

641st Knowledge Seekers Workshop May 7, 2026

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

(:12)

K- Thank you very much. Good morning, good day to you as usual wherever and whenever you listen to these series of Knowledge Seekers from Keshe Foundation, Spaceship Institute, we welcome you back to, as it said, everlasting teaching. It was very interesting Intro, Keshe Foundation's centers 21st century teaching. And, it's a beautiful way to see another generation of teaching, they become part of our intellectual, what we call, share of knowledge.

Last week's teaching was beginning of the understanding of cycle of life. You understood that Man uses every element, Universe (U) uses every element, to confirm its diversity and its beauty. A plant uses what's physically available to it, to create confirmation of existence. Water from the ground, gas from the air, mineral from embedded, and these are what we see physically, but at the same time, absorbs energies of Cosmos. It's not just the Carbon (C), CO₂, which gets absorbed and solidifies, due to its Inertia, which it creates by itself, but it creates a condition of the other material, what we call Cosmic Rays (CR), which one of many, is Carbon 14 and 16, (:14) and creates its own Soul, operation of Totality.

Body of the Man is the same. We, in the world of Vertical People, which the air we breathed this morning, the first breath we took when we opened our eyes, it wasn't just there for us, it was regurgitated by the tree which you left the window open, and partially the CO₂'s which are waiting in the queue to go in to be converted to become the Carbon body of that tree, and the tree releases the CO₂ overnight while you are sleeping and partially releasing the Oxygen which you are breathing, becomes part of your body. Now, how many of you ever thought that I'm sitting on the same table, and I'm eating from the plate of the guy next to me, and then the guy next to him, and then the guy next to him, and they're eating from my plate. We don't say anything because if I don't eat from his plate and he doesn't eat from my plate, none of us survive. So we are regurgitating second-hand clothing, second-hand food of the others. The tree outside. We cuddle our loved ones, we absorb the CO₂. You think you only take oxygen when you cuddle your child in the morning and she's sleeping next to you, (:16) or he's cuddling you, or your wife, and you say, good morning darling, yes give me half of your CO₂, I'm taking it in because you need oxygen from the plate next door which came from the tree, otherwise I can't do much with it.

Our body is not selective in what it takes from the space of the room in our air. CO₂, carbon monoxide, carbon dioxide, oxygen, a bit of Nitrogen, a bit of Hydrogen, and a bit of gases of the Universal Cosmos, everything goes in. Then our body, according to the Inertia of the structure of the cell decides which one I'm going to take. The biggest mistake, again, has been made by scientists who never understood, is you breathe air in. Unless you are connected to a gas tank, you're breathing CO₂, too in. What happened to

the CO₂ which you breathe in? You don't just breathe in nitrogen as they tell you and oxygen and that's it, 'hunky-dory.' They made it too simple to show that they're clever. But if the tree is absorbing CO₂ and you're breathing it, it's in the air. What happened to that Carbon? What happens to the CO₂ which your lung has created to be converted. We most of the time breathe our own CO₂ back in because he hasn't got enough time to escape the extraction forces of our nose and our mouth.

So the way the tree converted the CO₂ to a structural physical body itself according to its internal Inertia. (:18) We absorb CO₂ as well. We convert part of that. We are not just (an) absorbing oxygen plant. We are a full-dimensional mixed culture of elements and with all this, always comes Cosmic Rays, Cosmic gases. There's so much Cosmic gases on this planet beyond the imagination of the Man. Because this Cosmic gas plasmas is what converts back to the matter according to the Inertia of the Place, Time and Position. It's not all gold and dust and copper and whatever you see. If you understood that, the way you converted the minerals and Inertia use of the Time, Place and Position to the structure of the carbon of the tree, according to the Inertia of the plant, this Cosmic Ray becomes part of the food of your Soul.

The way we eat to feed our physicality, we inhale from the Cosmic Universal energies, materials, packages of plasma to feed our Soul, otherwise it dies. Experiments in the Cosmos by the scientists of the Universe (U) has been done, when they manage to isolate the feeding of the Soul, and the Soul has died. So, we create, we can create, (:20) we have the possibility to understand further, that as we eat and drink from the environment of our life, be it on this planet, be it another life in another dimension (D) of the Universe, our Soul needs, absorbs and lives a parallel life to our physical life. Does not matter where we transmute to and where we been. In the dimension of the Souls traveling the spans of the Universe, sorry there is no cows and there is no milk and there is nothing else to feed you. But your Soul gets fed from the dimension of the energies of the Universe, and according to the Inertia of your Soul, you convert, become the first seed of a planet, the first seed of a star. Or, you join other seeds which have already started the process of the creation of the star. Multitude, complexity of the life in a Universe, in a plant, in a planet, in a star, in a galaxy, is a combination of the Souls which led to the creation of the seed of that star.

We do not just eat physically from this planet. Our Soul eats from the Cosmic Rays of the Universe. This planet does not provide that, it's like you have a deficiency of the Vitamin C, the Soul will have the deficiency of the energies of the Universe. It lives in that dimension, not in the dimension of physicality (P). Needs to be fed by that dimension, otherwise will starve. You'll have deficiencies, that the planet Earth, Moon, and the Universe, solid state matters, cannot feed it. (:22) This is now you understand, that you are a schizophrenic body, that even it feeds itself on two different tables of the Universe. You feed your dimension of physicality, and that feeds the dimension of your Soul.

Once you understood this, becomes a very big question. And that is, in the physical life of the tree, we understood that the Carbon of the CO₂ of the environment, according to the Inertia of the plant or the ?? planet ... the characteristics, becomes a wood, oak,

becomes the stem of a mint, or it becomes floating stem in the water, according to the Inertia, which the Soul has created, that the Soul of physicality of the plant, which controls his physicality, has accepted to convert. Now comes a big question for Man, for humanity. And that is, if the Carbon in the CO₂ absorbed by the plant, through its leaves, converts to the structure of the wood of the trunk of the tree, that when we burn 50% of it, it's that wood that then we make our barbecues and gorgeous kebabs with, what happened to all the energies that the Man consumes as food, as Cosmic Rays feed of his Soul, when the Man dies? We say, oh, he becomes converted to gases. But we have a direct, instead of waiting and measuring over thousands of years, hundreds of years, weeks and months after death, we burn our bodies, we cremate. What is the residue of the body of the Man when it's cremated? (:24) How much Carbon is in there?

The tree converted its CO₂. What did the Man do with all these sugars, this delicious fruits full of Carbon, which you say, "Carbon is a CH₃, complex Carbon structures, our children eat it and become hyperactive." What happened to that Carbon, which we consume 10 times more than the tree? Scientists have shown, data has shown, at the point of cremation, which we speed up the release in a house fire, or in a crematorium, leaves more or less zero Carbon. What happened to that structure? Why do we have the sugar in the structure of our amino acid (AA)? Think. It's a trap. The way the CO₂ brought the conversion of the gas in the solid state of the body of the tree, according to the emotion of the tree, dictate the construction of the pine and oak tree in their wood. What did all these Carbons which Man uses on the daily basis become part of? Or is it a trap for absorbing more and more Cosmic Rays to the Soul of the Man (STM)?

Then if you understood this, you understand where the evolution comes from. How did the Man change? How come the Man has become intelligent? A cow eats one type of grass. (:26) A little bit diversion if we give it a corn or grain, but it's mono-energetic. Intelligence needs diversity. Man eats different foods, grains, meat, sugar, everything else on this planet. It creates diversity. That diversity brings intelligence. Nothing else, because you absorb different spectrum of the Carbon, which connects you to different spectrum of the energy of the Universe to enlighten your Soul. 5 degree, 6 degree diversion in the axis of the Earth has created such a complex weather, life, structure, races, and animals on this planet. Your Soul doesn't need tilting, it has replaced the tilting with diversity of food, complexity of the emotion, complexity of the life.

Physical life chooses the tilting, dynamic life uses complexity of the energies. There is no difference between the Man's behavior and what we call, a bit diversion and a slight tilt of the Earth. Earth is like that tree, has chosen a position of the diversity in the center in one position, but this time it rotates around the Sun. Man uses the leg to do, Man uses the diversity of the minerals and gases and Cosmetic Rays to create its diversity of life, anger, joy, short, tall, black and everything else. (:28) And the planet uses that tilt to create rain, forest, animals, rage of the hurricanes and everything else. The life is the same, does not matter where you go. The tree does the same, the ?? plant does the same.

If you understood this, that your life you eat from two tables at the same time, you are the, all of you from the time of birth, are the best, best Muslims God ever created. You

have two wives and two lovers, and you eat from both pots. The pot of Universe through Cosmic Rays in one house and a pot of physicality in the other. But somehow you have managed to bring these two 'mistresses' together to show as one and nobody knows where you are. I used to have a minister, cabinet minister, one of the top leading nations in Africa. I called the wife one day, I says, "Can I speak to..." "Sorry, I'm wife number one, he's with number four tonight." I knew number four because I had many times dinner with her on the table. I called her, I said, "Gina, where the minister is?" She says, "The other three don't know, but he has a mistress, this is the number, call him." He's with her tonight, and he's another city not here, and he's another country tonight, to come for a nice evening and weekend.

This is how we live. We have chosen to keep mistresses, call the STM, and just show the physicality, that the others know we're having an affair with God, in the dimension of the Universal connection. (:30) The reason is, we are too ashamed, to accept the dimensions of life within ourselves. We hide it under names of the religion. We hide it under name of every other thing, but to accept, because this way, as we don't tell who the mistress is, that the others cannot divulge and release the truth. So, we all agree to lie to each other, but we all keep one in the background. I've sat on many meeting with the ministers and world leaders, and highly influential people, with their mistresses. And I have to look down as, "Sorry, I have to treat you like a wife." We live in the life of the Man, through different emotions, with different 'call girls,' on the table of life. And this is what has caused the others to abuse us in the name of the religion. Because if they call the 'card,' we are all 'snookered,' we lost on the gambling table of Universe.

When Man understands and accepts the reality of the existence in two dimensions, Man will come to understand the work of the Universe. "What do we do? I'm traveling to another city, I'm working darling, tonight." "And what do we do?" "We go to another city, another lover, and we enjoy ourselves, and we come back home in the morning." "Oh, it was a hard work." Denial of the other one. And we do that to ourselves, every day of the month, every breathing seconds, we say, "Oh, I've fallen asleep." (:32) We choose the sleep and the dream as the wife and the mistress, but in fact, the mistress you chose, is chosen by your wife. Because your wife chose the mistress, and she dictates partially where you're going to end with that mistress. Your cleverness is your tamer. Your cleverness is your prison. You have a lover which you call it the sleep time. Because you don't want to understand that you have moved house, but with the same mistress. Having a 'full strings' on your Soul. The physicality, 'go and play, I keep the string, I go, I pull the leash, you come back.' Because, till I'm here in dimension of physicality, your Soul is that dog on the leash. I decide when it goes out. I call it a sleep time, because I need a little bit of repair jobs, as they call it. But, you're out with the mistress, the Soul, traveling in the span of the Universe.

So the conduct of the Man itself, the Inertia pull of the emotion, dictates how long that leash will let you go, and where you'll be, because you think you're free, but not. The leash through the, what we call, the field strength of your Spirit, has got a hang on your neck of the Soul. But, what happened to what you ate all these times? Tons and tons of the physical food, and God knows more from the Cosmic Rays to feed that Soul. (:34)

Now understand how the game of life played. You don't fall asleep, you just cover up for the mistress you allowed the husband to play with, where you have the leash on the neck of the mistress. But it goes where it wants. That mistress is your Soul, which you hide, but is control over the dimension of the acts of the physicality of the Man.

Now you understand, how the environment of the physicality is used to feed the Soul, but keep the dimension of control. The tree left the Carbon behind as it's trunk, till you made the barbecue. But who barbecues your Soul with all the Carbons which you consumed, and when you burn there is no trace of it? Now you understand. Now you know the game of the play of the gravity, the Inertia, the human race on this planet. Now, it's for Man to decide how to play the game, to bring the mistress out of the box. "Darling, this is my mistress." And the wife says, "I already know we are friends. We set you up, and you played the game, the lifetime."

When Man understands, how the two dimension of his life, in the brain of the Man, in the emotion of the Man, is controlled by the two mistresses, Man will understand how to transmute. (:36) How to please both, to keep the life of the Universe the way the Creator does. Enjoy the dimension of physicality when it's needed, and enjoy the dimension of the fields of the energy of the hidden life, when the Soul decides to play the game of life. Maybe now, in the coming times, in the teaching, you as Knowledge Seekers (KS), will come to understand, how your Soul is created. Is the Mistress, which allows it to be created, you call, the sperm and egg, and expansion of it in the womb of the Universe. And, is that Mistress, which then decides, how the wife lives, because it's the control of what the wife can eat, even though they live together. I close my eyes to your conduct, because I need a rest, and you think you are free, the mistress is there for you to play with, I gave you the chance. But, be good when you are free. And the most beautiful thing is, that the mistress is obedient, is playful, takes you across everything that the wife cannot take you, because it's dimension of physicality restriction, but you still deny it. But not knowing that the mistress is actually the wife, because the conduct of the wife decides where you land, what you enjoy, and then you decide, when I divorce this mistress, this wife, I go to where I like with the mistress, but the wife has already set the position for you, where you going to end up to have a joyful life, (:38) for the dimension of the, what we call, Energy side, or the STM.

You men and women understood fully, what the teaching of today is. You deny your own existence, you play with the mistress. You understand the work of the two, you leave the path in the way of the Creator. Does not need emotion, it needs understanding of the process of the Creation. And once you reach that point, you matured enough to understand, there is no transportation, and there is no transmutation, but it's a travel through the Cosmic Rays of the Universe. What now has become fashionable to be called the 'Quantum Energy' and the 'Cosmic Ray Energy' and how we live. Terms never used, but once unleashed, the Man will use it to show his cleverness. But the next thing Man had to understand, is that his Soul and his physicality, have the same emotion. He has to learn which strength with isotopes of the emotion, to tune into, to play with the mistress or the wife. Wife is the physicality that everybody can see. A mistress is hidden in the back, that the wife knows about, and that you play with. But, it's you who lives the dire

life of denial, of the existence of the mistress, that everybody else can see, everybody's aware of, and you are the only fool which hides it. (:40) Now you have to understand, how you play this game. We want to be in front, with a wife, or you want to be, call it a sleep, and go traveling with the mistress, which is actually created by the wife.

There is a beautiful thing, there is a woman, says, being interviewed, and she says, the woman, "I have a second wife of my husband in the house. I do all the cooking, cleaning, I do everything else in the house, and the mistress has the pleasure of shopping, going out to the movies, taking the heart of my husband." Then you are puzzled, by this. "How a woman can allow this?" And then, she calls the daughter in, and she says, "This is my mistress. I do all the cooking and cleaning, and she enjoys the life of my husband, going shopping and the rest. And the beauty of it is that I enjoy it, because I see the love of it. When he loves her more, I love more. But what I created for her, for him, to love each other more." And this is what we do in real life. And if you understood the essence of it, you understand how we live, and how we treat our Souls, and why transportation, transmutation, has become a dilemma for humanity, where the rest of the Universe has solved most of it. We keep the wife, and the mistress is for the love, what we love as the wife has created for us to adore. (:42) And both agree, we live in the same house.

Now you understand, how Man needs to understand, lives in the same house, consumes the same energy, but lives to the denial of his own existence, in the dimension of life, and the emotion of life. If you understood this, in the next week's teaching, I bring to you something which shocks all of you, and then you understand how we teach you, how we feed you, how we control the dimension of the existence of you as Knowledge Seekers, humanity and the life in the Universe, through understanding a simple principle. We don't need to create the mother to enjoy. We are the mother that we have created, all to enjoy.

Understand the principle of the teaching today. Very close, you thought you have a mistress going shopping with. But the mother created that mistress for you to enjoy, because the love of the emotion of the mother allows the Man to enjoy the pleasure of the daughter. Now, how far have you understood about your own existence? That, is that the Carbon you breathe, the Carbon of your structure? Or does it become the shackle to your body, like a tree, to become the wood? Heavy and ground, you to the ground, that you cannot move. It's you who makes it a prison, or makes it the flight of fantasy, in the dimension of the Creation. (:44)

Think about it. And then, maybe, we decide to teach you more next week, to understand the totality of the process of the control of the Man through the Soul. Is the Soul the daughter of the mother, or the mother is the daughter itself? I hope you understood and enjoyed the essence of the teaching of today. But now it's for you to understand the dimension of your own Soul. The strength of it, connection of it. Do you need two different emotions, or actually the same emotions created by one? It's you who do not understand the difference. Then you understand why you are... throughout the teaching I call, "The emotion of the Soul and the emotion of the physicality." Because you haven't understood, so you try to find out it, but both are the same. You have to find out which side holds which end of the string, and where the string takes you. You climb up the tree

with the same rope, or you climb down the same rope, to become physical. One end hangs on the tree of the Universe, and the other end while you're holding it, gives you secure footing with a foot on the ground.

It's you who chooses which end to hang on to, and night time, go up the rope and live up the top of the tree, and daytime climb down the same rope, and then land on the ground and still hold on to the same rope. That rope is a connection between your Soul and the physicality, (:46) and you decide to be on top of the tree with the birds of the Universe, or foot on the ground and the acts of the Man in dimension of physicality. The rope doesn't change, it's the Man who decides to play with the wife or the mistress on the top floor or on the ground floor that nobody knows, there is a staircase between the two. You choose the "I'm going to sleep" and to let the mistress play. Or, we both understand, "I'm handing it over to you because I need to do a bit of cooking." The physical dimension of the life.

Now you understand how you have been fooled, and how you fooled yourself. And the races in the Universe who understood this, travel the span of the Universe, no need for the rope, the UFOs, the rocket, missiles, cars, and the use of the leg. We go for a break and come back, and we start a new dimension in the life of the Man. Rick, take us to a break and we come back.

>> BREAK >> 641 KSW May 7th ... (:52).

K- Thank you very much. First thing is that last week, due to May bank holiday or whatever, we did not get majority of the people for the addiction session and we abandoned it because there were two or three people only. So, those of you who you paid for it, you haven't lost it, we, with the agreement of the couple of people who were there, we delayed it to tomorrow. Those of you who you paid, and you still want to attend, the session will run tomorrow. And then you lost it, because we can't keep on delaying. It's the first time we ever done, but because of the May Day Bank Holiday, or whatever, it lost. Tomorrow at 10 AM, Central European Time, we'll do the addiction session. Bring your headphones and the rest, and do not come back to us, oh, I missed it last time, we delayed it. A number of you, please join us tomorrow in the session. The other session for Cosmic Ray Energy, we'll decide by next Thursday, if we're going to do it next week. Or we're going to delay it because there's some movement in the background that we want to do a new way without the Zoom. We still use the Zoom process tomorrow.

The other point which we are very interested to follow up, is what we call, what we've done with the process of the Keshe Coins (KC). (:54) Please register yourself into the Keshe Foundation Association in Austria, or register yourself into the Game, which is set by the Keshe Foundation, and then you have to sign yourself into it, that you become eligible to use, check, cross, Keshe Coins, in the process to come. We're negotiating with a number of governments, and when a Keshe Coin comes into operation, you cannot just purchase it, you have to sign to be member of the Keshe Foundation structure worldwide. We are not a Cryptocurrency, and this is start showing what we call, hiccups in our system, that we do not move into the Cryptocurrency and fluctuation which carries to make a fortune or not.

In the documents which is laid out and it's just been shared with maybe four, maybe six governments at the moment going through, we have laid out the principle, it's some 22 pages done by one of our leading management team of the Keshe Foundation needs to be translated, still going through its final modification, and it's already been shared with four governments, in setting out the structure of the work of the Keshe Foundation, the ethos behind it. Once this document is completed fully, after a consultation with the government, we'll release it to you as Knowledge Seekers, to take it to your governments for them to understand. We are pushing for Keshe Coin to become international currency within the coming maximum a year to two years. The same as we did with sharing the what we call the 'Key' to the Keshe Foundation knowledge in 2011, 2012. (:56) This time we sharing with you, you take it to your governments, this is what is the Keshe Coin. It will become part of the structure of international .. currency exchange.

The reason for it is that no government, unless they are dictatorship, will refuse such a process. And it allows the governments to work without the boundaries of restriction, sanctions and everything else. We are hoping to receive more detailed negotiations with the governments to see where they see the fault of the document we sent or what needs to be added that they can do. But we are aware that they changed things to allow them to govern and not for us to share to run what we call, national structure. We're still looking for purchase of the ONN as many as you can because that's where the 'game change' comes, and as of hopefully next week if our team gets together as they're doing in the Space Center, they bring the operation of the ONN's to become released when they do their last jobs with it.

As many of you know we are pushing with the Keshe Coin as a currency for next 100 to 300 years. Till another process comes up where the Man pays through his Soul, and not through physicality of the matter. But this transition time of 100 to 200 years depends on how the humanity moves and how humanity decides. It closes the game of the closing the straits of one nation's waterways or closing the what we call the SWIFT account of the other. There are no SWIFT, there are no what I call waterways except the wish of the Man in to survive in the dimension of the work. (:58)

As I said to and I wrote to the world leaders in past couple of weeks, we give you a thousand Coins for every person born to the person in your country. And as a government, you get a hundred Coin. But somebody might look at a thousand Coin, a

thousand Euro is one million Euro. The span of the life of a hundred, two hundred years, which is becoming the norm, how you going to spend one million? It's not enough (?? it's too much, you'll have leftover KC). As I explained to the diplomats, very simple. I'm sure mankind will leave a big fraction of this after spending whatever he likes. Because this is made for the Man's need across the Universe and not the use of this planet.

And then if you understand, to your understanding of today, how I'm going to get an apple, an apple costs 10 cents in one place, 1 dollar in another, and 30 dollars in another for a kilo. Yes, that does, if you live in the dimension of physicality. But with the Keshe Foundation Technology and development coming into our Space Centers, and there's an apple on the phone, costs an apple 1 cent in New York, 1 cent in the wages of Central Africa, 1 cent in China, and 1 cent for Aborigines in Australia. We all have access to this mobile phone. I told you I use Man's humanity knowledge to punish the Man to find a way out of every problem. There is apparently 7 telephones for the Westerners and 2 telephones for rest of the humanity, anywhere on this planet. You all have access to an App, even in the smallest village. (1:00) Then, it cost one cent for an apple, you can have a thousand apples in a hundred years, because you live on this planet with the greatest of pleasure, anytime you want to take one.

So, you live with a few cents a day, the food, the medicine, everything else on the App, and then you're clever enough, you use a chip, ID, AI, in your body, and it's controlled needs. The emotions in an apple, AI in your body, calls from apple, you get the taste, the emotion, the rest of it. The only thing we do not provide is what they call it, the ?? true pleasure. That you have to taste it through the dimension of physicality. And if you understood this, with one Euro, which is a thousand... I'm sorry, with one Coin, which is a thousand Euro, which is hundred cents, you can have one hundred thousand products of your life with one Coin. You eat three times a day, and you have five different, ten different items a day. Let's say you spend 20 cents a day. You have 100,000 with one Coin. What are you going to do with other 999 which is given to you as a surplus?

Now you understand the structure of the work. One Coin of the Keshe Foundation is there to support life, to support Soul, (1:02) to support the life of the Man in both dimensions. Because you start spending energies, "I want to elevate my Soul, I need the Cosmic Ray ??." Physicality is not there. But in the teaching of next week you'll find out that no Man will spend a penny on an apple. Not a single cent will be spent in the coming time for you to eat the apple, to buy the apple on the App. Because, go back to all the teachings from the beginning of the Keshe Foundation. Go back to the session tomorrow, go back to the sessions you lot paid for us to research in your Soul. Don't need to give you an apple, we feed your Soul. And that Soul decides with the mistress of the physicality, what that energy will taste. Will it be an apple, an orange or a steak?

The whole game of the Keshe Foundation Coin business, and the whole game of introducing the teachings which you are part of it, tomorrow as an exercise, and even today we are tuning to all of you on these sessions, is to feed you through your Soul, and not the dimension of physicality, and the two mistresses decide, "I'll have this part for me and that part is for you, you convert to what you like, I convert to what I like, I choose it

to get closer to my Creator, you choose it to have a nice soft skin that the partner can enjoy."

Now you understand, the game is not what you thought it is, the game is to bring Man to understand slowly, (1:04) and the teaching has been very clear about it. From the day one, we kept on telling you, we feed the Soul, to feed the physicality. And now we brought you to maturity, that you can gradually understand, with the teaching of today, and I'm sure within next week or so, how you have walked into the life of the living, and life in the dimension of the Universal dimension, and not trapped physicality of the Man on this planet. Be aware, we don't do anything just for fun. We do everything for the joy of the Creator. The fun (of) physicality does not count that much when it comes to our work. We just let you enjoy the tickles, but the tickler sits in the center of the Creation.

So, support us to spread the ONN's. We need huge amount of ONN's because the governments are as stingy as the human people who run them. And we try to bring that change. But understand, one Keshe Coin can feed you a hundred years on this planet. You don't need a thousand of it. But Man always likes to think big things, make much billions worth more than a dollar. But the billionaire sufferers cannot eat. And the poor Man with one dollar enjoys the joy of the life on the table of the small gritty shop and the restaurant in the back streets of a nation. Money cannot buy, but the greed of the Man pushes Man to the dimension.

Tell you a story as I do a lot about my life, that you understand, I'm not who I am now. I have been brought up the way, and I learned the way I am, from childhood. (1:06) I come from a very wealthy family in Iran. And my cousin and I, we used to choose to go to the worst places in Tehran to see how other people lived. We walked into a cafe which had what we call the stools where the buckets where they used to carry oil in. And we asked for a kebab. They looked at us, two rich boys, what are they doing in this slum? We watched them. There was a dancer in the middle dancing and it was a very beautiful scenery, dark, smoky, dirty as you get it. And, then we went to a cinema, those of you who are from Iran, know which cinema I'm talking about. There were no chairs, we went with the oil buckets, to sit, to watch the movie.

My father said to me, "Why do you do this?" I said, "Dad, I have to understand my nation." He said, "You go to the most exclusive restaurants with me and your mother, and I hear from your cousin, you two go to the most grittiest places in Tehran. You go to the side of Tehran, and in need with the people in dungeons." I said, "That's the pleasure, that's where I see the humanity, not your luxury houses." He said, "One of these days you're going to get hurt." I said, "That hurt is worth, I learned something else, I learned more about humanity." One day he called me on the street and said, "Why you two are here? This is not the place for you to be, it's too dangerous." I said, "Dad, we come here so much, we become part of them. They love seeing us and we love to be with them."

I didn't choose the life of today, I lived this life all my life. (1:08) Now, you have to understand, you choose your path. We know how to string you and how to strangle you with your own greed. Understand why we are pushing with the Keshe Coin and the

ONN's. It's not for us. I can live a life of luxury beyond your imaginations, as I did before I started the Keshe Foundation. But, bringing Man to be free worth more than a few pleasures of life. I don't live a gritty life, I live a pretty pleasurable life, the way I enjoy. But, the time of suffering for the others to enjoy, is not the time of this cycle, because if my Soul suffers, so does my physicality. I've not achieved anything. I just let myself down to be part of the structure. But I'm there to change the structure for you to live the life I live. Be happy with what you have, greed brings you down to nothingness.

Now you understand the process of the work. We are building the Space Center, we need a lot of support. And then we call upon you, when we are ready, to take these documents, the way you took the Keys to your nations, to share the merit to be wealthy at birth, not wealthy by cheating during the cycle of life. When you're born wealthy at birth, that the mother does not have to worry about where the next clothes comes and where the other thing comes, you live a change of life. It's beautiful in one part of these documents, the way it's written, the (being) born wealthy allows you not to commit any crime, (1:10) to become wealthy. As an English farmer says, he says, "How do you make a farmer a millionaire?" He said, "You take a billionaire farmer, you tax him as much as you can, that he's got nothing left to ?? it." We have to tax ourselves with our conduct. And when we are born as a millionaire, as a 1,000 Coin, as 1,000 Euro gives you 1 millionaire, then millionaire is not the target, to see how much you left behind, and how much you leave behind of that million, is a conduct of some Man to enjoy life.

Physicality does not count, wealth worth nothing, if the Man does not understand, is not the key to it. I walked to my mother, I said, "Mom, I want nothing of your wealth than my father." He said to me, she said to me, "You're too young," and secondly, you're too wealthy." I said, "No, that's your fruit." Then, and then my mother and father died, I wrote to the lawyers, I want not a single cent to my life. I don't want to inherit, because I have to live the inheritance. And this is how Man should be. Don't look in what is given to you, build what you can, in dimension of physicality. But in dimension of the Soul, that's where it lives. The physicality of the Man is just one more jacket on the structure of the life of the Universe. How many jackets have you changed in the past 20, 30, 40 years? It's another piece of underwear which comes off, in Man's life every day. In the Universal time, it may be thousands of years. Man has to decide what he puts on his frock, on his body, which is the STM, and not the physicality. (1:12) Be wise, you'll find the path to the Creator. Fight for bigger things, and you always suffer in dimension of physically. Just play the game of life and see which one of us wins. The Creator or the Man who was created by Him.

Any questions?

Q: ... Good morning Rick, can you get Mr. Keshe to explain what AI in the body is, please? Or, please tell me we do not need to get chipped to eat the apple.

K- Your AI is your Soul. And as the English farmer says, "???" You have to understand that we are developing technologies that just does not exist. It's very interesting, you call it the Cosmic Rays, Keshe Foundation terminology for Cosmic Ray has become the

fingerprint of our work. But, interesting enough, as now we are deeply involved in the Chinese structure, (1:14) Chinese government has come up with a new word, using the Keshe Foundation, saying, "Oh, they're sitting on top of us in every dimension." They have come up with a Cosmic Ray computers, last 2-3 weeks, where there is no physical and we use the rays as a combination. This is what we developed and is in development of the Keshe Foundation.

So, the biggest nation in the world has started using, will actually sit on our Chinese products for past 4 or 5 weeks. And the world has started understanding, this is beyond plasma, is a Cosmic Ray. The Creator of Cosmic Ray are ... creation of the dimension of field of Universe. And then you'll, what we call, the Cosmic computers, have no components. You use it in the Gans's, and now the Chinese government has jumped on the 'bandwagon' by the scientists who are mainly Knowledge Seekers, not being able to tell them what they call, the bosses, what they do, who they are. And, for the first time we've seen Cosmic Ray computers, discussed by the Chinese government scientists, in the past two, three weeks.

So, if you understood that, Cosmic Ray AI's does not need chips, understanding the field strength of the Soul, and not the dimension of the physicality of the Man. You were introduced to Cosmic Ray AI's control and system, when you start buying those Cosmic Ray Balls. Those of you who bought the Cosmic Ray Balls, (1:16) already entered the dimension of the work of the Universal Cosmic Ray systems. And many of you live a double life when you have those, because it's an interaction between the Soul and the physicality. Those Balls will show very soon their power. And how we connect through those to our systems to all of you. We don't produce them anymore. We more or less stopped because we need the material for other works. Those of you who have these Balls, is hundreds of them around with you in different part of this planet. You are part of the ONN without you knowing. We've structured in that way. I set it up that way. ONN are part of the physical dimension of communication. Those of you who have the ONN and you get the Cosmic Balls, Cosmic Ray Balls, you will connect in a different way to the whole system. You are part of the structure. Because the ONN, new antenna, connects to the Cosmic Balls.

Keshe Foundation just doesn't do things, but as usual, I know how to hide things behind other. Those of you who hold Cosmic Ray Balls with you, treasure it. Give it from you to your children and to your great-grandchildren, and the next generations for them to come. (1:18) All the Cosmic Ray Balls which you hold is connection to us. We have embedded in a different way in our whole system, without you knowing. And you will become part of that AI structure. Any of you who carry your Cosmic Ball, you are well connected with me, because I carry one, and all the Balls are connected to each other. I have the first Ball ever made. It's in my position, it's in my name. It carries my fingerprints on it. These Cosmic Balls, these Cosmic materials, is part of the structure, which will be followed into the ONN's and the future systems that come into operation, and it's part of your AI. You'll understand when we put them in operation. Then you don't need the microchips, we have already chipped you with the Balls. You'll understand once it becomes operational.

Any other question?

Q: ... The game has some major things missing. No longer get 200 for logging in and out countries are relabeled wrong. What happened? Thank you. (1:20) So in another question about why are the three servers not interconnected without players knowledge which has led to massive account bans. So generally maybe some issues and problems with the Enlightenment Game that's been played and...

K- Enlightenment Game has been made by human. So it has flaws, you have to bear with us till it's rectified. That's as simple as that. People are working day and night, 24 hours a day. And you have to keep on playing it for us to see the pitfalls. And if you thought you're going to earn 2,000 Euro, 2 Coins a month free without us learning from, oh, you haven't understood what Keshe Foundation is about. There is a huge amount of work is going on, people are moving countries to countries. We've got so many people trying to help different part of the structure of this AI and the Game that it's gradually growing up into a big structure for us in the next 6 months.

Because when the Game is set up, you have to bring agriculturists, you have to bring the people who play social game, you have to bring a lot of other people. We've taken over a center that now they have a, they actually become a home for this part of the operation of the Keshe Foundation. And it's going to cost millions. (1:22) We've grown about in three countries, we have to cover the whole of this planet, but safe through our own system. The first phase of the research center, Space Research Center, has started this week. We've taken over and are one of the most beautiful centers ever Keshe Foundation sat in. And the first people are the AI people who are moving to this building. When the Space Center completes, it'll occupy most probably 10,000 scientists, in the next 2 years, 3 years. But, we are setting the points, step by step, that is solid, self-supporting, and doesn't need no nation, no government to control it. It takes time, it's easy to complain, you try to sit here to structure it. People are working 24 hours a day, day and night, no Saturday, no Sunday. Then you complain about one game, too many.

Keep on playing for... It's your responsibility, those of you who play the game now. You have to play as much as you can. Don't look at what you earn. It shows our weaknesses in our system, that we can correct. You... the more you play, the more problems or good things we see in us, and different people join into it, then it brings us more knowledge. And... it's a habit of Man. "Me, me, me, me, me, me." People have moved countries, people have moved continents. You don't know how much, how many people are suffering, and brought suffering to themselves, to make things possible. It's not just the game. (1:24) The structure to set up the game, the structure to run it, the structure to people who bring the facilities for it to be able. It's not just, just you play game. It needs a lot. There are people in 5 or 6 different countries working to keep different aspects of this game, for now and the future, to be set. Technology is to be developed to be used. Everything else counts. And you just complain about, "The game does not do this." Keep on playing, it's your responsibility. The more you play, the more we see the faults, the more we can expand. You are the first generation, and most probably the fundamental

part of the game. And, stop complaining. See how much it could you put 12 hours, 15 hours a day to play the game for us to see where the fault is, how we can expand it. This is to change the humanity, it is not just for you to complaining because I'm not playing. You have a spare time, play, and let us see where it is, because we observe in the background what needs to be done.

Any other question?

Q: ... Can twin Universes be separately understood as Magnetic force and Gravitational?

K- We always live that way, one cannot live without the other one. (1:26) We call it Magnetic (M) or Gravitational (G) in one part of the knowledge. We call it the Soul and the Spirit in another, but it's the same thing. And they work parallel with each other, one cannot exist without the other.

Q: ... Thanks again for the teaching today, and you said that the Soul dies if not fed, I'm paraphrasing here, he says, but previously I understood from your teachings, that the Soul never dies, can you explain further?

K- Ah, you missed one word in there. In the condition set up, it can die. In a normal condition, what we call laboratory testing, you can create a Black Hole that the Soul does not receive any fields, and within it, cannot grow. That's what the death of a Soul is, and you cannot create it in a normal condition, impossibility. As far as there is a Universe, there is a transmission of the fields. If we can make a, what we call, a box condition, that no fields can go in and out, that the Soul cannot receive energy, yes. It cease to interact until its death. It's a Faraday case of the Soul. Created it makes a lot of... it needs a lot of understanding of the World of Creation. (1:28)

R: What kind of material would it be that would stop those rays from getting to the Soul, for its nurturing? I mean...

K- Our own conduct.

R: Okay, you're not talking about physical materials, like a metal box, like a Faraday cage, you could say... You're talking about an emotional Faraday cage?

K- In a way yeah, because everything has a magnetic field strength, if you can block it, it will give you that. In the knowledge of the Keshe Foundation, I think we've got a couple of these boxes which we can block more or less everything. I built the first one 20 years ago. It's a true 'black box.' And... actually, wow, time flies, 20 years ago, 21 years ago, 20 years ago, 2005, 2006, in those days you, you were not that many of you, it was a time when the Western Europe was shocked with the technology. The universities, top universities in Europe, took the technology in such a way that the governments wanted to know. And I used to attend a lot of governmental meeting, a lot of strange places, where I ended up in. Not knowing what I was doing to them, but they knew what's going to happen to them.

And one of them was, I was invited to the European, what you call it, (1:30) in Brussels, the big building you see, I went with Dirk Laureyssen. Because we didn't know he was a spy inside the government. I mean that time I didn't think about it, it seems he was too nice, but covered up with sugar. And I took a piece of material with me, and it disappeared. While we were guests of honor in the conference hall, there were hundreds of them talking about new technologies in the Universe of the Man. And he came back, and I said, Dirk where did you go. Oh! It was the first time he had a chance to actually put his hand on this material. I knew, because he used to come to my house, we were writing the patent and everything else. He was trying to get something from the house, but that day I brought this material to show in EU, Central Conference to the world scientist.

And he came back, he said... I said, "What did you do with it?" He said, "They must have broad systems." He said, "We put it through a system just now. This is organic." I said, "What do you mean it's organic?" He said, "You have metal in it, but our system sees the system here, they have, to see that it's organic. You can transfer nuclear material in this, where nobody will show, doesn't exist." I said, "Who gave you the permission to do this?" He said, "This..." And then I found out, later on, he's part of the government structure. He was recording every glass of water I drank.

And that time, in that meeting, I was sitting and listening in, they were introducing me as a leading Iranian nuclear physicist, giving this speech to this conference. (1:32) In that process I realized that I can hide everything I want. I've made a Faraday box of the Universe. In that EU meeting in the Central Hall of the ?? CUNC, that is like a huge curvature building in Brussels. That few minutes brought a new understanding of what you can do with this technology. You can make a Faraday box of every wave in the Universe, emotion, thoughts, magnetic fields ?? , everything can hide, if you understand it. You have not understood that yet. With him walking in, I could see his face, he was uncomfortable, it means they told him, "Most probably go and find out one more, this is it."

They .. There's a company in Belgium, which is part of the spy structure, on the scientists, and this company has killed many scientists, owned by the ruling family and the rest. I know they killed hundreds. Stealing their technology, I was one of the victims, more or less. And they took this material, they analyzed it, and that analysis, as many of you, I have said before, we came down, I became a terrorist, (1:34) because they said, "To produce this material you need Gamma rays, a nuclear material." In this organization they took a material, and the lucky thing is always lucky position. I called the scientists who were doing this analysis, and he explained to me, he says, "You developed something we don't understand. You have the matter in the condition of energy." And he said, "You passed Fluorine." I said, "Can you give it to me in writing?" He says, "Yeah, I'll write it to you." And then I couldn't get it, because they found out he's gave me the information before the report is written. He said, "You work in dimension of energy beyond Fluorine." That even making Fluorine at that time was a criminal offense.

And, those of you who have been around the Foundation, you remember, they went, they made me a terrorist, they issued a warrant for me as a terrorist, because I created Fluorine, using normal caustic, but in a specific way. And the American refused it, says, "This is not a world leading science." And then they created that fake, what you call it, fraud. It's the same code number on the summons. It says, the number is the same, it says "terrorism" and then the Americans said, "No, he's not," because they needed the Americans to confirm it. They said, "He's working with the peace talks within Iran, he cannot be a terrorist." They didn't... the stupid guy didn't change the new case, didn't open, and he just changed the text on the form, he says fraud, and the rest of it. We have both copies, with the numbers, and this is how it comes. (1:36)

You can make materials which traps energies, and we've done it according to this company, you all know who it is in Belgium. One of the leading institutions in Nano technology, and now AI. We understood we can trap energies, we can trap specific type of energies. If you understand the knowledge of the Cosmic Rays, another thing, because this was a true Black Hole. The true Black Hole, it can be made. But Black Hole is not just keeping light, light can be bent. It's holding energy of a specific condition, not randomly, specific, the way you want it. So, thoughts has a field strength, emotion is a field strength, and we can keep you trapped in the emotion of love, forever you'll exist as a Soul, forget about your physicality.

Any other question?

Q: ... We have two questions, one from Doug, one from Antonio, that are basically the same, about asking whether the agriculture presentation, mentioned last week, is ready for showing?

K- Yeah, the video is ready, they have to edit it. I did an excerpt, came in yesterday, and I wrote to them. It has to be edited for security reason.

R: Okay, so we'll see it next week, perhaps? (1:38)

Hopefully, they're trying to sort it out. It's beautiful, you see, the Space Agricultural Lab of the Keshe Foundation, owned by us, owned by us. And we have a section with the Chinese Herbal Medicine Agriculture, tens of thousands of square meter. Then we have a very controlled environment, greenhouse about 4,000 square meter, which, some of you Knowledge Seekers have been there, if you have worked with us, you have developed it. They have to do a very pretty good job of it. Because it's the first time we show it, it has to include everything. And our team are learning, and don't forget the people who come to us in dimension, they are from outside, they don't understand what needs to be shown. The video is ready, but I refuse to show it, because he has a few faults on it.

Any other question?

Q: ... He would like to ask, whether there's any possible way to use plasma technology, to secure or deactivate chemical weapons, that have been dumped in the shallow Baltic

Sea, after World War II. In the ?? Jardish Deep, the Gotland Deep, and probably many other locations, extremely dangerous substances were dumped, such as Phosgene, Difosgene, Chloropicrin, Hydrogen Cyanide, Edemcite, Mustard Gas, Clarke-1, Diphenyl Chloro Arsine, (1:40) and a few other things, like Zyklon B. The barrels have corroded, the substances are leaking into the water and they are poisoning the local ecosystem.

K- Yes, actually, we have started this process and earlier on this morning, one of the Knowledge Seekers, who's online knows, we are going through the first test, independent test, by Keshe Foundation with Knowledge Seekers, in one of the European countries, early next month. We take the water, then we put the solution. And we have to decide to offer it to the government, or publicly go out with it, and then this will be the beginning of this work, decontaminations. I'm fully aware of the water contamination, what was dumped in, because I had to handle it in early 1990's with the Russian government. And so, we know how bad this contamination is. And what needs to be done, but this process has just started, we were one of the beautiful Knowledge Seekers. We start this process in one of the lakes, and we start the person who's responsible for it, and for the nation, and then hopefully capable to carry this support through, for different governments as we grow with it. Yes, we are aware of it, you're not the only, this is not the only place, some of these contaminations delivered, some of it is industrial, some of it has brought changes that needs, what we call, better understanding. (1:42) Just, just one second please, I have to work with something.

R: ... I'd like to just show a couple of excerpts from the classic video, the Fukushima cleanup video from, geez, about a decade ago.

K- Yeah, I'm back. Oh yeah, this is Desenzano.

R: Mr. Keshe shows the various processes, and discusses how to help with the clean up of the radiation contamination at that time.

K- This is our house lab in Desenzano. Where many of you Knowledge Seekers have started coming in and learning about the whole process. I am fully aware of this environmental contamination, because, as a nuclear physicist in 1990s, when the Western, what you call it, Europe managed to say, opening the East, was asked by that time, early time, by Yeltsin and then by Nazarbayev, the president of the, what you call, satellite countries, to look at a couple of lakes, which the Russians dumped everything into it. They never considered that the people will ever use. It was a lake, a huge lake. (1:44) It sits in Kazakhstan. And I was asked by that time, Yeltsin, with collaboration of Nazarbayev, to look at this lake. I was taken to the lake. And I was told never touch it. And they wanted a solution to clean up all this nuclear chemical waste on this lake, which they've dumped for decades, and now they need it to be cleaned up, creating huge cancers, huge problems, fishes with half a tail hanging, and they're still swimming, and all sorts of things. And I'm fully aware of the contamination, water contaminations because I was asked by what you call that time, Nazarbayev to find a solution. And I told them how much it's going to cost you to do it. They said, "We don't have that national budget for it, it's just a lake, let it be there."

But with the process we started hopefully in June with one of our beautiful Knowledge Seekers to head it. We start looking at lakes. I put some time into it in the next few months because it's a huge problem around the world. We have a good experience as you see in the video with the Fukushima. We have a very good experience with contamination in Italy. We did for the Italian government the report, what used to be the late ?? Periskoni, he paid for it. And we have now, with the help of the Keshe Foundation, to bring this into operation. We actually start with it next month. The work is getting done, it's not something that's going to start. (1:46)

I'm making a special trip for this next month to handle the contamination because the national report says contamination is different in different depth. We try to see how we can get access to different depth, and then test the water and submit it, and make an industry out of it for the Keshe Foundation to support the humanity. It is possible you can do and...

<< Mr. Keshe ask for a second. >> Our team in the background wants the video to be shown. to be shown, we are editing it, what you wanted, I said, "No, work on it perfectly, we show it next week."

The decontamination, you look at the lakes, we have a huge land contaminations. And then we have a huge, what we call, fields, which you are not aware of. It's a knowledge doesn't exist, (1:48) which is created as a by-product of many, many new technologies (?? from weapons and other developments). If you understand that the problem with you Knowledge Seekers and humanity is you just look at, "Oh, it's chemicals in the water, oh, there is poison on the land." The poison, what you call a poison, the damage, and the Cosmic Ray level for humanity is huge and it's getting worse, because Man is releasing composite of these matter states, which still have radiation, without that radiation they don't exist.

And, then you understand, the work has to have a few different dimensions. And, I think, I hope, if I can bring to you next week or the week after the teaching, with how we're structured, then you understand what I'm talking about today. At the moment, we are worried about the water contaminations. We are more worried with Space contamination, fields, which can damage your Soul, damage your energy side, and they do. You are partially protected by the Earth atmosphere, but in the Space you don't have it. And this is what I call it, the Universal viruses, which can interact with your Soul, because you have no physicality. Viruses are the biggest danger to Man's Soul in Space. Understanding, we explain viruses as the energy packs. And if energy pack has a field which in this spectrum matches your Soul, (1:50) God help you, Corona was nothing. Because, when the Soul changes, the physicality goes with it.

So, technology, physical side, is simple. More in depth is the, what you call, the future. If you look at, just stop the video there. If you go back on the green part, it was just showing. This, this ball, it's taken me over a year and a half to produce. And when you look at it, this is a field trap. It's been made that nothing can come out of it and nothing

can go inside it. So, the only thing which can come out of it is the specific spectrum of energy. Just coincidentally, as you are there, you see this green. That layer, I think, took me about 3 months, just to make that green layer. And inside this, originally these balls carried hundreds and hundreds of radiation sources. Learned a lot in how to change contamination to the field contamination of. The field contamination (1:52) is a bigger problem for Man, once Man goes into Space than water contamination, environmental contamination. That touches your Soul. It's like you come back, the Soul energy in certain spectrums, and then you have no emotion of love, because the virus has attached to it.

This is one of the first systems I built, I spent a long time to build this. If you go a little bit back, you see the other bigger reactor and these things takes a long time to develop, to build. But make it simple that people can understand. This reactor is the same. Because inside it counts, you people just look at the ball, but you don't know how long it takes to structure the inside. And you see the Iranian reactors, and if you see these all have little screws, they carry between 16 and 24 I think, some of them more. And I used to open the screws, two or three times a day, sealed them, vacuumed them, put radioactive material with hand in them, and it used to drive the Iranian government into insanity, why do you handle all? I said, "To me, you touch sugar, I touch radioactive sources, it has no effect on me."

And these, some of these original ones, carry up to 480 radiation sources in one ball. (1:54) Can you imagine, no gloves, nothing, just sticking one after another, you put your hand in it, they got 200 balls, what you call it, radiation sources, beaming on you, and you walk away with it, nothing. We are Man of Space, radiation is part of our life. And it's a shock. The authorities in Iran and even in Belgium, when I used to handle things, the tests we did with SEK, the Belgium nuclear center, I never used, or what they had to use, a remote room, remote arms. When you're a human, you have that restriction. Even in time in Queen Mary, I never wore anything. They used to call nuts, you go on top of the reactor, you just pick the rods off. Can not be done. I said, "You can't, I can."

Radiation is not a problem, contamination is not a problem. We're looking beyond physical contamination. Space contamination is much more dangerous than water contamination. But this process is already started. I was talking to the beautiful person, I'm talking one, two o'clock this morning. You start into setting it up, because water contamination is one of the biggest problem, especially in certain part of the world. We have very inland water resources, And the inland water resources are sweet drinking water resources, because they are not connected to no ocean. And Man has always ignored them and can just pour everything in it. It's the river, it goes down, I don't care what happens down there, as long as I get my factory running here. And now, has accumulated in these sweet water lakes. (1:56) Especially in certain part of the continents, it's the only source. And contamination has to be handled, but it has to be done scientifically, and we have started that process now.

Any other question?

Q: ... I have to apologize a bit because I did not get read, through all the teachings we have, and so there's a lot of things I do not get well. So, could you please Mr. Keshe, explain me a bit about what is Space? So, everything happens in Space? And what is Space?

K- Oh, everything is a Space, you are part of the Space.

Q: Does Space have a known quality or form or...

K- No. The Space has no dimensions, according to what we all see, according to the Inertia of its dimension. It manifests itself in that position. We eat so much sugar but we don't see any wood in our body. The tree inhales the CO₂ and it makes it to a wood to its structure. Manifestation is according to the Inertia of the Time and Place. (1:58) So...

Q: Space evolves in the moment where there's fields, then Space happens. So...

K- Yes. Space is everywhere. That Space is part of it, your brain, part of it is your kidney. Part of it is the planet Earth and the Universe. Where we talk about...

Q: Yeah, was there space before? Before there was... I mean, I know it's a...

K- Aaaah! That's the question. Did the chicken come first or the egg?

Q: Yes. I'm afraid it's the stupid chicken egg question and in totality...

K- It's always a chicken or egg. Did the Creator come, that by His field the Creator's Space, but was there a space that the Creator could manifest Himself in it? This question we answer one day. It's not unknown.

Q: It's not unknown?

K- It's not unknown. But to Man it's unknown.

Q: But you know, this is really so crucial. But you think we're not ready yet.

K- Let me explain to you something that may lead to future teaching. Thank you very much for bringing this question. Did the space of the womb of the mother existed? Or did because of the interaction of two fields, the womb became the space for life?

Q: So the second option seems more true to me.

K- But who made that womb? Who made that womb? Did the space? (2:00) If you, if you put egg and a sperm in a tube and put on a table they die. You put it in a test tube, create a condition, you give it life. Is there a need for a womb, or it just needs for environment for the fields to manifest themselves?

Q: I think it just needs environment and the womb is one very good environment.

K- Then you know how the Children of Mitra will be created.

Q: Yes. And is it the same with Soul? Because you say our Soul, the field strength sort of, of our Soul decides which body we can have. But on the other hand, you say, that the matter creates the condition for the Soul to... to...

K- ?? Oh, I'll answer this question for you next week. Because, if you understand the teaching of next week, half of the riddle of the creation for those who understand it will be solved.

Q: I'm looking forward to next week then.

K- Thank you very much. You got to understand, you cannot just put everything on the table, blob, you have to make the table ready that they enjoy that, blob.

Q: Yes, but there must be some people who are not...

K- Time will tell, time will tell, not everybody needs to understand everything. ... They say ignorance sometimes is bliss. But Man has been ignorant for too long to be blissed. And so it needs time to understand, it needs time to evolve.

Q: So, I think this is the true thing about Buddhism, (2:02) they say that ignorance is one of the four...

K- Biggest gift.

Q: No, because... obstacles to enlightenment.

K- Yes, but it's one of the biggest gifts. Because when you ignore it, you can assume anything. I call it, I call this the principle of Einstein. Dismiss, ignore, and then just write $E=mc^2$. What about the rest? He was the biggest crook in the world of the, what you call it, dismiss everything, till what I want to show you. You understand? So this, if you become dismissive and you ignore it and become what you call it dismissive about the things you can say whatever it is. And if you get enough people to accept it is the next step of ignorance, the same.

There is a structure in the world of religion do the same. They dismiss everything till the one is them. I had a very interesting experience in past few weeks. There is a fight in certain part of the Christianity and I'm sure is in the rest of the world, that to become the priest of a church. Because once you become the head of the head priest, you can steal what you like. Because nobody is there to ask questions. And you never question the integrity of the God's chosen one, which is called the priest in the church. And funny enough, I asked a question, he said, (2:04) how the priest before becomes the head of the church, lived in a little rented house, and in 3 years time he has a Mercedes in his car

park, in the garage, because we passed it. And he lives in one of the most expensive houses because he bought it. Did God buy, or the ignorance of the Man? Putting the money in the pot.

Q: So, if entities can be created by us, by being creative, then this God and the ignorance of people must be the same.

K- Yep. It's very interesting, very, very interesting. People weakness in understanding themselves allows the others to do. This is part of the teaching of the... That's why we teach openly in the Keshe Foundation. You can put your head under the water, it doesn't mean that there is no shooters outside. Yes. You decide to be the duck. That's what mankind does because we're in ???. We've been brought up this way.

Q: But you cannot do that too long unless you drown, you know?

K- ??? So somewhere down the line you drown. You can live yourself. It says, "My wish is my command." You can physically live on this planet three, four, five hundred, a thousand years. In a physical body. Has been done. We know people live two hundred, three hundred years. (2:06) But, it has to be a wish. What's the purpose? Well, there is no purpose just to be an animal on a planet. You can physically, even today, you can, if your Soul, if your wish is to extend your physical life to hundreds of years, you can do. But you have to have that wish, and you have to see the productivity and use of it. There is a survey out recently, scientific research, that if you pass 65, your chances of reaching 65 today is marginal. But if you pass 65 to 85, your chances are 50% now. And if you passed 85 your chance of survival to 110 sits at 30% today.

Q: So did you plan so?

K- What do you mean?

Q: Did you plan to stay a bit longer this time?

K- I don't decided, it decided. They tried to poison me, they... I... all sorts of things has happened to me, as you know, and part of it you don't know. But the time is set. I have no say in it, I know the time, the place. Very recently, I just accidentally fell nearly two meters. Down, down, series of stairs, plop, plop, plop, plop, plop. And I was on the floor. It was just accidental, the step was not there which was supposed to be, it was the builders, or something. And the people around me, they waited to see if I'm dead or alive. (2:08) And I was lying there, taking my toe, not saying a word, or the toe moves. Now the arm moved, can I move my head? Now the movement... This took about 5 minutes, because the fall was amazing. And then, I noticed something happened, and then I could hear them. I hear... the one was shouting, "Don't touch, don't touch anything else." I said, "I'm okay, just let me get up." And I got up and I went to see one of my doctors, and he said, "You know how lucky you are, you're alive." I said, "Why?" She said to me, "You see this, anybody takes this ??? fall dies. It's a natural process in the body. Half of the people in car crashes die because of this." I said, "He chooses when I go, not me. Even

Man makes mistakes, in dropping me. And our time is not chosen, is not there, is chosen, the time, the place. We still got a mission to complete.

Q: So, but you say the time is chosen, but still you say, "I can change this chosen time."

K- You humans can, we can't. It's like a classroom, I have another class to go to, to teach. Thank you very much.

Q: Thank you very much Mr. Keshe.

K- Thank you very much. Any other question?

Q: ... I'm writing a book of stories for children in which I have eliminated fear, illness, lies, and other evils. (2:10) The story develops in the flow of love, in the flow of plasma, according to the teachings of Grabovoi and Mr. Keshe. Question, how do you recommend I realize a plasmatization of this book. I'm thinking of a child with ADHD or Autism, holding this book in their hands. I wanted to convey peace, joy, trust, not only through the text, but also through the fields of the pages.

K- You have to decide. Books are printed, books are read online. How do you carry the Soul by words that the medium is irrelevant? New ways of writing you have to find.

Q: But what about the impregnating the pages of the book with Gans's or some other?

K- That's what I said. What about the girl with ?? who ?? listens to it, ?? doesn't meet? You know one of the most popular things in the world at the moment is the stories we ?? share and listen before you go to sleep. They used to be cassettes, if you remember, then they came the CDs. Now you walk through the supermarkets, you see little statues hanging in toy grounds, in section of the toys. If you're not in that, what you call it, if you observe it. They're little statues. And they charge 20, 30 Euro for these little statues. These statues have a little box. (2:12) When you put a statue on top of the box, it gives you the story of Cinderella and everything else with it. And you change it with another, and it tells you what God knows, Superman or whatever. And this company has become one of the biggest companies in child, what you call it, in the world ?? level. And, how do you carry the information and the emotion in that? It's a piece of plastic, has a bit of recording data, which transfers to the speaker of the box.

You have to carry the emotion in the essence of the word, the emotion, in the essence of the writing. It has more effect than in ink or plastic. You have to find a way to let them feel the emotion, and write it with the emotion that has no pen. We write words, but we can put words which within this emotion, doesn't matter what media you put it in. So, you try to find out, how and which way you can do it. These, you read the book, a lot of our children, now there's even adults, don't read books anymore. We buy these little notes and you read it on a computer. And the server is in another part of the world and you just download it as it is. How do you convey? You have to find the strength of the emotion in writing, in the word, that it writes it. (2:14)

There are technologies is getting developed, that it's very advanced, that you go to Grok, you go to AI, and you say, "AI, what's this?" The new AI's, which is getting developed very rapidly, it just takes your emotion. What you think, convert it to a... not a word, to a fields, and transfer the fields to AI, and the AI answers back to the fields, and you get enlightened. This is getting developed, it's not a fairy tale. A number of companies are working on it. But the only problem they have is the intention. What is the intention of AI giving you that piece of information, not that other one? And you move into that realm of actually moving it, actually getting into it, actually fundamentally changing it through emotion. Has no pen. Foundation is working on this. We, most probably in next few weeks, bend the emotion to what we want, because we are building the system for it.

Q: ... Good morning Mr. Keshe, what happens when sons have been ignored by their parents in their opinions and advices? How to overcome the bad memories sons have of their own parents and brothers? (2:16)

K- Not much you can do. When he gets that point, just elevate it. Especially when it comes to parents and brothers and sisters or whatever. We chose to see an event the way we wanted. And depends what was our position in respect to that person. Could have been a good intention, he was doing something funny, but because your point of view was different, that was a bad thing to do.

I was talking to someone yesterday, the day before, about my brother. I had so much fun with this guy, isn't it, 20 years he's gone, that it was impossible, absolutely impossible to get angry with him. And when he used to get stressed, he used to be a point of joy, to de-stress him. And we used to work together, we used to do a lot of things together. What he saw as, "I'm doing it wrong", I used to turn it around as something which made sense to him. And it was the same (?? from him). I had a brother, a partner, a friend, advisor, everything in one package, I didn't need anybody else. And we used to do this a lot. When it was a point you see as a conflict or something you don't understand, they are doing wrong, look at their point of view or change the position to what they see. They come around. (2:18)

We have to judge ourselves more than judging them. And if it doesn't come to our judgment, just pray for them, they'll correct, they will come to it itself. And when they see it your way, or when you see their way, there is no conflict, it's just you have to understand their maturity and their way. Especially if you, especially with brothers, is something different. Parents have their own way. Centuries back there was an accumulation of what you call their own child, their own upbringing. But brothers or somebody or sisters or somebody, you've been brought up in the same environment more or less. Even you see injustices or whatever, but if you overlook it, I mean, it just passes that way.

I don't have a single bad memory with my brother, because we both chose that way. Condition was to overlook or to understand each other's problem. And why I don't understand it? Born in the same place we went to the school together, we went to the

same high school, we moved to England, we lived in the same house and last minute breath it was the same. Being there by Soul doesn't mean you're not their physicality but you have to understand it. There's nothing more precious than a brother if you're a man. (2:20) And why you create conflict, you understand his point and you try to understand what is your point you're seeking to.

Parents are something different. They live in their own cage of their own doing. And you always elevate your Soul. I used to have fun in my brother, in everything he did wrong, I put it right. And my mother used to say, "You are the worst enemy for him, because you cover him, you cover his problems, you cover his." And I said, "Mom, does he cover mine?" My mom always said, "You two are a disaster and nobody knows what you two are up to." Because even when we had a point of discussions, it was there to enjoy both. You gain strength if you understand the other side's emotion and thinking. Then think of it as a fault and problem. What is your problem? You come see your brother or your sister or your parents. Doesn't fit. Show them. And live your life. They will see it one way or the other, done the line. You don't need to do anything. To me, brothers are sacrosanct. And if there is a problem, you have to understand what's your problem. You don't understand them, pray for them, they'll come around to it. (2:22) And if you see your ?? good (?? God) all the time, then you have a problem.

I was in my early twenties, I bought the first four-wheel drive ever came out on this planet, called Quattro, Audi Quattro. Those days was one of the toughest sports, fashion car you could ever have. I bought a limited range, the numbers came out in Europe. And my brother came, and for me, what I had was his, I never looked at it any other way. I was in a building downstairs, and I saw him coming, tickling, white face. I looked at him, he looked at me, because he just took the car from me, the car was not even 2 or 3 weeks old, just new in the European scene. And I looked at him, I said, "You crashed the car, didn't you?" He said, "How do you know?" I said, "Your face tell me." He said, "I'm... I said, 'Don't (say your) sorry, that's why we insured it, let's go and see, you're safe.'" He said, "But the car is off, it's bent in the middle." I said, "Doesn't matter." "You're safe, that's all that counts." He said, "You're not angry." I said, "Why should I be? You're my life." "That's money, that's a car, we'll get it replaced." Otherwise, if it was you, you go, "Aaah, aah, aah, aah." No. You have to understand, if love of a brother is more value than a car. Then you find your own fault, not his.

Any other question? (2:24)

Q: ... Thank you for all you do for us, humanity. And ... my question was that, first when you talked about the virus in Space, if I imagine that the creation is a body and it has its own defensive system, it's a perfect organism, how could they not take care of this virus? And then is it bad for us, humanity, our Soul or our physicality? Or is it bad for all Beings in our Universe.

K- It has a good and bad. It depends which part you want to look at it. What does that virus bring to us as energy, and what that virus take from us that is danger to us. If you look at the energy pattern, somehow everything is connected to each other in the

dimension of the fields. (2:26) And so viruses are the same. It's like we take certain things, they call it biotic nowadays, for your stomach. We introduce germ into it because we damage it with eating something wrong. Very fashionable nowadays, you go to supermarkets, you have biotic (probiotics) drinks to replenish yours. In olden days, our ancestors used to rot the cabbage and biotics was done. All the pickles we eat is part of that biotic structure. But on the other hand, the same germs, slightly orientated, can kill us. It's the same with the viruses, it's the energy packs. And what we accept through emotion from them. And so, not every virus is bad, but even the bad viruses, what things they give us. It's very controversial, depends which side of the fence you sit.

Q: Well, I don't worry very much, because I'm part of the whole thing. I take whatever happens.

K- We are all the same. Yeah, but the viruses are not all bad, and even the bad ones do some good things, because they manage to connect to us. To connect, it means we share something with them. There is a test going on, it's been going on for decades, that they tell you if you change your emotion and stick to your emotion, hundreds of meters away, people around you feel your emotion. (2:28) But you have to know how to control it. There is a system which now is going through a lot of tests around the world with different universities, which allow you, or allow them to measure the emotion hundreds of meters away. If you remember, bless his Soul, Jon, years ago moved with a thing outside meters, tens of meters, I remember, and you could still feel the fields. And the system was inside the building. This is part of our life, what emotion we create and what we give for it, and we call it a virus. Oh, your emotion is the biggest virus in the Universe. We start about laughing, and you see other people laugh with you, even though they don't know what you're laughing for?

Q: And another question, thank you, is how much my humbleness affects my personal physicality, Soul, Inertia?

K- What is humblest, you could be arrogant to the others. And then, depends what you create with that. We think we are humble. I was talking to some people recently, and say, "You know, you're the most arrogant person we ever come across." So, why? They said to me, "You think you're humble, you share everything, whatever, but have you seen yourself, because of your humbleness, you become too arrogant, you..." I said, "I don't become arrogant, I share my thoughts." (2:30) "Yeah, but you share your... everything else, and because they see it, the way you want them to see it, then you become arrogant for it." I said, "No, I don't, it's not arrogance. It's understanding my point of view, without, what I call, tempted emotion. It's the fact sits there, and if it's there, it's a life experience." You don't need to listen to it, you think of...

When I work with the management of the Keshe Foundation, I always said, "This is my opinion, you think, you discuss amongst each other and we see, what suits you better." It's not arrogance, it's just been, we had, we are building a Space Center, and this Space Center is extremely tough, it has a lot of problems, a lot of things, and I work with a young team. They respect, "Okay Mr. Keshe's analysis, he's setting it up, blah, blah." And

we had hours of discussion in past few days. And I said, "This is my opinion. You discuss among yourself, what suits you, what is good for the Foundation, you decide." And it happens on daily basis, right across Keshe Foundation. It's not just because, "Oh, if anybody was like me, I own the Foundation." I say, and you do, no."

One of the things to do with Research Center, because there are so many different sections to this thing, it's huge. Building a Space Center, it's every part of it is becoming a point of understanding, (2:32) and then you have a young management team, and from different cultures, and different aspects. They all have to understand each other. It's not very easy. When we planned, we discussed something that we do, something on one floor. My idea was to do it on one floor and... then we came to the discussion point. And they are on the line, most probably they listen. They know exactly what I'm talking about. My idea was to use one floor for a certain thing. And... one of the management team guy says, "Why don't we use the other floor?" I said, "What do you mean? We never... I never thought of moving this." "Upstairs, on that floor, there is this..." I said, "You know something, we're in the discussion today." "Get up there, all of you, and then, in the next couple of days, because you have a point." "It's just because I own the Foundation of our structure there, doesn't mean my word is the last word. You have a point, we move up, we'll have a look." And we reorganized it, we gathered later on, during the week there, and he was right. He was... he has a very beautiful value point.

And I said to the team, "Now you decide, this is what it is, if you think it's good." And we all agreed that it's always... You know, it doesn't come out of arrogance, is just being part of, and allowing other people to enjoy your knowledge, and add their knowledge into it. And it's the same. I always say to the top management of the Keshe Foundation, you are just the guardians. Learn and bring younger one, that when you are ready to go, you are there to support. We structure the same thing with the UC and UCm. Universal Council and member of Universal Council. (2:34) When you become 60 you go step to the Universal Council members, but you still have the same say, or putting input with.

We will launch the UCm and Earth Council very soon is getting structured in the background. And restructuring the Universal Council and Earth Council, they'll be placed in Switzerland. And I'm working on it, that they become the owner and guardians of the Keshe Foundation International. Once I finish the setting of the Universal Council as a company, and the Earth Council as a company in Switzerland, they become the thinking arms, but they will not become the acting part. We take the control out of the hand of the United Nations, the shares of, what the decision-making. And the members of Universal Council are to give the life support with thoughts and the guardianship and the physical management is to carry it out. And then they carry it out, is what happens to the Space Center and other things around the world. And then two companies, they become two trusts. Keshe Foundation, Universal Council as a trust, and the Earth Council as a trust, will run as a trust, the whole of the Keshe Foundation structure. We will not transfer everything into the hand of the Keshe Foundation. And they have no say, who gets what.

They carry their emotion, and we'll ask for new members of the Universal Council to volunteer to be part of, because they decide the future of humanity. (2:36) And the Earth

Council decides how, ?? what. The Universal Council is the Soul, and the Earth Council is the, what I call, the Spirit. The humanity is the structure to shape it. And it comes through the Soul of you, and what it... the rest will accept this. No blind following, just because I say so. Accepting the energies of it, like that story. Does not matter if it's in the plastic or the hard copy, the essence of the emotion.

Any other question?

Q: ... This idea of... okay, we call it Satan. You gave the proposition that it could be because of the inclination of the orbit of the planet, which is not straight, so it creates this angle which makes the difference in season and choices of humanity. And the other one can be power, that power invites Satan or some beings or feelings. And the other one can again be our mental, or Soul of Physicality (STP) that brings these beings or emotions, that kind of like fall of human by Adam and Eve that something overcame them to them that God throw them away symbolically. (2:38) So what is that thing that we know our enemy more efficiently and be clear about it? ...

K- You see, Man has chosen too many words for the same conduct, the same thing. And why do we create these words? It's because of our own weakness inside. Our fears are our Satan's, they are fears. Lack of understanding becomes our own enemy. And if you manage to convince the others of the same, so you make it to be accepted by the others. And then it becomes a ritual with it. Either way, I always said, and something I believe in, our Satan's is our own ignorance. When I was in Africa, in Ghana, this guy said, you know, in Ghanaian culture, "They can put a key on you, they can lock you, and then they change your life and everything else." He said, if you believe in it, then they do it on you. Then they are Satan's, and they... the devil worshippers and the rest of it. So says, if you don't believe it, ?? they can believe whatever they like to do. It's us which allow creation of these words and this line of thinking.

Q: Yes, thank you very much. So it's dangerous... (2:40) it's dangerous when people of power, they let these things get into them.

K- Oh, it's just all sorts, all sorts. Our own Ego becomes our own Satan. And if we accept other people's Ego, the others will call it the same. We allow these things to be accepted by us. It's like... you see children, you can allow them, teach them to walk in the dark, like they walk in the day, or you frighten them, the dark is something you don't do that, and they won't go anywhere. It's how you perceive and how you ?? precept. They say, yeah. This is what we've come to believe. Yeah, you know, something you call it darkness, we call it Satan, whatever, yeah? Get your children or your grandchildren to walk with you in the dark. What they fear most. And then play hide and seek in the dark. It becomes fun. They say, "Can we play hide and seek in the dark?" Where darkness was the worst thing to them, it was their biggest fear. And then you see the whole dimension of thinking for them changes. Play hide and seek, even as adults in the dark, and see, it's the same as playing hide and seek in the light. And it's the same darkness we create for ourselves. Because there is more fun in the darkness, because it's actually brighter than outside. Your eyes gets used to it, your senses grows deeper, (2:42) you look for every

breath, every move, every... it's a fun. And you create your own Satan, because of your understanding.

Q: Yes. And they say that, lack of God, lack of light of Creator, is what is Satan. ...

K- The light of God is the knowledge. Light of God is not the light you see. It's the knowledge. If you understand the Knowledge of Creation. Yeah, no darkness in your... there's no gap in your knowledge. Or you try to understand it, then you don't make something out of it, it becomes Satan, because it's against what you understand. We create our own Satan's, due to our own lack of understanding.

Q: And you know, of course there are people who are... don't have knowledge, academic knowledge, and...

K- You don't need it ... What did our... This is what I don't understand. Did your grandfather went to university? Did your great-grandfather, or mother went to cooking class? No. We have made this to block others to be... You don't need to be a doctor to understand the work of the Universe. So you understand. This is .. the knowledge and education, you have to have a degree or whatever, it's become forced on us to control. Our fathers, our grandfathers didn't have any... they didn't go to a classroom. (2:44) They didn't go to universities, but they run this world. They knew this world like the back of their hand. They knew where to travel, what day to travel, they could forecast the weather, and everything else. They didn't have to have a... everything which we are forced to accept. If you have education, you understand.

I always say, education with a Man, it's like those blinds you put on the horses, and it's, you know, concaved in, it's like a funnel. The more educated you become, you think academically, the narrower that hole becomes, and you become more arrogant, because of that little hole you see. This is how life is. We become... the education has become the biggest stronghold on Man's, what you call it, opening to knowledge and science of Creation. I'm an electrical engineer. So you don't understand how you pump the water, you don't understand how the shower on your head works. There's no electric current in the shower. The worst thing is Man is, since the academic education started. And the beauty of it is with this Internet it's just getting thrown to the wall. People are educating themselves in the way they enjoy. It's a gift.

Any other questions? Thank you very much. Shall we call it a day or ... (2:46)

Q: ... Thank you for today's teaching. In Book 2, is the bending of light really continuous MaGrav positioning, in response to different Inertia conditions, the light is passing through, such as light traveling by a star?

K- You got to understand, there are dimensions in the light. There is light, when it manifests itself, and there's a light as a energy, and both can be bent. We have developed the technology for it. Now I can... I can show, firstly, create a light and bend it as much till it becomes gold. You are building this machine. This is going through its test phases.

What you saw exactly a year ago, 10, 11, 12 of May in Beijing, is obsolete. No moving ?? parts, understanding the motion of light, and the energy of it, in the Cosmic Ray dimension, and handling it in that dimension, then in the matter state. And then you have a problem.

If you don't understand ?? You don't bend light in its matter dimension, you bend light in the energy and then you decide to manifest itself in the visible light. (2:48) And now I have just taught Knowledge Seekers, the machine is getting built already. But you have to understand the essence of the Creation. The light of the Creator doesn't come as a light to us as a star, it comes in as energy, and then we convert it into matter. And you have to understand how that process is done. You know, for the first time I have taught Knowledge Seekers how this process is done. I put the box in front of you, on one side I make Gold, on the other side I make water, on the other side I make you cry with the emotion, and on the other side I make you to see the Christ. And you tell me which light is what. But all from the same source.

The knowledge, the technology for it, is already getting developed and is developed. But you have to understand how and what it means. You have to have a deep knowledge of Cosmic technology. And that, we are Messengers of the Creator. We just play with the hand of the child, till the child understands. Our knowledge is so deep that it baffles even the Creator, how we gather this knowledge for ?? Him.

See you next week. Thank you very much for being here. Those of you who paid to be in tomorrow, last week's session, which is tomorrow, if you're not there, we carry on without you. And thank you very much for your donation, it's not refundable, it's Keshe Foundation, we needed to expand our research centers. And please don't forget, we need a lot of support, we need millions to bring the humanity into it, doesn't matter if we can create Gold. (2:50) We'll see you next week, and have a beautiful day.

641 KSW – May 7th, 2026

End
