

K- It's .. very difficult for someone from outside, but again scientifically have shown people who meditate, we see the change of aura, which is the interaction of their fields with their environment. But again you have to understand these aura systems we have are limited into a spectrum. And when we can see a bigger spectrum we'll see the connections. (2:08) It's a balloon which again depends how much we open to send than to receive, because we always all of us receive the same fields, it's no difference. What we interact, or what we allow, what structure of our physicality, ?? STP allows, dictates the dimension of that aura, that field interaction, the expansion. And you can expand beyond Universes if you know how to do it. It's the way the Creator does. So it's not impossibility, it's understanding the processes.

You have to look at physiology of the Man. Then you understand the control systems which is put for you not to run away with it. Body has developed glands to control the Soul. More or less 80% of the glands in the body of the Man is not for physicality, it's for controlling the Soul, not to take physicality beyond its limits of what the STP wants to put. Look at the Thyroid gland. For example, why is it where it is butterfly at your neck? Just opposite, sitting on top of the neural system which comes to the front of the body of the Man which controls all the emotions. Your spinal cord controls the physical motion. The frontal nervous system controls your emotion. Heartbeat, texture, .. everything else. (2:10) And this is what goes through the neural system because you got this. You sever the spinal cord, you cannot walk, but your muscles are get still fed through the frontal system. You still have the muscle tissues, your legs doesn't fall out, doesn't get gangrene. And this is what is part of the system.

Man has to always look at the two systems running parallel. And Man always looks at one and that's it. And if you are clever enough, you understand the work of the Universe, you can use the second system, as using the first system. It's us who decides that restriction of the aura and how we do it. The position of Thyroid gland is separation of the fields of the Soul from the physicality, so ?? it sits. We see this butterfly again on the ?? Lupus people on their face. Again, another part of control. Left and right side. That's why it's like a butterfly sitting at your throat. Thank you very much.

Call it a day. Hopefully we see each other next week. If we still here and we still can broadcast, and if the fields of the Universe are still. And we'll see how the world changes in the coming days and weeks. It's all getting prepared for world peace. (2:12) I .. even the conflict of religions has become, in a way, complete by another part of religion. One day I explain to you even what's happening today in the coming time. Thank you very much, see you next week.

R: All right, excellent. Thank you Mr. Keshe.

K- Thank you. By the way, don't forget to register for as many people as in this play for the peace. Because we need to find out more and more problems and can be solved before it goes out on 21st of March. Thank you very much.

R: ... (2:14) I probably have an announcement from Universal Council to present here, so let me have a look at that, before we wrap up here... It says, "We the Universal Council invite the Keshe and Universal Family present at the Earth to unifying at the Soul level every time, every day, at 9 PM Central European Time, to give from our field strengths to enlighten the Souls of World Leaders to negotiate and sign the World Peace Treaty, (2:16) pledging their nations to everlasting peace on Earth and throughout the Universe."
