

640th Knowledge Seekers Workshop April 30, 2026

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

Denied existence of Soul - only live in P; Come from Rays of U - Sun small part; Sun feeds P & CR feed STM; Change energy into gases - gases into matter; Leaf - Nano converts CO₂ into C of plant; CO₂ becomes wood - in body becomes organs; Earth's atmosphere - spectrum of strengths of CO₂ isotopes - Inertia, gravity; Keep separate - like oil & water; Green plants in oceans; Compression of water and light - decide plants; Leaf & body of Man - compression converters - compress energy fields - get what need - transfer into matter; Experiment - soil not convert into tree - comes from CO₂ gas; Sun's fields convert to C - become P; CO₂ & Inertia of Earth becomes C₁₂ - P of tree; CO₂ converts C₁₂ into C₁₄ & C₁₆ - part of CR released in body; Why dream; CO₂ allows C₁₄ & C₁₆ reach Soul connect to U; Breathing dictates dream; Purified C₁₄ becomes purified C₁₂ - closer to Creator - controlled through emotion; Emotion tells us not to do wrong; Energize our P by C₁₄, C₁₅, CH₃, CO₂; C reflects lights of Creator and matter; H - confirmation of life - connection to Creator; Life comes out of Inertia - dictated by energy of emotion - reflection of P on STM; Man made like Creator - from emotion to P; Humans same as trees; Inertia connection between matter state light & Cosmic light; KF brought enlightenment about CR to humanity; KF systems - energy of Creator converted to CR - to CO₂, to P, and back; One drop - create fish - one fish creates Creator; Life made through H - interacts with itself becomes all elements - reflections of Inertia; Why Mass, Weight, Density, etc; Light reflected in mirror - means can bend; CR mirrors - create Unicos; Man carries essence of Creator; Teaching - thousands years understand; Understand creation; discover weakness through emotion by gold; Created gold to create U - reflects STM; Gold makes greed; Gold created in Beijing - just beginning; No dynamic reactors in U - converted by pressure; Understand where & which Inertia needed - confirm existence; Man made Creation difficult to understand; AA - O & N connect to planet - H & C to Creator; Same everywhere in U; H & C - common denominator to Creator; Replicate life - spectrum of C isotopes - C & H energy fields; C colors - affects emotions & behavior children; Inertia & energy - connects to STC; Sugars; Key to psychological conditions & emotions - lack of H - wrong bandwidth; Why cultures behaves differently - Inertia of Place, P & P - conversion of C in that area; Mono-energetic beings - closer to Creator; Life on Moon & everywhere because C & H; Emotions closer to Creator than matter; Man reflected wrong energy; Man converts CO₂ to internal organs & intelligence; CR create DNA - dictates RNA - M field emotion of cells - teach in future; Encyclopedia of Knowledge of Creation; No temples - understand Creation; No time in U; Soul of Vertical People; Man chose not to reflect Creator; Breathing takes you to Creator; Create Inertia through C; All races from Africa; Genes - different field strengths - millions years in Africa; Land made up of different Inertia strengths - why different races; Create everything through fields; Produce nuclear materials; Create through wish; Live life of pure emotions; Man not proud of his Creator; Transmute through breath control; Hold CO₂ longer like leaf does; CO₂ absorbed by Soul connects to C₁₆ - transmute; Key factor - C₆ & C₈; Center of C - without electrons - flat energy; Teaching past human understanding - emotion of cell; Be detached; May Monthly Flight; KF products delayed; Creating pure seeds; Others obsolete T; Need help

from experts; STM enters fetus about 12 weeks - becomes controller of all cells - before individuals not connected; If don't become fully functional - miscarriage; No single methods to overcome fear - all are different; Find own strength - what to strengthen; Wellness Center; Old people - fear brings pain; Eradicate fear with energy not Gans; Change skin texture; Hide research groups - safety; KS not show publicly; Researching emotions; Fear has frequency - resolve with CR - new products; Emotion and reaction to emotion; Gans's - becoming more complex - understand more; Create Gans mixtures - personal - use feedback; Control emotion of P & STM with emotion of STP; Some Romanians banned from Game; Not use sexual alchemy for transmutation -easiest way - emotion; KF Store - Training and Support package; Gans Plasma dilution; Air pollution - affects health; 5,000 years to evolve new chemicals into body - individuals 40 years; Emotion affects bandwidth of C absorption; World of money; American government 2 directional policy; Americans & British create drought & famine in Iran - destroyed systems; British starved 15 million Iranians; Afghanistan heroin trade; British King visiting US - expect trouble - run and owned by Rothschild's; Earth - heavy for visitors; KC - offered to 4 governments - bribes; KC - main currency without inflation; KF to Shanghai & German stock markets; KF Apps; See change to humanity through; Collecting seeds and eggs; Work during dream; Why backed by Euro; Plasma Association of Romania; Global communications - CR T; Control and convert light to energy & matter; Produce gold; Markray not expand into China - user of T developed in China; Situation between Iran & America influencing our work; KF is real Space Agency.

ENGLISH TRANSCRIPTION

(:13)

K- Thank you very much, good morning, good day to you as usual, wherever and whenever you listen to a series of Knowledge Seekers from Keshe Foundation Spaceship Institute.

We go back to what and where we started, and bring in a facts, which has been in front of us, and we all have been aware of, and we have seen, we observe on a daily basis, as part of our physicality (P), but we deny his existence through confirmation of his Soul. What does this mean? (:14) We consider our physical body, but we, as we spoke before, we come from the rays of the Universe (U), we don't come only from the rays of the Sun. Rays of the Sun is one of the participants in the construction of the physicality of the Man. What comes in the dimension of the matter, connection, conversion, becomes our physicality, which is the dimension of partial, the fields of the, what we call, our Solar System (SS), rays of our Sun. And the other which makes our Soul, comes from the dimension (D) of the Universe. Our Sun cannot produce that much, to and make connection with our Soul. Because our Soul receives energies above what is within the limitation of the resources of the physical conversion. In a way, our Sun is a amplifier of its own fields, but does not work at the strength of the Cosmic Rays (CR). So, the Sun feeds our physicality, and the Cosmic Rays from the Source feeds our Soul. So, we live a

two life, we have two tenets in the same physicality, one is our Soul and one is our Spirit, or what we call, emotion of the Man.

But, how do they come together? We have denied, we have not understood, or partially we understood, the process, and we are on a path to understand more about ourselves, more about our creation, more in how we are connecting the two together without knowing. (:16) The line of connection is the Hydrogen (H). The line of communication is Carbon (C). And, it gives us the physicality. And this is the beauty of it. How it hides within the same structure. How we change energy into gases, and then how we change the gases into matter, is understood by Man partially, but how it was absorbed, never understood. With Nanotechnology we introduce, as I said, if you've been in my lectures around the world, I usually look for a leaf, and I explain to you with a leaf of a plant, if you look at one side of the plant leaf, and then the other side, the back of it, there are two different colors, there are two different filters. But these are Nano materials, create their own Magnetic (M) fields, and what is the balance between the two, is what Carbon the plant absorbs from the atmosphere.

All the CO₂'s are not the same, the CO₂'s are different, The CO₂'s are a spectrum of difference, and the gap between the two leaves, two green parts, decides which isotope of CO₂ I'm going to absorb, and what it is, and how it is. This is how the woods, the human body, is created. When we have a leaf, or a tree, at night, When the CO₂ is passing, which is huge concentration of CO₂, in the atmosphere of the Earth, the plant decides what I'm going to... which fish I'm going to catch. That fish is what I am, what I like to eat. (:18) It's like you put a cow, the deer, the donkey and the, let's say, giraffe, in the same fields. Each one eats certain part of the grass. The other one all eat the same (?? they don't eat all the same), and they leave something for the next one.

And this is the way the fields of the atmosphere of the Earth works. And, due to Inertia, due to gravity, due to everything else, these isotopes of CO₂ are like layers on top of each other. It's like when you put a oil and water, they separate it. This is why we only see certain type of trees on top of the mountains, and then we'll see a tree line on the top. There is no more vegetation, because we don't have vegetations which can work on that level of higher strength Carbon CO₂ level. And as we come down, we come to the rivers, we come to the, what we call, oceans. We see the change in the CO₂ absorption and conversion. We see plants in the water, in depth of the oceans we find greens. There's still a CO₂ in there, but the compression changes. Compression decides, compression of the water decides, compression of the light decides what is absorbed by the plant to be there, for life to exist.

What we call a leaf, a body of the Man, is the compression converter. What does this mean? It compresses the energy fields, what it needs, and then it transfers it through, into what we call the matter state, (:20) as it needs it, the way it needs it. It needs a wood for the trunk, it needs the thinner stem for the leaf, and it needs the thinner CO₂ for the green, and what it reflects. And why does it reflects the green? There's a test done by a scientist decades ago, where he actually took a plant of one kilo, or few kilos, very little, put a square meter of a soil, and he measured the soil and the plant. And then he

converted this, let it grow for 5 years, 10 years, the plant became a tree, about let's say 100 kilo, he measured it, and the soil was exactly the same as when he started 10 years ago. So, the soil does not convert into the tree. The only thing which becomes the trunk of that tree, is the CO₂ which the tree absorbs.

R: Excuse me Mr. Keshe, is there a drawing that we should be...

K- Yes, yes, give me time.

R: Okay.

K- The plant absorbs the CO₂, and according to the, what you call, the CO₂ spectrum, becomes a chunk of the tree. That's why you have a oak, that's why you have a pine, that's why you have a stem of a bush. Because of what CO₂ is absorbed, it becomes the construction of that plant. In a way, what is sent, what is released by the Sun to convert into Carbon, (:22) becomes the embodiment of the physicality. So, if we look into the dimension of a plant, as a leaf, the CO₂ comes in. They tell us, it synthesizes, and it becomes a trunk of a, what you call it, a chlorophyll, and everything else which it becomes, and then it becomes into a matter state of it, becomes the, what we call, those little strings we see. But, this CO₂ going in, O₂ gets absorbed and released into atmosphere, because the trees give us. The Carbon becomes the trunk of the tree. When we weighed the tree and it became a hundred kilo, one or two kilos, and nothing changed in the soil weight, then, where does the weight of the tree comes from and if you get a tree trunk and you burn it what are you left with? Charcoal, carbon. So we understand that the CO₂ with the Inertia of the earth becomes the embodiment of the Carbon 12 (C₁₂) which becomes the what we call the embodiment, the physicality of the tree. That's where you burn your wood from, it's the CO₂ which you captured, which the plant captured, according to its leaf construction. The Nano layers on to the two sides.

Now, our body is the same. They tell us we breathe air, we breathe the same air as the tree does. Why do we sleep at night better than daytime? (:24) Because our lung capacity changes into absorbing CO₂, but our body has learned to absorb CO₂ 24 hours a day. But certain CO₂s, which takes us to convert the C₁₂ into C₁₄ and 16 to become part of the Cosmic Ray is released. Now you understand why you are connected to your sleep and your dream. The same way as a leaf absorbs the CO₂ and then changes releases Oxygen, the carbon becomes the trunk of the tree, The air we breathe in, does the same thing, part of that, it's not all O₂ and Nitrogen, this is all made simple for people to understand. The science of composition, is the same as the, same as the tree, still we absorb a lot of CO₂'s. We kiss each other, in the process of kissing, what do we do? We transfer CO₂ to each other, your CO₂ is not my CO₂, I take what I like from it, we sleep next to each other, we breathe over each other, we get 100 of us into one train cabin, and we all breathe each other's CO₂, but none of us dies, because our body 24 hours a day, takes the CO₂ which fits us to keep the combination, the connection. Even when in the leaf, the liquid which goes in the, what we call, embodiment of the tree, its sap, and the body of the Man, the blood and the leaf, is exactly the same process.

But, as part of that CO₂ which we absorb as a Carbon, we have at certain strengths, (:26) attract and bring in combination, connection, that allows C₁₆ and C₁₄, and the other Carbon connection with the different dimensions of the Universe to connect to us. This is the reason we dream at night, because we allow not only the blood pressure to reduce, not only the CO₂ combination in our blood changes, allows the C₁₄ and C₁₆ to reach our Soul, connect to the Universe. This is why our breathing dictates our dreaming state, our breathing dictates the entanglement, the shackles on our Soul with our brain. This is why when our blood circulation stops, what we call the Soul is released. Because it's not just that Calcium of the skull, is the blood flow which carries the C₁₂, in the dimension of physicality of the Man, which is the shackles on our Soul. This is why when you cut a head, the Soul is released, because C₁₄, which supports with the Calcium, to contain the body of the Man, the Soul of the Man (STM), all is gone. Even though, when our blood pressure releases, reduces, then we dream a lot. "Oh, I feel light-headed and I was dreaming."

Now you understand, our condition, our physicality, is connected to the Carbon, which is the connector between the structure of the physicality of the Man, (:28) and then is a collector and connector to the STM, and what we call the Cosmic Rays. What dictates into what we absorb of the Carbon, of the atmosphere of this planet, is the Inertia of the Carbon, not the Carbon itself. What it has as Inertia, what it creates an Inertia in the dimension of floating within the structure, dictates the Gravitational Magnetic (GM) field of the C₁₄ and C₁₆, which our Soul absorbs, into what level we connect, and the more purified this become, this C₁₄, and the more purified becomes the C₁₂, the deeper, the higher field strength, the narrow bandwidth, we get to become closer to the Creator. And how this is controlled, is through the emotion. Your emotion tells you not to do wrong, when you don't do wrong there is no attachment, there is no connection of the emotion with the wrong, which allows the STM to connect with the physicality of the Man, which becomes to absorb the final Carbon in the structure, that allows it to be closer to the Soul of the Creator (STC) in the dimension of its Hydrogen.

Then you understand how we are connected with CO₂ and CH₃, how we are connected in the energizing our physicality in the dimension of the C₁₄, or we get energizing dimension of C₁₅, CH₃. It's very fine and it's connector. Carbon for the dimension of physicality of reflection of the lights of the Creator and matter state, Hydrogen in the conformation of life on Earth and connection to the Creator. (:30) Now you understand why the whole structure of the life of the Man goes on the pattern of the Inertia, which that Inertia is dictated by the energy of the emotion, which itself is the reflection of the direct effect of the physicality on the STM. I made Man in the image of Myself, and he carries everything that's within Me, from emotion to physicality.

Now you understand as Knowledge Seekers (KS), how you are no different than the tree. The only problem is that they have fed the humanity with the wrong information that they can abuse the Man the way they want with the information. The simplicity of the creation is the beauty of the creation. And the dimension of the Inertia connection between the matter light, cosmic light, and everything else will come in the future. As you are aware, we now work with a very restricted matter state. They talk about the quantum. I talk now

as we have started about the Cosmic Rays and Cosmic energy. Because Keshe Foundation with the knowledge it has brought in, has enlightened, has brought a new level of knowledge to the understanding. And as I said, we have set out to create systems which can bring, Man can see, how energy of the Creator is converted into the Cosmic Rays and converted to CO₂, (:32) converts to what we call physicality and back to. The way one drop will create the fish, one fish will create the Creator.

This is the process of the Creation. This is what Man needs to understand. How you how simply create life in the Universe by one single element which is Hydrogen. The rest is the reflection and the Inertia of what that reflection creates by interaction of itself. From Hydrogen to the heaviest element in the Universe and the interaction of itself with the dimension of its environment. If you understood this then you understand why we have a Mass and we have a Weight and we have density and we have everything else in the dimension of Creation. Why we see light in the spectrum as we talk they say you cannot bend it, but we can as I explained last week, with a mirror you can reflect it. If you cannot bend it, how can you reflect it? Where does the rest go?

We need to understand to make mirrors which fit the Cosmic Rays and not the matter of the humanity, with the mirrors we have. Once we manage to create the dimensions of the Cosmic Ray mirrors, then we manage to play the game of God. Because, this is what happened with the rays of the Creator, as it expanded in the dimension of the Unicos. In their reflection, they created the Stars, the Galaxies and the Universe, as part of the Unicos. Now we are aware, we become knowledgeable, how to reflect the lights of the Creator in the dimension of the Hydrogen, (:34) and in the reflection of the Carbon. I made Man in the image of Myself, so Man carries what is within Me, in the dimension of physicality of My manifestation.

Today's teaching is very deep, needs understanding, and those who understand it will find the key to the Creator and the Creation of the Universe. It'll take you thousands of years to understand past ten minutes of teaching. But the point is set, that Man finds his path to the process of his own creation. I made Man to know his weakness through the emotion of gold, but I created the gold to create the Universe. It's not the gold that you see, it's the gold that I made to reflect the STM. This is why Man becomes greed when he sees the gold. Because, the conversion of dimension of the rays of the Cosmos dictates the conversion of the matter state through the Inertia of itself.

Now you understand, in the time to come, what you saw exactly a year ago in Beijing, was just the beginning of the show. There are no dynamic systems and there are no conversion systems in the Universe, but we convert everything in the oceans, in the depth of the pressure, (:36) and in the tops of the hills with no pressure. Understanding the conversion, dictation and understanding the totality of the structure of the Creation, from the Creator to created. Man needs to understand where, which and what Inertia needed, to confirm the existence of the matter state, or to confirm the existence of the Rays of the Creator.

The process of creation is simple. It's Man who has made it difficult for himself to understand. Now we open the book, that you can fully understand the purpose of your creation, how you put the Mass on you, how you connect the Mass. And if you look even in your amino acid (AA), why do you say you have the both H and C? Oxygen and Nitrogen are the attributes of the planet. Hydrogen and Carbon are the ?? attributes of the Creation and the Creator. Connection of the two, creates a condition of life. And this happens anywhere in the Universe. Wherever you go, you test any blood of any created liquid, within the essence of the Creation, you'll find both the Carbon and the Hydrogen. It's the common denominator of the creation from the Creator. The rest is addition of the Time, Place, Position, and Possession of the Inertia of the place and time. (:38)

Once the Man understands this knowledge, Man will be able to replicate the life in any corner of the Universe, as long as he understands the spectrum of the isotopes of the Carbon in the energy field states and not matter states. And the same with the Hydrogen, in the states of its energy and not matter. And if you understood this, maybe this untangles one of the biggest mysteries in the present science, why we create colors out of the Carbon, and why all these affect the emotion behavior of our children. Because they bring that Inertia, the energy level which connects to the STC. And then you understand why they add sugar to it and that sugar affects the child, affects the Man, why it energizes us, because we connect to a different Hydrogen level, spectrum of energy, that our body is used to. As much as it can bring joy, it can bring depression. And this is the key for the psychological condition, emotion of the Man. The lack of, the shortage of, the use of the wrong bandwidth of Hydrogen, in connection with the Carbon spectrum, brings that condition.

And then if you understand this in the full detail, in the researchers of the future, you find out why each culture behaves different, depending on where they live, how they live, according to the Inertia of the Position, and Possession of the conversion of the Carbon in that state. You're tall, look at where you live, you're short, look where you live, you behave like an animal, ?? measure the Inertia of the matter state of your area, you behave kind and serene, look at the same. (:40) Your behavior comes out of the Inertia of your Possession and Position, and the interaction of manifestation of physicality of the Man in conjunction with Gravitational Magnetic fields of the Inertia of the place of manifestation.

The lives created in a mono-structure systems, where there is only Hydrogen, or the interaction of which brings the combination of the Helium with a Carbon, or Helium with Hydrogen, this leads to creation of mono-energetic being, which they carry within them, the closest energy effects, in direction and dimension of Inertia of the Creator. Creatures born, structures created, within the structure of the stars, suns, are the closest things Man will ever see, connection aligned in life, as those are with the Creator. Even though they are amplified field strength of itself. The lower, the lower, and the lower you go, the narrower bandwidth of the field energy of the Hydrogen, the closer you become to the Creator, because the reflection of those, creates the dimension of physicality of the Man in a condition of the, its environment, Possession and Position.

When the scientists say they have found life in Mars and Moon, now you understand life is everywhere, because now you understand, the connection between the Carbon and Hydrogen, especially the spectrum of the minimal field strength on the Magnetical dimension of the Hydrogen, will lead to creation of life in a dimension of the Position and Possession, with emotion. (:42) When you study the spectrum of the emotion, when you start the spectrum of the fields of the matter, then you understand how close the emotions are to the dimension of the fields of the Creator, than the matter state. I made Man in the image of Myself, but Man has reflected the wrong energy, of my matter state in the dimension of his own emotion and Soul.

Now you understand where your Weight comes from. Now you understand where your Mass comes from. Now you understand why we call them the Vertical People. In the composition of time, we see the absorption of the Carbon. The way the Carbon as a gas converts to become the wood of the tree. The same Carbon which is within the structure of the Man converts to become every organ of the Man with the intelligence of Time, Place, Position and Possession. But what is more interesting, which will come in the teaching of the future, how through Cosmic Ray, your DNA is created, how through Cosmic Ray, dictates the RNA, which we call the Magnetic field emotion of the cell.

Man needs a lot to learn, and once he gathers these all together in one, what we call, Encyclopedia of the Knowledge of Creation, Man will understand everything, and Man does not need no temple, and no churches, and no mosques, because he understand the process of Creation. (:44) On Earth we have time for evolution, in the Universe there is no time for evolution, as the time does not exist, and evolution fits the Time, Place and Position and the creation of the closeness of the Soul to the STC. And if you understood this, further you understand, where to find the Soul of the Vertical People. And when you separate it, you end the life, you release the Soul. And then you understand why the roots of the trees are so much in the shape of the branches, the leaves of the tree itself.

One day mankind will understand how kind the Creator has been to create such a horrendous, what I call, obnoxious creature, called the human, but is of the reflection of the lights of the matter state and not of the beauty of the STC. Too much has got muddled up, and too much has been absorbed by different reflections of the same, but in the wrong proportion. Now you understand why you have a Soul, and how what you breathe takes you to your Creator, and how it takes you away from your Creator by dimension of the physicality, and why Man is so attached to the dimension of physicality, than the STM. We all create Inertia to the dimension of Creation, through reflection of the fields of the Carbon. (:46) Our shape, our emotion, the color of our hair and skin, is nothing deeper than one isotope difference, but we are all the same.

As you all know, with the recent research shows that all of us, does not matter from what line, we all come from Africa. All our genes in combination of the different what we call, field strength which created a condition of life in Africa allowed us all to be created. Every single one of you from South America to Australia to blue eyes in Norway and black eyes in Saudis, and all of you all have one common denominator which comes from Africa. When the human race in the dimension of different field spectrum like the plants

was created, different races of Man was created in Africa, and in the mixture of the whole lot we find a mixture of the humanity. We are not all of one ocean, one plot. The humanity is made of many, many conditions which led to the creation of life at the same time. And when he matured traveled the span of this planet.

So, every one of you are connected to one tribe of Man in one way or another in a combination of interaction of the fields within Africa during the time of the millions of years of the process of creation of life. Then, when asked, "Why?" one called himself better than the other, (:48) where you all came from the same pool. Then, if you understand this, why do we value everything, where we can create everything? In the upcoming time, we produce nuclear materials, like we produce water. We produce gold as it rains from what we call, Niagara Falls. Man will have no value for no matter state, as it's abandoned by his wish, and it's what we call, Creation. Then, it comes the value of emotion, which brings Man to purity of life, purity of time, purity to become more closer to the essence of his own Creator, and not his creation. We are proud of our children, what we created, but we are not proud of the Creator which created us, which we are the children of it. And this is where the Man has fallen flat on his face. The greed of the matter state, the conversion of the, what we call, the narrowest bandwidth of reflection of the light of the Creator, in the dimension of the Carbon.

I hope, as Knowledge Seekers, and those who listen to these teachings, in the time to come, they see and they unravel the keys, to understand the process of the Creation, and how to find a path to the Creator. Now you understand why we tell you to breathe, your breathing decides how you emotionally feel, and how you can create the condition of the transmutation. (:50) Go back to the teaching, I explained to you, if you can control your breath, how you breathe, then you can decide how to do the transmutation. The longer, the longer you can hold the condition of that CO₂ in your lung, which creates the release, what actually the leaf does, releasing the CO₂ that gets absorbed by your Soul, that connects higher to the dimension of C₁₆, then you understand the process, why your breathing affects your state of transmutation.

There is one, one key factor, which will come to it in the future. The C₁₆, the C₁₄, even though they look higher in order, they are more closer on the other end of the Carbon connection, to becomes the C₆ and C₈. One day I explain. If you can create a condition of C₆, you have much better chance of becoming closer to your Creator, than the C₁₆. One is for communication, and one is for closeness, for the emotion. One day, when you understand the work of what we call C₆, in the isotopes of purity of the state of the Soul, which is the center of the, what we call, nuclear of Carbon, without electrons, about the behavior of the flat energy, then Man will understand how through that flat energy, without the existence of the matter state of the Carbon, Man will find a way to his Creator, as those fields are the reflection of the light of the Creation. (:52) Man has not understood C₁₄ fully, how can you teach him about C₆?

The teaching is deep, the teaching now goes past the dimension of human understanding, and in dimension of emotion of the cell of the Man. When you have nothing to be attached to, and you are detached from one, why does a cop (?? C) need an electron?

Now you understand. Look deep inside you, and you'll find out why you cannot travel the span of the Universe, and you are shackled with the physicality of dimension of the C12, on this planet. One day I teach, Man is not ready for that yet.

I hope you understood the teaching of today, and I hope you enjoy understanding it. And one day, when you come to understand, why your structure, Amino Acid, is a combination of the Nitrogen and Oxygen, then Man will detach itself from the process of the creation of the matter state on this planet. We go for a break and we come back, and one day we'll explain. Rick, can you take us for a break, please?

>> **BREAK** >> 640 KSW April 30th ... (:58).

K- Thank you very much. A couple of notes. We try to run the session for addiction tomorrow. We could not reach the system, what we call, development we are waiting for. But, either way, through the new developments, this will be done tomorrow. We start at 10 o'clock Central European Time, and it will be just couple of hours. And then we need your feedback, those of you who participate. The May session of the what we call, Transmutation. We try to delay it a little bit more, until the system is ready, sometime later on in May. But we want to do that, especially with the new system, that nobody interrupts each other. Those of you who come in for the addiction tomorrow, please bring with yourself four, what you call, two headphones with the four head covers, and as usual we tell you what to do, we consider you've been there before, and keep as quiet as possible.

I was informed yesterday that our team would like to delay the presentation of the products till next week, where they have their videos and everything else complete, even though they have their pictures and everything ready, their website. They see, if it always is appropriate, to be done in a full, first time delivery. Next week, hopefully, you will see part of the structure of the Keshe Foundation, where and how we invest, into creating the pure seeds, pure structures, and pure waters, that can allow us to structure, what we call, the transmutation, transportation of the future.

Those of you who work with us around the Keshe Foundation framework of support. (1:00) We still need a lot of help. If you are expert in any dimension, we would like to know. As I said, we're receiving a lot of offers. Those of you who we know, can help us

to stage further, the whole process, we'll get in touch with. Those of you who keep on sending us emails, you've done this and that. If we don't respond to you, as I said before, we already passed the knowledge you are trying to tell us, you're still playing with infancy, even though you think you're on the edge of the science. So, if you don't get any reply from us, especially who offer us scientific, what we call, data or systems, it means we passed your system. And, your understanding might be good, but it doesn't mean you're wrong, but, compared to where the Keshe Foundation is, your work is literally nominal. Even those groups of you, there are few groups around the world, who have gathered together in different part of the world. There's some in East Asia, there's some in Central Asia, there's some in Europe. We have groups in America, and we see a lot of your work coming in, and you think you've done, you're very advanced, you're actually... even the most advanced one I was looking at, you're something 10 years behind us. There are groups in different part of the world, and they think they've gone very far, but it's beautiful what you do, but what you're doing in these groups or individuals, you are quite a bit behind where Keshe Foundation is. And, it's not good for us to go backwards, maybe it helps us somewhere down the line, but at this moment, what we set up, what we're doing, we're looking to go forward. (1:02) We have to bring the knowledge in a very big operation, as it's taking shape gradually. And those of you who work with us and you've been with us, know exactly how we're going, where we're going, and the systems development, and everything else which is going on. If there are any questions, we'll try to answer, and we'll see where we go.

<< A KS raised his hand by mistake.>>

Q: ... Thank you so much for the teaching today. Yesterday was discussing at Soul Teaching about our creation and related to the teaching today. I want to understand because our creation, our body, the sperm and egg and the interaction of the fields of the environment have a gap for the STM inside of this body. (1:04) So why have this gap of time?

K- What do you mean? Which gap?

Q: Because the creation of our body, we... I listened a few years ago, you said after some weeks, I think 10 or 12, the Soul comes inside.

K- The Soul doesn't come inside. It's the participation of common denominator energy between all the cells which are created. I put it once to children in the classroom. Now maybe it fits to this too. You know, you've been on these, what we call, turner roller coasters in the fun fair. Where there is a very big post and a lot of chairs hanging from it, with a seat at the end. Sometimes we have in different layers, three or four of them, when you go to fairgrounds. Our cells of our body are like those seats at the end of the chain hanging. And the top is when all centrally controlled and run at the same time, then they fly to the edge, then they bring that top to control all together. Before that point, they are swinging everywhere. (1:06)

It's the same way. We have many cells, they're all surviving in their own little environment. This could be the cell of the liver, this could be the cell of the heart, this could be the cell of the skin and the lung, but they don't have a common control, that they function together. It's like, all sent one link to one position, and that they all agree that, "We listen to this link." There's a physical link, which we call the brain, controlling the physical dimension. But the emotion which comes behind it, which is the hidden energy, not the physical dimension of the matter state of the cells, comes, then becomes the Soul, where we all listen to one boss. And this is how long it takes for all to agree, all to connect, to listen to one central command, one on the energy, and one on the physicality.

It's very much like a power station. You have the cables, you have the power generation, which is the turbines and everything, and then you have people who run the energy which it produces, two different divisions. But, if the turbine doesn't work, there is no power, and if the central energy guy don't know where to send the power, there is no use for the power, in... what you are produced. That common denominator, that all the cells which create a full functionality, is when the Soul is complete and takes shape.

It's no, the Soul is not created, if you don't have the livers produced, the body cannot function, the body is rejected. (1:08) If you look at the children in infancy in the womb of the mother in the first 6-8 weeks, which they rejected, is because one of the organs is not complete, cannot create a son. You cannot feed a child when it has no bladder. We cannot feed a child when there is no digestion system. When everybody reports, we are all operating, we are all started to see, to start, we are all going, then that Central Command takes position, and that becomes the Soul. This is why we, very, very clear, in the world of science, they say, 10 weeks or 12 weeks, is when that, all the Central Commands are in line, and connect it, physically and energy wise. Energy wise is the Soul, physically is the body of the Man. That's why it takes time.

Q: Thank you so much Mr. Keshe.

K- Thank you very much.

Q: ... Thank you Rick, thank you so much Mr. Keshe for your weekly update on the progress of humanity for 12 years now, live. My question is, if there's a combination possible with non-medical use of hypnosis, to overcome fear or even trauma? I think about pictures, visual effects, music in combination with plasma fields and Cosmic Ray materials to reach the Creator in us. (1:10) What would be a possible approach?

K- There is no single approach, because we all are different. This is not a one tablet stands for every headache. We have to find our own dimensions of the strength. And where we need to strengthen. And then you look within the structure of the fields of the energy, which feeds the emotion. Which means, you have to find fields which fits into the emotion where your fear is. And strengthen it. This is possible, now we have the knowledge, now we have, I think, as part of the structure of the work of the Keshe Foundation. We'll see this.

We are moving in a position, hopefully, I know in next couple of months, to operate from a medical, what you call it, Wellness Center, which will allow us to operate, if everything fits perfectly, with 3,500 beds. Which, this needs a lot of negotiation. This is started, but if they are ready and we can be ready for it, we can test a lot of things like this. A lot of old people go through the fear and that fear brings them a lot of pain, a lot of what we call shortcomings. By eradicating that fear they start living a different life. Our skin changes.

In recent research we have even gone through the Soul emotion to change the what we call the skin texture. (1:12) Not with Gans's, understanding the energy dimension. There's a lot of research goes on with different groups of the Keshe Foundation. I have hidden all the research groups well embedded outside the KF for them not to be damaged. We've seen what they tried, we've seen what they couldn't do. If you remember, years and years ago, if you go to early Knowledge Seekers, we used to let you to come and do things and explain to us and some people have used us for that. Since 2021 we stopped that. I embedded these people in their own research, in their own things. They still work with the Foundation, they're still very tightly close to us. But we don't bring what I call the elites of the science of the Keshe Foundation public anymore.

And there's a lot of research going on this way. There's a lot of research, and the fear and all that can be resolved because fear has a frequency, fear has a dimension of emotion, fear has a structure that through what we call the Cosmic Rays can be touched. Very soon through products we change this. Through material which we produce through Keshe Foundation we will change this. Very tactically, very technically, very direct into the dimension of our work. But you need to not only change the structure of the emotion, you have to change the structure of physicality that reacts to that emotion. It's a very, very fine connection. (1:14) You get angry, you dump it inside yourself, you chew it up. You get angry, you raise a hand and hit someone. You get angry, you drive a car or you swear or shout. So, anger, the emotion of it, is one side. How you create the reaction, is another side of the part of the Keshe Foundation work, to stop your reaction. And there are two different dimensions of science, two different parts of understanding, and it cannot be done with, "Oh, I gave this Gans's that didn't hit anymore or this."

The Gans's that we are producing in our factories are so complicated and getting more and more complicated. It's unbelievable, because we understand more. And somewhere I see in some researchers, they even lose themselves in the Gans's, they don't even understand anymore. We are working on, hopefully, in the next few months, computerized Gans productions, which means you want a Gans for, let's say, apple. There's certain .. you want a Gans for, let's say, anger. We can create that precise mixture that. That Gans give this reaction. But for us to do, we need you, we need your feedback on the line, to see where your anger sits, where your fear sits, that we build that into the mixture. It won't fit your brother, it won't fit your child, it fits you only. (1:16) Your child gets angry, cries, you get angry, you raise your hand. Why?

So it just takes time to go precisely, the same with the fear and everything else. You have to find a connection between the emotion of the physicality, emotion of the Soul and

bring them under control with the emotion of the, what we call, the Spirit, the collection, collection of the fields of the matter state. It's not so easy, but it's something, some works which are going on, gradually be reaching there to understand.

Any other question?

Q: ... There are potential Enlightenment game players from Romania, who cannot log in to their account, after following all the registration steps. So, I guess the question would be, what should people do that are...

K- Why Romania?

R: Romania in particular.

K- If there are any Romanians with this problem, Send the link in the Romanian chat group, in Telegram, and we look into it.

R: Okay, that's a good suggestion.

K- Just send it to us, because why Romania? We have sorted out our part, or most of our problems, with the firewalls in China. (1:18) But, anywhere else, I don't see a problem. There's no ban on Keshe Foundation in Romania, or blocking. Secondly, these things cannot be blocked the way we set it up. But let's just have a look, why Romanian and which one? Or have we blocked you? Because we've blocked people, but we don't have anyone Romanian blocked in our system, as far as I know.

R: So, if generally, if somebody has trouble with the registration...

K- Yes, there is... there are two people... There are two people in Romania, sorry, were blocked for misconduct. There are, I think, one or two people, because of their total misconduct, in the condition of the work, and ?? unethical works they do, and correct themselves to the Keshe Foundation, they've been blocked, for a long time. But, I don't see... we haven't, we blocked the Belgians, because of the conduct. But, not really. We have two people, I know the two people, they've been blocked for their misconduct in the past. But we always review, we are not going to stick to it forever, but this just depends what things take shape.

Q: ... There is a theory that the fastest way to transmute, is by practicing sexual alchemy. What do you have to say about that?

K- What? Never heard of that one.

R: Sexual alchemy.

K- What is that? (1:20) That's a new one to me.

R: Well I would presume that means using sexual energy to manipulate that in some way with certain sexual practices in order to...

K- It was like the guy who was covering his head with a plastic bag and died, a member of parliament in England years ago. Increasing the CO2...

R: I guess he transmuted pretty fast.

K- No, I think he increased the CO2 too high.

R: Well, in a way, the fastest way to transmute would be to die, would it not, in a way?

K- No, because...

R: We don't want to accelerate the process to make it faster, may not be the best technique. Or how... I mean how should... how should the ordinary person approach that, in terms of accelerating our evolution or our elevation? Obviously you want to do things that can help.

K- If ?? they can do it. The easiest way to reach transmutation is through emotion. But you have to understand your emotions, both in the physical and the dimension of the Soul. Then you have no choice, it's the easiest. Breathing is the longest way. Emotion, just think what makes you breathe faster, or what makes you to breathe slower, which emotion? And work on that one. It's very, very easy to do it through emotion than actually physical breathing, because you can sometimes go over the board. (1:22)

I was with a doctor yesterday. She's a specialist in children behavior and speech. And when I was explaining to her how she has not understood the position of her patients, in respect to their emotion, she was shocked. She said, "I work as a specialist in this field for years, but this emotion controlling, just something they don't teach us, but it makes sense to do it." You have to understand, even the... why do you lose your breath, when you come to a clarity? Or why do you use your breath when you get too excited? It's the emotion which creates it. So why do you work with the, what you call, the soldier, when you can work with the General? And this is what I keep on explaining many times. Understand the emotion. Emotion is... the physicality is irrelevant. But, if you understand what creates that emotion, which brings that physical behavior, or needs that physical behavior, it's much easier to handle. You can transmute much faster.

It's us learning, we haven't been trained. It's like learning how to drive. Keshe Foundation has put this week a new, what you call it, it's not a product, it's what it says for training and support. (1:24) It's a very expensive package, it takes time to train and do things. And it's been put at 5,000 Euro, especially for these kind of things, we bring in people who train in different ways, even to how to use systems, and the process of the Keshe Foundation that's becoming more technical. We don't have enough people, we train some and then they train some others. And this type of training now, is taking shapes in our research centers. One of the Knowledge Seekers, we cannot keep on lifting and shifting

from everywhere. They are remotely training our staff in that field of their expertise. We have Knowledge Seekers who, from one part of the world, or one part of the country, train our people on camera, on what you call it, on teaching sessions, once or twice a week or a month. In this process of the support is part of which comes how to find ways in the Keshe Foundation, in the software, in the hardware and other things, to use, for example, these new games, which we have now. And slowly building of a team behind it, now that the system is more or less, I think it was completed yesterday or today. Finally after months of work, we have managed to get it, hopefully they try in next few weeks, and then you will see the very expert team of the, what you call, Keshe Foundation, bringing your new dimensions in your, what we call, the game. (1:26) Takes time, we started from zero, and this takes time to build up, and the same transfer of the emotion through our system, and everything else which goes with it. Takes time, but we need time to reach that point.

Any other question?

Q: ... In the plasma dilution process, light is needed in order to achieve it. Can you expand a little on that? Thanks so much.

K- Plasma Gans dilution does not necessarily need light. Needs a spectrum of energy that some of it can lead to creation of light. I was talking about this, a part of this, just before teaching of today, with our Knowledge Seekers, minutes before. You don't need to introduce light if you use the creation of the light by itself through the Gans's, which is an easy job to do, if you understand the process. (1:28) We don't have a spectrum of light in the matter state, creates big effects in the Gans's and production of fields. Because the light coming in, outside, as a human source, is already in the matter state, the strength, which we need above it, or below it. This is a new, these are techniques, and most of the material to do it is in the hand of the Knowledge Seekers, but you don't know how to use it. Gradually we'll introduce it.

Any other question?

Q: ... Good morning Mr. Keshe. Does the air we breathe in cities, directly affect our lives, because it is altered or polluted?

K- Yes, very much so. It's a new spectrum of energies which our body is not used to. We haven't created, we haven't gone through the fast enough evolution. The industrialization, new technologies have brought out things that our body... We need about a thousand to five thousand years to go through understanding of the evolution that we can repeat it, as a race. Individually we do it about 25 years to 40 years. (1:30) But in, as a society that, okay, we are all, let's say, Chinese behave this way or whatever, or the British look that way, this takes about 5,000 years. Go through a full evolution in the cycle of one race. And it's something very slow. But now with the industrialization and a lot of other things which are coming in, this takes time. And our body doesn't have that time. And this is why we see so much problems with a lot of things like the CO2 industrial revolution and everything else, the plastics, and as we talked last weekend, everything else which is

coming with it. The changes are too fast, for ?? our slow system of evolution to catch up with, and it stays a tomato, as they call it.

Q: ... Does being surrounded by nature make us feel better because the air is pure, Or is it the way we breathe that makes us feel better, and leads to the absorption of C14 and C16?

K- It's a combination of things, because the air at the moment around the world, is the same everywhere, it's a big pot. We call it the wind, and the storms, and the air flow, it flows everywhere, you cannot change it. So, you have a better chance, you get more of when you're in the tree in the green area, but all the same, the gases started from America ends up in your house in Manchester or in London, or in, what do you call it, Germany. (1:32) It is the way it is, you can't change it. So, you get a slightly better quality living in a tree area or whatever, but at the end, that wind brings everything in.

Q: ... Will the ONN system change or purify the air we breathe, and help bring about a change?

K- I don't think so. I don't think so. It's a different dimension, different one. No, it's... there's no way I can see that, maybe in the future, there's another way to do it, but...

R: Maybe it'll help people become aware of their... of themselves and their environment, and maybe that will make them start to appreciate the quality of the air more, and all of a sudden all the laws change and...

K- There is a lot to do, how psychologically people feel. And then, in the emotion, they change the bandwidth of the use, or absorption. When we are relaxed, we absorb, when we are happy, we absorb, a different spectrum of the Carbon, than when we are angry, or when we are stressed. And that reflects in the structure of our body and everything else. And possibly, we can create a condition of environment of the, what we call, feeling better, but then you change the spectrum of your absorption of the, (1:34) what you call, the elements in the atmosphere. Our biology, and our physiology, and our psychology is so far from reality and it's been accepted so much. To change this is a battle of huge proportions. The world of money has changed Man so much and to be able to get access to live ?? without money, Man has accepted a lot of rubbish. By fear, by bribes, by changing, a lot of things. And we see this, governments get involved in it. Governments.

American government has a two-directional policy. One is exploded now we see, and the other one is about to blow back on the face of the Americans, themselves, directly. They set up structures around Iran to create drought, with the British. Because, in creating famine, they killed 15 million Iranians during the First or Second World War. 15 million Iranians died of starvation. So, they set out to do the same. In past 3 or 4 years, there was such a huge drought in Iran, nothing could be done. Iran destroyed 2 centers in Dubai and Emirates, and in Middle East, it's a flood. The day these two centers, they were controlling, knowledge to create death. (1:36)

And then, we see another spectrum, the same again, the Americans are busy with, which is heroin. Americans paid, the British paid, the whole of Afghanistan to create heroin, only to destroy Iran and Russia. 93% of the heroin in the world is cultivated in Afghanistan, and Americans paid to the farmers. It's documented, well documented with CIA, it's not something I say. That, to produce enough, that creates enough weak nation, that they can then run, what they did with China, with opium. And now, the Iranians through blocking and cooperation, have transferred all this cocaine heroin into United States. That's their biggest nightmare. All these exotic drugs you're getting in America is coming from your own nation, feeding it.

So, using the emotion, using the technology to harm, has actually backfired, in so many ways. And this is what we have to eliminate from the human race. And this is a big tasks, is not simple thing to do. And we've seen in past 72 hours, how cuddly the British and Americans are in Washington. And now we will see huge horrendous movements in the Middle East. You will see it very soon. British decides, Americans are the soldiers of British. (1:38) And as you heard most probably ?? Britain to what was said. Trump said, "If it wasn't because of us, you Europeans, all will be speaking Germans, after the Second World War." In a speech by the King of England, in America last week, or this week, said, "You Americans, all will be speaking French, if it wasn't because of us British." And now, it's a 'hunky dory' time, and every time this 'hunky dory' there's a big problem for humanity. Because the British Kingdom is literally run and owned by Rothschild's. They have borrowed so much money from them, that they do their ?? bank. Now we expect the same new cycle of pain and suffering through religions, coming through the Jewish state.

Any other question?

R: Okay, let me see here.

K- Are we getting to the end of everything?

R: Getting close Mr. Keshe.

Q: ... Could it be that souls from another dimension who have already transcended, are unable to manifest themselves here on Earth, because the energy here is so heavily laden with hatred, anger and violence?

K- It has, it does, it will do, the same as our Souls which travel the span of this Universe. But, for whatever reason, this could be part of it, or could be none of it. (1:40)

Q: ... And does this work involve a nation that is here to help us purify this energy, so that other Souls may manifest themselves here?

K- You see the... in the past weeks, we have started offering the carrot and what you call it, the stick job, but the stick is much softer and much more beautiful than a carrot, with the governments, to change the governments in operation of the Keshe Coin (KC), and

technologies. Those are, who are around, the Knowledge Seekers who work with me, they know how and what I'm talking about with different nations. And, one of the problems we have, is to bring comfort, and bring peace of mind to a nation. And, at the same time, to do that, we are talking to the governments that we pay you to let your people have peace, but we don't let you control their peace. They have no problem, us giving them a condition, creating a condition, that their nationals can use Keshe technology through our Coin operation, to become comfortable, because then they can rule whatever they like. But they don't like us to dictate to them, that you cannot interfere with them. We are not dictating, we are providing what you to do. (1:42)

In a financial way, we are offering trillions to governments, not billions, trillions, to allow the nations, their nationals, to live a peaceful life. And we provide it through the Keshe Foundation. And the way this is done is by introducing a Keshe Coin to become a currency of the nation. We are now talking to four governments, six negotiations. We don't touch their national currency, we don't touch their structure, we don't touch the government, we just provide, what we call, equal to 1 million Euro to every citizen. All they need to do, to open their Internet channels, that their citizens, they go to the Shop, they exchange Coin, on the phone. Because everything is controlled by these governments through their phone. And we pay the governments to have, and we pay the governments, we give the governments structure, that they become, the nation becomes wealthy, but the wealth is spent on the people.

The biggest problem they have, is the bribery. Can we have hundreds of thousands of Coins for us, our families? There's no difference, then we start the whole bribery situation. And this is what we are going through at the moment. A large number of the Keshe Coins is already locked into some nations. And we are negotiating. We are providing through technology employment, through technology security, through technology, advanced technology. We had... we said to train the scientists to work in the Space level, that everything else goes with it. (1:44) But our problem, we're facing, especially past three weeks or so, is the leaders of these countries. Again, what's in it for us? And if we don't do some sort of no bribes, but we make it more comfortable that you get more votes, that you will stay, it doesn't wash with these people.

And, if we create a condition, this is what we say, try to get as many people, once we are fully ready, it takes us another maybe 3 to 6 months, to play the Game. And the enlightenment and peace, the more people play. And we can put the antennas out, we are bypassing the Internet, then we can achieve this. Bringing a comfortable position, people not to be afraid of, because everybody uses of, and we disperse enough Units around the world, that if they take some out, they can take it out of Russia, but you can't take it out of, let's say, India. You can't take it out of China, because the systems support each other. Then, yes, we are about five years away from this, I look at it.

But now, we actually offer, we start offering Coins to governments, income to the governments. And gradually, once the ONN sets in, Keshe Coin, without a doubt, become the main currency of exchange between governments. You will see it, it takes time, it's taken time, we don't need any authorities, we don't need no banking, we don't

need authorization for no bank. (1:46) You, Knowledge Seekers, the humanity will take it through, and it will become a currency that there's no inflation. I know, it's something which the governments die for. When you work with Keshe Coin in a very open way, there cannot be inflation, because you cannot get more than a thousand Coin, and you cannot get more than a thousand Euro per Coin. And this is one of the best ways that will curve the inflation. A tomato does not worth more tomorrow than today, or next year, it's just the Man who puts it for his greed. One tomato, you cannot get a tomato online, through energy from the server in Russia, you get it from Ukraine, you get it from Australia, it still costs one cent.

And, this is one of the biggest points which bring humanity to the point, that greed is not worth it to have. You, as Knowledge Seekers, don't understand what we set up, what this Keshe Coin is going to do to you, and your next generation. peace. You don't have to stash money away, because your money is on the ?? Internet, everybody knows. You know, when the Euro came into operation in 2000, after two, three years, Belgium's went to the European Central Bank and says, "We want to print more notes." They said, "What?" "We want to do more coins." They said, "What for?" "Our nation has everything on the bed. We are short of coins and notes in the currency, in the circulation." (1:48) EU had to allow Belgium to print new money because everybody was hiding the money. 28% of the money disappeared within 3 years. You don't need to hide anymore. They steal it from you, we give it to you again. But we track it where it has gone stolen.

Technology is there. Emotion of theft is under control. You can control it through technology. And, this will bring, takes a lot of these things out of the society, but we need time. Our time is now, you have the, what you call, the Game, you have the Coin, we have Markray Corporation sitting there, very soon Keshe Foundation will be in Shanghai stock market, and then we will control the, what we call, definition of peace through currency. Everybody has enough to eat, nobody dies of hunger. It's short in your country, you want the emission of an apple, because the cents go on the App, cent of Euro, you have 1 million multiplied by 100, you can eat 100 million apples during your lifetime. There's no inflation.

What I set up will change humanity, but I'm here to see it through completely. We control it, we have to control everything to be pure. That's the only control we have, we are not there to control humanity. We are there to control the apple you receive, there is no fertilizers, chemicals in it, that it doesn't affect you. The apple is the apple, ?? not another, in purity. (1:50) And that's what we are doing literally, I show you something, when you... the same processes, goes through pure, pure, what we call, work, to create the pure materials. So, you have to understand why we show you we are doing these research in agriculture or in the water, is to go back, we still are entanglement of some chemicals or whatever, to go back in 12 months time, maybe up and down a few months to create, let's say an apple, which has no chemical, no alteration in it. That when we put this on an App, you get no poison inside. This is why we do it. We're not doing the agriculture for us to make a profit, is to get to the original seed.

And I'm literally traveling around the world at the moment, when I'm traveling in a lot of places, collecting seeds. I have a bag full of seeds with me. Original seeds. I'm collecting eggs from chickens, original chickens. That when we put the App, the chicken is from the origin, (1:52) it is not contaminated with the birds, other birds, or other feeding. Birds which have never been given chemicals. And we, when we do the generation, this morning I received from our research center the full chemical analysis of the product which was produced a week or two weeks ago. What's in it? We are that precise. I received I think four or six reports from one. It cost a fortune to get these things done. But we test every week to see the purity of the material. When it's absolutely pure we don't see any chemicals in it, then we transfer it into growth into what we call, for Apps.

So there is no inflation, there is no government forcing through food, through everything else to dictate on you. Then this brings when all the governments work on the same currency, one nation policy made by the Universal Council, through cooperation of the Earth (?? Council). This takes time and needs people who are devoted to bring, many Knowledge Seekers are with us to bring doing it. When somebody produces lettuces, okay, it's the lettuces. (1:54) We pay the last 2 weeks, 3 weeks, to analyze what's in the lettuce we produce. As a reference point, compared to what we produce in the future, and we see how much will be eliminated.

We have to understand, when we put our name on it, when we put our logo on it, when we say, "It's a Keshe Foundation..." We get mistakes, without a shout. We had a mistake last two weeks ago. But we didn't go and shout at how, our team decided, we learned from this mistake. A product is produced, somebody has decided, using the old traditional way. And so we usually is you sack people. No, the team has decided, okay, we learned, how much of that we can destroy and change because we are working in other dimensions. And we videoed it. And it came, we knew something's happening, but it came from one of our Knowledge Seekers who traveled around the world to be with us and says, "This is this, this is what they are doing." And we picked up on it. We were aware of it. But now we knew what it does. So the management team decided, okay, if we don't touch, we are here to solve problems, we are not here to blame. We know who to blame, we know who has done wrong. But let's see how much Gans technology can destroy chemicals in the thing, so we can offer this on top of the others.

And this is where we cope with this technology. We cannot just do, I'm putting the Coins out, I'm putting the ONN out. I have to be able to deliver from A to Z, going from the front door to the back door, from the chair to food, to the freezer, to the media, to the Game, (1:56) to the furniture, through a one common technology, which all fits, not just mismatch, what it fits, where it might fit. It's millions of years of Man's evolution, it won't happen overnight, in one week. But, we have a started the system. And, those who work with us, have the same Ethos as us. We don't work for the money to be there, up 9 to 5, we work 24 hours, 7 days, 365 days. Even in a dream we see what needs to be done. Because we care to bring the change. And one of the biggest changes is going. Because it'll affect the people who think are in power, but they have no power but to serve. You'll see how it works.

If we get two, three nations together to accept the Coin, which we are on the verge of, and they have no choice to do it. The soon later, people will push the governments to accept the Coin. The same happened in Italy. We learned a lot from the Italians in early or late last decade. When they went to the Parliament and they got the Parliament of Italy to accept the Coin, and the Key. And people held that part. When then, when we give money where people exchange, governments have no say, it'll be accepted. But this time cannot buy for themselves, and stash away Coins. It's yours, from the second you're born, you're given. And we don't accept false birth certificate. Gradually systems for protection will be put in. We can't have two citizenship and gain on both. (1:58) And, slowly, slowly we're getting there.

And, we pay your government to encourage you, to use the Coin, because they get money for it. But again, governments pay through coins to ?? bring. It may be in 5 years, 10 years, when everything goes in one way or another, gradually. You'll find out you're dealing your local currency, and you exchange, in, when you want, you go to your reserve, in the, what you call, Keshe Coin. Those of you who, what you call, play the Game, and have an ONN, you are adding double, you're getting 2,400 a month, and you're allowed to go up to 2,000 Euro per month playing, you're getting 5,000 Euro in Africa, (if) you have a system. So, you see, it's very, very beneficial to have. And to what extent we will, what you call, push these through, we have to wait and see.

Q: ... Why is the Keshe Coin backed by the Euro, that they just print, and not the value of Gold or Silver, which is money and not a currency?

K- The reason we put the value of Euro, is because it's already accepted by 31 or 32 countries. We didn't use American Dollar, we didn't use Yen. This is a collection of nations accepting a currency. Independent nations. And, usually it stays the same. If you live the way we do in Europe, (2:00) you see, especially in past 2-3 years, prices across Europe are becoming very similar to each other. Very similar. It's hard for the Eastern block part, gradually they are coming up, and it's getting for the Western side, which was too expensive. And this is the reason, is more or less, Euro is trading in some 20 odd countries of the European nations, and it has shown it works. And it's the average inflation, average, what you call it, workforce. Average output of 30 odd nations. America is one nation trying to force its way to give its own value. And China is a different story. And this is why we used the 32 members of EU to base it on. It's already accepted by a percentage of nations on this planet, and it works. It's a good reference point.

Q: ... Why do we need those 8 to 10,000 (ONN)? Is it that they give a stronger signal when closer gradually ?? use it?

K- No, no, no. It's... when you speak to the guys who was behind this, tells you even the 8, 10,000 is enough for 1 billion maybe. (2:02) We have to increase the number of coverage. It's how much traffic it can be handled, in principle. The more the... I offered a nation 3,000 Units this week. One Nation. Because I know the traffic in that nation. And I go in that wise way, see when people are in it. I think a hundred thousand is a full

operation, or maybe for the whole planet in two, three, five years time. It works on a network, which means how many might go down, there are others too. And then as the more of you use it, the more we need... Actually, the computers you carry is a, what we call, the servers. They become the backers, they carry the traffic, they carry the information at every second. And most probably, in about 2 years, 3 years time, we increase the 8 to 12 and 16, because of the traffic. It makes it more secure.

Q: ... Good day everyone, Mr. Keshe, many people in Romania are asking whether the devices made by Barbu Constantine and the plasma Association Romania are connected to the Keshe technology.

K- Nothing to do with us. The technology is already obsolete. They made a request to us to help them. We looked at it, they are doing a lot of work, but the technology is 10, 20 years behind where the Keshe Foundation is. (2:04) 20 years minimum. What I said when I looked at it, because they're trying to pressurize us to accept the technology to help them, they want material, the whatever, they did this, and they are waiting, they said they purchased the material, or whatever. And they got the license from the Nuclear Industry, which is warned us very heavily, how they got this license from the Nuclear. We are doing a lot of work in the background on this group. But their technology is obsolete, totally obsolete. Compared to what is developed in the Keshe Foundation. And it's nothing to do with our work. They use one of our technology. They are one of the very few groups, there's about 10, 15 groups around the world who work in this, and there's a group who does on, what you call it, a MaGrav technology, in another part of the world, there are groups who are doing on communication. But, the Romanian group technology is 10 years behind the present technology, we are at least, it's obsolete.

So, it's good for Knowledge Seekers to work, and if you look at it, the Romanians are copying a lot of, or they're developing a lot of the MaGrav systems in theirs, and they try to connect us to this and a lot of other things. There's nothing wrong with it, but the technology is what I call the dinosaur time, where the our technology is, especially when you bring in the antenna with ONN's, these kind of antennas are useless. You got to understand, it's not just sending something. (2:06)

The future of the communication sits in Cosmic Ray. Where... I was explaining this to our research team this morning. The future of the Cosmic Ray sits in... what in communication sits with Cosmic Ray. Which means there is no zero, there is no field, but the fields can be bent, can be connected, can be disconnected. At the moment in the computers you have boundary zero, one. In the Cosmic Ray Technology which we are working on, we bend the light as we wish. We can control the light, convert the light to energy and to matter. We are that advanced. And in bits I have shown you things, but as Knowledge Seekers you don't understand. And this allows us to do a lot of things.

I can produce, if the government ask me to produce a ton of gold to back the Keshe Coin, I'm talking about, it takes me about a week to produce a ton of pure gold. But we are not in that game. We work what it is with humanity, to work with humanity, we are not there to destroy, we are there to build.

But, working with that kind of technology, we are very advanced. We are extremely advanced. Our advancement shakes some governments, who have realized what we are doing. Don't forget, I sit as advisor to a few governments. And they only take our advice when it's to their benefit, not because we are there. And, through these systems, we're trying to bring the Keshe Coin, the Keshe technology in. (2:08) And what is happening in Romania is obsolete, at least 10 years behind. Doesn't matter what they think, they're... It's good what they're doing. It's good to... you never know what they might come up with, but there's not many good news coming in, higher than the technologies we do.

We use some of the Knowledge Seekers to, what we call, the perch of, to support the new Knowledge Seekers in. But these kind of technologies we see, they are years behind. We passed these points years ago, but it's not to publish, it's to develop and to go ?? ahead. I'm sure, I'm sure next week you will be surprised in one of the dimensions of the work of the Keshe Foundation, where our research team releases its first products. You will see to what scale we work. Even the Western world is amazed in what we do. In the West you don't have it. The agricultural people dream in what Keshe Foundation has achieved, and we are there to start the change.

Q: ... Hello, if Markray expands into China, what consequences will this have for Markray shareholders in the USA?

K- Markray will not expand in China. Our agreement with the Chinese is very simple. (2:10) The Markray, the Chinese Keshe Foundation will appear in Shanghai Stock Market in 2027, 2028. We will not merge the two companies, even though I control more or less majority shareholding on both sides. Our operation in China is much, much bigger and vaster than what is in the US at the moment or in Europe. We're becoming gradually a giant industry in next two years in China. Maybe in four years we become percentage of the GDP of the nation. This is not hoping, this is we structure it that way, we are working that way, gradually we set up on a solid basis. And then we don't let the Markray become a... originally, as essentially, a user of the technology developed in China.

We will open a front in Frankfurt stock market, in German stock market, in a coming time. And that will come in what we invest in Europe. I'm already actually, past 3-4 days, working on this. We're getting engaged in a vast developments in Europe. But in our own way, in what we bring. Some of the Knowledge Seekers in the background, know we already rooted in a couple of nations with our work. And ... it just, we have a certain resources, and we have to use the resources accordingly.

But Markray will never merge with stock, Shanghai Stock Market of Keshe Foundation. Our team has worked for two years ago on this, we have set everything. When we are ready. And in 2027, 2028, Keshe Foundation will appear as one of the largest stock market companies in Shanghai. (2:12) And Markray, within coming time months, we will see what we do with Markray. We have to weigh two things, there is a very crucial point. First of all, the situation in, between Iran and America, is influencing our work a lot, because I'm Iranian, and as CEO of Markray, and more or less, full stock control of

the operation in China. My passport has a lot to do, the governments have to find a way around it. There is no other way to do it. And then, this affects all our banking system, around the world, as the head of the organization being an Iranian. If we didn't have this sort of knowledge, those ?? who work with us, know what I'm talking about. The banking system in a lot of structures, and this will resolve, once we resolve the situation with Iran. And then, we influence our dimensions in different ways.

But Keshe Foundation in China will become one of the giant industries in next 2 to 5 years. We plan it that way, we work in that way. And we are absorbing a lot of Knowledge Seekers into our operation. A lot of Knowledge Seekers are moving in, setting up, in a way we need. And, it's totally independent. We are not in the hand of any governments, wherever we work, in Europe the same. We stay clear of governments, and we support ourselves. But, Markray initially will be a child of Shanghai Stock Market. And the support he receives through our connections of the Keshe Foundation, a lot of support. (2:14) And we're negotiating with a couple of big industrial groups in, what you call it, merging them into, to speed up our development.

It's not easy working with government, following the research, making the development, bringing all the things, we have a dossier of all you Knowledge Seekers where you've done, what you've done, where we can use you, we come to you, and you've seen many of you travel, start traveling to us, to support us. And, up to now, whoever has come to our research centers, they want to join full time. They are moving the whole family. Because, it's a nation, and it's making as One Nation, One Planet, One Race. And people come in, they see. And I think you might have a glimpse of what Keshe Foundation has become, next week, for the first time. But we keep quiet. We have to go ahead, we have to do what we are doing. In... we have to let the nations and what you call, citizens of the planet, to bring us up, not us by ourselves.

We'll see, gradually, I think you'll have a surprise next week, if I wanted to release it today, but they said, "Give us a chance in next week, till we do it properly. Or the week after." And then you see how we work. And it's all done by Knowledge Seekers. But they all have signed non-disclosure, nobody knows who they are, where they are, what they do. And, is perfection. Because we want to create the perfect seeds of everything, without contamination, that we can put on an App. Not to poison you, but to give you what it brings you, joy and happiness, and what you need. (2:16) You'll see the first phases of Keshe Foundation development. This time we kept, and we keep quiet, we work our own way. But you see, we work, we are a Space Agency, a Space Structure, and you'll see the true Space level of the work. Thank you very much for this Rick, and we'll see you next time. Thank you very much Rick.

R: Okay, thank you Mr. Keshe.

K- Thank you. Don't forget, tomorrow 10 o'clock for those of you who signed in for the addiction session. And if you have already been to an addiction session, we advise you not to join tomorrow. Give it a miss. Thank you very much.

R: (2:18) << Message from the Universal Council.>> We the Universal Council invite the Keshe and Universal Family present on the Earth in unifying at the Soul level every time every day at 9 p.m. Central European Summer Time. We the Universal Council give freely our Souls and invite all of humanity to elevate the Soul of every leader in every nation to work as one Soul in one direction to achieve peace as One Nation, One Planet, One Race.

640 KSW – April 30th, 2026
