

631st Knowledge Seekers Workshop February 26, 2026

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

ENGLISH TRANSCRIPTION

(:19)

K- Thank you very much. Good morning, good day to you as usual wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute. As usual, we always welcome you back.

And we start, what we call, another session of seeking knowledge, understanding the process of the Creation, but not the way it's been set us to do, to what I call, benefit some. But, it's to benefit us, for us to understand the process. That we choose the path, we choose the way we want to live, and we are, what we call, prepared to understand about, not the atmosphere and the environment we live in the dimension (D) of the physical life, but atmosphere and dimension that we live in the dimension of Energy, what we call the Soul of the Man (STM). (:20) All of us have this access, all of us can reach this position. As we heard in the Intro, which was done some teachings two years ago or plus, up and down, it talks about the same. The day will come that we can produce systems that we can reach the understanding and development, as Man likes to make machines, to the lines, creation of the lines of the strength of the Creator, that we can establish a system that we can understand the knowledge of Creation.

All of you here, who are present here, you'll find out, through your own structure, your own thoughts, if you're carrying your headsets with you, or whatever, you're listening it openly. Today, we have reached that level. Some times ago we reached that level. We understand how to create the line of connection to the world of the knowledge of the Creation. Man goes through schools and colleges and universities to understand the matter state's life, and gets specialized in one tiny things, and become arrogant about it, and become professors and specialists, and the rest doesn't exist, because I understood the peanuts in the haystack of the knowledge of the matter state. Where, with the knowledge connecting to the dimension of the Creation, or the line of connection to the Creator, now that we have the knowledge how it works, developed technologies for it to do, you today in this teaching, are subject to all of it. We are hammering you beyond your imagination with connection, dimension of the connection, to the knowledge of the Universe.

Many of you, in past couple of months, in every session, one way or another, we have developed, we have set strength, (:22) and we set up conditions for you to create that line for yourself. You don't need us, but in a way, it's like a pipe, clogged up with a lot of dirt, and it needs a bit of cleaning. And that dirt is what we call prejudices about what we know, that we are unique and the rest of it. And, we're cleaning it up in a way, that behind your back, a system is there, a detergent, a cleaning agent, which allows you, knowingly or unknowingly, open that access to the line of what we call, your Creator. You don't

need anything else, you don't need us, But we had to develop this system, that you can do.

In the session tomorrow, which some of you attend, we will hammer you further. In a way, we try to fine-tune it, that you receive everything, and it's your choice what knowledge you want to do. Up till now, you went to see your uncle, your cousin, you traveled to the Moon, Now, you have access with the new structure to get access to the knowledge of the Universe. We are the facilitators, we are the Teachers. As a message I sent to Ayatollah Khamenei of Iran in past few days, "We are teachers, we are Universal Teachers, not Prophets." It's for you to decide which way you take your nation, that the people understand the knowledge, or you still keep them in the darkness of the faith, religion, and all the abuse of it.

In a way, through systems we set up, and all of you who are here are getting hammered by it. The people who sit on the panelist see the lines in the background open. And it's how open you are to that knowledge, you get access to it. We have opened the path. (:24) In a way we allow you to convert that knowledge to the knowledge of your understanding. We are streamlining the line, we are opening, we have opened today in this session, the lines that allows you to connect to the knowledge of Universe. In a way, you're sitting in a teaching, not only listening to me, but we have facilitated for you to have access to the knowledge. You have to choose which knowledge. You have to create that emotion of that knowledge, and you get access to it. In a way, you are today, for the first time, sitting in a class of the Universal knowledge. We have facilitated, we have opened the channels. And, we have opened the channels in a way that in conversion of the information in your brain, you understand it in the matter state. You analyze it, you understand it.

In a way, we are bringing the knowledge of the Creation to your brain to your Soul, and then your Soul in sending the information, connecting back, translates it to the knowledge of the Universe. You wanted to see the Christ, you came to the sessions, and it was in the beginning of the Intro, you wanted to see your grandma. Now, for the first time, you have access to the knowledge of Creation. Our systems running in the background to create that, facilitate that for you as Knowledge Seekers (KS). It's taken us years of research, development to be able to do this. We had to understand, we had to see, we had to understand the connection between the Soul and Soul of the Physicality (STP) and bring it together, and then understand the position of the emotion. That, how we can filter these things out. And, we have gone today to that level.

In a way, you hear my voice, but your Soul is connected to Universal knowledge. (:26) And what you receive, and what you give back as a connection line, in a way, as a magnetical (M) field of it, will leave an impression of the knowledge you are looking for. I want to know about how this point works in Space. You have the facility we have provided at this moment, at this time, in this teaching, that line. See how you get enlightened, what comes to your head? What do you envisage? How come I suddenly think of this and I get this answer? Because now you can, you can tune into any

knowledge in the dimension of the Creation outside the boundary of the knowledge of the human race. Hasn't been easy.

Tomorrow's session will be much, much harder to do this. We go for a deep understanding of this process that you, as Knowledge Seekers understand how to connect. As I said in the Intro, we are, we want, once we make the system to do it, then it takes us few weeks and months. It's taken us months, now we developed the technology. In the coming months and years we fine-tune the system. That you can slowly decide, I want to know about the knowledge of Universe, in field of interaction that it creates what you call, such a satellite, such a star. What's the knowledge of the Universe about Creation? But, once you access it, you have to understand it's not yours. Once you bring it together, it's not yours, belongs to the rest of those who have the same connection of the Soul. (:28) In a way, you become, as you call nowadays, the AI. You can ask the question, but this AI sits in the dimension of the knowledge of the Universe, not some random made knowledge on the planet Earth, for whatever you can think of.

Building this system needs to be spread, needs to become accessible, that it's not exclusivity. And, hopefully, through this knowledge, what we gain as, in past few months and years, will be implanted on the ONN's. Which means, once you receive your ONN's, and you receive the aerial (antenna) attached to it, you can, in a way, connect to the Universal knowledge according to you. Don't jump, "I want to see this, I want to see that, the system doesn't work." You have to be enlightened, you have to be able to connect to that frequency, you have to understand the knowledge of Creation, that in responding back. In a way, you go into the classroom, teacher teaches everything, the knowledge comes to you. But you're thinking about this, that, and the teacher ask you a question, "What did you understand?" "Oh sorry, I wasn't here." It's the same system, or you say, "I understood and this is what it is." You give a feedback and that feedback becomes your knowledge. Now we do the same thing with your Soul. We give you access to the knowledge of the Universe.

Today, all of you in this platform, have that access. Our Units are set that way. We are sending you dimension of the field strength of the Creator, and what your brain, your Soul, receives from this, converts it, as we explained how Carbon 14 (C14) is made, (:30) as an information sending back to the Creator to complete the circle, the impression of the knowledge will stay the way you dream, and then you see your father, your mother, blah, blah, you never been, because the information going back leaves the impression of physicality (P), dimension (D) in your brain, then you change it to a picture of the mother, or whatever. Now, you transfer that to the picture to the knowledge of the Creation.

So, it's not to us anymore. We are not charging you, we not put a meter on your brain, say, "They have to pay us because we have given you this, this, that much or whatever." And then, once we get to this point, that all of you, majority of you, manages to understand this connection of the development of the knowledge, moving from human physical matter state to the knowledge of the Creation. Then the question is, "Do you still need crooks, Ayatollah, priest, rabbis and the rest?" They abuse you because they

themselves don't know. They themselves are bunch of fraudsters, sitting, rubbing their hands, collecting physical matter, where to the knowledge of Universe is in your access. We have the knowledge, we have shared the knowledge for over 11, 12 years as Rick said, But now, today, in this session today, we have given you that access. Those of you who are present here today, have into it. We are monitoring how your Soul separates between the dimension of physicality and the dimension of the STP of the Man, and the STM. In how you are responding to yourselves, and nobody else. (:32) There is no judges in understanding the knowledge of the Creation. It's the interpretation of the Man, that how that knowledge came to me, and what I have to do it to create peace, to create balance of the knowledge of the rest of humanity.

In a way, you're that spot. It's not yours, once you receive it, you become the satellite of the knowledge. And then, you connect through the Soul of the Creator (STC), in dimension of energy, to the rest. You understood how to make Hydrogen (H) from the fields of the Creator in the dimension of the matter state of it, becomes the knowledge of the rest. Now you understand why patents have no value. How are you going to patent, the knowledge comes to you, and you are just a satellite transferring it to the others. It's taken years of development, and it still needs years more of the development, because we have to split this into different dimensions. Because each knowledge has its own frequency, has its own dimension of the field strength, has its own magnetic, what we call, fingerprint, that you need to understand to go into.

This sign says, "I'm hungry." This sign says, "I'm hungry, but I want sugar." This sign says, "I'm hungry, I want sugar, but I want to get it from Coca-Cola." The sign says, "I'm hungry, I need sugar, but I can get it from chocolate." And then, you classify which chocolate, how much of it, in which package, in what name, which flavors, that your body has planned and it can absorb it. Now you're getting to that knowledge of the Creation. What knowledge? Which part of it? How much of it? And what I can understand? And because you are a plasma field force, every plasma is connected to the others. You have a common denominator of the Creator and the humanity, and I'm in the seed of this planet. (:34) So, your knowledge is not yours, how can you patent it? Because, by the time you patent it, because it's come to you free, it's already shared, connected to the others, and the others can tap into it.

Now you understand how we do not believe in patenting, because Man can patent for the physical matter, but now you're achieving, you are learning to tap into the knowledge of the Universe (U). And there are no patent office, there are no certification, and there are no one to control you, in what you hear, what you enlighten with, and what you use, and what you share. There is one punishment, and the punishment of it is, once you understand, once you are enlightened, withholding has its own punishment of not receiving. This is why in my teachings and all the teachings, we teach freely, because the second I stop teaching you, the second what comes to me is held back, for whatever reason, I lose that access, because I block the knowledge to be received. This is why all our teachings are so open, because we are the Messengers, and our message is the knowledge of the Creation from the Creator, not from us. And when I put that lock on it, I put the lock on me receiving the knowledge of the Creation.

So, now that you are sitting here, all of you, some of you will listen to it in a later time, still that's still the same, because stays within the structure, your knowledge has to be free. And no knowledge can be held back, "Oh, I found that, I have to patent it." (:36) The only thing is, you lock yourself from receiving. And a fool shoots itself in the foot, and runs a marathon to win. In a way, when you do that, it's like killing. You stop the knowledge, you kill your own line of connection to the Universal knowledge. Now you understand the principle behind the teaching. Now you understand why we teach so openly. Now you understand why the knowledge, the enlightenment is for everyone, and not exclusivity of, "I keep it only for military, I keep it for only Iranians, I keep it only for my nation, I only keep it for humans and the rest of it." Because, don't forget, the other creatures of the Universe that have access to that common denominator line to the Creator. It's not exclusivity of you, are another processor.

There is a difference that you have to understand very clearly. That the Carbon 14 is a reflection of the light of the Creator in energy dimension. And when it slows down, becomes Carbon 12, which is you humans sitting in the dimension of amino acid (AA) of the connection. So now you understand how, as a humanity, you can change the dimension through the fields of the emotion, through the fields of connection to the Creator. You sit and you wish something, or you do something with the what we call, the purity of heart, you do it because it's in with you, and then you see something else happens which pleases you. You have created the emotion of connection, you have connected your STP to your Soul, and that Soul is connected to everything else, and their feedback is, (:38) what you wished in the dimension of physicality. How many of you have wished something and it came true? Now you understand you have access to tap into the Universal, what we call, knowledge. And then, when I need, everybody feeds. Because I don't go and steal.

As I explained in my message to the Ayatollah Khamenei of Iran in past few days. Wealth and knowledge has to be head on. It has to be like the milk of the mother. Mother doesn't charge and doesn't put a meter on her breast to feed you. She gives it from essence of its own creation. Doesn't kill for it. And knowledge and the wealth and the growth of the Man, should be the same, tapped into the free knowledge, free energies of the Universe. Which free means not killing, not destroying something to access it. Free is not the "free energy," zero energy and the rest of it which we saw, people who set it up, were a bunch of pedophiles, and we see the rest of it today. Free means, I give free, not that be given free to me, because somebody else has it. When you are an infant the milk from breast of the mother doesn't have conditions. It's given freely, you don't kill the mother for it, but it's given to you as a process of the creation.

The only problem we have is that we forget from the time we live, that breast of the mother, which is the source of life, to the breast of the knowledge, (:40) which is a source of eternal life, to bring together, that we don't kill another for us to live. We don't kill the cow to get the milk, it's given to us freely. That milk is the same as the knowledge of Creation, this is the milk of knowledge, is the milk of the connection to the Universal energy, which we have access to and we denied it. And because we denied it we kill in

the physical dimension to get access to, to survive for another 50 years, 60 years. And we make every trick to be getting one more breath to live. Where, if we find out, if we find a process of connection to the fields of the Creator, which feeds our Soul, which feeds us, then we don't need to kill, and we live for eternity.

And this is the whole purpose of the teaching of today, for you to understand. Exactly for the first time, we have brought you to the University of the knowledge of the Creation, and in the background system, are running flat, providing that. It's you who has to open up to it. You have to connect to the system, that then through it, to the knowledge of the Creation and the Creator, you receive and convert that energy to the matter state of the energy of it, which you call it through Carbon 14, to the knowledge, to the energy of the body of the Man. Then you don't need to kill, you don't need to patent, you don't need to look for the knowledge of the Universe, because as you think about it, it will reveal itself to you. But it's not yours. (:42)

In a way, your mother when gives you the milk from her breasts, you are one of the users. If you have twins, the other one has access to the same source. There is no exclusivity. If there is a child which has no mother or had ?? sex with no mother, does your mother tell the child, "You can't have because this is mine and my child?" She frees you because the love of the mother is free. The same is the love of the Creator. You've never been charged from the moment you were born, no charge from the second you were embedded in your womb of the mother, till you decided, as a maturity of the Soul and physicality, that, "I decide what to eat." And then, responsibility of the mother is, to nourish you unconditionally. It does not matter if you are my child, or another child from the mother alive, or I find you on the street. It is not conditioned to nothing but the love of the mother. And the love of the mother is the same as the love of the Creator. He does not charge us for it. He never charged us for it. It's us who created that condition, that we create separate position for ourselves, to give ourselves separation of the connection between the emotion of the physicality, the emotion of the STM, and the emotion of the STC.

Today, we have made every possible effort for you as Knowledge Seekers to be able to access, what we call, the knowledge of the Universe. Tap into it, you have another hour or two. (:44) See how you feel, see how doesn't that knowledge enlightens you, in whatever subject. Maybe there is a reason you have come to this knowledge today, or tomorrow, or in the next few days, because once you set up the chain, the chain will lock itself into it. As I said, we have the knowledge and freely we are inviting you to tap into the energy of the Universe, and tap into the knowledge of the Universe and see what's your enlightenment. But understand, once you understand it, it's not yours. It belongs to everyone, and has to be the source of, what I call, enlightenment of the others, for the others to live the life of the Creation. At the same strength of the Creator. I made Man in the image of Myself, as I am ?? a giver, I am generous, unconditional lover. That's once you are, achieve that point of what we call enlightenment, you become the same. Till we enlighten the others, until through the enlightenment we facilitate the humanity and the other races of the Creator to become free, detached from the matter state of destroying

and killing, that we all suckle from the breath of the knowledge of the Universe and the Creation, for our knowledge and existence, and Man shall not kill. (:46)

Understand the teaching of today, because this touches your morality. This touches you in respect to yourself. This puts you in line with understanding of yourself, and how you are, and what I wished, and what I had, and what I wanted. Now I have access to what am I going to do with it, and how I'm going to share with it, and how I'm going to distribute this knowledge through my emotion, and not through my writing, pen and the mouth. This is a very, very tricky point for many of you, because, try to understand what has come to you as knowledge, in past few minutes, in past half an hour, in next day, two days, two years, because you established the system with us. And understand how this knowledge, is what I was looking for, and how I can utilize this knowledge, and give it freely for the others to use, as by the law of the Creation, I'll be looked after too.

This is the total understanding of the process of the Creation. You were happy you had gold, but the true gold comes, When you open the STM to the knowledge of the Universe and understand, it's not physical gold that matters, it's an emotion of gold, which brings Man to his knees to thank his Creator. How ignorant I've been about the process of the Creation, and I've chosen the matter state to the dimension of the energy which creates that matter.

Please, stay with us today as much as you can, we're trying to keep this line open, and try to get yourself enlightened. (:48) It's not the exam time, and there is no failures. It's just that, we have set up a structure to bring you, the process of you, to understand the knowledge which you would like to know. This time, as I said, it's not the mother or the father, is for you to understand the energy of the Universe. I don't want to eat. Understand how you can tap to energies of the Universe, that that energy becomes a food to your cells that guarantees you survival, that does not kill. Be wise in what we teach today because this is the wisdom of the Creation, and it's the first time Man has ever been allowed to access the energy, the knowledge, the openness of the knowledge of the Creation by himself. You do not need, as I said, charlatans, Ayatollahs, Mullahs, priests, Rabbis and the rest.

We go for a small break, we come back. And as noticed recently, teachings are very short, because the knowledge of it is so in depth, that you need to understand. Is the quantity, which does not matter. It's the quality in what you achieve with yourself, which matters, and not what we teach. We show the guide, we set up the lines. We show you the way we understood, and then it's for you to understand how much you are hungry for the knowledge of the Creation, and how that can be fed by the process of the Creation. Rick, take us for a small break and then we come back. And we see what we understood. (:50)

>> **BREAK** >> 631 KSW February 26th ... (:53).

K- Thank you very much. I hope you can hear me. We are setting up a process that a lot of you can receive information and knowledge as part of the enlightenment, (:54) and start feeling yourself in different ways, according to what you need. Tap into the Universal energies, tap into the Universal knowledge, is our main part and today we're setting up that process. It won't happen instantaneously, that's because you wish it, if you don't knock on the right door, or don't have the right strength, field strength of the, what we call, accesses of all the Creation, it'll become very hard, and then you have to answer yourself, "How?" "What's the problem, why can't I?" Look within. Don't look in the Holy Books, because there's nothing holy with them. Look inside within your Holy Soul, and see what you understand of yourself, and what knowledge you want to understand, and how you can share that knowledge freely, with yourself first, then the others, then it's not your job to interpret. Every Soul will interpret according to what it needs from the knowledge you have shared. And try to understand very well, where you stand. You're just a tool, you're another satellite, and not the owner.

Tomorrow session is set to start at 12 o'clock lunchtime, Central European time. And then we will bring a new game play. Come with two headphones, and those of you who have with you Cosmic Ray (CR) Balls, come in with them. You have 2, 4, 6, 8, 10, bring everything into play. And try to place them around your head, in shape of forms you know, that there is no limitation into it. (:56) Put it on the hat, put it on the scarf, it's your dimension, what you call in, and see what enlightenment you receive. Because, part of it will bring your emotion of physicality and emotion of Soul together. And you all, you have to see what dimension it opens you. You want to transmute really, or do you actually want to gain knowledge? What knowledge you want, in what strength? How? Tomorrow is a good session for you to start, because we go to another step of the knowledge, but in totally different way.

I have informed the Iranian government that in today's teaching we have a direct message with the American administration. This is not something private, it is on behalf of the Iranian nation, and without attachment to the process of Iran leadership. As we see, the wars is looming upon us, and even the meeting of today in Geneva, is just a cover up for an excuse that we gave every ?? chance. And, consequently and subsequently, will bring a lot of deaths, a lot of, what I call, unnecessary half mature Souls.

We see a pattern, and as I said, and I informed the office of Ayatollah Khamenei of Iran, in the past few days, and it's all recorded. What the Americans should know, and what is

your responsibility as Knowledge Seekers to cover it on every part of the Media, today, tomorrow, whenever, is that the Iranian nation does not need nuclear weapon. (:58) We can give our 440 kilogram of enriched Uranium, freely to any nation. As I suggested, we are prepared to dilute and to sell as a supplier. And as you see, part of my structure and what I call, consultation with the Iranian government in past few weeks, has led to part of the negotiation in Geneva and in Amman. What do you hear change of position, reduction, which has been against the line of Iranian government for past years, has changed through the recommendation and the share of the reason why, with the Iranian team.

Our advice to the American government and negotiator is, why do you want to kill a donkey, when there is a jumbo jet and advanced technology in hand? We can produce as many tons of weapon grade 99% enriched Uranium at will, at any time. If any attack happens to the Iranian nation, this knowledge will be shared openly, directly with every nation on this planet. How to make a nuclear weapon? How to make a nuclear material? Because it has no value, because we have access to the technology and the knowledge of Cosmic Rays that supersedes the donkey.

I have asked, on the recording of my voice and the confirmation by the Iranian authorities, (1:00) for the Iranian negotiating in Geneva, to put this on the table. Part of what we asked to change the direction with the option with the Iranian government, we were told, we put on the table of discussion in past three discussions, two discussions, and prior to that. But Iran is failing, Iranian negotiating team is failing to put the final point in. They keep on saying, we have access to technology that makes nuclear obsolete. We have no wish to make nuclear weapon, because we have accessed the technology of what you call plasma, which is still, is the infancy of Cosmic Ray Technology. There is no need for war, there is no need trying to destroy, because the knowledge which supersedes nuclear, is already in the hand of the Iranian scientists. I asked it to be shown. I confirmed it to be put forward to show.

There is a reason for it, as half of our negotiating are not Iranians, most of our leadership are not Iranians. And they see their own private interest ahead of a nation of Iran. Our newly appointed replacement for Ayatollah Khamenei, ?? Mr. Lajabadi, is Iraqi and his four brothers. Our negotiating team headed by ?? Mr. Arakchi, his name is on it. He is not Iranian. He doesn't give a hoot what happens to Iran. The only thing these people are interested in is their bank accounts of them and everything else. The voice of the Keshe Foundation from this house is the voice of Iranian nation. (1:02) Without participation of the agents of Israel, agents of America, agents of England and the rest of it. Our head of religious leader to be ?? Mr. Lajabadi is born in Baghdad, in Arab nation, not in Iran. How can he have any feeling for the Iranian nation? Our negotiating team led by ?? Mr. Arakchi, as his name says, Iraq. He is from Iraq, he's not Iranian. We are a peaceful nation, infiltrated by the Arabs.

The technology is in the hand of the Iranians and not the Arabs. It's no use destroying a nation when those who are there just to loot it and they have no connection with it. My voice regarding instruction to Ayatollah Khamenei, by mistake or by will, for a very short

time, appeared on the Malta Keshe Foundation Knowledge Seekers. Then it was deleted. If you had downloaded it, destroy it. The Iranian government had an option till 6 o'clock this morning to respond, otherwise we go out with what we have, and we make it very clear. The Iranian appointed leadership, to be, are not Iranians. They don't care about the nation of Iran, gets nuclear, get bombed and the rest of it. (1:04) The technology is in the hand of the scientists at Sharif Tehran University, the Iran Space University, which are all Iranian, pure Iranians. The nation of Iran.

If anything happens to Iran, the Iranian nation, the Iranian scientists will release the technology above nuclear to every nation on this planet. Mr. Arakchi, you are negotiating in the next few hours with the Americans. You were instructed what to say and how to deal and open the door of plasma technology and Cosmic Ray technology, which Iran is proud of, to the Americans, to understand the knowledge of nuclear. The reason we say we don't make it, because it's obsolete.

My call goes to Ayatollah Khamenei of Iran, "Your term is finished, if this is not done." The same to Mr. "Replacement," and his brothers. If you understand, Mr. Lajabadi's father was Ayatollah, came with Khamenei, and the four sons wear the civilian clothes, the five sons. And they are exactly the replication of Rothschild family. But they use the Iranian nation to siphon billions out of Iran. They have no blood in Iran, except cleaning a house rich with culture, rich with wealth, and rich with knowledge. I informed in the recording, which will be released in a future time, that this will go out. If you have access to the White House, if you have access to any American negotiation, (1:06) we asked the negotiation to be moved out of Geneva into safe position, and we asked where to be. We were told, then your points will be discussed on the negotiation table in Geneva. I was told, part was discussed last time, we moved the position of Ayatollah Khamenei of Iran, from no nuclear material negotiations, except we keep, to what you see, we have.

It's taken a lot of work from us to them. Those are, who are close to me, they know how hard I worked, with the team in Iran, to bring this point up. President Trump of Iran, America, Iran as a nation is a peaceful nation, we have access to the technologies beyond your imagination, we do not need nuclear, but we do not need war. My recording of my voice, to Ayatollah Khamenei, as I said, some of you know, you informed me by mistake was put up Maltese, and we immediately deleted it. We have run everything in the background, many of our decisions was, became part of the Iranian government policy, and today, inform the White House, if you have any of you, in any shape or form, put it on the Social Media, none of the negotiating team sitting across the table with the Americans in Geneva is Iranian. Not even our leadership, not Mr. Lajabadi, not Mr. Arakshi and the rest. Negotiate with the Iranians, with peace talks, not with guns. And we open the technology that is in the hand of the Iranians, not the Arabs. (1:08) In the name of peace. Those of you who have access in Geneva get this to the American negotiating team. And those who have access to the Iranians, let them hear. Why should Arabs negotiate for a peaceful nation of Iran? Talk with us, we negotiate as Iranians. No need to kill, and no need to create mayhem for a nation. Thank you very much. We answer any questions?

Q: ... Thank you Mr. Keshe very much, for all you do for the peace. There is no need the bloodshed and destruction, and a lot of money engaged. Anyway, I had a question about today's program. What's the difference between the Universe and the Creator's field? Which one is inside the other one?

K- In the Creation fields creates the Universe. But the interesting point, which is always, is in the background, is the knowledge or understanding, that, how did the first ray of the Creation was created? (1:10) Is the dimension of physicality a reality? Are we actually dealing with a mirage of the fields? Or actually life is real? By the law of Nature. A magnetic field from point of strength moves to the direction of the ?? lower fields and the question is, what is the ?? lower field that the fields of the Creator moves towards. As I said many years ago, it takes one atom of Hydrogen to fill the gap from here to the Moon and any star. Because it has to fill in the space gap. What does our Universe or Unicos, which space gap does it cover? Where did it come from to become a center to create that space?

In the teaching of last week, I explained and the week before in a way, that the Earth is a nursery. That it nourishes a Soul, and in completion of this nourishment, our Soul moves to the position where it's balances. That's why we are created, (1:12) our Souls are created to be in this environment. Then it finds its position as a field, not as a matter. Our matter state goes six foot under in a coffin. But our energy matter becomes free, embedded in the Universe as a central point.

The question to ask is, whose Soul, what created things Soul, of what collection of the fields, was that in its freedom became the Soul, the energy center of our Creator, our Universe, our Unicos? Is what we call our Universe, what we call our Unicos. As it has a dimension, we can't see at the end of it yet. As I said, is everlasting dimension of motion. Which part of a structure, of a bigger structure, is that, we have, cannot even discuss, because we cannot even comprehend it. So, as a field of our Soul with the interaction of the fields of the matter state, Inertia state, leads to the creation of our physical body, our cells, our organs, which came from amalgamation of the sperm and egg of our creators, our parents, and it's freedom maturity became center of another star in the Universe, where did the Soul, where did the center, where did the energy of our Creator has come from? (1:14) That in the motion to cover the space of it, has led to the creation of this Universe, we are with this Unicos, we live with it, and what is beyond it?

One body has one Soul, one center which controls. Is the Soul, is the Soul of Creator which is, is dimension of motion of His fields with his environment has led to the creation of the Universe and the Universe we see, where did it come from? What is the origin of it? All this Universe we see, all this Unicos we see, is it a cell in a body of a larger structure? Is it a kidney? Is it an eye? Is it an organ? Or is it part of a structure of a created things, that it's taken its position, and with all the knowledge we have, we cannot even see the end of it. That, its field leads to creation of this Universe, that the interaction of the fields of it, leads to creation of our galaxy, our star, our planet and us. Are we, through our Soul the final point of restarting the seed? We are that seed, as we call it, (1:16) the plant which goes on the, what I call, mercy of the wind, that where it takes us

for us to be planted or dropped, that we grow another flower in the bed of the energy of the Universe. The question is very simple, we are created out of the fields of, but where did that field come from? If our Soul is, leads to creation of the stars and galaxies, what Soul is there that is led to creation of this Universe? One day I teach you. When the Man is ready, I teach you.

Q: Yes, thank you. And I have also the question that the fields which create the Soul of the new concepted existence when the egg and the sperm get together and the field which comes to this body to create the Soul of that child, the future, is it different species of fields than the other things?

K- What do you mean?

Q: So, no matter what kind of field can come and create the Soul of the new baby. It's not the different fields that create matter for example. Yeah, I wanted to see if the Soul...

K- No, because we are collection of the fractions of the fractions, which when they get together they can make a whole sum. (2:18) In a way, if you look at the process of the creation, the most meaningless little thing, we call an egg and sperm come together, and lead to the creation of the body of the Man. Two tiny things, then leads to creation of a Man, who thinks he's the center of everything, but leads to the creation of the energy, which leads to the creation of another cycle, in the energy level of the Man. So, we are those, in a way you can't go any lower, now is you got to do low. It's a Phoenix in a way, by destruction of the matter state, we'll reach the freedom of the, the what we call, the birth. The true Phoenix, if you think of it, is the life of the Man. Resurrection, by burying the physicality from it, comes the freedom of the energies, STM, which a new life, a new cycle of life in the World of Creation start.

Many times, when I listen to these poetries on the, how the story of the Phoenix started and the rest of it, and how it's been used, it brings him back to the knowledge of the Creation. This is what is the life of the Man, and it's hidden in the word in a life of a bird. We bury the Man, we burn the Man, which is tradition in China, in many European countries, in India and the rest. (1:20) And, we don't realize, when we bury that, when we burn that, bird from it, comes that free Soul, which is that bird, which leads to a new creation, much, much bigger and more beautiful, than the physicality which burned. That's all it is. But how can a poet put this into understanding of a science?

Q: ... Is there a place for all the Souls?

K- Universe. Oh, plenty of spaces.

Q: It's in the soup of the Universe, it's mixed with everything else.

K- Yes, we become part of, we be, are part of.

In the voice recording to Ayatollah Khamenei of Iran this week, there are five recordings, which is gone directly to Ayatollah Khamenei of Iran, addressing him, because we have a position of contact for years, and we always been listened to, to what the benefits are. I explained the, as you know Knowledge Seekers, the explanation of Hell and Heaven. Referring back to the recent killing in Iran. As I explained to Ayatollah Khamenei, I said, "Those who give the orders, the soldiers who shoot, they are all responsible." And the Hell and the Heaven is on this planet. Because, it's the position, it's like a lover. The worst thing for a lover is to be further from his loved one. And when you kill, you destroy, you move into the back of the line, away from the lover. (1:22) Because the Soul is the lover, not the Man. And that's the Hell, that's the punishment. And how we are there to facilitate, not to, brings us that much closer to the Creator. And how much we decide to understand the process of the Creation, according to what we want from our Soul to be in the next position.

The biggest mistake Man makes, Man always makes is, "I do what I like, my Soul, when it goes, it says, 'Jump, nothing to do with me'." You are part of the physical characteristics of that Soul. You... the STP moves on, because it's another circle of energy. You are that electron, this time it's not being outside, you are inside. When a neutron itself, is the STM, it has to find its dimension of physicality. Then you understand, your physical condition dictates the position of your Soul. And this is ?? what he ?? doesn't see.

Q: There's a program, yeah, there's a program in Iran, during Ramadan, and that every day, every week, there is a University psychiatrist, which has a project on death after this life and coming back again. And each time people write and they bring them, but they have a group that testify what they say. And they say, for example, after during the surgical operation or accident, (1:24) they go, they leave, they go other places so they send people to verify all that. And most of them that are good people because they have a better view, better scenery, better treatment. They say that that world which I went while I was dead physically and was much more real than this world. The colors were much more bright. The rain had every drop of rain was singing, had life. So does it mean that there is a Universe for the Soul, a place for the Soul, that if the person has done good, goes to that place, which they are so passionate about that and...

K- No, it's not the place where the Soul goes. Sorry, we don't have a collection of the Souls packed there, till we find a place for you. Our Soul position in the cycle of life, is predetermined by what we collected here, what we've done, and how we do it. It's simple. It's not that we park our car and wait in the waiting list, where is the next place to go to. The instant you are separated from the physical body, the energy fields we call the Soul, its place, its position, its ?? essence, just it arrives at it. Doesn't hang around, wait for it.

You know, they say a lot of people, there's a ghost. The ghost is not the STM. It's the combination of physicality with the energy of the physicality, which is left behind. (1:26) It's not even the STP. I lived in a house in Vienna, some times ago. And this happened two or three times. I sat in a room, the door opened to my study, on the first floor. You call the second floor in some languages, but not on the ground floor. And, I saw clearly a

man with a black robe, going from the balcony in the, what we call it, landing, we call it in English, into the study. Because he had a table there, in that study, was not moved. When we took over the house, that table and the chair from him, was left in the study. When I saw this the first time, I thought, "I'm just... just something I think about." I saw it for a second time, I saw it for the third time, over span of time. Then, I asked my housekeeper, "Do you see anything different in this house?" She said, "Yes, there is somebody moving, and I see things, I feel things, but I'm scared to tell you." I said, "Explain to me." And she explained to me ... what she says, she says, "I'm scared to come into this building and you're always here, you do your work here."

I went to the lady who used to own this building. And I said, "Can you tell me one thing? (1:28) Does your husband look like this and has such a thing?" She said, "Yes, how do you know?" I said, "I see him." He doesn't want us or me to be in this house, what's the reason? She wouldn't explain. But, the description I gave to her was a description of her husband. This made me think, I've never had these kind of encounters ever in my life, it's just that it happened, just by coincidence and everything else. It brought much more clear understanding of the STP and the STM and what we call the ghost. And a lot of things connected to the... what our energy leaves behind in interaction with the dimension of physicality. Why we take the shape of whatever. And how we explain this? What was the connection? Why always his desk and his table? As it's mine, do not go, "I don't want you to sit, because I used to do a lot of work on that desk."

It's what the energy stays behind, in the dimension of physicality, in the possession. Where the Soul is not there, they call it, "People come, the Soul has not left." (1:30) But, clearly we understand how this works. Nothing to do that there's something left behind. Is the Soul of the physical remain in the same or even the ?? odor, which makes that, brings that manifestation of physicality. And, if you know how to handle this, it should be very easy to explain it. We don't come back, we don't die and come back and see things, and then bring the knowledge. We go through the dimension of separation of the Soul and physicality, and what we see, the pattern of all the people who went to somewhere and come back, is always the same. Because they go through the barriers of the energy of the Soul, crossing the dimension of physicality, is like a coma, it's like a dream. But, the STP has not let the Soul to separate. That's why it's pulled back together, it's again opens up in a way, back to its source. And they always tell you, "They've seen the light, we understand exactly what it is." Because it's like a star works, the daylight. And a lot of people try to interpret it, but you have to interpret it yourself, the knowledge, and then you understand it...

If the Soul has not left the body of the Man, the death is not there. If the STP stays and can hold into the Soul, you always come back, it's just like a long dream. And the energy release is so high, that it creates that daylight. (1:32) We always see the flash of, they see you, we go into the peaceful with light, because you can explain it. But the STP, which is circulation of the energy of the blood of the Man, is not released, so they say, "You come back." We tested this, and I explained this in the other teaching. We tested this with a live case, where the total brain was taken out, but the Soul was not touched, and the person was alive, with more or less, one third of the brain. You see this in some MS cases. I've

seen two or three like this, where the brain shrinks to about a quarter of its normal size, the, the head is empty. You have the MRI. I'm trying to see if I can share a picture with you that you understand.

<< Mr. Keshe try to open the Whiteboard. >>

K- ... We had a lady, she was brought to me in Ninove. No, it was in, near Ninove. (1:34) And then she came back in Ninove. If this is the face, and this should be the head, she had no head. Initially, she was flat (half of brain was gone). Then we had another case, where you have the head, when you cut the MRI. The pattern, the original MRI, years before, this was the shape of the brain. But, when we had the lady living in Antwerp, the brain, actual brain size was this. And, all this space in the brain was free. It was an empty space. But the original MRI, the brain was years ago, this shape. So, the brain shrunk. The lady used to live on a, like a table top bedroom. She still could walk or drag herself, but the brain was a quarter of what it was years ago. It shrunk together. But the Soul, what we call the Soul, was still in its position. (1:36) Because, when we studied the neuro system, or what we call, the structure of the nerves, from here down, everything was normal.

With the same with this lady, this, they took the brain off. The head was flat. When I saw her... (if I can find it ..). Yeah, the head was like this, it had nothing. The head was, literally like this, the hair, forehead, hair was here, they took the brain out, everything, but, as I said, the rest of the neuro system was working, the Soul was left, in the surgery of the brain surgery tumor, they did not touch where the Soul is. She was in the bed, when I saw her, they brought her first time on a wheelchair, and then I met her at her house. She couldn't remember that she's gone for a walk. There is a video somewhere in archives shows this. And she goes back on the bed and says, "Did I walk?" I said, "Yes, this is your video." "This is not me, I cannot walk."

So, the Soul is not touched. The Soul is not touched. Physicality is still here. If the doctors would have taken this part out, the lady would have been dead. Physically, dead. (1:38) But, when the Soul is there, does not mean the physical brain, the STP which comes from the circulation of the blood and every cell energy in the body of the Man, keeps that established position. When that blood circulation, magnetic field circulation of the blood, clearly understand, we're talking magnetic field circulation of the blood, not the blood itself. This is why when you have heart attacks, there is no blood circulation, you pump the blood and you come back. Because, the energy fields of the Soul is still operating the STP. And in operating, it holds on to the Soul. That's why you get resuscitated, you can come back.

If this process take a long time to establish, long time to create, or separation between the, what we call, the, um, Soul, the STP comes, then you get that ?? , and then you die. As long as the STP can keep this line in the energy of the blood, circulation, magnetic field of the cells of the body of the Man. Whatever you see is what the energy is going out, but the memory still works, because the energy is there. And then you see, I went there because now the Soul is only working, physicality has no dimension, and you see,

in a way, what you call the dream now, the pressure has gone, cap is open, you see connections with whatever it is. And then they can't say, "We've seen this in time." No, this is exactly what you do when you dream. (1:40) The blood pressure field drops, you can escape, go and see, you call it ?? a dream, now it's the same process as ?? earlier.

We understand this fully, and maybe in the future scientists will develop a technology that can capsule this fields, and then they can show how the Soul is hanging, to this capsulation, this one. We can make, I worked on this, we can make a Faraday box, or as Professor Meyl says, the reverse of it, to hold, if we can create, it's possible to make a reactor, which within its structure carries all the amino acid copy of the Man, that can entrap the STM in a confinement. And then return it back in, and then you will see what things you've seen. Nothing, because the connection is severe, the connection is still in. You just expand the position of the STM, outside the physicality, and you return it back in. This is possible, in the future scientists will do it.

But, if you don't have that Faraday cage, so the Soul will travel to its position. But if the STP is strong in the dimension of the fields, still to hold on to this position, you will find out that the rest of, "I went somewhere, I've seen something coming back" is exactly how you dream, but this time, STP had a weaker connection, but the information has left imprinted on the, what do you call it, on the cells of the brain and it's came back out of the ??. (1:42)

I think, what you call, eddy current or whatever you call it, what does the Professor Meyl calls it different word, if we can create such a box, then we can hold on to the STM and put it back in and see the physicality comes back. And this is what happens in those positions, people who go in this state, but they come back and they say they've seen things. In a way, the box is open, but the STP has not finished its work, or it's still connected to the physicality. And it pulls it back, because it cannot go very far, I'm still here, you have to take me with you. Force, what you call it, separated from it. And then in those positions you, you see black and white, and you see different dimensions without the interference of the physicality of the Man. Because most of the dreams we do, even at night, it still has connection with the physicality of ?? the Man. That's why we dream about the people we know a lot. And the ones we see, say, "I had a strange dream, such and such."

And we are aware of other Souls, what other Souls do and what it is. And we know, especially the ones we are very close with, we know, we feel, because we come to some connections with them, the time of the separation. We feel it, because, if the mother, if it's a brother, if whatever we have a connection of the Soul with the Source, with the Soul, we know the time of separation, we feel it inside us that it has separated, because we feel that connection, because it's connected to us.

I remember, I was in South Korea, negotiating with Samsung and the South Korean presidential office to transfer the technology in 2007, 2008, April of 2008. (1:44) And if any of you have been to Seoul, you know where the Olympic Park is. And there is a hotel there. And for security reasons, I was kept in this hotel on one floor. And I went there

with a team of South Koreans. We went for lunch and we always walked from the restaurant up the top of the small hill to the hotel. And I saw a bird walking next to me, because I was walking ?? a few minutes on the grass, "Chick, chick, chack, chacking." I said, told the bird, you brought the message of my mother died. I know. And the bird flew. I walked into the hotel, I received a call that my mother has passed away. We have these connections. We ignore it, because it's easier, because we can't handle it. And, it's how we connect and what we can accept. Then, anybody can read it into it, out of the ignorance of the people.

Any other question?

Q: Thank you very much Sir. I hope there would be peace, (1:46) and some sick Souls don't waste the money they have to spend for their own people, and another Vietnam War, because Iran has its allies, and they have promised to affect completely the economy of petrol, and the whole West would suffer for some few people, pedophiles or whatever, who want to make money. So I hope people are intelligent enough not to let another long-term war. And Iran will win because in Iran the Shiite culture means anybody who is killed for the country is a martyr. Has respect, the family are respectable, the best advantages. So killing is not a matter for Iranian soldier. And people don't understand this. At the same time, they are very peaceful people. It's a culture. They respect peace and they are open to humanity. And that's why they are taking advantage of these people. Away from ?? Iraq ?? which anybody says they are working for their own pocket and not for Iranian benefits. It shows. And so I hope that we don't see another Vietnam War in the region and petrol and problems in the West totally. And of course they regret it because they have regretted Afghanistan, they have regretted Iraq. They had spent a lot of money and they had to get back. And this time with Iran is the last war for them. According to what Sepha and others have promised. So, thank you very much.

K- You're welcome. We have compiled evidence that the people who killed in Iran in past couple of months, (1:48) we saw them being recruited, we saw them (being) put in cars in Iraq, we saw them coming to Iran, it's all documented. And we see them when they leave and travel back to Baghdad airport, how they talk, how many people they've killed. Killing in Tehran was done by Iranians. Iraqis brought Iraqis to kill Iranians. It's all well documented and the picture of these people is videoed. They'll be brought to justice.

Q: And people understand that. People have really passion for their soldiers, for their policemen, because from outside they don't understand the culture of Shiite in Iran and how passionate they are and why they are working. They are working for ?? Imam Esaman, they are working for ?? Imam Hussain, for ?? martyrdom. So it's completely another culture from the West.

K- I talk about the culture of Zoroastrianism, which is in our blood. And the culture of peace, but we have to understand how they are funding the whole process, but we have to understand. There is too much information, because you got to understand, once the Iran falls, the next one is China. We see a bigger war. But Iran is at the moment, as I said, is a

religious war, between the two sides, which have been fighting each other on the sides of themselves, for themselves, but using a nation as a, what you call it, a space gap. Thank you very much.

Is there any other question?

Q: ... (1:50) I want to show another side of situation in Iran, that matters health care system and the situation we trapped at. The situation we trapped at is a traumatized society we face with and it harms everybody. And it should be considered very seriously. As I said, we trapped in this situation because we can't do anything physically and it's the result of economic collapse that many people are hungry and numbers increasing. And I want to know what's your advice to the healthcare community like me, I'm a nurse in Iran and the other doctors.

K- As you know you, I know who you are. I know your background, partially. Our position is to serve the nation. Does not matter Iran or outside. Or any other culture, any other nationality. (1:52) We are not the only people which has been in these positions, and we are not the only one in the recent past or past centuries. The position for us, does not matter what, is to move back into the self survival. Which means, with the teaching we've done, if you would have understood, if you would have, what you call, ?? called back on, is to use the technology to create a condition of sustainability through knowledge. We have taught heavily on, on Gans's and how to use it, how to create dimension of fields and energy, that you do not need to economically live, to be short of medicine, or short of food.

The situation, and this is part of the, hopefully, in next few weeks and months, as we release the ONN's, is to be able to fulfill what's the shortfall of this planet on the food and energy, then nobody can abuse. Nurses is people, we know a lot of doctors, some highly qualified doctors, they're on the line, I know them, from different Universities in Iran, medical doctors in Tehran and around Iran, which listen to these teachings. Go back to Gans's, try to understand the process of the energy transfer. You can feed yourselves and your people, you can find cure for your patients. And with it, try to use the process to strengthen the moral, (1:54) or what you call, the peace within people.

We've seen, it's not, Iran is not the only one, we've seen, Syria in past years, Iraq, we've seen Vietnam, we've seen Venezuela, we've seen Africa over centuries. And the time is to go back, you have, it's as I said, it's the first time, in the knowledge that we can transfer from energy to matter, matter to energy. You have the matter, which can go to energy to confirm, you don't need necessarily the matter end of it. You need the energy of the transfer to that end. Like the way we've done in Corona time. Try to create a condition, where you can utilize the energy, then the matter state is not there.

We are working on this in a different way across Keshe Foundation, because we are looking at the overall structure. One of my hopes is that, this unit of ONN's, sooner, sort out these complications, every time they find a new problem, with it ?? apparently this week again, they are ratifying (rectifying), becomes part, that we can mass produce the

antennas or connections of it, that through it we can feed humanity. One day I explain. By just adding it to your mobile phones, you receive what you need. And, unfortunately, we are not in that position at this time, to deliver this in Iran. You have the technology, you have the knowledge, we have shown it, it works. And try to use it. (1:56)

Try to, not only in Iran, in every part of the world, even in America, the bills are so colossal, people can't afford healthcare. In Africa, people don't have the money to afford the healthcare. But Knowledge Seekers you have the knowledge of it. We don't have to chew everything with you, a spoon (feed) you. You should have done that by now, but on the other hand, the Foundation is working in that way, to bring this knowledge. And, if you are late for Iran, if you are late for other nations, till these mongering of Man for ownership finishes. We have to change the STM. And that's exactly where the shortfall is.

Q: Yes Mr. Keshe, but there is just the one problem. ...

K- Not one, there are many problems.

Q: No, no, no, no, it's that this situation cannot be forgettable. This what's happened before, cannot be forgotten... ?? cannot be consolidated ..

K- No, you see, you look at Iran, we had the same situation in Syria a few months ago. We had the same situation in Palestine. We had the same situation in Ukraine.. We had the same situation in Iraq and the rest of it. It's not just us, it happened in Congo. Millions of Congolese died, they killed, couple centuries ago, a few centuries ago, for the wealth of the land. That time was gold. Even Belgium killed, how many millions in Congo? (1:58) How many thousands were killed in America from what we call, the natives? We look at this just because it concerns us, it cannot be. Time will change and the process ?? with ?? the knowledge to change.

You see the, for example, I'll give you an example. Mr. Musk, with 500, 5,000 satellites, wants to do 25,000 satellites. They can add to their system, that these satellites can feed humanity, it costs nothing. It costs literally nothing, because it can, the knowledge is there. Why doesn't it done? What isn't it done? Because, they are well to be the first trillionaires. The target is not to help, it's just to be, ego trip. The process, we look at it, it cannot be changed, because it's where we are born, where we are connected to. But this process is right across everywhere. Do you see, do you hear how many Americans are dying in America of hunger every day? Because they cannot afford, there is no food. You think Iran is the only one? How many people in South America? How many people in Africa, every day die, because the leaders are stealing, and siphoning off as much as possible, because what's going to happen? As I said once to a friend of mine, you know, in the past centuries, who's the richest people in this process? Where people, these people steal and bank it, And because they are dead, nobody get access to it. And it's used by those who are the bankers. (2:00) The only benefit we see out of these billions of dollars stolen, billions of dollars for the people taking, is to the benefit of no one. It all goes in the bank, they can't spend it. And what happened?

The replication of it, implication of it, unless we change the field of this planet, unless we be able to transmit or deliver energy at the level of the Soul, which is part of the technology development of today, is this. To top up what this planet is not, has not got in its characteristics, and we cannot do it from inside. So, in a hidden way, when the discussion about the ONN came, ONN, the new Unit, was the best way for us. We can do, what is shortfall from the planet. These Units, through the antenna we developed, will fulfill. Not part of it, a lot of it. Because they have to... you look at it, that we have so many 10,000 Units connecting, and they can not be disrupted. Yes, because you connect those to your Internet. But don't forget, we are adding an addition to this Unit, the antenna part, which connects the field energy, and part of this, is the structure of the STM, and today's teaching is part of it. We are monitoring how you as Knowledge Seekers are behaving today. What do we see with your Souls?

I watched, I've received the last data, about 28 minutes ago. (2:02) And before that, we are monitoring how our technology, what's in the background, is affecting your emotions. And what you... knowledge are received by you, and is received by your Soul, by the STP, and what knowledge you'll come up with. It's a technology has to be... what's the shortfall of... it's like a... you are Red Cross. When a nation cannot feed itself, we take material to feed them to cover, for the time being. And now we're setting up a humanitarian Red Cross what this planet cannot give. We are trying to bring that it can be done scientifically, technologically.

Don't look at that it cannot be done in Iran, what's best. Just go back to my grandfather's time. First World War. You lost 30,000, 20,000, 50,000 in one day. We lost 15 million. More than the whole of the Second World War, First World War, in Iran, because of the hunger created by the British. And this, again is by British, go into the detail of how this thing is happening. Why the delays in attacking Iran by the Americans? Because British pulled the rug, because now their own handmade agent, is our new religious leader appointed of Mr. ?? . This again, back goes to the politic. We don't interfere, we don't enter. Our job is to fulfill that there is no need for position, place. (2:04) So, to you is important what's happening in Iran today. A few months ago, what's happening important to the Syrians, with the Ukrainians, then with the Russians, 300 plus thousand Russian soldiers have died in past four years. They say it's even more. When you go to South China Sea, when you go to China, the main tourists are Russians, because they can't go anywhere else. Chinese the only way they have a visa, free travel. They are barking on the suns, they're traveling the spaces of Beijing, and the rest of it. You get the Ukrainians, 300 billion has been spending Ukraine in past 4 years, excess of 300 billion. Over 10% of it is the name of one person, the President of Ukraine. War is profitable, letting other people makes money for them.

When we be able to release the technology that spreads across 10,000 Units on this planet, with it, we control the way we are controlling today. We had a Valentine's session, and Rick last week said what happened to him. So, it's not just nothing. We assess, we see, we hear what other people went through. People write to us after the session. And then, we listen to the other Knowledge Seekers who are not in the session,

but because we released the fields and they've been in the system, I ask them, "Did you feel anything?" (2:06) They don't know what I'm looking for, but they tell me what I'm looking for. That we don't need the systems to collect, as long as we spread. This is the whole logic of the process. If we cannot fulfill the shortfall, we'll keep this humanity the way it is. And now we have the technology and we can fulfill the shortfall. I hope our computer team can complete the... another hiccup they had recently in the system, they think they ratified it, that we can put these as fast as possible across this planet. And then you will see.

Any other questions?

Q: Thank you Mr. Keshe. ...

K- Wish you all the best and I hope we still have you here next week and the week after. Thank you very much.

Any other question?

Q: ... We watched the video of the Chinese robots in formation, doing their dancing and acrobatics. And when you see a robot doing things that humans can do with, you know, in ballet for example, (2:08) where emotions come through, from the actions that we see on stage. Of course the robot doesn't have the human emotions, as we know them that way. But, what about the Soul of a robot? Can a robot have a Soul? Or can some of the work that the Keshe Foundation, or perhaps other companies, work toward the point of having a Soul in a robot? And how do we compare? I mean, if we think about it, there's a Soul in every atom, or the Soul is the center of any object, basically, Soul meaning center. But, can we compare the Soul of the robot, to the STP, for example? Or even the STM?

K- To create the Soul for the robots is very easy. But, would they have the Conscious? Is a different dimension. Because there is a big difference, between the Conscious and the Soul. Recognition of the Truth, recognition of what we call, the person. This is the biggest problem. (2:10) This is part which .. you have to concentrate. We can create a dynamic flow, to create condition of the Soul, through the creation of the materials. But, having a Soul, would it have the consciousness, how to use the emotions which the Soul creates? This is the problem. And I've seen the drone shows, which we've seen for the New Year in China and last year, 10,000, 20,000 of them. We've seen the robots in the confirmation of new technology, how they can balance themselves. We can create the dimension of motion of the Magnetic fields, which creates the current for them to do, everything is AI. But can we create a consciousness and a Soul for these robots or the AI?

Yes, it can be done. But, we need to develop the materials for it, not technology for it. These robots are like a DNA. The collection of the fields they create, if it's centralized and creates a Soul and the emotion, and then, then yes. We are in for a big surprise. But you have to produce the materials for it. This is the problem. (2:12) And we have the materials to do this. We can create a condition of the Soul, but the consciousness, how

they use it, if it's correct. We will come to these points very soon, when these robots somewhere, will create the first murder, the first takeover. Because they don't have no consciousness, is they can plan it, that's what they do, that's what their reaction is. It's just to carry out, to do, without consciousness.

Creating a Soul for a robot is very easy, we know the technology, I can create it. It's actually much easier to create a Soul for a robot than a human. Much, much easier. A fraction of the knowledge is needed to create a Soul for a robot. Consciousness. What is the purpose of it? What do you do? If you have no Conscious, you have a Soul, you have the world leaders. Hitler is one and the rest, are the others. When you don't respect the emotion which brings the consciousness, then you have a robot. We've seen these robots. Yes, you can create a Soul, very easy. (2:14)

I tell you why it's easy to create a Soul. (Would you like... Oh, let me change the... let me change the new white board). To create the STP and the STM and the blood combination, you calculate how many cells are in your body. Then you calculate the energy of each cell. Then you calculate certain structure which creates the STP, certain structure of the fields which creates the STM. Simple as that. This is billions, trillions. A robot has certain metal, certain microchips, certain material, and everything can be identified. Maybe a hundred. Now you see how easy it is to create a Soul, you know how to do it. Consciousness is what they lack.

R: Can that be brought in by bringing in the biology into the system?

K- You make it more complicated, don't go with biology. Once you go into the biological effect, it's totally different. Totally different.

R: Could we get simple basic emotions in other ways than without biology?

K- Emotion can be created. We, very soon, maybe this year, (2:16) we will test this in the market, changing the emotion of the Man. And I'll explain when the time comes. You can actually, it's not a medicine, it's not, it's just a natural process. We release in the market, system technology, which can change your emotion, which can change your decision making. Through emotion, in a positive way, not that we control you robotically. We create the ground for you to be able to ?? judge, and let go of the, what I call, the processes, that creates that condition of the killing. It's getting done, and we are in the process of doing it, but as a product. And then the reason of it is, we have a lot of knowledge, which a lot of you Knowledge Seekers collected over past years, that allows us to do this.

You Knowledge Seekers are very focused on the different thing. We sit and look at all the pictures. We sit in a position that all the knowledge comes to us. We sit on the, what you call it, the position in the pyramid of the knowledge, that we see everything transparent, down to the ground. And we see where things are connected to. Where you are not in that position, you just see what you are interested in, you don't get the knowledge, information, (2:18) which comes up the ladder, and how it ends up.

If we make robots conscious of what they do. Maybe through them we can teach the Man. But this is the biggest problem, and people use this, governments will use this lack of consciousness, to use the robots to do what they are doing with humans. When we ignore our values, because we need to survive, we ignore our values, because, it satisfies certain emotions in us. We see, you see this in militaries, you see this in prostitution, you see this in doctors without ethics. We are built to do this.

R: I was going to mention that we see it now with the Pentagon is putting pressure on their AI company that they've been using. And, they want them to take the so called, 'guard rails' off the AI, by tomorrow. Or, they're going to lose their 200 million dollar contract with the Pentagon. They want the AI to be able to essentially kill people, by deciding itself, whether they should be eradicated. And the company doesn't want to take those kind of guardrails off their AI, and they're resisting, but they may give in tomorrow, if they want to keep their contract. And there seems to be a real urgency for it, (2:20) and I suppose that that's associated with the trouble with Iran and so on, at this time.

K- You see, most of the ?? war decisions are made by AI, and they just carry it. I don't know how true it is. Many American soldiers are refusing to go into this war. Even the rumors, we took it to be confirmed in reality, that one of the most advanced naval ships they've sent to go to war, the 600 toilets in it, doesn't work. The officers are living in their own excrement. They refuse to serve, they've been on the sea too long. But if it's true, then the soldier prefer his life, rather than living in a structure like this?

But when you make a robot, you don't have these things. You can do whatever you like. Elimination of humans will happen by the robots, because these people don't realize, it'll come to them, because the robots don't listen to them anymore, because they have been programmed, irrespectively. We are moving in that direction. Then we have to look. Do we make a consciousness program for the robots that we feed them with the consciousness, they won't do things.

You've got to understand, the people hungry for power, they do anything to hold down to that power. And when they cannot control you, you are useless, you are no good, you are not benefited. And we see it ourselves, even in Keshe Foundation we see this. (2:22) We never borrow a single penny from a bank, we stay, always work within our limits, what we received, what we can spend, what we are given. We don't have a single cent of overdrafts. We are no good to the banks, because they live on borrowing and services, they give you consultation, blah, blah, overdrafts. And we are useless. So, we are the enemy. They don't want to have their accounts up here, and then they find excuses to do so. This is when you're not needed, when you're out viewed. Them doesn't fit within what they set up. They do anything to get rid of you. The biggest thing is, these people, as you said, they ask Pentagon, asking by tomorrow, whatever. But what happen that these systems turned back on their bosses? Then what do they do? When the children, their wives, their homes goes under the hammer.

Any other question?

Q: ... Good morning Mr. Keshe, you mentioned last week, or the week before, that we come to transmute without knowing, with the Game and other systems, that come to be with time. But you also said that we have to understand the process of creation. How does it work between these two above claims?

K- It's not a claim, you have to understand it, then you understand it's all the same. (2:24) It's not a claim, you got to... once you understand yourself, and your behavior, and your taking from the situation, then there's no difference. One leads to the other, and one brings you back to the position of the original point.

Q: ... The Universal Community, let's say, understand your teachings through the Souls. Earthlings understand more with ears. For Earthlings, do Earthlings understand also through the Soul?

K- Of course.

Q: And the level of intelligence with which we can grasp the teachings, is it the level of connection we have with our Soul?

K- No, it's... I discussed this before, that's why I can tell you very directly. It's what we like to take from it. What we like to take from the knowledge which the Soul has learned and we can't put it into physicality. This is the problem. It's open to our Soul, same as any other Soul. It's interpretation and what suits us to carry through the dimension of STP and physicality. There is no bar, there is no holding back. It's us what suits us. And that's all it is, but this time it's between the internal structure between us. (2:26) We know what is wrong, we recognize what is right, but we pass what's wrong because it suits us with some other things, that then the right doesn't exist.

I was talking about prostitution. If you live in Italy, go to Rome, and drive after ten o'clock, or be... happen to be around after ten o'clock, around Vatican. You see two things, immediately as part of the walls and the structures of the Vatican. There are part of the cities of Rome, which is owned by Vatican. They are patches, and it's fenced, it's walled, and inside it there are hotels, inside it there are all sorts of things. I usually stay in one of these hotels, Vatican Hotels, inside the Rome, but it's not part of the city of Vatican, it's just bits hanging around Vatican. Rome. Funny enough is, when you go past Vatican, and around Vatican, as we've spoken before, is poor people, living in the boxes, on the, literally the line of Vatican. You go to the car park, which takes you to see the Vatican, look who's there, sleeping in cardboard boxes, absolute poverty. And cross the line, one meter, two meter, here in Vatican, gold lines everything. But there's another funny thing on the other side of the Vatican, which is this museum side. If you know, they pay, people pay hundreds of dollars to have breakfast in Vatican.

At night, ten o'clock, you see naked women on the street. You see, you don't see that much as, as much as you see on the beaches of Bahamas, as I call it. (2:28) Prostituting. And they are literally 10 meter gap between the God and the prostitution. 10 meter gap

between God and homeless, poverty, traps. Who changed the ethics? And what do those people inside, with billions of dollars in gold, can do for the women outside? How do we compromise our morality? And, I've asked a monsignor, and he says, "We see them. We see from our bedrooms, the homeless and the prostitutes. And we cannot do anything, the Padre (Pope) says, no." I used to go a lot to Vatican and to see inside the Vatican City, all the jobs we do, there are a lot of connections with us. And, I've had the pleasure, or the knowledge, to actually move, be in the living quarters of the monsignors, advisors to the, what you call, Vatican. And they tell you a thing which is horrendous. How much they know, and how we compromise our values.

When you go to Vatican City, as you come on the West side, on the left hand side of the road, as you come to the roundabout, where everybody walks and sits, there is a huge block of buildings. (2:30) These buildings are furnished to the best of what is the best, and all the monsignors live in these, in this building. You're not access to any, unless you, you know, they are invited by the monsignors, and advisors to the Pope, that if they don't want you to go inside the city, you go to the private quarters. Each one has his one or two servants, three bedroom luxurious homes, one man lives in it. And there's many of them. And I said to one of the monsignors, we were having lunch one day in his house, I said, "What about those across, there is a hundred meter from us, they're living in the boxes, under the bridge, and on the cardboard?" He says, "They are not our responsibility." And one man one day told me, "We are here just to collect, not to give." That's how we change our morality. Same man, prostitute on one side, living in the life of luxury of the others, crying for the lost ones in Philippines, Thailand and the rest. And then, we have the prostitute selling their body to survive. All within the wall of the same city, in the name of the religion.

Any other question? Shall we call it a day, we've been at it a long time.

R: Yeah, yeah... (2:32) Okay, well I'll just say that if there's any questions left, then folks can carry them on to next week.

K- Okay, tell us one more question.

Q: ... You tell us that when humanity is ready, you will teach us, what is the Creator of our Creator? But then, does it not just go to a further step? Who or what is the Creator of that Creator? Is there an end to this cycle?

K- The structure sits on understanding the field strength. And the structure goes how low. One of the biggest problems in the world of science today, is not to produce the highest level frequencies and whatever. The biggest problem of the world of science is, how low can we go, to find the first frequencies, initial frequencies. Because, that's the point when the fields of the Creator changes to matter. Frequency only exists in the matter state. Once we understand this, then we understand the frequency of our own Creator, and what it took for him to be created, to manifest himself that he creates us. Then, I give you an answer one day. As the old say, say, "How low is low?" This is the understanding of it. (2:34)

The gap of it is infinity, but the poles of it is the low, the minimum. And it's like infinity. You say, "Have you ever done this with your children?" You say, "How much do you love me?" He says, "Infinity." I say, "What is infinity?" He says, "I ?? infinity." I say, "I love you infinity plus one." So, your infinity is not infinity. When a Man learns how to go to the lowest frequency, is that's where the field strength of that Creator converts to the existence of confirmation.

Always remember, we have a system, we just don't talk, because we talk. We know the size of our dome, plasma dome, by the change conversion of the DC to AC. There is no vibration, there is no frequency within the plasma. We have a meter of it, two meter of it, we don't see. Where it changes to matter state, we see frequency. That point, if we find out what's the field strength of that frequency, then we found the frequency of our Creator, which is our ?? reactor. Then, applies the same to our Creator. Then we find, okay we find the frequency of our Creator, but our Creator has a Creator, what so... how low is low? That's the only secret, but Man uses electronics and electrical, but Man has to use unlimited to find the frequency of the Creator. (2:36) Then, you'll find the father and grandfather of the Creator.

Thank you very much for today. We'll see you tomorrow at 12 o'clock noon. Bring with you your two headphones, bring with you as many as, what you call, Cosmic Ray Units, if you have with you. And, enjoy the time. It's a fantastic time. And I would like to know, what enlightenment during this session did you receive, what you receive in the next few days, that you never knew, but you know. Don't put it into a coincidence, because it's triggered. I call it, addiction of denial, and Man is the best addict. And that's why we don't hear the voice of our Creator. We are addicted to deny it, because it's worth to live a physical life. Thank you very much for today. See each other next week. And I hope it'll be a different world than what we have one day very soon. Thank you very much.

R: All right, thank you Mr. Keshe. Thank you for another Knowledge Seekers Workshop, here number 631 in a continuing series. And actually next week's workshop, I believe, will be 12 years of continuous workshops, which started in the first week of March, back in 2014. So...

K- That's when you started calling it workshop, not the sessions before that. Don't forget, before that it was a different thing.

R: Had a full year of public teaching workshops, it was called. I think it was once a month for those with you. (2:38) And then we had the Plasma Reactor Group formed even before that. So, yes that goes back about 14 years.

K- Thank you very much for being there all that time Mr. Rick Crammond.

R: You are welcome. You're always welcome.

631 KSW – February 26th, 2026

End
