

653rd Knowledge Seekers Workshop July 30th, 2026

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

ENGLISH TRANSCRIPTION

(:25)

K- Good morning, good day to you as usual, wherever, whenever you listen to these series of Knowledge Seekers from the Keshe Foundation Spaceship Institute. We welcome you back. Today we throw more knowledge into the pot of Creation. (:26) And try to understand how we have come to this point, and how our life on this planet and beyond is dictated.

Somebody wrote to me, "In Da Vinci explained the body of the Man, you're explaining the life of the Man in Space." We have understood the physical part of our body as much as we can up to now. Now we have to understand the functionality of this in the Space. What pieces are not needed? What pieces are needed? And what do we carry with us? Once we become part of this energy in the Universe (U). Does not matter in the time of a sleep or in the time of death. How do we picture ourselves? How do we find Position, Possession? And in so many places in the Universe manifest ourselves as an entity. Is not anymore I wear a summer's sewing wear when I go to the beach in the sunny inside of the planet and I wear my wear fur coats and warm clothing when I go to the North Pole or in the winter or a cold part of the planet. Now is how what do I carry in Space? What do I wear in Space? Do I need to wear a 'monkey suit,' or become like Americans wearing fake clothes that it can supposedly hold us in it. Or I become a true Spaceman, a true what we call, member of the Universal Community (UC), part of what life is.

The beauty with the Creation and the Creator is that we only listen to what we would like to listen. (:28) We hear the noise of the bird, we hear the noise of the someone calling and we listen to the traffics of life. But there is another noise, which that noise works with your Soul and not with your physicality (P), because it's not keyed for it, it's not tuned to it. Our scientists have listened to depth of the Universe and it has a continuous noise. That noise is the noise where the ear of our Soul hears, tuned into, receives energy from. It's like the dog whistle that if you remember 1970s and 60s was very popular in British televisions where they're making a whistle, but with this tool only dogs reacted. We called it a dog whistle. Man never heard the noise. It's the same. This is a Universal whistle. Our Soul hears it but our ears don't.

In reality, without it, we don't exist. In reality, without the Universal noise, like the noise of a heartbeat, Man cannot survive. We ignored it. We have ignored it to our peril. That's why we are here. When we put the Man in a Faraday box of Universe and cut that noise Man will die. It's the only way that the Soul stops functioning. On this planet we sentence Man to death by firing squad, hanging, beheading and the rest which Man has made and perfected the art of. Even the most advanced scientist of the time Edison created electric

plates to kill an elephant. In the Universe, in a way, in the cycle of a Soul, is to put it in a Faraday box of noise of the Universe. Hard to make, it's extremely hard to make, (:30) but if you read the patent of the Keshe Foundation submitted in 2005-2006, we have put a 'Death Code' in the patent. This is that death code, the noise of the Universe, where Man will find out it's impossible to destroy a Soul, impossibility, never been used, never will be used, but as I said to the writer of the patent, put it in, Man should understand there is an option.

We are used to our heartbeat, we are used to the noise inside our body, but the Universal noise that hissing and hissing noise that our scientists say is the noise of the Universe is that what our Soul hears, reacts to, it's its the basis of it, this is how the cell of ?? humanity, ?? the melanin and myelin responds to. This is why when the response is not correct you call yourself, you got the skin cancer, you got all sorts of skin problems, because you always use and look for a cream to change it. You don't look for the noise to change it. The noise of the Universe dictates when it doesn't match it solidifies it, it becomes that crystal salt in the middle layer of the ?? soil what we call, the physicality the skin of the Man. In the lung becomes a lung cancer and the rest of it.

The most fundamental point that Man has to realize is that our skin, myelin, melanin, all that, are the transfers of Universal energy inside, into the body of the Man. The food we eat, the material which we put in our blood is the reverse of it. (:32) When the noise of the heartbeat, when the energy of the heart, muscle, tissues of what we call, the cell of the blood of the Man delivers the physical energy into the environment of the lymph, in interaction with the energy coming from the Space, creates a vibration, that vibration creates the physicality of the matter state. There is a third element, what we call, the field strength of what comes from the planet up.

So when you make a Man on this planet, you have the noise and vibration of the Earth, you have the noise and vibration of the physical heart, the physicality of the body of the Man, and you have the noise and energy from what comes from outside. Then it dictates the shape, the color, everything of the Man. This is why Man on this planet has the bone and the same feature all the time. Because the noise, the heartbeat of the Earth, gravitational magnetic (GM) field of the Earth coming up and getting absorbed to go in, is more or less constant, depending on the position in respect to the Sun. Then you have the heart with this vibration is beat, is energy which flies and travels through the blood vessels, and then the energy which comes from the myelin and melanin into the body of the Man, the combination of the three interacts with the lymph, creates a specific individual cell to be placed in a given place to satisfy the three. But there is what we call, what you call, the Inertia of the heart, the blood vessel, (:34) the Inertia which is created by Universal energies, the Inertia which is created by the Earth, which dictates the physical feature, and then there is a fourth element which dictates how that person in every cell will exist, manifest itself. It's the Inertia of emotion.

Once these four come together and find the balance, they decide on the cell of the kidney, they decide on the shape of the Man, they decide on the feature of the Man, they decide on the emotion of the Man and decide on the behavior of the Man. Now we see we are

truly a combination of the Creation. But this changes when we move Man from Earth to Moon to another position in the Universe. The heartbeat becomes the heartbeat of what we call, the Soul of Physicality (STP), what you call the Spirit. Then you have the heartbeat of the Soul of the Man (STM), the heartbeat of what decides what's in that liquid. But, the, what we call, the heartbeat, the gravitational magnetic field, the Inertia of the Soul, stays as emotion. Then, you take this one to the Moon, gravitational magnetic field, the emotion, and the heartbeat of the Moon, decides what this thing now will look (like) on the Moon.

Now you understand, you cannot have a bone. You have. You decide to have a structure. We see this in the worm and the snakes, they don't need a bone. We see this in the creatures in the oceans. They don't need a bone structure. So, what we consider has to be, (:36) it's a lack of our understanding of the World of Creation, in respect to the condition and the Position and the Possession. Do we see a spine in a worm? Do we see a structure as such in a jellyfish? Why should Man, in a given condition, have bone structure in the Space? Now you understand your position. You do not need to look like with a bone structure in the Universe. We change the gravitational magnetic field of the position, then the body decides, transmutes into that shape.

Now you understand more about what about what is about to happen to you in the Space. Remember in one of the trials in Linz, lady says she could see herself half fish and half human. We explained the reason. The condition of emotion is still wanted a confirmation I'm connected to humanity but I want to be a fish. How many times you had the dreams that you're a different creature or whatever in the pool, in the flies, and the rest of it. Was that the reality that you could not accept?

And on the other hand you understand one point. When you become a plasmatic field, traveling in the Space of the Universe, you have no feature, no fingers, no toes, no bones. You're a dynamic energy with emotion. Then you see yourself as a light. (:38) When you see yourself as a light, when you see yourself being in a way, in a condition of a plasma traveling in the Space of Universe, where that light comes from the interaction of your emotion, what we call, Inertia, with the Inertia of the, what we call, the plasma ?? of itself, which is your Soul, creates a different light, then when the totality of interaction of all the fields in that plasma, which includes your gravitational field, Inertia of your emotion, with ?? its environment, creates your Inertia cell body as a light. When you see your light, means you detached from physicality.

This is why we hear a lot of people say, "Oh, returning back from dying and the rest of it, and we saw ourselves as a light." When you see yourself as a light, it means you detached from physicality. It's not that the other side is so bright. It's you which interacts with the fields of the Universe in your environment. And that, like a dream, leaves an impression on your brain, because the brain is not packed yet to go. And you see yourself, "Oh, it was so peaceful. I became a light." Of course you become. Now you understand the mechanism. Now you understand how. And this is what is our job. For you to understand how to change, how to transfer from a physical body into a light.

The strength of the light, the field of that light, the Inertia, emotion of that entity dictates the position where you can go. It's like you live in a, or you work in a structure, you can only go to the first floor because your key just allows you a lower staff. If you are a cleaner, you can go to all the floors, but only to the toilets and the cleaning area. (:40) You cannot go into the research because you don't have the clearance. Because you didn't gain that credit to go in. If you are the professor, you can go to all the places. And if you are the head, there is nothing hidden, you have access to every floor, every research room, and every ?? niche and corner, and every place in the building. It's us, with what we do on this planet, what credit card, what credit limit, we create (for) ourselves. We're only, sorry to say, the toilet cleaners, because we created enough mess on this planet, that the only job left for us to do to gain access to a higher point is start as a cleaner cleaning the toilets of the mess we created. Those of us who serves may get access to an office in the Universal level if you understand it that way.

So, in what we do on this planet, what we do in the life of ?? sin, not only on this planet, in the life of our Soul dictates what credit card, what access entry to which floor we have. Do we operate as a cleaners and a sweepers because we have to clean up the mess, the murders and the killing we done on this planet? The lives we put in danger on this planet? Or we get access, we've been good we've done things and we served the life not only the humanity, then we might get access to one floor, one research room. And then to get to the one who's access ?? has access to all of it, which is the Creator, takes a long time, does not matter even if you become part of Him. Because that part which you, (:42) where carrying your dirty work is ?? too (beep beep), I'm not accessed, I have not done the right things.

And then you go back to the Ethos of my beloved Mitra. Then you see those who live by it, get more access to it, which is to the light. Now you understand the structure of your life. 'I made Man in the image of Myself' with what we call, credentials and credit level collected. The biggest banker in the Universe with a credit card is the Creator and your limit is dictated by you. What did you do in the transfer of the energy from the physicality which came through eating, destroying, or you live through the dimension of life. Now you understand exactly where you stand.

I can give you a beautiful analogy of past few weeks, how this thing works and how they allow you, and how you get access to the hierarchy, and in that position you betraying, but that betray is not hidden from those who issued your credit card, this is as low as, as high as you can go. Then you understand your life on this planet is the creator of that credit limit, and you understand that what you gather on that card is where you end up to be, in the process of when you only deal with the fields of the Universe and not the gravitational magnetic field of the Earth. Because once you are in the Universal fields, when you're traveling the Space of the Universe, (:42) Inertia of the Earth hardly has any connection with you. The Inertia of where you go dictates your shape, your color. And then your emotion decides, I want to be part of it, then I create the right, what we call, pulses that confirms and transfers me into dimension (D) of physicality which then you see me as what you want to see me on that place, position in time.

This teachings, this cycle of knowledge is unknown to Universal Community and even Man, and in a way, we for the first time we release the knowledge. There's a rush of those who understand trying to reach to the point, but you have to look in the background of what credit card you were given and how much you can extend your credit to where you can go. You have to understand those of the Passengers of the Universe, not ?? doing the killing, so they have access to a laboratory here and there, you call them UFOs, you call them this and that because they gained the knowledge to be better. And then you understand why those Passengers of the Universe don't interfere with Man, because then you have to teach Man things which the Man can cause problem. And then you understand why the Man is left alone.

We've seen it recently in the President of the United States fought for every way, cheating, bribing, heckling to get the Nobel Prize for peace. Then they didn't give it to him, (so) he went for killing as many as you can, then I get it that way, I give my own prize. His Soul is in the dorm rooms, I think the only job he'll be given is a toilet cleaning, in the basis of the shouts of the dirtiest part of the drains of the Universe. We've seen this with the religious people, (:46) how they put children in the same position, and you think their Soul is any different? Then we see those who are on the streets, hungry, begging for food, but still give them a chance, they (will) kill. Man does not change. Man has to change to learn to take energy from the Universe, that (he) become detached from the dimension of physicality. This comes through understanding of the totality.

At the moment we have the beacons that send messages to every position on this planet, we call it, mobile phones. Man has to create beacons that sends energy that the STM and the physicality of the Man can transfer it into energy for Man to live that the Man does not commit the crime. To kill from a grain of rice, the physicality of an animal, to another entity in the Universe. The new knowledge which is brought out and is about to release Mankind, is to create that beacon of light which the Earth shortfall and fell to give to those who are created on this planet. This is two-way traffic. Mankind has got to move to the direction of understanding the World of Creation, and at the same time give the knowledge to the Man (to) become part of it, if he abandons killing, destroying and everything else. I made Man in the image of Myself. The Creator is not jealous because He has whatever He needs, and the Creator is not a killer because He doesn't need to kill to gain. (:48)

Once we understand this, once we understand the interaction of the fields and through it we control the emotion, the Inertia of the emotion. We need to control by breathing the Inertia of the blood. With it we control the what we call, the fields we absorb from the Universe, the Inertia of the Universal fields, then the Inertia of the planet becomes more or less irrelevant. We can decide, we create, we accept parts which we like, then we look Chinese and then we reject and accept another one which makes us the Scandinavian in shape and blood and then the rest and the rest. Then it can be done instantaneously because now we control this, what we call, the control panel of the emotion, magnetic, gravitational, Inertia of the Creation. Mankind has a lot to learn. But Mankind has to understand learning and becoming wise to it, does not become the source for him again to rule, to dictate what he wants, but it gives him the humbleness to become. When you live

the life I live, then you become a true being anywhere in the Universe, and I, is the Creator.

Then you understand, Man does not need to encourage the emotion of killing, the emotion of jealousy, the emotion of possession. And once Man can control this, Man become the true member of the Universal Community. Man gets his Soul to travel, does not need to take the physicality. (:50) And those who understood the weakness of the Man and the religion, have understood how to control the Man. Humanity has entered a new phase. Humanity is about to change the structure of his existence. The Mankind has become the totality of understanding the process of the Creation in the dimension of its own created things. Now we understand how good Mankind has moved and how Mankind needs to move. Mankind has to understand to work with the energy than physicality, then he can feed this physicality through the energy. Mankind needs to transfer itself to a dimension which is not within it, but he lives in it.

With emotion you can dictate through the melanin and myelin what you absorb from the Universe, because emotion sits with the dimension of the brain of the Man, which is skin is part of it. By controlling the breathing and emotion of it, you can control what the emotion of physicality will put in. Don't you get excited when you see something you like? (:52) Don't you get excited when you hold your lover in your hand and the rate of your heart and your breathing goes up? You can do a marathon without moving a finger, if you know how to create that emotion. Then you understand how you have to interact with the emotion of the planet, with the fields it creates. And then you become a true Passenger of the Universe, mastering the World of Creation. And once you master that, you are ready to transmute. You're ready to take Position, and a Possession of your Soul, that does not do wrong, does not harm, and does not stand for the lies.

It's interesting when those who come in with a deceiving idea and working with the others, to those who are pure, how they themselves get trapped in the, what we call, entanglement of their own doing, because the Souls judge and not the physicality. One should understand the totality, one should be aware how to manage the emotion of the Soul. Then you manage to control the emotion of the Universal fields, you can control the emotion of what we call, the 'Spirit' and then the only thing you cannot control is how to interact with the field, the Inertia and emotion of the Place, Time, Possession and Position.

We see this in the world of the creation of the Man. (:54) You look at the shape of the mountains and see how they peek up, and look at the plants and the trees growing on them. And then you have a line that nothing can grow. Does not matter what you do. It's how the angle of the Creation created, and what is the angle of Inertia of the planet, that cannot reach there in the level of the amino acid (AA) of the life. It can reach in the amino acid of the matter and push the mountains high, but it's ?? field Inertia of the emotions, of the what we call, life, does not pass more than certain line. And this is what you see for example, you run a fountain, the orange color can go only to 10 meters and the red can go 15, does not matter what you do, 10 cannot pass the 15. And then you understand even in your physical life what you have ignored.

Mankind is controlled by his breathing on the altitude that he can live and that breathing decides the interaction of the emotion of what we call, the physicality of the Man and the creation of the Man. When I was in a special condition years ago, they explained to me, I wish I could have seen it, that the women in this area at this high altitude can have as many husbands and one comes and waits till one goes when the ships move, the other one move in, and five or ten men share one woman depending on availability of who will arrived first. You try to sell this to the Arabs. See how that woman gets beheaded. (:56) The altitude, the Inertia of the emotion of the planet has more direct effect on the emotion of the Creation than actually you ever thought. And then you bring that, change the field strength of it. One Man in the Arab nations can have 40, 50 women. Same creature. The emotion of the planet dictates the condition of the life.

The same shall be the emotion of the Universe dictates how you accept what you accept what it suits you to be. Would you like to be a Man in Himalaya or would you like to be a Man on the what we call, deserts of the Saudi Arabia? This is how the fields of the planet, its gravitational magnetic field emotion affects the Man. In one we share one, and other one is forbidden, is criminal to the others. This is how the emotion of the place, position and time will affect the manifestation of the Man is what we call, transmutation and presentation and what we call, to be visible in any shape or form in the Universe. What does not treat us we cannot manifest. This is exactly why we don't see so many elements in so many parts of the Universe, because the emotional field does not match the Inertia of gravitational field of the plasma of the entity.

In the coming time part of the teaching of the Keshe Foundation brings you face to face with the fields of the Universe but you have to learn how to let go of those limitations of the Man, (:58) in the dimension of physicality. And how you create what we call, the Inertia of the Soul. And how you create the Inertia of the emotion. And then you have to negotiate with the bigger brother which is the Inertia of the Universal field. They all carry their own noise, they all carry their own heartbeats, now when they synchronize, when they become one, then you have what you call, resonance, which allows the Creation. When the four match, then it's the time when you manifests ?? itself, because it's the beauty of the manifestation. And this is exactly how the cells of your liver, your kidney, your eyes are created. I have the motion I want to see and I want to see at this point, ?? voila, gives you the eyes, I don't need the eyes, I want to feel it with the field of the Universe with the eye of the Soul. I don't give you any eyes to see because you can have physical problems, you can see the whole Universe, because there is no horizon.

Now you understand even the cells of your body dictated that way, the noise of it, the heartbeat of it. If you didn't have the noise in your blood vessels, if you didn't have those gates that creates that (swishing sound) you won't even be able to make a single cell. When they put the gates not falling to the bottom of your foot, is to create that noise which in its attraction with the emotion of the Soul, the emotion of the what we call, physicality, the emotion of the Universe and the emotion of the planet, that noise of "whoosh" in that position leads to creation of certain cells which confirms the manifestation of. (1:00) Why do you have a smaller blood vessels at the tip of your

fingers, and the noise is so tiny and so you have a tiny element called the tip of your finger. And you listen to the blood vessels, your arteries and see what sits around them. The noise they make, decides the size of the Man. The change in the noise of that 'whoosh' in your blood changes when you get older, you fold in to be near to it. You bend into it to be near to it to confirm the existence. When a Man has a heartbeat and a blood vessel which can make that noise, the same as he was 18, you see Man survives in 200 and 300 and 400 years old. That noise of "whoosh" in your blood and not your heartbeat is a cause of your existence because that's what carries the emotion of this is me this is my strength and that's what I want to do.

Being an athlete does not change it. Understanding how to use the emotion of the what we call, the Inertia of the emotion, then you can do. I want to live 200 years, my body tunes to that. That's the emotion of the Inertia of the Man, which dictates the life of the Man. Your life is dictated by your own emotion and the physicality of how you master this game. Now it's for Mankind to understand deeper what is being taught today. We open more doors in the knowledge of the Universe for Man to understand. But at this moment of time Man is too busy killing. (1:02) The time will come, and that time is very soon, that Man will stop doing the killing and the Man start understanding the process of the emotions of the four dimensions which leads to the Creation.

In a way if you look at it, you have again that the Star Formation (SF). On the top sits the noise, the plasma, and the fields of the Universe. And the base sits the planet Earth, sits the STP. And on the side sits the STM, where the Soul of the Universe is connected to the Soul of the Creator, which is the most powerful. The other three are what we call, the bottom feeders from what is left. And whichever you strengthen is the dimension you get pulled into. Man has strengthened the STP, the Spirit, and is tied up with the Earth and he's locked himself to it. Once you understand this and detach yourself from it, you'll see the 'ship becomes more in balance,' and then you'll find the dimension and direction of one way to the Creator. I made Man in the image of Myself. But the thing is, Man used the wrong mirror to see My image.

We go for a break, we come back. And the teachings are so intense. If you don't understand it, it's another word. If those who research into this in the coming time, years and decades, understand I have given you the key to the Universe of Life and dimension of travel in every dimension. And these teachings will come much, much deeper. And in so many ways become more relevant to the scientists, and then the layman, and layman trying to understand the work of the scientists brings the two to be in level and understand the work of the Creation and the created. (1:04) And the only thing we don't need in between somebody to translate, nor AI, nor the priests nor any others, because Man has to understand this according to his intelligence and that intelligence and the application of it brings Man to hold the key to clean the toilet, or become a guy who's got the access to most of the rooms in the world of the Creation.

We have given the key as what we call, those who clean the toilets to the presidents and the leaders of the world, as they commit more crime than anyone else. And those who become detached from it, will come to the point that they see no one will carry what we

call, the crown of leadership and kingship, as it's nothing but the headache for those who look to live the path of the Creator. As I said in one of the Holy Books, the time will come that no one will take the crown of kingship. This is a point of disaster, and destruction of the STM. And no Man wants to destroy his own Soul to get to his point of destination.

We go for a break and we come back. And we finish today at 11:45. As we are travelers of the world of physicality, organizing things for the Foundation. Take us for a break and we come back.

R: Okay, thank you Mr. Keshe. All right, we will have a break here. I have actually two videos to play. One is the Keshe Coin and one is a tribute to Mr. Keshe's birthday, which is coming up in, what, three days here, three or four days. (1:06) So, that's a tribute from the Brazilian community. And so, maybe I'll play the Keshe Coin video first Mr. Keshe, and then we'll play the... birthday tribute. Does that sound okay?

K- The surprise one is good, no problem. Thank you very much to the Brazilian community, and thank you very much for all the love and care.

R: So, you think I should just play that one, the birthday one?

K- Either way, you surprise me, you can do what you like. When you told me this morning, it's your decision. Thank you very much.

R: Well perhaps we'll play that and if you want me to play the Keshe Coin later we'll do that as well.

K- Keshe Coin is more important. Thank you very much.

R: Yes but it's our tradition here to acknowledge your birthday. It seems we do it every year and as you mentioned earlier the years seem to be coming by quicker and quicker as we get older. It's not hard to envision being 600 years old if the years go by this fast.

K- We've done many hundreds, so this is another one.

R: Okay, so this again is a tribute to Mr. Keshe's birthday from the Brazilian community.
<< (1:07:30) Rick put a video made by the Brazilian Community to celebrate Mr. Keshe birthday (1:12) >>

>> **BREAK** >> 653 KSW July 30th ... (1:12).

R: All right, thank you to Rafael and the other members of the Brazilian community, or... they put that together. So, we're in the second part of the program here. Do you want me to play the Keshe Coin video now, Mr. Keshe, or...?

K- Yes, please. But I think that's important for the Knowledge Seekers to understand. And thank you very much for, to all the Knowledge Seekers, for all the best wishes. Go ahead.

R: Very good. Okay, now I'm not sure if I got the correct video, but there's a number of Keshe Coin videos now, about, well, five plus previous ones. And there is a playlist in Youtube now with the Keshe Coin videos that people can access to link up to those. This is Keshe Coin Video #4 and I'll share that now.

<< Rick plays video of Keshe Coin (1:13:13) >> (1:14) ... (1:16)

K- (1:17:17) ... Oh, I thank you very much for the birthday wish. I just had an amazing message while we were teaching in the past few minutes. And I read it to you, because it sums up everything we have done. It says, "Good morning Mr. Keshe, another special day. The first ONN arrived today. Thank you." (1:18) The first Unit of ONN has arrived in your hands. The cornerstones of independence, financially, and within the next few months, communication-wise. Nobody can interfere with your accounts, nobody can decide if you are a criminal or nothing that it suits them. And the game starts as of today. This message is the biggest birthday gift I could ever have received. It means, from next couple of weeks, we start sharing the Coins, and we become part of the structure of the International governments. And, hopefully, we should receive about 25 of these in next 2-3 weeks, as the Units are ?? (arrives) in their position. And our team in the background works to sort all the, what we call, 'nick knacks' and structure it to the best of ability. We wait till the first 4 arrives in the next day or two. And then the next 4 should arrive next week. And then sometimes to middle to the back end of this month, the other, what we call, 17, should land somewhere in this planet. And with this allows us to start testing and bringing that process and nobody will be left behind.

And we need a lot of support to put as many of these Units into the hand of the Knowledge Seekers (KS) in the coming weeks and months. And unfortunately if you've been on the side of the Keshe Foundation, we had to raise the price to just about 5,000. Because thanks to the murdering leader of the world, the President Trump and his crony, (1:20) Netanyahu, with the fake prices of the fuel. The fuel prices literally has doubled and tripled on what we started with. Hopefully you see Chinese Microchip and the processors in next year or two, will bring a different dimension. But at the same time as we open the research centers we developed a new what we call, the Plasma Chips and what we call, Cosmic Ray Chips or what we call, control systems that even these things

will become obsolete. This morning before we start the session those who work with us in Keshe Foundation we were in a long term meeting, and the return meeting before that to secure the research centers, the properties of the research centers, and the researchers which join us and come in. We are gathering the scientists gradually, we are about three months behind on our work, into the China Space Center, and next couple of months, into other factories and starting companies around the Chinese nation. I thank those who work with us deeply in running, bringing this up. It's very hard. It's not easy, but we're getting there.

If you are a specialist in certain fields, we'd like to hear from you. We might not need your expertise today. We might need it next week or next year. But as planned, we start the research center from 1st of January 2027. We hope that the knowledge will have one of the most prestigious research centers in the world. From all races, under their own nationality, no need, no visa to enter, except the need of knowledge and peace. (1:22) It's important for us to still look for scientists in the Keshe Foundation, if not outside the Keshe Foundation, as we have already started recruiting a number of specialists outside Knowledge Seekers circle, because we don't have the depth of those we need or cannot join us because of the government pressures, and this will bring us to a very beautiful place. We hope to celebrate with all of you the opening of the Keshe Foundation Research Centers in some 16,000 square meter of research facilities in China on the first weeks of 2027, when we get the building handed over to us, hopefully, that it's ready to facilitate for research.

If you're on the caliber of that kind of level of work and join us to build what we call, 'clean future for humanity' based on what we call, peace and not on commercialization to create more war. It's a beautiful building and it is a prestigious building and when it comes prestigious what we call, technology (T). It's an amazing building built especially for research. It's like the builders knew it was built for the future Space technology. It's a Space room, it's about 12 meter high ceiling that we can test everything in it. Now we have facility of some 40 rooms, research rooms, 40 different directions and dimensions of research in Space technology. (1:24)

There is something which has become apparent to many of you for past week, two weeks, that this is a difficulty with the Keshe Foundation website and the Store. We had a dilapidated system for nearly 10 years, we knew it, our team was working on it, and decision was made about two weeks ago, after a heavy attack on the website, showed the outdated, what we call, programs which are in AI can break in like a knife in the butter. And everything is getting redone, reset, brought to 21st century, to AI situation, what we call, level. You have to go back into the shops and re-register. We moved from the traditional problem we had a lot of with before, with the system which was brought to us by actually a lot of problems in 2012, ?? 13-14, with what supposed to be an expert, was a, what we call, a clown, more or less.

Now everything goes on the Shopify system, credit card, everything else. You will notice very soon that the bank account of the Keshe Foundation will change from 1st of September, credit cards and what we call, everything goes through Shopify. We will give

you access to the donation accounts separately and in a way we have revamped the Keshe Foundation website and Shopify everything which you had some problem in the past two or three weeks with, hopefully in the next few days. It's fully done, I watched it being put together. It's taken months of work. It's the last steps. It had to come offline, that it could be done. (1:26) And if you have any credit, any products you purchased before, you won't see it there, but it's registered in the system. Do not worry, nobody loses anything. And it's just that we cannot transfer them into Shopify, because it has a different data collection and basis. When you come into this door say, "Oh where is my, God knows, for example, ONN system?" It's already put in the background, it's yours, you haven't lost a single thing. It's not the tradition of the Keshe Foundation.

And we are ready to move. Gradually, once the last bit's done, there's a couple of interfaces that have a problem with, hopefully it'll be sorted in the next days. And you'll get access to Keshe Foundation website and everything else, and that we can be good to another step, maybe 10, 15, 20 years time, another system comes and you shop with your Soul, then your Coins (Keshe Coin - KC) and everything else, which is coming in. We're trying to implement the jewel purchase by Coin, or by Keshe, or by payment, that has to be finalized and then we open the website, maybe next week or this week, when our team complete. You have to understand the Keshe Foundation team now on the IT, what we call, our Internet work, runs to about 12-15 people now. It's not one Man and it's taking a lot of energy. We brought in new teams from different countries, European and Asian, and as usual the IT team in Europe is working hard, and I think this team will increase about 20-25 in the next few months. As we have to support the game, the website, the Keshe Coin and everything else. And I thank those who are behind it, especially those in Far East, who are helping us immensely with this, putting this team together. (1:28)

We are moving into the position of sharing Keshe Coin (KC). As I said before, we are doing the oppositeness of using government's energies to, what we call, finding the Coin, we're using the government instead of finding peace, and the Coins have been all been fished and nobody can touch it, and it's controlled, and you start receiving Coins bit by bit. Register yourself into the Keshe Foundation, what we call, at, in Austria, complete the registration, go back into the Games, and we start giving as we said, Keshe Foundation workers in China, we'll get a first hand, first time, we'll check on them, how we can work with them. Then we go to the Knowledge Seekers and then be spread to the students in universities before they start the next year, hopefully. And we gradually break through. We have two nations who have shown interest to accept the Coin, Keshe Coin as a purchase, and we will we are expecting a huge problems from government. This is why it's important for us to get as many Units as possible that become independent VPN system ourselves and running and that the system cannot be stopped does not matter as we spread across the nations.

We need at this moment a lot of financial support to acquire as many as these ONN systems to bring, to send out everything. Everything is sorted out after a year. And by September we would like to be able to spread this across this planet as fast as possible. That we can operate freely and at the same time collectively together. If there's any

question I try to answer and I have to finish today at 11:45 in one hour and 10 minutes, (1:30) as I'm traveling and I have to be on the move.

Q: ... Just all the best for your next couple of days. Enjoy your birthday. Mr. Keshe, with the connection between the skin, the lung and the brain, the energy coming through the skin and through the lungs, through your breath, with the brain, is it through your eyes or through the top of the head?

K- Everything has dimension of the use in its place. Means your skin, cell of your finger if it was on your head you will not do what your Soul needs and your brain cells need. And this is one of the beauties of it. Your skin or what we call, the layer on top of your skull, those cells are specifically designed to absorb fields which can penetrate through the skull, and at the same time, to stand the vibration of the brain in hammering it receives from the heart. So we should be in a way in a progressive development of every skin cell has a match with its own inside. (1:32)

It's very intriguing as we heard in the teaching that for every cell in the body of the Man is a cell in the blood. I always said if you go back to 10 years teaching go in the medical side as well. I always said, blood cells are taxi destination life. When your bone marrow creates a cell it's already taxi driver for that a specific position from heart to that point and nowhere else. And in a way it has through, going through different parts of the body, gets fine-tuned when it arrives at that point, has the right energy to deliver to that cell. It's not that they are floating and they don't do anything. Let's say the heart, the blood coming out of the heart is that let's say 1,000 but the cell of the blood has to reach the tip of your finger, which is let's say 40. So in that process from the heart to reach to the point of the tip of your finger it's designed which path it goes and how it goes that it reduces its field to 40 that it loses 960 on the way but helping the others to do what they do. It's precise work.

But at the same time the bone marrow creating that cell to be for that taxi, the bone marrow produces matching structure for the skin on all three layers, to match when that cell arrives at that place and position. And when you do the skin graft, you look what's underneath of it, what happened to that cell in the future, we see a lot of big problems. (1:34) And we've seen part of it is, for example, rejection of the skin or rejection of the cell. Because if the scientists understand they have to create additional fields for it to be supported you don't have the rejection, you don't need to take tablets, or medicine to accept it not to reject, you have to create a new condition of fields that it allows it to be done. You get something like this very similar very soon from the Chinese what we call, medical section in the Chinese market in next few months. Like how to change the color of the skin, how to improve in the cell of the body, of aging, and all sorts of things. New product range comes understanding this process and not just finding a solution to do something. Thank you very much indeed.

Any other question?

Q: ... Thank you Rick and happy birthday Mr. Keshe and many more to come. So greetings Mr. Keshe, Rick, Universal Council and Knowledge Seekers and thank you as always for the teaching. My question tonight is about food, what it costs us, what breath and the fields can replace it with and what we become when we no longer need to kill to eat. (1:36) You have taught us that as much as 80% of our energy goes simply into digesting and breaking down the matter state food that we eat. And that with the new Cosmic Ray technology we will feed ourselves directly from the fields of the Universe. In your recent teaching on breathing you showed how we already draw energy through the breath and the skin and how the melanin and myelin bring in the Cosmic fields and how by changing our breathing we change what the body takes and what it needs. I'd like to hold all of that up against something very old, something very modern. On breath, the breatharian question. For a long time there have been accounts of breatharians who, people who are said to live strictly on breath and on what they call prana, taking little or no food and yet living vibrantly and in good health. Is the Cosmic Ray technology feeding ourselves through the App in the fields in a way an upgrade to this, a way to be fed like a breatharian, drawing our energy directly from the Universe while still keeping the taste, the emotion, and the pleasure of eating food when we choose to rather than out of need? I'll start with that and then if you have time for one more question I'll have another one. Thank you Mr. Keshe.

K- Thank you very much. You have to learn something very simple. In all the teachings which you had, all the systems and technologies we had, no totally integrated system about the energy has ever been brought out for Mankind to live. And once you learn hopefully in next few weeks how to create a one unified field for life of the Man, (1:38) you don't even need to breathe. There are no airs on the Moon for you to breathe to control.

In the physical dimension, there is pros and cons in the elements we have in our body. in our body. The biggest asset for conversion of the fields of the energy of the Man is his tongue. When you lose your mouth, your tongue still will function inside your body, but in a different functionality. I teach this one day, is when you close your mouth, you never drink, you don't need to make a noise with it, and in losing it you can't kill. But the function of tongue as at this present time if Man understands is one of the most crucial, crucial what we call, organs in the conversion of the energy for Man in the dimension of life. These teachings will come up in the future.

I (will) explained to you that you understand scratching the surface. What happened when you get frightened? What happened when you grow and your stomach grows (?? growls) and you hiccup? What happens when you see your loved ones? What happened when you have sudden problems in digesting what's happening in your environment? You swallow. (1:40) Your tongue comes it hits the roof of your mouth creates a field pressure which dictates to the Soul what I want you to release. This is why even you sneeze, this is why when you run into problem go (?? you swallow). When you just come to swallow your saliva, see where is the position of your tongue. It hits the roof (of the mouth). There is no element in the life of Man, physical life of Man, than that tongue. Those two little things dangling in the back of your throat (tonsils), you don't know what it is. Those are

the frequency makers. They are on the physical dimension, have no use. But they are the ones who convert the dimension of the emotion of the Soul coming through the tongue that they decide what vibrates inside you.

The stupid thing is the doctors take it out they call it, tonsils, you don't need it. These are not pieces that accidentally are there for nothing, they are the converters of the noise, vibration, which body needs to translate the work of the Soul. Mankind doesn't know even about his own physicality why we put those little things in the back and just, oh, yes, it gets infected, we take ?? (them out). You watch get the scientists to do research with the people who use their tonsils and those who don't. Look physically good, but see what is missing in that long life (during their lifetime). And then the body has to create imaginary dimension to replace it, that the stupid doctors took it out, and now we create the what we call, field of it.

The what you say how do we feed when you lose we need to breathe, (1:42) if you know where to stick your tongue inside your mouth you don't even need the air to breathe. Because when you go (?? huh swallow) it closes your air channels. Man some of those who were advanced they found something but they didn't understand what. And this is one of the crucial points of the life of the Man. Most probably our tongue long term it becomes a circular organ still sits inside our mouth cavity, with the mouth closed, no need for teeth, and will create a physical size, what we call, magnetic field pressure, physical pressure on the Soul and the heart. And that allows what Man will absorb through his skin from his environment.

In the development of the Man when he becomes more or less not eating or breathing from the air of this planet, tongue in a shape of a, what we call, a spherical shape in the cavity of life, will be one of the most important organs for control system. What do you do when you swallow? And why does your tongue take to the roof of your mouth? If you understand this, then you understand how you control everything else in the physical dimension. You have the thyroid gland for the conversion of energy, you have the tongue in a specific position and shape for controlling the flow of the, what we call, blood and carrying the emotion to resonance of the matter to energy, energy to matter state of the body of the Man. (1:44)

Your tongue is one of the most important power source of the connection of the running of conversion of energy of the Spirit of the Man in interaction with what we call, the Soul, or the skin of the Man. It sits under your sinuses and the pressure it creates under your sinus, it changes the NO (Nitric Oxide) conversion. But there is one piece missing, and that piece I'll teach one day how. The pressure your tongue puts on the roof of your mouth, pressurizing your sinuses, releases NO. But that NO, which lets your blood pressure changes, the flow of the blood in this and cells reach maximum use, has a function in it and the functionality it, and it needs two elements with it, at that point to come. When you, what you call, do this breathing and you say, "Oh, not much happened" because as the beautiful Farsi says or in the language says, << Farsi language .>> "Half a doctor is a danger to life." Your breathing system, without understanding the work of your tongue, is... you're practicing. Doesn't make you a marathon man. And you have to

learn how to use your tongue. Tongue is not for talking. Because Man in Space has no language, and your emotion will transfer what you want.

So there's a lot to be learned and we have a lot to go yet. And when you speak about breathing, this is interim process. If you want to jump it, (1:46) learn about how to control your tongue in the back of your mouth, in the cavity of the roof of the mouth, how much pressure you can put in, how you can twist it, how you can move it, dictates how much material you release, but there's other dimensions you have to bring in, and then you feed the Soul of the Cell, that itself, with the use of the, what the tongue does, replaces the energetic, what we call, the Spirit of the Man. So, the same Soul feeds the skin for the absorption, and the same Soul feeds through the tongue and what we call, the gland under your cheek. And then the heart, which actually if you think of it, the heart is not much needed, if you know how to control this, because now you feed the energetic field through the Soul conversion through your the gland and then you see we don't even need a heart. No Universal entity carries a heart. It's a specialty of the what we call, creatures who have not progressed fully in development, which Man is part of it.

Any other question?

Q: Thank you, Mr. Keshe. Do you have, can I ask one more?

K- Yeah.

Q: Okay, so this is from a so-called older teaching on the parasite. In the Essene Gospel of Peace, not your teaching, this is from the Essene Gospel of Peace, the Gnostic teaching of Jesus, there is an account of a 40 day fast. (1:48) At the end, a bowl of goat's milk is placed on the ground and the follower sits naked, hovering just above it. And a great parasite, a worm, sometimes 30 or 40 feet long, is drawn out of the body to reach the milk and is pulled free. So much of what ails us seems to come not only from the eating of dead food but from what lives inside it and inside of us. The parasites we carry from that food and from contact with the animals and pets that we live alongside. When we reach the point of feeding ourselves purely from the Cosmic Ray fields and no longer take in dead matter, will we finally be free of these parasitic infections that cause so many of our illnesses? Is this one of the ways we come to live a far longer, healthier, and happier life? And is being freed from feeding, and from feeding what lives within us part of how we are made ready to be introduced to the Universal Community? Thank you very much.

K- If you done any work on this part, researchers have done a lot of work in the recent past 3-5 years. They went back trying to find what was remain of the whatever life or living things 6-10,000 years ago and beyond, and the present Man. When we look at the guts, what are, what we call, acid, enzymes, or water in the stomach of the Man, used to be around 430, 440 I think, enzymes, would digest everything, anything. Today we only find around 200 of them. The other 200 and something has disappeared, our body doesn't need. (1:50) Those, it's the same work of the life. Gradually we might end up in couple of thousand years or whatever if we don't change our ways the way we're becoming mono

energetic fed different shape and color of the food but the same things inside it, then we'll most probably end up with about 50 60 enzymes in our stomach.

So, the new bacteria's is the new problem we see, is for the loss of that 200 and odd enzymes which we lost in our body. Those were there to stop these to be growing and now we change our lifestyle and there is nothing there to do, and they get a huge growth. In the new products from Keshe Foundation China in the medical side, we are releasing things which replaces this by energy. People with a problem with leaking guts, people with viruses in the stomach, and everything else, new literally scientific products will come out of our factories in the coming months, that replaces or adds to energy level side that can recuperate that 240 elements we lost enzymes we lost in our stomach.

We see parasites in our stomach because we lost one of those enzymes ?? that was trained for it. The modern Man especially in well educated in the energy business of the life of the Man ,which doesn't rely on other positions is the herbs. Try to replace these 240 losses (lost enzymes). (1:52) There is no stronger herb on this planet than clover, if you know what to do with it. There is no stronger elements in energy than black seeds, if you understand how it works, and how to mix it and how to do it. And these, what we call, the Medicine Men, discovered these to replace those enzymes we lost as energy, which now allows to create different diseases in us. When we use this we replace all the enzyme lost.

And it needs time. And once you stop eating what happens to your stomach? When you lose your mouth, what happens to the stomach? What mayhem is going to be in there? How? We can't kill the people like what the Israelis do now. They kill the Palestinians as terrorists and they kill the children as terrorists in Gaza and they take their organs and they export it. They take everything out of their body, liver, lung and everything and Israel has become the biggest exporter of human parts by the list of those which even passed in parliament, they're going to kill 10,000 Palestinians in prison, because their organs is already sold by Mr. Netanyahu to every synagogue across this planet. There's never been more murder done by human parts that the synagogue run by the Jews. Now you know, go on the Internet to find out who's the biggest nation in human parts where do these parts come? Palestinians which are killed, raped. And what happened to us when we lose these enzymes? We don't need the guts, we can give them all to the Israelis to sell it to those who don't need it anymore. (1:54) Cursed the race. Now you understand what happens when we don't eat these enzymes that are needed. What new diseases will we have? Except what we create ourselves emotionally. The future of the Man is all cycle. Because semantics wise there is nothing to create the condition of it, except the emotion of the Man.

So, we have to understand how system works and when we don't eat these 200 and odd enzymes left in the stomach are not needed because the stomach is not there. What does the body is going to do with these? The biggest problem for the body will be what to do with the liver. No more food comes to food because there's all energy. Our liver becomes the energy than the physical thing. The stomach is not needed. It has to be taken out gradually that in the next future life of Man on this planet because we don't kill. We don't we don't breathe. What's the position with the lung? Do we need the lung? And then

you see how glands which are part of the brain in a way substations will take over the life of the Man. All the glands we have in the body of the Man are Units for the transition time from physicality into energy ?? life, well planned in advance by the body to be ready to go. It's not just accidental.

Every gland you have or your kidneys everywhere else is the energetic side of the same to function, the same without the physical condition. We'll see them as energy but there is no matter. (1:56) Because what's the use of carrying a stomach in you when you have no mouth to eat? When you have no lung to, no nose to breathe? But it takes millions of years of evolution to replace the lung, otherwise it gets infected in the body and you die. You get also some infection because you have an extra organ in there rotting. It takes evolution, unless we go through the process of transmutation, and bring that condition.

In a way, those of you who learn what transmutes, you transmute yourself with the physical dimension, as you are now, into the energy, and then you reverse back yourself into the dimension without the parts. We'll teach you how to do it. In a way, you have understanding of this. You get the Iron, or you get the Copper, you transfer it to energy, and then you do whatever you like with the energy, make it something for your pain, you make something with your... for something else, and it manifests itself in that dimension. This is how you move yourself from killing habits of the humanity. Once you learn the transmutation, you move yourself in the dimension you are, into energy, and then you return yourself, transmute back yourself, but added energy, that I don't need to take energy from the planet, I supply to the Universe energy through the glands.

Doctors and scientists haven't understood a ?? dickybird word about the glands, about your lymph nodes. I always say your lymph nodes are the kitchen of transferring energy. When you go for a breast operation and take all the lymph's out, you're sentenced not to receive dimensions of the fields from the Universe the way it should be. No lymph nodes should be touched, no glands should be touched. Because these are what I call, 'Communist Party members of your life.' (1:58) You know, in China you have a Communist Party of what we call, the government. In every offices, high offices in China, you have the chairman of the board of let's say electricity. He has no power if the what we call, Red Army representative overrides him. And this Red Army general or person, is your gland in your body. You never allow. You should never allow doctors touch, remove any of your glands or your nodes. Lymph nodes is the source, the kitchen, which cuts the bread to size you want.

In the future I'll explain this because this is important for creating the Children of Mitra. How you use what you call, as your glands and pieces as reproduction for creation of energies that leads to creation of life. You don't need physically to penetrate and deliver. Sorry, the woman from planet Zeus has no those of those parts for you to have your physical fun. But you can have the physical joy if you understand how to use your glands and how to use what is left there to do the job. Thousand times more pleasure. Because it's a union of Souls. It's a very, very special but you may have to learn. It's learning time we are here to teach. I'll teach every one of you how to go through this transmutation, but you have to understand it, and not just be enthusiast and that's it. (2:00)

Any other question?

Q: ... Good morning Mr. Keshe and Rick. I have a question about a transmutation. Does a tattoo or a drawing on the body has any effect on a transmutation or on the body itself?

K- Has huge amount of effect on the energy transfer in the body and the emotion, yes. You clear... you clearly introduce a filter. I was with a Knowledge Seeker, yesterday. We were sitting in the public. And the question came out, "Have you seen all these people in 50's and 60's, how much tattoos on their body?" I said, "Yes, you don't know what is called. They call this a Beckham factor." We were in our 20, 30 years ago, Beckham became a footballer and he brought this tattoo job into his ultimate opposition of the day, became fashionable. All these youngsters were in their 30s and 40s. They tattooed it to be like him, now they're ?? tweeting it, trying to get rid of it. It touches your emotions, touches everything. The amount of diseases we see, people with the tattoos, and people without the tattoos, is amazing. And they put the tattoo in the most sensitive part of the energy transfer in the body, on their back, especially on the upper arm. (2:02)

You see, your femur is the most important part of the conversion of the energy to matter of the what you call, the blood system everything else. Your upper arm, skin and the lymph flow is in the energy the same as your leg. Your leg is already covered with clothing or whatever. Your arms are mainly stripped with short sleeve. You're naked, you wash whatever, and you absorb a lot of energy through that ?? place. And you tattoo it and see what diseases people with tattoo have. Forget about the ink, look at the energy transfer of it. And you see now it's tattooed the face, the ears and every other place they could tattoo, they're tattooing.

I was standing on one of the most famous what we call, anchor points on a beach a few years ago and I saw a lady had a snake starting from her toe disappearing in their genitals and appearing in the head of the neck or what you call it, the tongue of the snake where her tongue was in the bottom of her lips. It was a greenish done extremely artistic. And I looked at her she looked at me she said, don't worry, it goes in places you cannot imagine. And I said, yes, it's touch your brain. Then it shows where it is.

And the structure we tattoo ourselves affects our emotion. (2:04) And imagine in a thousand years the way we dig in the graves and find people from thousands of years ago, when our future generation dig up these bodies and you see all these tattoos with skin most probably stuck to the bone, they think it must have been a ritual people did this to sacrifice it to the God, they never understood that it was a humanity going stupid with Beckham. As I said, Beckham, he didn't just twist the ball he twisted that every ball in the brain of the Man to these tattoo business. And unfortunately, or fortunately, whatever, I had it this early my life that I came close to this family and I it was it's amazing how they think and they live. When he used to work with Manchester United, and I used to live in Manchester. As part of the life he had connections with these elite, stupid people.

Any other question?

Q: ... Hi. Actually we spoke about a month ago. You said you'll give me a time after three weeks to talk to you.

K- We are, let me let me explain. We are so busy, we'll come to you, you're not the only one. I have a book list of people like you. You're dealing with a third, fourth level person in your district. And anything these people do comes from much higher. And we are dealing with those people in India at the moment. (2:06) I understand what you're doing. doing but I understand, thank you very much for your work, but the situation with the Keshe Foundation at the moment sits with BRICS. We are we are at the level that what BRICS wants to do, and the Indian government is one of the key factors in the BRICS It is very important for us to follow and we are dealing with your with the people in your structure.

For Knowledge Seekers to understand, even my trip today, this week, is part of this process. BRICS is trying to bring a Coin or a currency which can rival dollar, and they've been told if they do. They're trying to, Chinese are doing the same thing, trying to bring RMB to that point using the BRICS. And then there's a Keshe Coin which says, blow it off, you don't need to do any of this, because now already the Coin, the structure, what you're hoping to create, is already created on the banner of the Keshe Foundation. You Knowledge Seekers will understand very soon, Keshe Coin will replace every currency on this planet in the coming time. You still have your local currencies of RMB, but then the balance will come the gap to gage themselves to fix continuous same amount currency Keshe Coin. And this will affect local decisions, this affect how the governments will do.

And I even work with a Chinese team in China and they think they know everything is happening, but on the background we're working with the highest level people inside the government to move this. There's opposition from Americans not to lose power, but there is a lot of work we don't need the governments. (2:08) Americans will use the Coin, Chinese use the Keshe Coin and as you... This was... I answer you in one way. Rick asked me what you want me to play this morning as Intro, and I said the government one and you listen to it. This was done for two governments, three governments who were listening. You have today amongst you or you had today or people listen to it, the highest people in economical factors in the world. How does it affect us? I said listen to the teaching. I tried to get it made. You have access to the video but listen and understand it's spread around the world, it's not just you thinking I just ?? want you to give a link.

We have, we have to work at the highest, and then use our control in bringing peace into work of the governments. Once now the ONN's have landed, it's not, it's going to be, took us 12 months to do it, Once the Keshe Coin flows amongst you, and you tell the guy, I have a Coin, you can have a thousand, why don't you go and ask for yours? We don't have the support to do it yet, by the end of the year, we do, hopefully. We have to set up the VPN properly, that's why we're testing with this, I ask Knowledge Seekers to help us financially, to purchase as many as these as possible. This is the key to the World Peace, not just because of the Keshe Foundation, but the independence of the

governments that they cannot be controlled by United States, or the whatever called. They're scared of bringing Coins, they're all going into the Coin business. We're already in the Coin, but our Coin is for all the nations not just for them.

So, understand we're working a lot in the background but it needs a lot of, a lot of patience and now we are there. The first Unit landed today. (2:10) I'm, I think four of them will land today. The important was to see the first one landed. And then we work through government. You go to anyone say I give you 30,000 20,000 in Coin and go to the other guy and then you accept mine I accept yours. How did the Bitcoin come in? This time, Man do it. You don't need to be rich to buy 60,000 50,000 Coin. You're given a going to become to have in your hand an amount. You start exchanging it, we don't need to do much, the job is done. Thank you very much to those who work in the background to make it possible.

We bring the Soul with us and they do the work. Always said, you've seen the governments when they come into power, they bring all the people who they know to support him to become minister of this, head of that. When we come as Universal Teachers, we bring our teaching team with us. And they know exactly what to do. We don't need to do anything. Those who create the Coins, those who create the programs, for those who create the research, they are part of us. We just put them in a physicality and the knowledge that they can carry it out, to deliver the job. I don't sit to do the job. These are like the glands I was talking about in your body, we come as a team in different shapes and different part of this world. But it's all the same and we are there.

We've done what we call, the ?? job if you know what that is, the head job. If you don't I'll give you a little secret, it's not a secret, now you hear it. You know how they killed all the Iranian leaders in the first day 160 of them. (2:12) 90% of them slept with what they call, ?? Asirah in Farsi in Arabic, you can, it's you can what you call, rent a woman legally, religious people for one or two hours, or whatever. And the Israelis sent a lot of women very, very trained in Arabic and religion to be very religious. And all these Mullahs and Sepah leaders had their Asirah. And they reported to the Israelis and Americans where they are. That's how they killed them. Through women. It wasn't a satellite, it wasn't chasing the telephone. They became friends of their families. The wife said, "Oh, he's going on a mission today to that place." And they sent the news to with the embassies, the British embassy, American, what you call it, Swiss embassy in Tehran, to Cyprus and to Greece, that this leader is going to be in that position. The information was 100% right, because pillow talk became talk between the woman they trusted, and how they kill. The way the system is. We don't allow pillow talks, we just carry that nobody is hidden from no one to do. Now you know how Iran lost all their leaders, to women sleeping on the Islamic cover of Asirah. They all got killed, but 20-30 women who became very, very religious looking and reporting everything. They were actually Jews under the cover of ?? Black chador, infiltrating the whole family of the leaders. And they didn't need anything because it was precise and that's why now the leaders are allowed not to talk their wives to tell anybody where they go where their home. And they're trying to find these 40 50 women, they found a few of them, and the rest has escaped into Israel. (2:14) Power of women. Now you know how they brought a nation down. But they

thought, they thought they did, but they didn't know it's much deeper than that because some of these leaders are very strict Iranians.

All the ones who are connected to Arabs have been killed because they're womanized. All the Iranian leaders you see in power are the ones who have one wife and they stay faithful to. So they had nothing with these black women, chadors, to give their secrets, where their husband is. I can tell you sometimes a lot, but better not.

Next question. Have we run out of questions?

Q: ... Can linen and wool be worn together? Will laundry detergent affect the fabrics?

K- You can wear anything and you can wash with anything. There is a... there are new products, natural products, which are coming into the market. The bark of trees, material made from the, what you call, sugar cane. There's new, a lot of new fabrics, natural fabrics are coming into the market. As I said, in China, we have IKEA sells blankets made of silk. (2:16) Silk wool, you know, here you get polyester, or duck feather. In China we have now what we call, silk quilts. And they are very thin but extremely effective. You have a summer and winter weight of it. And you can't find it in Europe. And you find your sleep totally different. When I sleep in China I sleep much deeper than in Europe. I tested it. And I tried, I went to IKEA, they never heard of it. Doesn't exist in their system. They thought I was joking.

You, you, you have to understand how to handle these things. It's not just because now I want to be. There's a lot of things, it's a full process of things you have to understand, it's just not creating gaps. You can... it's like, I don't know if you heard about one of the top brands, children shampoos, which I used to use for my children because supposed to be the best. In the American brand, they use lead. They use materials which is more dangerous than anything else to children. In Europe they're not allowed to. But in America, as usual, you're free to kill yourself on the brand of any products. And you have to watch out.

Why don't you use natural soaps? Making soap is so easy if you want to do that home. Walk into the jungles, walk to the woods you see burn trees and burn ashes, (2:18) take some home and just read how to do it with a little bit of caustic. And our ancestors did that. Then you so are within natural system. No government can dictate what you put into it. It is a natural process from the wood, you make a barbecue with wood, don't put the ashes away, read how to convert it into soap and it's yours, you know what's in it, it's a wood you burned, you ?? grew it most probably in your back garden.

They force us to forget the way we used to be, and that has brought us to where we are today. We lost the track and that track was us living with the nature. Now everything is synthetic and there's something wrong with you if you're living the life your parents were living. It's very interesting. We, we, our ancestors, most of us background comes to a farming unit or family somewhere or we know somebody. They lived the breads and the food of the land and they pay nothing for it. The same thing appears on your shop with

90% chemical in it and you pay a life for it, four times more. Exactly for what your brother and your cousins are free in the village. They sell you the same, call it Bio, still a lot of chemicals in it. And what do you call, you think you live a good life, a clean life and whatever. You can (?? can't) go to the extremes, but you can control some of the limits because of us our industrialization we can do a lot of things. (2:20) But there's a limit to what we can do. Try to use it, if you can produce natural soap. So buy, if it is , it's hard to find natural soaps nowadays, unless you make it at home. And yes affects your tissues and body use.

Any other question?

...

Q: ... He's wondering about where the energy comes from that makes a Man have a seizure. What is happening to his Soul at that time. And he says the only sign of it coming on is a slight cramp in his right calf. And my dog knows it's coming and won't leave my side.

K- You have to find out what seizures are, scientifically, but through energy. And you have to follow the pattern, what seizures are. Seizures come when too much information, too much energy produced in part of the brain and the controlling valve in that position or on top of the what you call, spinal cord does not have the capacity. In a way what your dog hear it is correct because they have a sensitivity to energies, and the energy released from the brain to do something does not match, it creates like a dam against the water, against the dam, it creates a splash. Your dog hears that splash, (2:22) but you have to find out how that seizures that energy extra energy is created. Or handle it, or understand it. And or what you call, live with it. A lot of seizures you would call people who have epileptic seizures it's one of them. It's you create huge amount of energy, your dog hear it because it is sensitive to fields it's like somebody is slamming the door in your house without hearing it, the hearing range is that you can hear the slamming of the gates of your brain and the water coming in, the splash. It's very simple. You create too much energy in a specific part of your brain, you have to see if it's emotional, control the emotion doesn't happen, or change the gate in a way, which is scientifically can be done. And again in Chinese production factories this system will be introduced in the next 12 months it's on the part line of the production ?? center, epilepsy ?? . License on the Chinese government health national insurance. You go to China get sorted and go back. In the West it's criminal to use Keshe Foundation technology for health in the West .. In China this is getting open armed, we will see what comes up.

Any other question?

Q: We have an ongoing question about regarding the Electric Gas Generator and whether there's any updates on that.

K Yes, we are working, and now with the research centers in China done and we stopped moving ourselves from one place in the world to another, because of all the problems.

We'll release this. (2:24) It is part of our production and it's part of our system to be completed. Yes. Just give us .. You waited a long, long time, just give us a little bit more. Let us get a set of the factories and research centers and we are in it. But you'll get a very much more advanced level than what it's been in the past. Much, much more advanced, ?? compact. It's like the UBESUS Units, you remember those big eggs? And now the same thing is on the Headset. It's the same thing with your gas electric conversion. It's... it's the process which is coming into us.

As I said, most probably, by time we release this, I was talking to a Knowledge Seeker a few days ago, one day I think, that in 2027 just be careful if you buy a car, because you'll find out your car's value will drop by 80-90% in 27, 28. Maybe more. Maybe you... nobody will buy your car. At a moment, the whole thing it goes on engines, the battery performance and energy, and blah, blah. The new cars will be what I call a Persian Carpet rug. You know the flying Persian flying carpet. It's the truth to it. I explained to you how actually Persian flying car was a reality centuries ago. And now it's become a myth. But it will cost you we estimate on about a thousand Euro's to convert your car take the engine and the what got fuel tank and the battery, and throw it away, and just keep the car. You can have a Rolls Royce without all the eight cylinders and the rest of it. (2:26) You can choose and make your own colors and your own features with fiberglass the way you like it. And we should be able to hit the market 27, 28.

And if you want to know the history of the Persian carpet flying they used to. The Iranian technology, the Persian technology was so advanced that they could make special wires from steel, that they could weave carpets with it, that the enemies could not hit it from underneath, because when they used to throw arrows, it used to kill the bird in a way. They used to make carpets, they used to go on top of the hills. We'd see it now, you know with these people who make jumping suits and they fly like a bird? The soldiers, the Iranian soldiers used to get on these carpets, and they used to fly with it, what we have now, we've seen with the flying clothes, and the enemies could not hit them from their bunkers, from castles, and they usually hit them from the top. That's how, it's a reality, it was advanced technology, making fibers from steel or iron, that it could not be penetrated by. And then they used to land at the bottom and a lot of them got killed because of it. But it is true, that's how they did. It's the Space suits itself. Today we see the people go up to the top of the mountain and they jump with a cloth. And the Iranian at that time made a carpet out of steel, could not penetrate, and the arrows couldn't penetrate, and they used to jump from the top. And in some cases, when the castles were underneath of the big mountain, they could hit. Anyway, that's our history.

R: I saw one fellow in the Youtube video, (2:28) who was using a carpet, like an oriental carpet, was reinforced somewhat, and he was flying on it, jumped, you know, off the cliff and flying with it. Just like a flying suit. But of course, they have a parachute that they pull at the last minute to, you know...

K- A lot of these people used to die in the landing. They had nothing to land.

R: No doubt. They have to go about a hundred, over a hundred miles an hour in order to make the thing fly properly. So...

K- It used to work. It used to work, but it's a reality. Now you'll have the, what we call, systems which we develop. It's a five-piece system. You... Pardon?

R: Sorry, I was going to ask what about in the old days of Iran did they have hovering carpets as such or was it mythology because they were jumping off the mountain with the carpet?

K- I don't know ... These flying carpets by soldiers was a technology that time they mastered and it was done because they could make very fine iron that they could weave a carpet with it, was very light. This was a master in carpentry. It's like you know you have these little tiny, what you call it, bullet shirts. Have you ever wore these t-shirts, bulletproof shirts? It's amazing. We used to wear these bulletproof vests, you could die under the weight of it. When I used to do missions for governments, in sensitive parts, we had to wear these bullet jackets. And now it's a t-shirt you wear, it is more effective with the bullet jacket you were wearing before. Because they mastered a very fine twisted. The Iranian carpentry was advanced so much they could make such a thing. (2:30) It was actually, they say, the weight of it was less than they made from carpets from wool. This is, it was very fine. And Japanese, got some of it. There's a company in Taiwan now, makes a fine wire of silver, and then coat it with 18 carat gold, it's a very special, they're becoming very famous across China, and they're coming up with some amazing artwork, with gold, but it's actually silver in the center, because they can manipulate silver easier, and then coat it with gold. Then it's the same if you pick a structure like that in any shop. Let's say it weighs 100 gram, theirs is 30-40 gram. They fine-tuned out of the... pulling the wires out of it.

Any other question?

Q: ... Does the number of Souls in the Universe only increase and never decrease?

K- Every star you see is a is a ex-physical body. Every planet you see, every dust you see is ex-physical which created a Soul or through conditions fields came to create a condition to be the strength of a Creation which creates a star, or a planet, or a moon or whatever. (2:32) And it's not exclusivity of Earth. I was explaining this and I'm going to show this so you understand. In the Universal Community if you translate to the language of a Man, humans are like beautiful women that they attract you, and once you get close, they are a serpent inside, with the tongue, they kill you. Humans have a beautiful Soul, but that serpent is the killing. And once you can stop that, Souls from Earth are amazing. They know how to love. And this is what attracted the Universal people to creatures from this planet, not just the STM, the Soul of the animals do the same, and the rest. And this is why we are here to uproot that serpent inside the body of the Man. I call it the jewel, the duality and underneath sits the poison. We are here to uproot that poison.

Thank you very much for today. I have to make a run for it. See you next week. And hopefully when we have the 8 Units in your hand, some of you received your first one today. Thank you very much for being there to receive the first ones. You're the trusted, solely trusted by Keshe Foundation. (2:34) And another 25 of you who will receive it within next few days by the before end of this month, or next month. And guard them precious, and you are the beginning of the change for humanity. And with it we start sharing the Coins and then with it we start bringing the change. And as I said always, we need a lot of support to put as many as these Units out into the communities and no government and nobody can stop us. And if you look the way we are scattering these Units are getting scattered at more or less we can cover majority of the world population under the cover of this. That we, if one take out two, taken out we can look. And unfortunately the prices of these has quadrupled in so many ways by the time we finish putting the what you call, the Universal Units Antennas on it. But it's something we are here to serve and we will find a way to do it. Thank you very much for today and see you hopefully next time.

R: And next week we'll be at the same time as this week?

K- Yes, yes, you remember that old song Mrs. Brown, you meet at the same time same place. Mrs. Jones. We are there. Thank you very much and see you next week.

Just be patient with the Keshe Foundation website and the Store. We'll try to bring it online this week if they can. Next few days they are working on it. It was a huge problem in the background. You see a lot of items are not there. Don't worry about it. If you have bought anything, it's kept in the background of the system because the new system has to be what it is, not what it was. (2:36) So we run your system in the background. If you bought something, it hasn't disappeared. It sits on our system in the bank.

R: So people should wait to re-register is that...

K- You have to re-register to the new and you... It'll be in your bank account. Everything is new, this new setting. And yes, we need that. It's part of it. There's a way you register now with what you call the Games. Your new Universal Card passport is in the same process. Everything is getting done. We're setting up a new nation with new ways of doing itself, what they do. Thank you very much. I have to get going and get things sorted. Thank you very much.

R: ... And happy birthday.

K- Thank you very much. Thank you indeed.

R: << Message from Universal Council: >> "Thank you. And gratitude, gratitude, gratitude to Mr. Keshe, my ?? Srimand Maharaji (?? Great Guru) and Keshe Foundation Spaceship Institute organization. Gratitude to all we are that Knowledge Seekers. Thank you for being here always, dear beautiful Souls. And this is the wish for from the Universal Council. (2:38) Together, we say, we all. We the Universal Council invite

Keshe and Universal Family present on Earth in unifying at the Soul level every time, every day at 9 p.m. CEST time. As we say, wherever you are, from wherever you are in this moment, or all the moments from now, you can be in communication with all Souls in existence. 9pm is the start. If you say, it is always forever. And a beautiful, beautiful wish from all of us. We, the Universal Council, give from our Souls and invite all of humanity to elevate the Soul of every leader in every nation to work as one Soul in one direction to achieve peace as One Nation, One Planet, One Race. Thank you, beautiful Soul. And happy, happy, happy, happy birthday. Happy birthday to ?? Srimand Mehranji, our beautiful, beautiful teacher. Thank you. In India we say, << speak in Indian language. >> You live for 50,000 years, and one day is like 50,000 years. Thank you. Thank you, my dear Rick. Thank you. Thank you, beautiful Soul. Salaam Namaste. Salute.”

653 KSW – July 30th, 2026
