

# 635th Knowledge Seekers Workshop March 26, 2026

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

## ENGLISH TRANSCRIPTION

(:13)

K- Thank you very much. Good morning, good day to you, as usual, whatever and whenever you listen to this series of Knowledge Seeks from Keshe Foundation Spaceship Institute, we welcome you back as usual, and we dig deeper in the Knowledge of Creation. (:14)

As in the past sessions, we understood the connection between the Soul of the planetary system, and the galaxies, and the Unicos. Now if you look at the connection, how this is connected to body of the Man, the Soul of the Man (STM), and how does the STM connects to the cell of the Man, and in what combination that we decide in what cell to be which part of the body. And what determines to be the cell of a kidney, organ, the cell of a brain, the cell of the skin of the Man? And then what comes important, how these are connected to the Soul? As we said before, every structure has a Soul, so it comes down to understanding the Cosmic Ray (CR) connection between the STM and the cell of the Man. It's the same order, there's no difference. As the environmental gravitational (G) Inertia dictated the creation of the Universe (U) in the Unicos, and then the gravitational magnetic field and Inertia field strength decided on how a galaxy is created in the given position and then the same how a Solar System (SS) and how the planet Earth and then how the STM is created, it's the same goes for the cell of the body of the Man.

Then we understand from the beginning, from the point of the Creation to its subordinates and subdivisions, (:16) there is a common denominator which sits in the factor of the Ray of the Creator. It's like a bracelet you wear and it's got little, little pieces on it. All these pieces are connected with the chain, by the chain, to make that brace. And then we understand that we all are connected through the same chain, same central energy field, together to the Creator. Even the cell of the body of the Man carries a Cosmic Ray connection to the STM and up to the planet and the Solar System and upwards.

But what becomes important to understand, what happens within the structure of this cell? What dictates what stays at what position? Why do we have solar systems in cluster of galaxies? And then why do we have a cluster of galaxies in the Unicos and in the Universe? And in the same way, this cell of the Man is created from cluster of energies, and some solidify, some stay high speed energies, some become given position according to the field strength of the environment, and it's exactly what we have, we have the Earth, the Moon, the Sun. We have these central energy fields with direct connection to the Soul of the cell of the Man, (:18) which their position decides dictates outside environment and inside condition themselves, which means the outside environment what they give

out dictates that they become a cell of the kidney. But internally they have to keep a structure slightly different than the cell which is in the liver. They don't mix, and we have a neutral material.

In the world of the creation we call this neutral material, Cosmos, super fields, separation between the galaxies, separation between the solar system, separation between the planetary system, and in the body of the Man we call it lymph. In a way there is no difference, transparent, no identity, but when it reaches a point of given time and space and Place and Possession and Position manifests itself as dust on Earth. In a way, the similarity and the work is exactly the same. We look into the cosmos, we see the transparency of the structure, we can see planetary systems, we can see galaxies deep in depth of the universe. We look inside the body of the Man, we see lymph, transparent, and everything else floats in it.

But, what dictates this? And what is the connection in every structure of the body of the Man with the Cosmic Ray? (:20) How does our Soul and the operation of itself within the structure of the cell, creates the Soul of the cell? And then the same operation. New scientists open a cell and they say, "Oh, it's got this in it, and this structure." They open a molecule and they say, "They see this and that." And we accept it. They tell us, "There are this twist and that's canals in this cell of the body of the Man." And it repeats itself. As we see, the creation of the steps to get to this point, itself goes back in understanding the interaction of the fields, Cosmic Rays (CR). In a way, our body, the cell of our body, is decided by the Soul of the cell. But, in conjunction with the Soul of the body of the Man, in conjunction with what we call, the Soul of the planet and upwards, as we discussed before.

Then it comes to a very fantastic concept of understanding, which we have never considered. If and when we understand that we have energy side we call the Soul and we have a physical side we call the body of the Man. When our body, our life, in the STM, comes to its demise, given time, as we said before, like the skin of the Man, every 28 days, the Soul has 50, 60, 70 years, depends on one condition. (:22) And then, what decides the age, the life cycle of the Soul? Is it that we, even as a human being, are a cell in the structure of the work? Or are we parasites to this structure of the work, which the Earth is the subject and the object and we are parasite living on it? We look at a piece of bread, it's there, but when we look at it, we see different things moving inside. It's exactly what we do, humans, on a... we are the parasites of this planet. Doesn't matter what, in different shapes, we are different microbes and different bacteria's, we call us fish, dog, and the rest.

But what is our connection? We go very deep in understanding the work of the field, because even though we found the Soul of the cell, how does the Soul of the cell works with these new scientists calling it "Up Quark", "Down Quarks" and the rest of it. So everything we see has another stage of the Soul of itself within it. We see the sun, Up Quark is the Earth. With it has the moon and other objects on it. There's no difference. We see in this solar system we call the cell of the Man, different planetary system with

different characteristics and how they dictate their position and their strength dictates how this cell reacts, dictates how the solar system reacts. It's all the same.

The whole purpose of the teaching of today is to understand simple. (:24) From inner sanctums of the simple energy fields of the cell of the body of the Man and his subsidiaries, to the biggest galaxies and universes in the structure of the Unicos, in the structure of the Creation, we all are connected. We all stuck on this chain of the bracelet which starts with a big nugget and connects it to the next and then it comes back a full circle to join that big nugget. Does not matter what you put in that bracelet, the charm, star, it's still connected by chain to the next one. Galaxy, solar system, STM, Soul of the cell of the Man and the integral part of this structure within the Soul. Then for the chain to be complete, for the brace, that many wear the bracelet, to be able to lock, it becomes the chain of life. Life in the dimension (D) of the Creation, not life in the dimension of the Man. (:26)

If Man calculates the cycle of his time, 50 years, 100 years, now can you imagine how long it's taken for the full circle of the fields of the Creation with the higher dimension of the fields to start from the Creator, end up with the STM and end up back to the Creator. If you think of it very clearly, the rays of the magnetic field of the Earth emanate from the North Pole and it turn round all the way. It is continuation of life around the planet, it's storms, rain and everything else. Life absorbs energies, converts them to better state and then it goes back through the South Pole, back to the center where he created, where he originated, where it was added to, to create the next cycle. If one understand this, one understand the full cycle, the chain bracelet of the Creation. Where we start with the rays of the Creator in interaction with themselves and the others and losing part, it comes to the point that it comes back to that droplet and back to the origin. It's that huge snowball which we hold in hand and we play with it and it melts down slowly, slowly and it's still a snow till it becomes water droplets into the ground, steams up back in the sky and that's a snowball. (:28) Never ends. Just the interaction with the conditional environment, what we call the Inertia of the fields, dictates how it'll manifest itself and in what size does.

The lower fields do not interact that much in a bigger scale. They have to be losing energies to go step lower to create that, and if they don't have that energy and energy within them is lower, they go step lower and step lower till they become weak enough. Understand, 'weak enough' that can be absorbed by the rays, by the fields, by forces of the Creator. And then, the source is not the strength, the source is that weakness, that in conjunction and in interaction decides what it will be in the direction of the Creation. Cycle of life of Universe. Cycle of life ?? our Creator, not of the Man. But in fact, there is no difference. It's just the scale, the size, the Place, the Position and the Possession (PPP). But there is one common denominator that it connects back, the residual fields back to the Creator and in process in interaction with the others, might lead to creation of the matter, another matter. (:30)

But in essence, the interaction of these tiny fields, the interaction of the planetary system and their moons, dictates the Inertia field of the environment of the Soul. And this dimension has different strength in different orbits and in the structure of the life in the

Universe. When we look at the structure of the solar system, we have different orbits and different atom structure like electrons in different orbits, and according to the field strength we always have one, and only one planet in each orbit. Where in the world of nuclear physics and atomic physics we see a structure of the 2, and then 4 and expansion of that per orbit. This is where the difference between the plasmatic fields and the matter state come into operation. Where we see the difference between the atomic structure, completion of the orbits, and balance of orbits, which gives us matter state Inertia, combination of the fields of the Creation. Where in the structure of the bigger, more energetic, or what we call magnetic (M) field dependent Souls we see one per orbit. (:32) Seeing two is very seldom. Seeing two planets on exact similar orbits is totally very, very seldom. We have not actually found one yet to the eye of the Man. We have not seen two Earth on one orbit around the center.

This is the structure of the plasmatic energy side but when it comes to the matter Inertia side we see double electrons, four electrons and this dictates the splitting of the Inertia field magnetic central structure of the Soul of the atom. This is what, as I always say, the World of Science have not understood. And once we understand this, the transmutation between the Man in the matter state field energy and a Man in the energy state of the matter will become a play, a child's play. We do not see the moons exactly on the same orbit. We do not see planetary systems on the same orbit in respect to their center. We do not see the same with the galaxies.

And if we understand this, then it explains to us, why for example, a structure fit into combination, connection between the energy and the matter state creates life. (:34) Why amino acid (AA) with Man's figure of 43, what we call atomic structure, becomes the common denominator for life in a protein structure of the life of on this planet. Because in the matter state it absorbs different structure, and it absorbs energies from itself that emanates and dictates a new energy balance. And that energy balance, depending on the connection to the nearest structure dictates life, Vertical or Horizontal, a fish or a solid state. And then once we understand this, then we can even transmute from Man to a fish, to a dog, to any animal kingdom according to the field strength of the emotion of the Man. I want to be a dog, but I have to create the emotion of the love of a dog. The emotion of love to give. What is the condition? Why do I become a Man? Why do I become a woman? Why do I become subservient, why do I want to be a boss? It's all emotion which dictates. And if Man understand this, understand the connection between the field Inertia of the cell of the Man, direction of the STM, then Man can be changed itself through the dimension of the fields, the Inertia strength of the, what we call the amino acid, a change. (:36)

In the structure of body of the Man we connect to copper (Cu), so we have the structure of the, what we call the, fat, protein. But protein at that level which connects the distance out, the heavier part, red muscle tissue. And then what happened with the trees? What happened with what we call Vertical People? Just look, you have Amino Acid on 43, Inertia field of the Soul, and then you have a Calcium (Ca) which needs to be to attach to be to. Then look at the plants and the Magnesium, and then look at other structures. But you have to look at what we call the space gap of energy. What it creates that pulse, what

does it create that frequency, that leads to the creation of such a object. But even that has and become and is part of the emotion of the existence of the entity.

So, when we see a Man having an emotion, so has the Earth, so has the Solar System, so has the Galaxy. We see the tantrum of this planet, from its volcanic eruption to its disturbed atmospheric condition. I don't like this and I'm going to kick. So you have an earthquake. But we got used to it. But we don't understand the real structure of it. Just because it's a magma and it happens in this point. (:38) As I said to a classroom ones with the children, do you know what the volcanic eruptions are? It is that boil on your face. That's all it is. Making a new landmark. There is no difference.

But then we have to understand the effect, the transformation, the condition of Cosmic Rays on the structure of the cell of the Man. We eat hot food, we get a boil. We get energies which are of the higher order from the Cosmic Rays, we all become animals, aggressive and the rest. One of the reasons the Man is always been a killing machine, anything born on this planet it just eats it to kill to eat, is because of the orbit of this planet, in respect to its Mother Source, the Soul. And the strength of the inner strength, the field of the planet itself. And these are all dictated by Cosmic Rays.

So, if you decide, if you take the research of understanding further, we'll see every single combination of the fields which Man has now made new names for it, we call it the Up Quark and Down Quarks, is exactly what we have as Earth to the Moon, Jupiter and Saturn, but they all position dictated by the Cosmic Rays of the environment and not by themselves. (:40) This is why they orbit around the same, come to the same point, every so many years or days or whatever, as does the cycle of the cell of the body of the Man. If Man understand the operation of the Cosmic Rays on every single cell of the body of the Man, Man will be able to transmute unconditionally on the energy level, that the interaction of the environment will manifest itself as an object, entity, life of that point, place and position.

We have to understand how the cycle of life completes by the level of the STM of itself. And then, how this dictates the new position for a circle of life. In so many ways, the Soul of the Physicality (STP) of the Man, in the dimension of the Soul of the structure of the Man, is what connects the energy side of the Man back to its Creator. Shortcut, but in a way, getting sucked in the Black Hole (BH) of the Creation, what we call the Creator. Sucks in what is not needed, what is going, that's gone through the cycle, and chews it out as a beginning of the fields, that the ones which are closer absorb, we see different characteristics. And the ones which are further out, they just get by, receive, create conditions, and live ?? upon and amongst. (:42)

In what Man has seen from the cosmos of the world, cosmos of life, our scientists tell us we are in a solar system, in a galaxy, at the edge of the Universe, but I create another point of view to understand about the Cosmic Rays. If you have your Mother standing behind you, and you're so close to it that you can touch and feel her with your back, and you're looking out, you see a vast horizon. Stand by the beach, you are facing the beach and the Mother is behind you. You see an ocean, vast view, and you wonder where does

this end, would I see the Mother? You turn around 180 degrees and you see the Mother. Man has to understand where that child stands. Are we looking outwards and we see everlasting of galaxies and universes, (:44) but if we look inwards towards the STM, won't we see the Mother, the Creator, right behind us? I made Man in the image of Myself, but I am part of making of that image.

Are we looking, are we believing our scientists that we are at the outer edges of the Universe, because we never understood? Or are we in fact sitting within the structure to the Soul of the Creator, that sits becomes the Creator of the others. Then it goes back to the time when a Man thought he is the best and the Earth is the center of the Creation. But all you need to do is to understand reverse condition of the Cosmic Rays in traveling back to the Source and find out from its strength are you at the beginning or at the end, and furthest away as possible. Then love and servitude and its field strength dictates your position in respect to the Mother behind you. Are you left alone in distance, or you are actually touching with a tipsy-tipsy foot, rubbing shoulder, knowing the safety of the Mother behind you, the Creator?

We are looking to understand the depth of this Universe, as because we are sitting in the center of it, and not on the edge of its outer skirts. (:46) Because we are in the center of it, because every Soul is the center of it, is connection of it, is part of, is in principle, the Totality of. Then, if you do that, as you sit, touching the Mother behind you, and you have the field strength as Creator, which created you, Then, what is the horizon of life? And whatever is created in all dimensions of the Universe, is within the reach of the Man, in dimension of the field and energy, as you are standing and looking at the same horizon, as the Mother above.

Now, I hope you understood, and understand the connection between the Man, the Creator and understanding the position, the position of the Man, towards his creation and his created. This is part of the theology of life, and as a scientist, I believe we are more in the center than on the edge. This is why we are so close, but we choose the gap between us and the Creator due to the lack of understanding of the process of Creation. Reach out and see you touch the mother. This time you have to use the strength of the STM, the strength of the Soul of the cell of the Man and not the touch of the finger of the Man.

We go for a break and come back, and I gave you a dilemma. Next time we talk about why in atomic structure of the Creation we sit in singularity of the planet. (:48) But the dimension of the creation of matter state, our scientists tell us we have two moons on orbit one and four in orbit two and more rubbish behind it, that has changed us to understand the science of the physics upside down, in respect to dimension of the energy and the matter. Rick, take us for a break. We come back, we'll discuss more.

**>> BREAK >>** 635 KSW March 26<sup>th</sup> ... (:53).

K- .. Thank you very much for being with us. There are a couple of things which, as part of the process of the Keshe Foundation, and what is happening to us, I would like to, in a way, explain. The session of the tomorrow is changed to, sometimes in April, we inform you exactly when. (:54) As we would like to test something and I'm just waiting for it to be in position that we can do. As usual we make some announcements and bring some points forward.

Keshe Foundation in its industrial capacity and what we are setting out to be, we announced we are looking for experts, people who understand the work of the experts, not necessarily in Keshe Foundation technology, but in their own fields, which can help us and many of you as Knowledge Seekers (KS), already been reached out by us, and you're supporting us in this venture. What we are looking for now, is Knowledge Seekers, who have developed or invented products, technologies, applications, through Keshe Technology, Cosmic Ray, Gans production, energy or whatever, or combination of the knowledge they gain from the Keshe Foundation, and it's technologies and their own expertise. Maybe you have commercialized or trying to commercialize, or you have actually got a working system but you cannot get finance, to other people look ridiculous, but it has the what it says. (:56)

Contact the Keshe Foundation. We are at a position to allow you to commercialize your product. In a way Keshe Foundation will commercialize with your conjunction with you in collaboration as a company between you as the developer and marketing structure of the market, production, management and the rest by the Keshe Foundation. You will be given your own company to run with full supervision of the Keshe Foundation. We provide within internal structure of the Keshe Foundation facilities to produce, to market. You have the, or by accident, or by work have come to develop something which is connected to our technology but you can't get it marketed or you cannot find a finance to market it. We are prepared to look into case by case and give you your own structure. Offices, secretaries, production facilities and the rest.

We finance and you become part of a structure with the proviso that whatever developed, whatever goes, will be commercialized exclusively through the structure of the Keshe Foundation and open to the Keshe Coin (KC) structure of purchase and sale, which means your product can be bought by those who play the game in exchange for us, which means the Keshe Foundation will accept the coins, (:58) convert it to currency of whatever it is, which nationality or which currency exchange in respect to your share. Which means if the product is sold for 100 Euro, 30, 20, whatever agreement is between us and you, you'll receive in currency cash of your location. We hold the balance in

Keshe Coin. Even though we finance the structure of the production, marketing and the rest.

We have already started talking to people, people who are already in the market, they won't use the Keshe technology. We put it, we are participating, we will participate in development and in exchange that everything will be handled in one under one roof and one structure. Those of you who join us in the bigger structure, as some of you have already done and you're operating.

Keshe Foundation as an establishment is already setting up structure of the education, its own school structure from young age till university. Which means we teach our technology from class one in the school which is set up by the Keshe Foundation. This structure is already has started is in the process, by 2028 the first Keshe Foundation School will be operational in a specific position and condition. (1:00) And so we start teaching the technology from the beginning that the children don't need to understand later on what's the problem between one or the other. One of the most what we call reputable structure, educational structures we have started to work with and those of you who join us in bringing your technologies, you join, your education of your children will be absolutely free in one of the most advanced structures. It will be paid by the Foundation as long as it's within the structure we set up.

At the same time, we set up as part of those who join us, the structure of the medical system, the Keshe Foundation technology in health will be applied by those who await us freely in a position and time. This should be operational by late 2027-2028. We are setting the first structures, very slow, very solid. And if you are a developer, if you have developed the technology, you move in the position we allocate. You receive salary as normal, we look after the education of your children and your health through the Keshe Foundation technology.

We are building a structure that at the same time as many of you are aware, self-sufficient through the technology and conversion. This process has already started, it's not something we are going to do. A number of you Knowledge Seekers have already moved into our centers, moved back, you help when it's needed and you know exactly how we operate. (1:02) We have started setting up a very large international structure with the use, with the help of Knowledge Seekers who understand us, but they have expertise when we need, we ask for. And we thank those of you who have spent your time in past months, in helping us to shape this for the future of the humanity.

If you have technology which is relevant and is part of ours, contact us [info@keshe.foundation](mailto:info@keshe.foundation). You might not get a response immediately, but if we see your process, your knowledge, your technology can be a value to us for the process of peace and development of what we call our objectives, we invite you to join you (us), we want you to join us. And, I have said one policy, as many of the Knowledge Seekers, who are now moving in this direction, you don't come on your own. We welcome the whole of the family. It's no use to humanity, enjoy the pleasure of technology, when the inventor suffers to be away from the structure of the family of the life. This is why we set up the

school and the health system. If we accept you, your whole family join us, and you run your own business, on the Structured Keshe Foundation.

Look in what you're doing, what you've done, and don't forget, what you think is exclusively yours, many people could have done, and if we choose one, does not mean that it's your technology what you've done. (1:04) We've seen many similar work between many Knowledge Seekers, and those who stand out, that we see commercialization, with all the manpower in it, is possible, we'll invite you to join us. And those who are around us, they know how it works, because they've already been or going through the system.

So, look in, you wanted to develop something, you wanted to make a prototype, nobody believed you. We believe you, the same as when we invited you to Linz, we said, "Whatever you say, we accept." And we are prepared to. We have set up a structure within Keshe Foundation, which very slowly, we are now going to do hundreds of things. We look at the opportunities, the possibilities, and the spin-off. Be it on the edge of Space Technology, to farming, to house utensils, to be it part of ?? automotive, we can do. You show us it works, and if you have already commercialized it, but you cannot support it, we are prepared to look at.

You have to understand something very clear, Keshe Foundation has established a blacklist. Those who have abused the Keshe Foundation, those who came around the Keshe Foundation, and then we found out, and now they think they have something, you are blacklisted. The same has been done with the Belgians, now the American scientists, and the, what we call, Ghanaians. We are establishing those who are the time wasters and do nothing but harm. (1:06)

If you have developed a system, technology, product, you think it does and you can show it does, we are prepared to look at it, to test it, to evaluate it, and it's because our technology, we believe you, prepared to finance its development. It could be a spoon, it could be a car, it could be an engine, it could be a spacecraft. We are very open-minded as you all know. If it uses our technology, we are prepared to discuss. Send us your technology, what it is, and or the product, what it is, you're trying to market, you're trying to manufacture. We look at it, we have all the facilities set up to set such a thing in motion for you. We are doing it very slowly and very surely and I'm sure within the next, as I said, weeks and months to come you start seeing products of the Keshe Foundation on the new logo which cannot be copied, none of you can replace it and the structure you will see from agriculture to electronics and to automotive, to Space Technology, step by step at a time.

So, you've been with us so long, you have something, maybe it's time to join us, or bring it in forward to change your own lives, and we are prepared to back it. The finance, it's manufacturing, it's set up, but all be done in one location, not anywhere else. We have set up what we call the... like, very much like Silicon Valley. Structure, massive area where it can absorb new technology, and we are working on it, step by step. (1:08) We invite you to join us in what we call, Cosmic Ray Valley of the humanity. We are blind to color,

race and religion. But we are very, very, very careful about behavior of the nations. If there are any questions, we'll try to answer.

Q: ... I'm spending a lot of time in trying to understand the world as Mr. Keshe is teaching. And I have a question about the physical Soul and the emotion. So as far as I understand, the physical Soul is creating the emotion, (1:10) and this link between the Soul and the physical body that makes us able to do the things we do, or to bring things into the world. But on the other hand for transmutation I understand you need to eliminate all the emotion or Mr. Keshe sometimes you say it's a very specific emotion that's necessary for transmutation. And so I do not understand this well. Is emotion something to be eliminated or something precious we need to create?

K- Emotion is a cornerstone of connection between the STP, the physicality (P), and the STM. They cannot destroy it. But, you should be able to understand how each emotion is created. And, we are in charge of it. The best is, you know, you cry, because you're happy, out of emotion of joy, and you cry because you're sad, out of emotion of, could be loss or anything, or what is not accepted to me. Physically, the... what you call, physical manifestation, could be the same. But, the difference between the emotion of happiness and sadness, is not very far. It's the two end of the same magnet.

So, this is... it's the only thing which has no physical manifestation. It is created out of interaction of fields. It's what I call, 'Gans's of Gans's.' When we produce Gans, we use a material to produce this dynamic plasmatic liquid. (1:12) And then, when we put Gans's of Gans's, two Gans's together, to create a new Gans, that Gans is actually totally manifested out of energy, not from physicality. Emotion is that. Emotion has, especially emotion of the Soul, has no physical connection. And that is why interacts with physicality very direct. But the emotion of the physical life, has one side connected to the physical manifestation of the Man. We cannot destroy emotion, because it is non-physical manifested.

But, if you get the interaction of the emotion of the STM, with the interaction of the STP of the Man, which becomes the Gans's of the Gans's of Gans's, then that emotion becomes dimension of the source of physicality, in manifestation of energy. What does this mean? You are... it's the best example of it. Behavior of the child brings emotion of sadness to, let's say, to the Mother. It's not what can I accept physically. But, the Soul has an emotion, which understand the emotion of the sadness of the Mother, but you understand the emotion of the child. Then these two emotions have to interact to find a balance. And when, it's more or less what I call, the Gans's of the Gans's, that becomes a judgment, because the new emotion is made, that you don't want to destroy the child, but you want to make sure that you don't make such a mistake again, to create such a mistake. (1:14) So, now, that new energy, that new emotion of the connection of the two, in releasing energy decides that you get a cancer on the left side, if it's a daughter. You understand?

So, the energy is different, and that energy difference creates a new dimension. It's very much like Corona, as a virus. On its own it does nothing, but as an energy, when it

interacts with the Calcium (Ca) of the body of the Man, it solidifies it. It creates a new condition. It's just like you put the food from the house, or from the room, into the freezer. You just change the environment. The Soul of the Soul, which decides that emotion creates that condition. So, we have to understand where the emotion comes. And usually, usually what we see, the, what we call, the Gans's of the Gans's, of the emotion, the interaction of the two emotion of the STM and emotion of the STP of the Man, that leads to a change in a physical dimension, it changes the environment of the body of the person. "I don't want to exist." Or, we see that when we fall in love. The behavior is of the interaction of the joy of life, with the STP, because it's a physical dimension. But, the STM has a reference in loving or giving. And when these two match, we do all stupid things in the physical dimension. You understand? So, we have to understand, the cornerstone of life in a physical dimension, is emotion. We cannot live without it. We created it, we perfect it, but has a barometer, has a balance, which sits with the STM. (1:16)

Q: And, and if we find that emotion that makes transmutation possible, in a way it's also...

K- Yes, yes.

Q: ...affecting the body, because the body will lose all these tensions and blockages and stuff, we create from difficult... ??

K- In a way we create that, if we manage to increase that Soul, what Gans of Gans Soul of the emotion, emotion out of the two Souls, then we create a new environment. The way we created the cancer in the cell, we create an envelope, that, that envelope is independent of Place, Time and Position, but with the emotion, you can move that envelope. I always say, transmutation is the transfer of energy, transportation is transfer of physicality. And, as we always said, you've seen in systems, vertical systems, in Linz, in the Exhibition. The present world of science wants to move one electron, and they spend billions of dollars in it, trying to move a part of electron, an electron or whatever, or an atom. But, if you make an envelope of fields, doesn't matter what's in that envelope, as I've said many time. And that, because it's energy, you can transfer it through telephone, the way your sound does. You understand? But, you have to create that emotion of the Soul of the, what we call, Gans of the Gans's, or Soul of the, of the two emotions of the, two Souls of the physicality, and the STM, that you create that envelope. (1:18) And then that envelope, because emotion, it connected to the physicality, dictates the position. And then the STM becomes a carrier of energy or the supplier of the energy for that. You want to be in New York or in America with your sister, that emotion, the strength, the love of the sister in America brings you that emotion in the Soul that the new dimension, the way it created the cancer cell, now creates a cell or an extra ?? love fields that allows you to transmute and then the STP dictates the Position, the Place and the Time.

Q: So in a sense I have to know the places I, where I want to go?

K- No, you don't need to. You don't need to.

Q: I can just love them without knowing them and then I can get there?

K- Yes, yes.

Q: So I can love the Lyra star system and then I can get there.

K- Our Soul knows what I call the whole GPS of the Universe. It's very funny. It's not like the Americans which in past few days they played with the GPS and ships are in places that never ship could be there in the middle of deserts. You can not place with the GPS of the STM, which is connected to GPS of the Soul of the Galaxies and Universes. We... there is no way in the Universe that we can not manifest, when we travel in the dimension of the energy, or what we call the Soul of the Creation. Because, once you arrive, the... what we call, the Inertia magnetic fields of the Place, Time and Position, and what you carry, dictates how you manifest yourself in that position. (1:20) But you don't die, because that has dictated, this is a condition of survival in this position.

Q: You talk of Place, Time and Position?

K- And the Possession. What you carry. Your deeds, your conducts, you understand? You cannot travel first class when your pocket is empty. If I can put it that way. So we 'pocket' into the life cycle of life. And I .. explain this in a very philosophical way. But if you understand what it means, it'll answer a lot of theology questions in life. The size of the energy level, or what we call the package of the STM, is fixed for all on this planet. The amount we kill, we take from it. And when it reaches to a point of reserve that it cannot go any lower, our physicality departs. You understand? So, if we understand this, it's not the elevation, is what we take out of it, not by observation of how good man you are, how charitable you are, your thoughts is the biggest strainer on your Soul. You understand? So, we actually decide our death, or position of our Soul in the Creation, by how much we've taken from the reserve. (1:22) You understand?

The vegetarians kill more Souls than the meat eaters. You understand? And that taking makes you don't have any energy left, because you keep on taking more and more. So, they become humble, they become softer, the rest of it is because the Soul is running out. But you take a certain spectrum of the energy from that level. But it still has a certain position in respect to the rest of the dimension of Creation. And we... it's us who decides how much we deplete. Every thought takes something, every action takes something from the bank of it.

And this is why, when you tap in the, what we call, the Cosmic Ray, the energy of the Universe, that you don't destroy anything, and you live by the Ethos of, what you call, Zoroaster, by knowledge of Mitra, then you don't deplete your bank account, you live for thousands of years, because you haven't destroyed. Talk good, do good, act good, think good. And all of it, when you... you know when you rage, somebody has done something wrong, or you plan to do something to someone, how much you get exhausted, because

all your time goes on it, is this is what you're taking from the Soul, you don't need to kill an animal. ?? you Pay for it.

Q: And did you teach us already how to make the Gans of the Gans's?

K- Yes, it's somewhere in the teaching. But you have to understand what to do. (1:24) In the operation of the Keshe Foundation Space Technology, in a very near future, we will produce the Gans of the Soul of Humanity. And one, we already have access to it. And our research centers, one of the steps in next couple of years, is where the connection with the, what we have, the new Game, will connect with the STM, as it's One Soul, One Planet, One Nation. We have the technology (T), but the Knowledge Seekers have to reach the maturity to understand.

Q: So, for your project to offer a mode to sell the stuff we invented, do you want the whole product, or do you want in the first place the concept of it, the blueprint?

K- If you... we prefer something which is already physically there. We see the sample, we look at it. We... we, as I said to Knowledge Seekers, we have not wasted the scent of the Keshe Foundation in developing technologies and facilities. But we learned our lesson, we keep very quiet. Need to know basis and we operate that way. But sooner or later you see the new logo of the Keshe Foundation in products which will become worldwide operational. A lot has been done, a lot of Knowledge Seekers put their lives onto it, and they're working in the background. Some of you come in, you are participating in development of it, and I thank all of you for keeping the, what I call, the secret. We need to do it this time, this way that we don't get touched. (1:26) And we are open and many Knowledge Seekers, actually non-Knowledge Seekers, we have given opportunity recently to join this structure. We think they can be a part, they will understand.

Q: Thank you very much Mr. Keshe.

K- Thank you very much. If you have anything, send us. Don't wait till we inform you tomorrow. We are very busy and at the same time and we're setting the structure to look at it soon, in next few months, a division will be set up for new inventions and products that you can offer and we look at it and we see if we have the opportunity to finance it, and to build it, and you'll be the beneficiary of it. The rest comes into the structure of the Foundation for the work.

Q: Yeah, we'll finish the building first, and then we come.

K- Yes, maybe sometime you have a concept, you put a lot of time into it, but when you come to us, we see the flaws, we see it's been done, or needs a little bit of connection for you to do it faster. We are open to everything.

Q: That's why I ask, whether you want to see the concept first, and maybe say...

K- Send us the concept, info@keshe.foundation, and we look at it. There is somebody I've tried to get in touch with, I've lost the connection, the contact. It's the father of the two girls, which if you remember in Corona time we helped with the tooth. If you're still listening to us get in touch and go through the channel through Dr. Kern. I'm looking especially for your support for part of our work. I remember I received a communication but I can not find it to go back. You live in Switzerland and you know what I'm talking about. If you are, please get in touch, we are looking for your support. (1:28)

Q: Yeah, the friend with whom I do this is also from Switzerland, so I can ask him, he might know him.

K- Yeah, I think they listen to the teaching, Dr. Kern knows. I've been trying to reach. If you have anything, let us know, we look at it. We are there to create the opportunity. Because at the moment the technology is so different, that everybody, and a lot of people are not prepared to support it, and becomes a struggle for the Knowledge Seekers. Now we have the opportunity to support the Knowledge Seekers to bring the technology to use, to do a work of full fullness. And it's very slow process, it won't happen tomorrow. But we're setting the structure for it.

Q: Thank you very much.

K- Thank you very much indeed. Any other question?

K- ... I have to finish by 11 o'clock. I have a meeting, urgent meeting.

Q: ... I have some really good news. We sorted out the bullies' eyes. And in essence, remember when you said about whether you should be left or right-handed? It turns out that it was a psychological problem and he was in a way learning whether he was going to be cross-eyed, or he was going to have straight eyes. (1:30) He went through that kind of understanding. Now, there's only one question that I have. When he looks really closely, the right eye just goes like zoom over to the left hand side and he's looking with the left hand eye. So what part of this, does the right hand side of the brain, where is it, should I try to...

K- Speak to Dr. Kern, we don't discuss these things on the teaching, you have to speak with the doctors, go through Dr. Kern.

Q: But it's just psychological, I thought we were allowed to speak about psychological.

K- There is a big question mark on that. Please go through Dr. Kern, because we're trying to keep away from that side of the operation where their facility is there it can be set up to be able to...

Q: I'll be able to handle it myself. It's just about the right side of the brain. What part does that play in someone's development. ... I thought there ??

K- It is the same. You see that the both sides of the brain work in tandem and you cannot blame one side to the other, or say what side does what. You have to understand more in depth the operation between the two and what is the reason that it does this? (1:32) It's the energy level and then there is a mechanical failure and there is an emotional failure. You have to find out.

You see for example in the world of medicine if with to do with eye, if you get a hit from right in the back of the head when parallel in line with the eyesight, what we call the eyes, you get disturbances in the vision, which is totally irrelevant, but now we know it is. And what do the doctors do? They give you a curtain, what you call it, a glass, to compensate for the change in the damage in the back of the eye. Your eye is not touched, it's just that the back of the eye. A lot of accidents people with a head back head injury change they have a change in their eyes. And doctors in different ways over years have developed different technologies to compensate for loss of vision through the dark part. But what is got the back of the head to do with the with the vision. This is how it's very much connected, you have to understand a lot of things to be able to assess it directly.

Is it the structure of the hemisphere of the brain and the shape of the skull? We see this what you're talking about with the Chinese. If you lived the way I lived in China, it's impossible not to notice what you're saying, but that has become part of the work, because the shape of the skull of Chinese does not allow capacity of two eyes to focus in one position. You sometimes go crazy sitting in front of the, what you call, Chinese television, and watch the presenters. They look at you with two and then one moves in and it locks, you see. But how is possible? It's got to do with the shape. (1:34) I've watched this and I had to understand it. So, you look at the structure of the skull, you look at the structure of the brain, where is the pressure and where is the shape of it, that creates such a position. It's understanding the physiology of the skull, more than understanding, and then blaming different things for. You have to understand why and how and what part is emotion and what part is physical.

Q: This is, actually, that, that's all I really needed to get me through.

K- Thank you very much.

Q: Thank you so much. Because he's been through an emotional episode in nine months without his mummy. So there's, it's emotional and that's why I've been able to get him out of it, to relearn ?? him.

K- We'll look in a lot of other things. Talk to Dr. Kern if you need some assistance.

Q: Thank you.

K- Thank you very much... Sorry, something I forgot to tell you. One of the things that is getting worked on by those who are responsible for this part, we're trying to limit the April session through a different way of connection to the Wellness Center, or what we call to our central system. In the April session, if hopefully everything is done according

to what I've been told, you will not hear anybody else, so we can directly interact with you during the session, without anybody else, you are on your own single channel. (1:36) This will be set up through the, what we call, the Enlightenment Game. And we do not know the limit of how many of you we can accommodate up to. But at the moment when we go through Zoom, we will not be using Zoom. We'll be using the Keshe Foundation KF connection in the Enlightenment Games. They are trying to register if you want to be part of the April session. You have to enroll through the Enlightenment Game. With the connection with the KF, it'll all be set up. We explain to you the day before, the week before we do it, that you will be on your own channel. Which means, for example, up to now many of you got disturbed with people sneezing, going to sleep, snoring and whatever. From now on, is one to one, it'll be one to one. And we want to test this for a number of people, and not a larger scale, maybe 30, 40, 50 people. And, with that way, we can transmit the, what we call, the exact forces to individuals. This is a way, when in the future, 10,000 people with the apple come online, they want to have the energy of the apple, they just go to that channel for the energy of the apple. So, this is part of the process you will have in April session.

One thing which I would like to ask you, or tell you is that, April session is for addiction only. Because when we did the addiction session, we had a huge success with it, a lot of you lost a lot of your addiction. If you lost addiction, don't come in, you can get it back. We know this because you reset, the reset. (1:38) If you are addicted to anything, and the addiction goes, preset your mind to that addiction, and you have to come through the, what we call, the Enlightenment and Peace Game. As I'm aware, and a lot of things happening, the Enlightenment and Peace Game will become a source of a lot of things for Knowledge Seekers in the future. And this is the first time we are trying it.

So, if you are registering for what we call April session, or what's supposed to be tomorrow, one of the delays is that. That you do not use Zoom anymore. You'll be given, you go through your own channel, through what we open up to you, we give you the instruction when the time comes, you go through the game to reach to the session. And the first session, we want to go back and test, re-confirm the addiction. And we'll set up everything from our side as usual, and it'll be one to one, you hear no one, it's just you and the system. And is irrelevant how many people are on the system. You only hear us at the beginning, and then the rest is in your hand.

Okay, any other question?

Q: ... Hello Mr. Keshe, I've played the Plasma Game and earned 2000 fCC. Does this mean that I have earned my two Keshe Coins? How can I use them? I want to buy a Keshe Coin Wallet and other Cosmic Spring products with them. Could I do that now? (1:40) Thank you.

K- You have to wait till we finish the structure. You have to earn two full Coins. And when the Coin comes depends what is on offer for exchange for Coin. And we explained this is... just give us a few more weeks, then this is fully done, then we do it. Because the CC Coin and a KC Coin have to be set up, connected properly. This is the best... there

was apparently a hiccup. Once this is done completely, then you exchange the Cash Coins to KC Coins, KC Coin which is a Keshe Foundation Coin. But I'll tell you exactly how it works, in detail, how you can exchange it. You can only exchange where the structure, the companies accept.

If you go back on the game, for the registration of the play in the game, there are different levels, individuals, companies and governments. So, as we transfer 8% of the transition from CC to KC, it'll be allocated to the government. And it goes to a special account, the Coin is produced for them and, as I said, we pay the government, where you live, you're resident of, not where you carry passport of. And this is all, should be done in next two, three, two months, three months, hopefully. And there's a lot of work getting done on this. We're trying to ?? solve some hiccups. Even this morning we were working on it. Then you can exchange where it is and what it is. (1:42) Because, when you buy Keshe Foundation Coins, KC Coins from the game, we have to exchange between the two. And to hold, that we can dispose of those to pay our wages and expenses. And this is getting done. I think fCC is a very small amount in doing it. We'll publish a chart, how it works, how much you need. You need a full Coin to exchange and you get 90% of your CC to KC.

And there will be new products in the next few weeks that you can order and pay by that. In a few weeks time we, in some positions, we deliver agricultural products and other things that you can buy bitcoins and gradually we go that way. Just bear with us a few more weeks. The Game, it's getting tested. As you helped us from January till March, now is the next stage of testing, before we go worldwide, that everybody can use it.

R: Hey, Eckhart's put a scale in here, on the...

K- Can you put it on the screen, please?

R: Yeah, okay, let me try to copy it here... And to be clear, whatever Cash Coins (CC) were earned before the version 1 of the game started, they don't count toward the version 1 and the actual playing of the new part of the game, correct?

K- Yeah, because that was, 3 months was testing to find all the failures and the problems, as we asked you to participate. (1:44)

R: ... Okay, this is the scale that Eckmar has suggested. So, it mentions, milli, micro, nano, pico and femto. So, in aCC is atto, which is  $10^{-18}$ . femto is  $10^{-15}$ . Well, femto is  $10^{-15}$ , and goes up to pico, which is a thousand times more, and nano a thousand times more than that, micro, which is a thousand times more than that, and finally milli. So, I'm not clear, and if they're talking about a Femto Coin, is that a, what is it, a trillionth of a penny, or something like that?

K- Because you have to understand, a Coin is a thousand Euro. A 1,000 and then if you go  $10^{-5}$  you become to 1 cent Euro. You understand? You have a Euro.

R: Right, (1:46) so in the game we're at  $10^{-15}$  which is 10 gradients more just to get up to...

K- Femto.

R: Yeah, so there's no human way of making a penny out of anything.

K- This was at the beginning of the game, this was a test trial, we have put it that way, it was just people trying to help.

R: But that's the way it is now, right now in the Game as well.

K- It is getting done, once we are ready, because we have to set up a lot of things, getting set up in the background, so we... it's not just to play one game and just make two thousand, what you call it, two Coins a month and walk away. This is a... and hopefully, developers, when they come in, they make the game much more complicated, much more thinking wise, in our way. But, it's set up once it's fully operational, because there's a lot of things needs to be set up still. For two Coins a month should be doable. The system is... ?? of that robot, cannot take over and just make money, you cannot go mining.

R: Right. So George, who has 2000 fCC, which is more than I think anybody has...

K- At the Pico level.

R: That's... yeah. That would be at the Pico level of Coin, which would be pretty tiny wee.

K- Which is tiny wee, but this will change once the system is structured. As I was explaining earlier on today, we have to... It's no use winning the game, collecting Coin when you cannot do anything with it. Keshe Foundation can absorb some of the Coin, because the Coins we buy from you, we become Central Bank. You're given the Coin, you pick up the Coins. (1:48) But then we have to cash these Coins, where people come as investors to us, and they want to buy the Coin. And we sell the Coins, you collect from the Game, to the institutions. You understand? And institutions and companies or whatever, know that there is no variation in the currency, so it's always stays at price, because everything is fixed to its position, and this is where the change will start to come.

The actual, we are, if you notice, we don't promote the game as such, which we can do everywhere, we're just waiting for all the teething and all the problems sorted, in the background, it's only been going for a week or so, and then we develop it further, and then within next few months we go worldwide with it. This is why we connected it to you become part of the Keshe Foundation, once you register. And it's not a Cryptocurrency game, as we saw this week, into what you call it, the Black Rock launched the new Coins to do with nuclear weapons, or nuclear technology, which is unheard of such a thing, but we know what's in the endgame they are doing. But this is for a change of social

structure. Because governments, in maybe a year, two years time, use the Keshe Coin for internal payments, because it's a stable currency stands.

R: Ekmar is saying, "Can you allow me to speak please?"

K- ... Okay.

Q: ... You have to understand that with each level, (1:50) we have nine levels in the game, you increase what you find in the treasures and collecting the items is increased by one order of magnitude. So right now you are all on level one because we started all fresh. Everybody is on level 1 and gets aCC's, that means atomic. So if you reach level 2, the next higher level, then you find femto, fCC's. The same amount when you find now 100 aCC's in a bucket on level 1, and you find the same bucket on level 2, you get 100 fCCs. Level 3 you find pico CCs, and in level 4 you find nano, and micro, and milli, and so on, till level 7 when you find milli. Level 8 is the last level where you can really find fractions of CCs, real CCs, but there is a level or a border of two and a half. So you will not find more than two and a half CC's per month. So otherwise you can earn more than two and a half thousand Euro per month and that is not what we are aiming for. We don't make you a millionaire, but we will make you a comfortable lifestyle.

What we have recognized right now is that a lot of people are registering on all three servers we have. (1:52) So they try to cheat a little bit so that they can earn instead of two and a half thousand euro, seven and a half thousand euro. So we are working on that. This is not possible when you have registered on one server you will be declined in all other servers. It's not yet done but we are working on it.

So bottom line what I want to say is yes you are playing for almost nothing where aCC is like you said here 10 to the power of minus 18. This is very little. But like Mr. Keshe said at the beginning, you should not play for the money, you should play for the enlightenment. The money is just a nice to have add on, during the next months and years, you will gain really cents and then later Euros and you can make a living out of that game. And age doesn't matter because even my 10 year old son can make as much money as I can with 66 years. Because playing in a browser game is not really depending on an age. Starting with whatever, five years, you can play already this game. And this game is not about killing or taking away, this is about collaboration instead of competition.

So there's a lot to come, especially what Mr. Keshe said with the KF rooms. I think they will be ready next week, that we can transfer plasma fields over these KF rooms. (1:54) So do not look at the money and think after whatever seven days of playing you have already thousand euro in your pocket you have almost nothing. That is a zero and then comma and then about 17, no 16 zeros and then 2000. That's what this guy has earned in these few days. That's almost nothing because on level one we are playing about almost nothing. ACCs, that's the currency of level 1. And level 2 is femto fCCs. And level 3 is Pico, it's pCCs. And then nCCs, mCCs, yeah? Micro, and then Milli, mCCs. And then it's

really Cash Coins, the next level, level 8. But until you have reached level 8, maybe I sent this link here from the blog, control C, control V, now it's in the chat.

After this meeting, I have a meeting with three Germans, maintaining the Wiki and the Blog, so that will come also live next week, at the beginning only in English and German, but we are looking for others to translate it in Chinese and Hindu and Thai. So, when you understand that in every level you need a double number of tokens to collect, you understand that level 8 is something to reach in about whatever, three to five years, you know, if you play daily. So it's not something which will happen next week or next month. (1:56) Realistic, if you are playing every day, and very much, you can reach level, say, three, in about, at the end of the year, nine months. So that is a realistic time frame for level three. The interesting part on level three is that, on level three you will be able to download a certificate from the game. With that certificate you can create your own environment, your own cocoon. So that means you download the game software from GitHub or any other public place and with the help of this certificate you become part of the ONN, the worldwide private VPN network from the Keshe Foundation.

If you recognize, for example on world, we have maybe 50 or 100 players at a time. And sometimes it happens that when you arrive, somebody else was faster and was picking up the item and you did get nothing. This cannot be happen when you have created your own environment, because then you play only with your family members or if you are alone, you play alone in your environment. So nobody can take it away. It's different with the PMUs which is only visible by a player. This can never ever catch by someone else. But all the other items are shared between all online players, and first come first serve. (1:58) When you imagine that maybe a thousand or four thousand players are playing on one map with 195 countries this will be very crowded because in every country will be three or four players.

So to avoid this problem we allow starting level three to download your own certificate, become part of the World Wide VPN and create your own world at home on your local computer. So you are protected against or isolated by the others. But that doesn't mean you cannot communicate with them. You still are connected with them over the VPN, over private emails, chat, the KF rooms, which we will introduce, and so on. Did that make it a little bit more clear?

K- Thank you very much, very clear. We got to realize that, as it's been, many of you have been buying Keshe Coin. Now, once this start going in next few weeks, you can use these Keshe Coins in purchasing across the systems which comes up, programs, sessions, products. So what we see people even seeing in certain countries move to purchase Keshe Coin to secure investments. That means now you actually physically on a KC receive in your Wallet, it's in your hand, it's not what was before, and those of you who bought the Coin from us in the past and you're holding in reserve, we transfer this through Wallet into your Wallet, which means it's yours and it stays yours. (2:00)

And as we said, we keep an eye, we as like Eckmar said that some people are trying to register in three places. We try to monitor that your Wallet cannot be stolen and if

anybody steals your Wallet we are aware of it we replace it it's not worth stealing from us because we can we find a way to catch it. So you can or you should never lose you'll be able to lose your Coin your assets. And those of you bought Wallet from us and for the Coins from the Foundation in past years and you're holding Coin for you, we transfer these into Wallets. You become in charge of it very soon. It's not with us anymore. And you can transfer it if you live in a country with a volatile currency. Change into KF, stay steady, worth exactly the way you bought compared to the other currencies to come back into. Brings stability in investment, especially for governments and big corporations.

One of the reasons in the future, I've been in business, I've made more money in currency exchange, in paying my bills two months late, taking a penalty, but I made 20% in exchange rate. This we take out of it, your thousand stays thousand and stays guaranteed in that, within the structure of the Keshe Foundation. You cannot lose and this is very beneficial to companies, that's why we open the Keshe company side. The governments, with the volatility of pressure of the other countries, trying to play with their currency, and we have enough Coin to support the whole of humanity for years to come. We don't need to mine, we already mined, so we sit on it. It's for the governments and the individuals to get into it and make a little, what you call it, progress of development of it. (2:02) Once the whole thing is complete, in next few weeks, then you see us promoting the technology very rapidly, the Coins. Thank you very much. I have to go, I do apologize. I have an important meeting, I have to attend. We'll see you next week and do apologize if we can't answer all your questions.

R: Yes, the time got away from us there, so thank you Mr. Keshe.

K- Thank you very much. See you next week.

R: ... (2:04) I've got a notice here from Universal Council to read... It says, "We, the Universal Council, invite the Keshe and Universal family, present on the Earth, in unifying at the Soul level every time, every day, at 9pm Central European Time, or Central European Summer Time. Giving from our field strengths to enlighten the Souls of world leaders to negotiate and sign the World Peace Treaty, pledging their nations to everlasting peace on Earth and throughout the Universe."

**635 KSW – March 26<sup>th</sup>, 2026**

**End**
