

655th Knowledge Seekers Workshop August 13, 2026

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

Lymph into blood: KF Knowledge integrated into Science of Man; Scientists listening - find solutions; Today's knowledge - change course of Man - how STM connected STP; Blood is matter - lymph is Energy; Creates boundary of organs; 3 systems of blood, lymph, neural - cover whole body - positioning - boundaries of organs; 3 systems create outline of organ - then tissue created; Cells of organs are created by interaction of 3 systems; STP connected to heart & blood vessels - STM to neural system, interact and lymph manifests as cells - matter; 80% of energy from environment absorbed by lymph - then lymph mixes into blood vessels - Science not know; blood pressure 120 over 80; Lower number 80 - strength which lymph is pulled into blood vessels; Lymph enters blood vessels between top of shoulders - immune system - Spirit merges into P - energy of STM is absorbed; Mixes with energy atmosphere through lungs - then goes into blood vessels - heart - energy released by energy of heart; How much energy released with each heartbeat & absorbed - M fields - emotion changes - composition body; Gap between beats - wish to die - imprints on Soul & P - psychosomatic diseases; Death code - cells switch off; M fields & position of heart - controls physiology of STP; Cause of brain hemorrhages, etc; STM can't handle higher order energy; Control gap between heartbeats - transmute; Create Emotion of Detachment; Transmute without system; Control everything through breathing; Birthing; Animals connect UE; Lungs, Heart & blood not needed - circulate energy M fields - Aliens don't bleed; M field channels between galaxies, planets, etc; No blood & lymph circulation in U; Transfer energy between Spirit & STM; Heart - volcanic eruption M fields to STM; Aging; Separation from Soul of Planet - detachment; Heart Black Hole - feed STM, M fields; Control emotion through M fields - without liquid circulation - survive Space; Alcohol & drugs; Live without needing energy; Change gap between STM & STP; Ancestors transmute; Hyperventilate; ONN create these conditions - develop energies - understand emotion; Unknown emotions; Learn Emotion of Transmutation; Love, Detachment; Travel Space return to Earth; Transfer energy through skin; SS & planets have skin or boundary; Emotion of Earth; Creation same from atom, Man, U; Understand how U works by physiology - M fields; Field balance with matter - disappear; Little ash when cremated; Body 90% water - dynamic plasma - two liquids cannot mix; Difference between temperature & heat in plasma - 1 million degrees - ice cold; Heating plasma; NASA's probes left SS - not understand; British show me mentality - wrong way - blocking knowledge; Eminent academician in China - cheated; Keshe T not need academicians to prove - own merit; Change direction of sound to create; Sound of U - unique in each area Space - creates specific materials - 'resonance transmutation' transfers energy into matter, C-10 not C12; Holistic understanding - knowledge as science - how matter & energy connected - sound, frequency, pulses; Sound of Creator & Creation silent; Mitra - best of Creation - be close to Creator; When understand little become Devil - advocate crime; Religions don't bring STM close to STC - to abuse P; Teachers of Aliens; Criticize when don't understand; Don't see all; Summary - lymph, blood, heart - UE enter lymph through skin - transfers energy to bloodstream top of lungs - neural converts to cells, matter; Don't need P; Secret of Creation; We are Messengers; ONN Units; Distribute Keshe Coin (KC); Registering -

family - not ashamed; Huge changes KF - restructuring; Time to interact with governments & public; Launch heavily in China; Human brain Microchips with emotion - understand right & wrong; AI obsolete; Need experts to manufacture Chips - system control through M fields; Soul uses nervous system - works on M fields not gases; Nerve cuts creates Nano material barrier - bypass; Rotation & orientation of fields - no detection; Life is M field connections; Building brain cells; Gas has GM field; Man limits himself; We are in the knowledge; Sorting problems - website; KF consolidating in China; Counter-insurgency - Sunni NATO - brainwashing by Press - hide Catholic Insurgents - Ukraine, Middle East, more killing; Isotopes - number in nucleus; Plasma uses bandwidth M field strength - millions in spectrum; KF - standard of measurement; Travel using field strength; Plasma measurement system; STM gives and takes energy - finds position in U; STM separates from planet; Teachings not finish; Oscillation of fields between STM & STP; Emotion has Inertia; Inertia affects neural & emotion - gravity; Inertia - altitudes - different emotion behavior; Europeans gentle killers; Inertia effects of food, air, living in concrete high rises; Radiant floor heating systems - neural instability; Smell is Inertia; Hormones Inertia based materials; Heart creates Inertia; Vitamin D hormone - with vitamin K2 matter; Hormones - Energy Packs; Need counterbalance - behavior opposite; Women - biggest murders - energy & Inertia; Cancers - emotion psychosomatic, accidents, evolution; Analyze to determine - 20% cancers incurable; Stomach cancer Iran walnut; Find root problems - correct M fields; KC kept as national assets until sign for Peace; Track STM; No zero point gravity; Earthquakes planned; CR Love Resin products; Emotion of Transportation - transmutation; Plasma of Earth inside plasma SS, Galaxy, U; STP inside STM; Emotion of love - transfer energy into P; Make Children of Mitra; Man's dual systems organs; AI calculated time to create life on Earth; Different D going on same time; Teach to become transparent; Illusion - fits perception of life; All agreed to perceive everything same way - Inertia of planet; Specific GM field - particular plant; Why absorb specific fields from U - G fields of Earth; Life on planet not coincidental - change GM fields slightly - no plants; Life through G fields from center; Neutrinos - have become us; We are made from collection of energies - accident of time, but with love; Man added love into it - unique; Breath with Soul; Absorbing energy is an art - transmute.

ENGLISH TRANSCRIPTION

(:16)

K- Thank you very much. Good morning, all the two, as usual whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute, we welcome you back. And the same way, same process, we try to add to the knowledge.

In the past weeks, we have entered into a dimension (D) of how we interact, and how the fields of the Universe interact with us, and how we are part of the Cosmic Rays (CR). If we follow on the same basis, again today we unravel new knowledge, unknown to the world of science, and gradually this becomes part of the world of knowledge. The same we did with the Black Hole (BH) some 20 odd years ago, and now the theory and the principle published in the creation of Black Hole paper, which was stolen by Stephen

Hawking, and now it has become a common knowledge. We see videos, we see teachings, and now they explain how the fields, now it comes out of what we call, the Black Hole, and now it is accepted. So we are 20 years, 30 years ahead of the world of science. And we have seen how it is done, how we brought the Nano technology (T), before when we spoke about the new type of Nano material, we became criminal, and now is the language of every, what you call, scientific organization. When we proposed the creation of specific diamond structure of carbon, this was pinpointed by the King of Belgium as a terrorist organization, because we use Gamma Rays and I am an Iranian nuclear physicist. We saw how all this has hit what we call, the fan. And now nobody comes to apologize, it's become part of the knowledge.

Today's knowledge will change the course of Man the same way. (:18) In time you will see a lot of research on it, because the world of science listens to these technologies. The world of science finds solutions in what is taught. Today's teaching is very fundamental. The fundamental thing, part of it, is how your Soul is connected to your Soul of the Physicality (STP), what we call, the Spirit of the Man. How do we got it all connected without knowing within the physical structure of the Man. What does this mean? We call, the body of the Man working on two systems, matter state and energy state. Energy state we call it, the lymph. The matter state we call, it the blood circulation. And where these meet a current, or what we call, energy balance of a fusing section, then it becomes a matter, part, cell of the skin of the Man and the rest of it.

And when it's one-sided, it creates a boundary. If you look at the structure of the vein of the Man and the lymph of the Man, and what we call, the lymph pipes, I call them the veins, and the neural system, you see how, when the world of science looks, where the nerve moves, and where the blood vessels move, and where the lymph move, dictates the boundary. In a way, we see blood vessels going all over the body, we see nerve lines going everywhere, and we see the lymph's, which are everywhere. But, if you look at it, they create that layer of dimension. This, if for example, you have the lymph on the top end, or what we just see, which bleeds, when we cut ourselves, that's just a liquid, white liquid, (:20) then the nerve or the blood behind it, this shows the boundary of the skin, this is where the skin is going to be. If now the blood vessel is closer to the let's say bone, and then you have the lymph system, and then you have the nerve system, this shows the boundary of, for example, bones, but in a specific condition.

So now you understand how things played. We just see, we open the chicken, we open the body of a lamb, and we just pull the veins out, we pull the nerves out, and we say this is what it is. Our scientists never looked at the positioning. The most crucial thing in how the boundaries are dictated is by the position of the nerves and the blood vessels. When you look at the structure of the blood vessels, when you look at the structure of the nerve, when you look at the structure of the lymph, then you see by just looking at it, if you put it in three dimensional and look at it as a transparent unit, we see, ah, this is how bone is decided to be, this is how vessels of the lung is supposed to be, how chest bones are created, how everything else can be explained.

But there is one step behind this, which has never been understood, and it will change the world of science. It will change the world of what we call, physiology, and the chemistry of the body of the Man, and physics of the body of the Man. Up to now, we say we have a Soul. Soul is to do with the energy which comes from outside. We call, what we have as the science of the neural system. We find as a science of what we understand to be part of the structure of the future of the Man. (:22) Which is what we call, the Spirit of the Man. What happens to the Spirit of the Man? How does the Spirit of the Man connect to the Soul of the Man (STM)? Where we know the Spirit is connected to the heart, it's connected to the blood vessels, and then we know, what neural system is connected to the STM. And then we understand the connection where the matter state comes, where is the lymph manifests itself. How does what we call, the Spirit of the Man, which is in the blood system of the Man, connects to the STM?

It's very interesting. If you listen to the scientific world of today, which up to now, nobody, because we don't look at the energy side, we never consider that we absorb 80% of our energy from our environment, is how does the lymph mixes with the blood? Why you go and you take your blood pressure, it says 120 over 8, when it's empty, the heart when it's empty is 8. It is all rubbish. Because that 8, that lower level (number), is the strength that the lymph is pulled into the blood vessels. Our body uses the lymph to its maximum. When it comes to the point that it reaches a balance of the energy, on the upper side of our two shoulders, the lymph's feeds into the blood vessel. This is where your immune system comes in. So, in a way, the dimension of the physicality (P) merges into the Spirit of the Man. This is how the structure changes, and then that lower pressure is what actually pulls the lymph to become part of the physicality, which is absorbed by the STM's energy. (:24)

And once we understand this, once we comprehend that now the lymph, in combination with the blood of the Man, on the top of the shoulders, where the lung is, where the energy of the atmosphere is mixed, comes into the blood vessels, and now goes to the heart, then we understand something very, very simple. The energy of the heart of the Man, what it releases. If you look at your heartbeat, listen to your heartbeat, "Oh, it's 80 beats a minute." That's not it. Your heartbeat is not 80 beats, 80 heartbeats. Sometimes it's 82, sometimes it's 84, sometimes it's 60, sometimes it's 100. But, when you look at the children, they have 120, 150. This is not important. What is important for us to understand, is what each bit releases energy, which is absorbed by the body. Look at your condition of it. Your beat, space of your beat, changes by emotion. You get excited, the heartbeat goes up, the gaps reduces. But this energy which is released by that beat is not just a heartbeat, it's a magnetic field which a heart releases. And that magnetic field sets the condition for the whole structure of the body of the Man. You get frightened. You get angry with your child. You do all sorts of things, and your body composition and the beat changes, and now the beat changes. If you wish death into it, you wish you were dead. In that breath, in that gap between the number 60 beat and 61, it imprints into the Soul, imprints into the physicality, the reality imprints into you getting MS in the future, (:26) getting ALS immediately.

So, when the doctors, now they look in the physiology, doctors, if they look in the beat of the Man, the gap between the beats, and they find out there is a gap in there which commands the death code, commands the wish of dying. There is ?? there which demands, or commands the gap between number 62 and 64. Now is 8 millisecond gap. Next beat, the same count is 2 milliseconds. And that 2 milliseconds is so impact that affects the lymph which is carried in the blood to connect to the lymph which is outside, which is not joined, the Spirit of the Man to create cancer, to create death code, to create, as it circulates around the body of the Man, ?? tells ?? the cell switch off. It's time to die. This is how our life is dictated, through the connection of the magnetic (M) field of the heart of the Man, which what we call, the position of the heart, is just because it's a more mass collection of the same liquid, which controls the physiology of what we call, the Spirit of the Man.

And, interesting enough, if the scientists check, and we have done check, many scientific work has been done on this, is that the heart sends more information, more magnetic fields to the STM, than actually the Soul sends to the heart of the Man. I'm here, I collect everything. And this is why, when you cannot, when those space gaps between the heartbeat changes, because of your anger, because of the stress, changes the energy release in what we call, from the heart to the brain, or to the STM, which causes you the brain hemorrhages, (:28) creates your paralysis, it creates your tumors. When the energy cannot be handled as a higher order that the STM sends or receives, dictates if we can, we will get, we have different kind of diseases. But, if we manage to control the heartbeat, the gap between the heartbeat, the structure of the heartbeat, if we can control that, then we can condition ourselves into transmutation. You create the emotion of detachment from the physicality condition of the planet Earth, from the physical condition of anywhere in the Universe (U). Then we become part of the structure of the Soul, energy pack, which the physicality has no control.

Once Man understands this and how to control it, then Man will be able to transmute across the Universe. You do not need Jumbo Jets, you do not need Keshe Foundation transmutation system. But how does this work? How does, how do we absorb energy? We can balance it, we can regulate it, and go back to the teaching of the past couple of two or three years. And I've said that before, with your breathing, how you breathe. You have to understand the psychology behind breathing. When you breathe, it's not just the breath. When you breathe in, you take energy. When you breathe out, you release energy. With breathing in, you create, you take the Universe inside you. When you breathe out, you give to the Universe what you don't need. One is creating excitement and life, and the second gives life back to. (:30) And when you can control the rate of the breathing, to the rate of what we call, exhale, and then the gap between these two, you can control everything. Man has taken breathing as a normal thing, I just breathe, I woke up, I wake up. Why do the child cries when he is born into this world? Why do we go through that tension of going through what we call, the first passage through the birth tunnel? To cause us to change. We need it as mammals because we carry in a certain way the Spirit of the Soul, we go to it. Chickens does it a different way when he makes the first hole in the, what we call, in the egg shell. We all have to understand what and how we connect to the energies of the Universe. And we have not understood this.

So, as Knowledge Seekers (KS), as the future scientists understand, when your lymph joins your blood circulation in the upper body of the Man, where is the longest, that's why it's positioned in that way. Read, go into the physiology, go into the science of the physics of the Man, you'll find the two wings which join into the blood circulation of the Man, on the upper shoulder, over the breath, over the lung of the Man. It doesn't join it at the bottom of your leg, it doesn't join it on your head. It joins where the energy of the lung, which is connected to the dimension of what the Universe gives you free, is connected to. Then you understand, if you take this a step further, you understand that the World of the Creation does not need the lung. If you can create the dimension of the circulation, where one pump, (:32) as a Man has, connects to the dimension of the inner structure of the Man, does not need to be blood circulation. It can cut many, many Aliens to you, and they won't bleed a thing, because they have transferred, they have transformed in evolution of their life, into a higher order transfer of energies than the liquids. The same channels, we see these magnetic field channels from one galaxy to another, we see between the planetary system. Do we see blood in it? If we cut a galaxy, do we see it bleeding? No. It has learned to use the energetic channels of the magnetic field to sustain its structure. Sections which dispose of, sections which store, sections which create distance, sections which create boundary.

We do the same. Do we need the blood circulation? Do we need the lymph circulation? No. In the same process, we see in the world of the Universe, if you look at the highest current, highest, biggest falls, what we call, we say Niagara Falls or Victoria Falls, are the biggest in the World of Creation of the Earth? No! The biggest holes are kilometers in the depth of the ocean. When one current moves to the other, it heats it up, it transfers energy across. And then we understand we do not need blood vessels. We do not need to transfer energy of the Spirit of the Man to the STM and vice versa, through any combination, because we look at the physically of the Man, but to look at the magnetic field of the body of the Man. If you put the body of the Man on a magnetic field scanner, as I said before, temperature doesn't come into it, pressure doesn't come into it, (:34) you will see that the heart of the Man is a huge volcanic eruption, which takes the field from the bottom of the body of the Man, and then his surface on the top, and pushes it through this fountain as a magnetic field, not a blood flow, into the STM, and then it connects with the Soul in a dimension of lower energy, then you see how even the life cycle of the Man has decided.

When the heart gets weak, when you get old, this volcanic eruption cannot reach the Soul. The separation comes, the Soul and what we call, the Spirit of the Man separate, because there is not enough energy in the heart of the Man to create that volcanic magnetic field energy to continuously feed the Soul. I cannot do, we separate. And that's where we stop taking food, we stop (start) going through the process of death, as I explained before. Then we understand how we can create that separation with the Soul of the planet, how we can create what we call, detachment. How we can create a life in a dimension that up to now we looked at its physicality, now we have to look at its dimension of energy, magnetic fields. This is what it goes back again to what we call, the creation of Black Hole. The heart of the Man is that Black Hole, where it pulls everything

in, and in getting in, it releases fields which are invisible to us, but it feeds the STM and the strength which the Soul is connected to.

We cannot feed the Soul with a chicken and what we call, kebab, or a Coca-Cola. It feeds from the fields, it feeds from the magnetic fields. It lives by the interaction of the essence of the World of the Creation. Would the time come when the Man controls his emotion through the magnetic fields of the body of the Man without the circulation of the liquid? (:36) This is the time when we become Man of Space, when we don't need blood, when we don't need anything to be able to survive, to cross the strength of the Universe and to live in every dimension. We can do this. If Man learns how by breathing, if Man learns how by controlling the rate of the breathing, how Man controls the emotion by the rate of breathing, then you can see what it does. And then you understand even how we become alcoholic, we become drug addicts. Because that drug, that alcohol, in the dimension of the energy which creates, allows the separation, or amalgamation of the Soul energy with the physicality of the Man, which becomes no need. Now I work in the dimension of the emotion of me, without attachment to what we call, the physicality of the body of the Man.

If, as I always say, you Knowledge Seekers and the world of science, understand the teaching of this morning, it will be so easy for you to take another step towards the dimension of transmutation, living without need for any energy. You change the rate of the breathing, you change the rate of the flow of the energy, from the lymph to what we call, the physicality of the Man, which is the blood of the Man, and then you change the emotion, and then you understand you can separate, change the gap between the Soul and the STP, where the Soul takes over the dimension of the physicality, and now is the magnetic positioning of the field strength of the STM and the planet. You transmuted. Our ancestors used to do this. Many races in the Universe do this. (:38) But, we have to master this knowledge of the emotion with the breathing, which is detached from the dimension of the physical matter of this state. This is why when they call it, hyperventilation, you go dizzy, you get different conditions, you absorb different energies. It's something which we have not been taught. And anybody who start teaching this has been tabooed because now they cannot control you because in dimension of physicality they do.

If the Knowledge Seekers and the conditions we create, especially with the upcoming ONN's (One Nation Network), that we release energies at a certain strength, magnetic field, that with an App, your mobile phone is just a tool to connect us, our central control to you, that you can develop energies, understanding fields of emotion, which I said, many emotions Man doesn't know. Emotion of transmutation is something that you as Knowledge Seekers, we yearn for, humanity yearns for, and we gradually learn it. We learn the emotion of love. We learn that emotion of love changes when you are a child to the mother, to the father, then the teacher and the lover, and then becoming your own child in your own hand. I want to be detached from the Earth, I want to be in the dimension of Space, that was the love of the mother, now you learn another. How come we learn the emotion of love, but we have never learned the emotion of transmutation, detachment? Depends what word you put to it, how you explain it.

And then we understand, Man is getting ready to become, to reach that point. (:40) But this time, every Man on this planet can learn. It's not exclusivity of those who make temples and rob the people, and it's not exclusivity of those who make guns and kill the people. It becomes what we call, independently from everything else Man does, but I decide I want to be on Earth today, and I want to be on the Moon tomorrow, but I still carry the emotion of belonging to Earth, I return back. As I said, what's the pleasure of going to the Moon and still being in a space suit, or be locked in a building that creates the condition of gravity of the Earth that you can survive. You have to bring that structure which created the condition of Earth, pressure, whatever, into the body of the Man, inside the physicality of the Man. Then do you need a Monkey Suit'? Do you need the skin of the Man? Or do you transfer the energy which we call, the energy of the skin of the Man? Or in what we call, our solar system (SS), the land of fire and the boundaries of what we call, our galaxy, our solar system, then we see the same. ?? Answerable, but acceptable, livable.

This, what we call, the skin of the Man, is not the only boundary made for one entity. Our solar system has one. Our, what we call, planet has the same. Anything comes into it, we saw last night, was one of the highest rates for a couple of decades. We have a hundred meteorites a day, an hour, going through the atmosphere of the Earth, you could see it from anywhere in the world. It's like you're walking through a field with a bunch of what we call, needles and whatever thrown at you. If it hits you, you feel the pain. If it hits our Earth, you see the light. There's no difference. (:42) But we feel the pain. What is the emotion of the Earth when all these meteorites hit the Earth? If it is a living being has an effect on it, same as with us. What is the condition of the Creation? There is no difference between every structure of the life, be it an atom, be it an electron, be it a Man, be it a galaxy, be it a Universe.

Now you understand. If the world of science understands the physiology of the Man, you have a whole structure to understand how the Universe works, as long as you work, understand the structure of the fields and not the matter state. Because once the structure of the field reaches in balance with the matter state, you disappear. You become totality of the field. This is the beauty of it. This is why when we burn the body of the Man, we get hardly any, because not much has been transferred into matter state. Most of it, the world of science says 90-80% of our body is water, 90-80% of our body is a dynamic, plasmatic, magnetic field in motion, not just water. Even if we listen to the new science, new technologies which is coming up, even the water itself is made of two liquids which cannot mix. That's why matter state of the water has such a complicated understanding for Man. And it takes different shapes and dimensions in different states of the matter state fields, in pressure and temperature.

It has to be understood. If you are a plasma physicist, if you understand the world of the plasma, (:44) and you understand the work of the Universe, there is a big difference between the temperature and heat. Your temperature can be 1 million, but the heat is 10 degrees. And this is why they don't teach our students in the world of the education of today. In the world of matter, temperature and what we call, heat are related, near

enough. So we always calculate, ok, this has got ?? 100 degrees and it's hot. In the space, in the world of plasma, it can be 1 million meters and still be ice cold. Because it's the motion of magnetic fields. This is how animals live in the depths of the Universe, in our planetary system, in the depths of the oceans, and NASA gives us pictures, -100 degrees, 200 degrees, so many kilometers above the Earth, as we've seen from satellites, or from what we call, other side of this planet, we see life moving like nothing.

This is one of the fundamental points in the World of Creation, that in the matter state, the heat and the temperature are interrelated. Because they are so close to each other, we say, "Oh, when it's hot, it's 100 degrees." But in fact, in the polar plasma, it doesn't exist, such a thing. And then when we see it, we don't understand, it says, "Oh, it's amazing." Because, if you understand the world of the plasma, it depends if you get heated, and depends if your expansion of the fields allow you to feel the temperature. This is one of the biggest questions in the world of astronomy, and we had two, what we call, units, which left this solar system. They went into what we call, out of the solar system, and everybody says, (:46) "Oh, this belt, they're going to be burned." But those scientists who tell you that nobody can cross these things, and it's a lot of rubbish they're talking, nobody has left this planet, is that those people who have not understood the world of science, the World of Creation. The World of Creation works in magnetic fields in the plasma condition. And in the world of the plasma, heat has no relationship to the temperature. They are two different entities, they are two different things, it looks hot and burning, but it depends if you have something which is so small, and then those things which create a heat, those, what we saw last night, those meteorites, what created all these, what we saw, the shining things, did they heat the Earth up? But at the point of their interaction, they had a high temperature.

This is one of the biggest things that Man has to move into. In quantum physics, they call, it, what we came originally as, what we call, plasma physics, is that we have to understand these differences, and our scientists have not understand, and then those who come up with, and explain this, "Oh, they are ridiculous." Because those who ridicule, it shows they never understood. Actually, they are the ignorant, and for them to show their ignorance, somebody else is. It's a typical, what I call, British mentality. "Show me to believe it." No, you understand because you are an idiot. You have never understood. You lack understanding the World of Creation. This is what needs to be changed in the world of science of education of today. Anybody ridicules, this is against the law of physics, this is your physics, because that's the limit you understand. This is how ignorant you are to the full process of the Creation. Not, show me for me to believe you have to prove. No! (:48) You add to your knowledge that you understand what I'm talking about. This is what has brought Man to the position of today, and the education system has to change. That we accept this is what it is, I have to understand it. No, it cannot be unless I say so.

We sat there with the most eminent, eminent academician in the world of science of China. Nobody is above this gentleman in the world of science in China. When it comes to rare Earth material. President Xi of China swears on this gentleman. He sat in front of us. The minute we explained the creation of matter, the only thing he could say for five

minutes to the generals of the Chinese army was "Bukha, Bukha, Bukha". "No, no, this is a lie, this is a lie. I'm an academician, I'm the world's eminent scientist in the world of rare Earth materials." He talks rubbish. What happened? President Xi with his insight and all the knowledge what they had, Chinese military said, he says it cannot be done, (and) he says it can. Take him to the mountains and let him do. We went for one week with the Knowledge Seekers in the mountains with the three generals with the Chinese army. We produced gold. We showed that the matter is unconditioned to the atmospheric condition of this planet.

What happened when we came back? The guy cheated. He destroyed the evidence of production of two materials, which was eminent. He hasn't produced these, but they were blank in the chart. Then we showed that for him to keep his eminence, he had to lie, because he couldn't comprehend the world of science that moved forward. What was the outcome. Keshe Technology does not need an academician to prove it. It works on its own merit. We don't need to prove anything. This is why we placed ourselves in China. Because we don't need to prove anything. (:50) We work on our own limit. We work on our own thing. Because you as Knowledge Seekers have been brought up to understand. Most of you, when you talk to the ordinary people, Keshe Technology is rubbish. No, you don't understand because you've been brought up with the matter state. Your knowledge is good for matter. Your knowledge is good for energy. And then you understand how everything is connected to each other.

How as Knowledge Seekers you have not to just push with your knowledge. What you learned today, that how the Soul is connected to the Spirit of the Man, you explain scientifically. And then what it is, you've done your job, you've understood. But the most important part is how you apply this to yourself, to become Man of Universe. How you understand this, to become what we call, in a position to be transmuted. How you control your emotion, how you control your breathing. How you change direction of the sound to create dimension of Creation. The sound of the Universe, in this corner, where we are, where our solar system is, where our Earth is, where we are, is not the same as the sound in other points of the Universe, because that sound in that part creates specific materials, because it's the resonance transmutation to transfer of energy to matter state, which means that sound in that point of the Universe allows only, for example, Carbon 10 to become matter state, not Carbon 12, which we are used to. If we go there, we cannot exist. We become energy.

Then we understand, even in the teaching of the last week and the week before, what I try to bring you. We have to understand the totality of knowledge as a holistic science, not as what it fit us and we understand. (:52) And this has been the backbone of the teaching of the Keshe Foundation, as you Knowledge Seekers, you become holistic. You understand the matter state, you understand the energy, you understand the connection between the energy and matter, and how sounds plays, what frequency plays, what pulses play. And when you understand all this, you hear the sound of the Creator, the sound of the Creation, because then it's all the same, silent. The world of Mitra, you cannot talk. When you don't talk, you cannot talk bad, you cannot think bad, you cannot do bad. So you end up with one thing, create what is the best of, which is the World of the Creation that our

Creator has created. Then we understand how close we are to our Creator and how far we as human beings have positioned ourselves to be apart, because we are attached to the dimension of physicality, not in the dimension of the Creation.

Then those who understand a little bit of this, play the game of the devil. And what we call, they become the advocates of the crime, so separate the STM from the Soul of the Creator, with all the rubbish we've seen in the text books of the religions. No religious book has ever written, has ever been done, which brings the STM close to the Soul of the Creator. All religions separate the STM from the World of the Creator, to be able to abuse the physicality of the Man. Now you understand, how you as Knowledge Seekers, can become even the teachers of those whom you call, Aliens, and in the time to come, the STM meets in the dimension of the creation of the Creator.

One day, one day mankind will understand the teaching of today, and they understand what has been unraveled in the World of the Creation of the Creator, (:54) not in the dimension of the physicality of the Man. And anyone ever tells you, "This is rubbish," say, "Yes, rubbish, because you don't understand." Even, you know something, a madman always claims everybody else is mad, that he can confirm he is okay. And you are that Man, you can stay that madman as long as you want to be. Add to your knowledge, and then you see what I see. Then you see that even I don't see the whole lot, but I try to understand the totality.

If the mankind understands the connection between the lymph, the blood of the Man, the heart of the Man, and how lymph, when it enters the dimension of physicality, transferring the energy of the Universe into the bloodstream of the Man, then Man will understand how he can transmute using the same system in the reverse composition. What does this mean? It means that we absorb from our skin the energy of the Universe. With our neural system, we convert that in the matter state of the lymph condition, and then when it is absorbed by the lymph, we feed it back into the blood vessels of the Man to the dimension of physicality. Our physicality is saturated with the energies of the Universe, which are absorbed by the skin crossing into our lymph, which then, through two points on top of your shoulders, is fed back into your blood.

So, now you understand how you can convert that, and through the blood, in a way, with a lower field strength, and a higher neural system, create the body of the Man. Does the Man need that to be in the dimension of physicality? Or would be able, the point comes that we can transfer the energy of the physicality to energy of life, without condition of the Place, Time, Position and Possession? (:56) Now you understand how close you are and how your Spirit is connected to your Soul, because the STM attracts the fields of the Universe, feeds it through your skin, to your lymph. Lymph joins the physicality of the Man through the blood circulation, and then it becomes part of you.

The question is, can you change the strength of the field of your Soul, or absorption of the fields, that "Thy shall not kill", that you can absorb the energies which joins into your blood vessels, through the lymph, through the upper part of the body of the Man to feed the Man. Then do you need the digestion system? Do you need to kill to live? But you

learn to absorb the energy and feed the physicality with it. Then the STM exists, the Spirit of the Man exists, and Man does not need to kill.

I have unraveled the secret of the Creation from the Creator to you as a human being. I hope you understand. And then I hope Mankind will move into dimension to understand how he can exist across the Universe without killing, without destroying, but become a source to absorb what the Universe does not need, to generate it into a flower of the STM, to become the essence of the creation in your Universe, to become the seed of light, to become the seed of a star. We are Messengers, and we are the Teachers, and we teach the truth about the life cycle in the Universe, and not what those who want to cheat Man, to get involved in it. As Mohammed said, << speak Arabic language.>> This is the beginning, and this is the end. It's for Man to understand. We go for a break, we come back to answering your questions. Rick, can you take us for a break, please? (:58)

>> **BREAK** >> 655 KSW August 13th ... (1:03).

R: ... And as expected, we will have a second part here with questions. But before we begin the questions, Mr. Keshe will have some answers. So please go ahead Mr. Keshe.

K- What would like me to answer?

R: Well, you usually have some answers to the questions that we didn't even know we had, first, then we have our questions that are, that are more our regular questions. So, you usually have something to say before we begin. (1:04)

K- There is not much to be said this time. The ONN's are getting their position across the planet. Hopefully by the end of this, what we call, month, all the ones which we were expecting, some nearly 30 will be positioned across the world, some 10-12 of them, 13 of them now are already in position. And we'll complete, it's just a matter of ?? host-age (?? hosting) to get into. And one by one, those of you who receive the system, you have connected to the system for us. And we thank you very much. And hopefully, once we see all the problems are sorted, as much as we could at this phase, then the first 100 in September, October will be released. That the next cycle of you Knowledge Seekers will receive. Again, we try to spread as much as we can across the planet, that we can support the distribution of the Keshe Coin (KC), and entering the next phase by October. That all of you, or most of you, can access to be able to work, exchange Keshe Coin within the structure of the Keshe Foundation.

One thing which has to be said, many of you are sending us your ?? codes (QR code), what we need, we will send a questionnaire to all, or system to all of you in the next few days, once everything is set up. First of all, you need to have the registration with the Keshe Foundation Association at. Then you have to have the registration with the, what we call, the Game. And through there to be connected to the Keshe Coin. Then, the only way you receive your Coin is that you just send me, this is my tax number. (1:06) Who do you pay this to? Your tax number is relevant to us. Which country, which tax office, which government, that we can target it directly to that position. Many of you have sent me a tax, this is my tax number. It's number 34 in China. No street address, no city address. How do I find number 34? There's millions of them. And this is what you're doing.

We try to bring you to understand. We need every detail, which government, which tax office, that when we send to the government, this is 100 Coins for this person who has joined the Keshe Foundation, then we can allocate, we can transfer. The other point is, you only registered yourselves. What happened to your children? Or is it just you, you are ashamed to say, "I've done this", or you get your wife to be done? Try to cross that line. Ask people to register themselves, and bring them in to do. Register your children, this is the asset you invest for them. And this is the step by step we try to do, hopefully by the end of September, that we just don't look for "me". It has to be us. And even the wife says to you, "You know, you're stupid, you've joined the Keshe Foundation, it's all lies." Can you ignore 30,000 for this year? Just do it, maybe next year you have... No women has ever refused money, even the men. The same as you. Lock yourself to it because you become eligible from the day you sign, not for the year you sign. So, if you miss a month, you already missed, you missed this one. If you go six months, you missed 15 Coins and the rest of it. Now we have to understand how it is, that when it comes into operation, from the day you join, what is left for that year is allocated to you. (1:08)

The other point which has to be understood by Knowledge Seekers, be prepared for a huge change in the structure of the Keshe Foundation, in how you interact with us, when the whole structure of the website, the shops, and the products suddenly hits you in the next few months. How you do, how you react, how you interact with buying and selling your goods, if you are a marketer or you've got a factory, you can sell your goods, ?? it doesn't have to be the Keshe Foundation, because you join us, you want to expand your goods to be sold within the structure of the Keshe Foundation, because you registered your company into it. Then we allow it to accept Keshe Coins, and then you can trade into it with yourself and with the others, and create that condition of what we call, working capitals for the others to learn ?? about (?? benefit) it.

We have entered in what we call, the interaction with the governments, interaction with public. So, in the next couple of months, when everything is done with the team of the, what we call, backing us up with the Coins and the structure of the Games, we try to bring that change. And in a way, as a politician told me very recently, Mr. Keshe, I understood, and understand one thing, you have a snooker in the world of politics, you have a snookered the banking system, and nobody realizes this, now that you put it in, nobody needs to answer to no government, nobody needs to fight for no government,

nobody needs to go out to destroy for no government, and it all becomes to build, build a future. According to this politician, I want to be out of the world of politics, because there is no more politics left. The way you have planned, and you are executing, the whole structure of the Keshe Coin, Keshe Foundation, (1:10) the One World, One Peace, and it will bring a lot of changes.

Now, we've done the work. The team of the Keshe Foundation is working in the background to bring that condition. Now you are the soldiers to take it to the ground. And you are the soldiers that we gave you the same condition, as everybody else, as I explained to our Knowledge Seekers, in the, working in the Space Center, something very simple. We'll get the people to ask for the Coin. By the way, it's their own weakness of work. What it means, very soon, in the next few, couple of months or so, Keshe Foundation will launch heavily in China. That every Chinese will like to be part of the Game. We have a plan, we are executing within the laws of China, but the interesting is that, we work inside the system for the change, for the rest. China will lead the Keshe Foundation, the whole of the planet, into a new dimension and process.

In the next 2-3 weeks, the Keshe Foundation will start working on one of what we call, human brain size chips. Which means up to now you have processing, now we create a dimension with a Chip with emotion. This process will start very soon. And then we will market this, because effects in a way is not the AI, compared to what we are doing. AI is already obsolete. Originally, I built this one, this part of the system, I wanted to introduce, but it was too early, when we were in Barletta. The first brain chip was made, and it was made by Knowledge Seekers, I just ?? taught the way. Now, we bring this in a size, enough to fit into your mobile phone, fit enough to fit into what we call, even the body structure, (1:12) that it can be fed, it can be changed, it can bring every changes for you as communication, the feeding and the rest of it.

So, be ready to see the first actual human structure body chips, in the very near future. We need this, it has to be completed. And we are asking if you are into Chip manufacturing, not selling Chips, but you understand the process of Chip manufacturing, controlling of the systems, magnetic field control, we ask you to join us to complete this process in the next few weeks. Because we cannot create the spaceship systems without what we call, human Chips. Without Chips, which has emotion, without the Chips understand what is right and wrong, and without a Chip which is made by us for our technology. Is there any questions? I will try to answer and we will see where we go.

Q: ... My question to do with the Soul and the nervous system of the body. So the Soul, my understanding, works through our nervous system in the body? Is that correct?

K- In a way, it uses our nervous system to transfer the energies. The emotion of the Universal Energies (UE), yes.

Q: I was reading some spiritual texts and they talked about a gaseous, which hasn't, (1:14) science today hasn't detected this gaseous element that works through the nervous system. But my understanding is that if you take, you know, like coffee, alcohol, this

affects the nervous system and then affects the effectiveness of the Soul to work through the body. Does that make sense?

K- You see the neural system works on what I call, magnetic fields of the energy system. The blood works on the magnetic field of the matter system, if you understand the difference between the two. So, in that level, so in that level, the neural systems when we have, that's why we feel everything so fast, it doesn't need the matter state of the nerve to connect. It needs the magnetic field of the nerve to connect. And when we get a cut, when our nerve gets cut and then we cannot reconnect it, it's nothing to do with the magnetic field connection. It's to do with the resistance that the nerve creates for not receiving that. What happens at the point of the cut of the nerve, the orientation of the cell changes. It becomes like a Black Hole. It becomes ?? grapheme. But, if you take that barrier off, there is no reason for you not to feel anything. (1:16) And if you can bypass this, we can reconnect the nerves, or reconnect the current flow of the nerves.

We know this fully, we understand this fully, because we replicated it, we are 100% correct. And, in that process, when you cut a blood vessel, you can always connect the blood vessels and it will start working. You can connect lymph's, but you cannot connect sometimes the nerves of the lymph's, the sensation. And this is the reason. And if you understand this, then do you call, it a gaseous, do you call, it a magnetic field, do you call, it a chemical effect? But at the end of it, it comes to this work. I explained this once to one of the military people and they understood fully. We can build a system that no radar can detect, not by creation of magnetic field, but by rotation of the fields, the orientation of it. And this is what happens, our neural system has this capability, and it shows exactly that our life is magnetic field connections, and not matter or gaseous or anything else connected. People understand, don't understand this connection of magnetic field, they call, it a gas, but it's the field. We see this in the connection of nerves, we see this in the building of the brain cells. And some years ago we put this to test to confirm it. (1:18)

Q: So does gas itself have a gravitational magnetic field?

K- Of course it has, but when you don't understand it you call, it a gas, but when you understand it, it's a magnetic field. If you understand, this is the limitation of the Man when he doesn't have the knowledge, so he has to go to the limit of his knowledge, which is a gas nobody can see. But now as Knowledge Seekers we understand more, we understand there is a connection of the field.

Q: Yeah, I suppose that in time as we learn more, we understand that what you're saying is gravitational magnetic (GM) fields and this is what we're dealing with. And I think that in time, with your teachings of course, we begin to understand it more and more. We are waking up.

K- We are not waking up, we are actually in it, but we don't understand it. We are totally in it, we are fully in it, we understand it fully. But for those who are what we call, ??

setup to milk us, for the money, as I call, it, they play that game. And this game has been played very well, and Man have been abused ?? very well ?? with it.

Q: Mr. Keshe, I did have a bit of trouble, you said, with the, you know, becoming a member and stuff like that, step one, step two, step three, I only got to step one and then step two. (1:20)

K- You have to just bear with us, there's a lot of things getting ironed out. We realize there's a, that's why I said we put the ONN's out early and the registration. We are learning a lot of things needs to be redone, connected, and new sections has to be made up. And that's why you are there. Hopefully within the next month or so when all the things are sorted, then you can smooth sail through A to Z in one go. It's not your problem, it's our problem, but you're telling us where the problem is, and it's our job to find out how to smooth it out. Some part of the equation is very complicated, even for me.

Q: Yeah, yeah, I tried to log on to Markray Corporation, the Markray website, and it wouldn't allow me, so I thought, "Oh, maybe there's a problem there too."

K- A lot of things are getting redone, a lot of things are getting sorted, we have to do a lot of work, and it's not going to be easy in the next few, two or three months, then suddenly this thing has given birth in totality with everything else. Then, what we call, the creation of what we call, the Space City, which is spreading across China, is another challenge for us. And we try to take you within the structure of the Keshe Foundation. When it's set up that we don't give, we don't feed our, what we call, the enemies, what they stopped us, ?? up to now. And once we...

Q: Is there other countries open to, like China, that are willing to take this technology on board or is it just China ...

K- There are, but the thing is, Keshe Foundation has to consolidate. (1:22) As you noticed, we are operating in Africa, we are operating in Mexico, in America, in Europe and everything else. Everything is getting shut down, all concentrated directly into China. And then China, because there is a lot of things to do with China, anything... Knowledge Seekers have to understand, we wanted to make Gans's, we needed to set up a factory, to start Gans factories. Whenever we started looking for quantity, it was China. When we wanted to do something else, we wanted the raw material, it was China. So, it happened to us in Sierra Leone. I was in the university and we wanted copper to make even the CO2. In every country which exports copper, we have to go into the market and see if we can find copper. You understand?

The reason I chose China was for this reason that it is the center of resources. Our team wants anything is there, we don't need to go to America, we don't need to go to European countries, we just look within China, everything is there. And now we set China as the center of operation, and from China we go out. Put it this way, how many millions we spend in the United States, how many millions we spend, we lost in Mexico. How much

money we lost in Ghana, how much money we lost in other countries. This time is all concentrated, everything is on top, management is on top, we observe and monitor everything, and we seen how it's turning. It will take usually a year for a company to actually kick off, to start. And we are coming to our one year, (1:24) the number of researchers, the number of technologies are getting completed, we need another 3 months, 4 months, and then the system by ?? January should start becoming self-sufficient through the combination of the Chinese structure.

You got to understand, if you want to sell a, let's say, a bottle of water in America, you see the problem. A number of people will use, and everything else. In China we have 1.4 billion. We want to test this, test it. You understand? This is why we chose China, we concentrate in China. It's not without a problem. So, we are there to solve the problem. But it's not that we took everything to China, because China, at this moment in time, is the center of everything we need to bring a rapid expansion. And we have the population to raise to their operation the funds needed for further research development. And then we go to what we call, Markray, and the same team which is running Chinese operation moves to run Markray. It's all been preset. So we carry on the same thing.

Q: Thank you Mr. Keshe, thank you very much.

K- You're welcome.

Q: ... Part of my question regarding the COIN (counter-insurgency) conundrum was left unaddressed, or perhaps went unread, last week. (1:26) I had also cited the COIN conundrum in reference to Sunni Arab countries whose leaders lack significant legitimacy regarding their peoples' social demands. Following up on this point, I ask: isn't the new "Sunni NATO" essentially a response by these leaders to potential insurgents, specifically in light of the backing those insurgents might receive from Iranian military might, which has compromised these nations' border security and, consequently, the stability needed for their socio-economic development?

K- Well, we have an insurgency called EU, Christians, there is no problem with it? We see them financing Ukraine, we see them financing the wars in Middle East and Africa. Now you call, it 'Sunni insurgents,' what about the 'Catholic insurgents'? As ex-president of what you call, the French government said, "EU is a Catholic club". How much murders have been done by the Catholic insurgency? Let them try Sunni, maybe we find peace. This is the way you are brainwashed. How many terrorist activities have done in Ukraine? How many people have died in the past week by the European insurgency of feeding, and loading, and arming Ukraine? But with ?? the other hand ?? a Christian country, they haven't touched Muslims or anybody else, called Russia. In your own pocket you find out there is more to blame. This is the way they make you to look, the Sunnis or Shias. (1:28) No one has done more murder in the insurgency of Catholic in the name of EU. Italy, France, Germany, United Kingdom, Holland, all gathered together to lay an attack on a school killing 186 girls in a classroom below age of 12 or 14. That's the insurgency. ?? Ruthless of the Catholic insurgency. Talk about Sunnis, they haven't

done anything. You brain, your washed, or you brainwash yourself, the truth sits somewhere else.

Any other questions?

Q: ... Could the oxygen found on Earth represent a local manifestation of a deeper isotopic or subatomic characteristic that also exists, in a different form, in matter throughout other celestial environments? Could there be a fundamental common denominator, perhaps related to isotopic or subatomic structure, connecting oxygen on Earth with matter in environments where molecular oxygen is absent? And if such a common denominator existed, could it have any relationship with the phenomenon we interpret as gravity?

K- In the world of Man and in the matter state world of Man, you have electrons, protons, and then how many electrons and how many protons and how many neutrons, gives you the atom and if the balance in the center changes but the electrons are the same, you call it, isotopes. In the world of energy and the plasma, which what we call, the World of Creation, you can categorize bandwidths. In a way, this is how I do it, how it's done more or less Universally. (1:30) You go for example from 1 to 2 Tesla is magnetic field that much, 1 to 2 Tesla gravitational field is that much, this is the spectrum of field, so we call it, group 1. When anything falls in that group 1, which could be hundreds of millions of different fields of strength of the gravitational magnetical, it becomes isotopes of that group.

So, when you have Hydrogen, we say, ok, Hydrogen falls within group 1. In matter state, you have maybe 4 isotopes, 6 isotopes of it, or 10 isotopes of it. In the energy level, you have millions of isotopes of it. Because you measure by the number of the protons, or electrons, plus additional neutrons, we measure by standard, what we call, field strength of the gravity, in respect to the magnetical. So we make a new chart. Then you can see a combination between 1 and 2 is not 1.1. It's 1.111111, 1.22222, and then 1.2221, 1.222. Then you see the spectrum of the energy within the field. We call it, group 1 and then group 2. And we find out this, what we call, a scale of measurement, will become a standard when Keshe Foundation works. It is well designed, but it is planned. Because then we would like to reach gravitational magnetical field of the Earth, but at a magnetical field 10,000 km away from the Earth. (1:32) We create the gravitational field of the Earth, but magnetically we position it. Now I want to come 100 kilometers. We keep the gravity, but we change the field strength. Now I want to move from the Earth to the middle of the space between Earth and the Moon. I keep magnetical, but I change the gravitational, but I'm still in that spectrum of the one.

And this is what in the future we travel. We measure one, for example, center of a galaxy, the magnetic field is a hundred. But, we go, we want to go to the center of the Universe, is a thousand. But, we change the gravity to move from Earth to the center of the galaxy, or we change it and we don't want to go to the center of the galaxy, we want to go to the center of the Universe. We keep the position of magnetic field of, we change. This is how we create braking system in transportation when we transport huge spaceships. You see a

spaceship 6, 10, 100, 1,000 kilometers diameter. There is no factory of people sitting there making it. It is done by positioning of the fields. It's in the patent, it's already in patent, how to make walls and structures from using the fields.

Then you understand we work with the same isotope, which is a gravitational base, or we work on an isotope magnetically based. And then you have a full spectrum. It's not the isotopes the way you talk about. It's a bandwidth field strength in magnetic fields. And then we introduce what is known as a plasma measurement, which is unknown to the world of present knowledge, because that band ?? strength field of the plasma, it's different for a matter state condition like the STM. The STM does not work on the sides of the Universe, (1:34) but as it progresses to become part of the Universe, it gives and takes and releases energies which is inside its capsulated. This is how your Soul finds its position in the Universe and becomes the mother of a star, the center of a star. This is a teaching far beyond Man's understanding.

So, when you speak about the Hydrogen isotopes, you speak in the matter state, you have a few isotopes, we speak about energy within the bracket of the Hydrogen, which is how much is the energy of an electron and a proton, the distance, what is the maximum distance before the electron releases itself from the proton, that each one becomes separate plasma, what we call, the spectrum is destroyed, so we say, from the closest to the furthest, how much field they give and take, this is the spectrum of the Hydrogen, and then we add energies to it, magnetically gravitationally, till the two cannot be, that's how your Soul and the Spirit separates. Then, this, what you call, the Spirit of the Man changes position to be the center by the Soul and the separation of the body. It's the same as the spectrum of the release of the Soul from this planet. It's very well defined. One day I'll release this knowledge. You can see what energy is there, and you can see what's the position of the death of a Man. And if you can create the fields, sustain the connection, you can live for thousands of years. It's a lot to do. The teaching will not finish. It's a lot for you to do.

Any other questions?

.. (reception problems)

Q: ... (1:36) Thank you, Rick. Good morning, Mr. Keshe. Good morning, Rick. Good morning, Knowledge Seekers. My question is with regards to the nervous system for what I picked up over the last couple of weeks of what I was able to ?? attend anyway. The nervous system being a pivotal point between matter state physicality... ??

K- Can you, can you, hello, can you hold on a second, I have a problem with reception, let me change my servers. Okay..

R: Okay, go ahead ... Are you okay there now Mr. Keshe?

K- ... Yeah, I cannot change server, something's wrong with my system. Okay, carry on, I just hear in bits and pieces. Carry on.

Q: ... So the nervous system being, from what I've understood, the nervous system being a pivotal point between matter state physical manifestation of existence of a Soul within that magnetosphere and the plasmatic existence, everything else. (1:38) The nervous system is a pivotal point between the existence in matter state blue planet Earth and everything else. Is that correct?

K- Depends what you want to pinpoint it or pivot it to.

Q: What it's going in the direction of is when transmutation of the physicality from one country to another happens through interaction of Universal Central Energy, what's happening to the matter state in the nervous system when their transmutation occurs?

K- Not much, it's just that the energy, the energy bandwidth changes and how we interact with the Inertia and the gravitational field point of the Earth. In a way, if you look at it, when you have an oscillator and you change slightly to move up and down, the Inertia is that adjustment in oscillation between the STM and the what we call, the Spirit and STP of the Man, which affects the neural system. The way our neural system works on and operates on them. And this is what we need to understand.

Q: That oscillation, how does that link to the Universal heartbeat? Is it, can you, what's the word? Is there a ratio to them, linking them? Between the oscillation and Universal ?? harping or even matter state ?? harping? (1:40) All three of them would be connected, would they not?

<< Mr. Keshe loses his connection.>>

K- ... (1:42) Sorry about that, I had to move servers. Can you repeat the question, please?

Q: ... So, the oscillation that you spoke about, could you go over that one more time please?

K- What do you mean? Which part of it you don't understand?

Q: The oscillation between the STM and, I don't know, my question was with regards to the nervous system. What happens to the matter state nervous system when transmutation of the physicality from one country to the other? What happens to the nervous system then?

K- Nothing, nothing. It's just...

Q: No, but you said something about oscillation. What was that though? The frequency of that oscillation, is that, does it have a direct correlation to universal ?? harping ?

K- Yeah, you see, (1:44) our emotion is Inertia connected as part of it. Earth's gravitational magnetic field from its center doesn't change much, in the proximity of where we are in respect to the center of the Earth's gravitational magnetic field. But the Inertia has a very direct effect on our neural system and our emotion. And partially, it's part of it, not all of it, is that if you move from the, let's say, a thousand meter above sea level, you call, it, in Asia, you don't have the same emotional behavior, oscillation, as you have 1000 meters (lower) in South America. The reason is that the composition of the Inertia of the material you walk on, the environment which creates the material you live in, within, is different. It is part of that range of spectrum of the fields of...in Asia creates, let's say, very romantic. In South America brings very aggressive. And this is how it interacts with your Soul, how it interacts with your neural system, and how we live within that ?? oscillation of the fields of the Inertia and our neural system. And if you bring somebody who lives, for example, in 1000 meters in Asia to South America, oh, he's God, because he's so calm, he's so lovable, but everybody is there, aggression. (1:46) And then when we bring the same people there, we say, "Oh look, they are outsiders, they don't behave like us." It's a very typical English-European language, because we are the best and everybody has to behave like us, otherwise everybody is out. But the Europeans kill more than anybody else, because they are very gentle in killing. And this is the process.

So, the oscillation of the Inertia is more important on the behavior of the Man than actually anything else in how we feel. And then you have the food additive, because the food we eat has its own Inertia effects, and the air breath, it brings a different direction, oscillation. It's very much composite, and that is what affects your neural system.

You, this is something I've been studying for a long time. If you get people who live in a bungalow, in a ground level building, in the same city, more or less in the same environment, they have a different behavior with people who live on the 10th floor, 15th floor, or 20th floor, within a concrete. And even, what is interesting, there are studies going on, how people, for example, on the 20th floor, all behave in a city, than the people who live on the 10th floor. It's... there are some studies going on, and we see it because it's how far you are and how many concrete levels are separating you from the ?? Inertia of the planet. Or, you're constant with the Inertia of the concrete you walk on.

One of the worst things you can have in the house is this fantastic, most advanced under floor (radiant) heating. (1:48) I'll tell you why. You find people with under floor heating with more neural instability than the people who live with the radiators, in the winter time. Nobody has ever studied what's the effect of the under floor heating, and those who have the radiators, but we see a lot of it. People with under floor heating in their housing are more unstable during the winter. Never rely on them, because there is a continuous flow of liquid in the place, which continuously changes the environment of the Inertia. You see this in the houses which have the river goes under. We've got brooks under the houses. We have river channels going under the houses. They are the most unstable condition, especially for men. You compare men in the houses with the underground heating, underground heating, and the men who live in the house with the radiators in the wall. That's how much the Inertia, dynamic Inertia, affects us.

This is why if you go back on the teaching from times ago, I said if you have a, if you live especially on a hill, if you live on a hillside, make sure you have Infinity Loop Nano coated, or a copper under your bed, under your carpet around the house. Because for sure, waters on top of the hill are running down the hill to bring those springs and the waters which later on becomes your underground reservoirs. (1:50) If that flow of the water underneath of the house creates mayhem with the men, then imagine what does the under floor heating does to men and women. If it's hard for you to understand, you get a woman to sit on the cold floor. What's their reaction? Immediately they have to go to the toilet. You get most of the men to do the dish washing with the cold water. What is the most frequent reaction? "I have to go to the toilet." We don't connect it to it, but it's actually what it does. It creates a flow which affects the man in a different way.

So, take back into the world of Inertia, you have a dynamic Inertia, you have unstable behavior, interacts with the neural system, interacts with the emotion, then you have to show it. You have stable people, till you put them in the apartments with under floor heating, and instability. There is a study, it's long term studies, the divorce rates and the problems in the society of the people who live in the high-rise flats where there is so much criminality. It's instability with the ?? boys. Why did the crime increase when we put everybody in these high-rise flats? And why is the crime always with the men? Men do most of the crime. Because of the instability. We get on the ground, (under) floor heating, we make it worse. You are lucky you are not living in the 19th century. If you were in England and you lived in the 19th century, it would have been worse. They had different rules, you know. There is a rule, a funny rule, now still applies, it's still a part of the law. Even part of the United States carries this law in their structure, is that you are not allowed to beat your wife between 10 o'clock at night and 7 o'clock in the morning. (1:52) It's in the law, it's in the Constitution of the United Kingdom. And it's again in some countries. Why? Because neighbors could not sleep because their husbands are beating their wives up. It's a law, you cannot beat your wife between 10 o'clock at night and 7 o'clock in the morning. The rest of the day you are free to do what you like. 19th century rule. Why did they bring this? Because it bothered the other. It's the same with the water. It affects us. Emotions, sounds, dimension of the Inertia, affects our neural system. But we make different understanding of it and we react different to it. Inertia affects, nothing affects the emotion of the Man than Inertia on this planet.

Q: ... Why does it affect male more than it does female when Inertia is changed, especially ?? ... ?

K- Oh, different things, different things. You see, the Inertia comes with the smell. Smell is a kind of Inertia. Inertia comes with what we call, change of hormone. Hormones are Inertia based material, totally. Our heart creates more Inertia than anything else, composite Inertia. The position of the height and the figure of a woman affects the Inertia of the emotion. There's a lot of things, it's not just something you can say what makes the difference between a Man and a woman. (1:54) It's just, if you look at it from everything from an energy point of view, you understand why. The world of science has made a lot of lies and a lot of simplifying the reality to fit in that they can sell their knowledge.

What is a hormone? If you look in vitamins, vitamin D is a hormone, it's not a vitamin. Why have we accepted it? Because if you accept vitamin D, which is a ?? vitamin K, that's why you always take D with K2. K is more or less a matter state energy, when it attaches itself with a hormone, which is D. Vitamin D is not a vitamin, never been, how they got it into vitamin direction. But it's a hormone, so it creates a specific energy dimension. It brings certain behavior, because hormones are energy pack, affect the neural system directly. Where vitamins are part of mineral side, they are connected to the Soul, the Spirit. When you listen to the hormones, when you listen to the vitamins, vitamins all affect the physicality, hormones affect the Soul. Estrogen and the rest of it. Why does it do that? You create a child because you create the environmental energy for it. Our sciences have been taught the wrong way to us, and we accept it because some, what I call, idiot in the middle had to get a name for himself.

If you divide everything into energy and a matter state, what carries matter state affects emotion. (1:56) Because it's Inertia connected to the neural system. What is the energy side, comes through the neural system, which is the hormones. And then you put together, you see what you get. Dimension of physicality, aggression, love, cuddle, whatever. And women are receptive to a deeper, stronger field. Men are affected by the softer fields, which everybody thinks is the opposite way. Then, the softness in that emotion has to have a counterbalance, which brings the Man to look strong, because inside they are putty. And then women look soft inside, but they are harshest. If you look back history of the Man, biggest murders done by women than men. Men are nail cutting of women, what they've done in the world of the wars and whatever. But, it's the same. We compromise one into the other. And, it's the energy, and it's all Inertia. And then, comes into what you eat, and what Inertia you produce, which affects your neural system through the energy balance of it. You look at it, how they feed you Zinc. What does Zinc do? It's a mineral, but the counterbalance of the energy, it brings relaxation of nerves, it makes you calm. Which is an energy matter, it's not a physical, it doesn't make you strong, it doesn't make your body build up. Whatever you put in, in Inertia, you get a counterbalance in energy as emotion, or what you call, manifestation of the ?? hormones. (1:58)

Q: ... So we bring cancer to our body because of our emotions. Why do we do it? 36 years old and leave a beautiful family behind. Why are emotions strong enough for us to heal and stay with this family? Thanks.

K- First of all, when you get the cancers, you have to understand immediately, is it the cancer of emotion, is it the cancer of psychosomatic, is it the cancer of evolution? When you hear young people cannot be cured, it's a cycle of... most of it is evolutionary cancer. The psychosomatic cancers, which comes in the 50's and 60's and 70's, is mainly emotional. Early cancers has a combination of the evolution and psychosomatic. And up to today, there is no cure. I always say, a lot of people come to us and say, "I have a cancer." We have to understand, if it's an evolutionary cancer, if it's a psychosomatic cancer, or is it an accidental cancer. A lot of, a lot of young generation cancers is accidental cancer. Look, when did they get hit? We play sports, we do stupid things,

nowadays when we are young, and so you damage the skin, can be damaged, but internal damage can never be done. Look at cancers nowadays, it's not just, (2:00) ok, that's why we see some people die young, some people come suddenly up with different cancers.

We've seen it, the effect of it is so, even you look at the ALS, ALS is psychosomatic and appears within 5 years, 7 years. You get hit, we play intense games, we do stupid things for sports to be 'macho,' and we forget about the injuries. Go look what got hit ten years ago, and then look at, I want to be a sportsman, but my family has all been timid, hiding in the caves, so I want to go through the evolution, my body doesn't accept it, it creates its own cancer. If the world of science, when somebody comes in with a cancer, sit down and analyze it, spend one hour with them, go back deep, nothing, what I'm going to give you chemotherapy, you have this, then they can analyze. Is it the evolutionary, if it's a psychosomatic, if it's an accident, and where you can do it, and how we can change it, it will be changed. I presume with the AI coming up, somebody sits up, come up with a structure, very easily, within a few minutes, then the doctor knows how to handle it and what's the reason. Accidental cancers need a different way of treating. And it can be very rapid, or you can change the environment. The psychosomatic cancers are different. Then you have to find the frequency of the psychology behind it, which is done. And then the, what we call, genetic, where it goes with our, what we call, history of life. Evolution, that's the hardest to do. 20% of the cancers cannot be cured. Cannot be found a solution, because it's mainly ?? evolution. It's taken thousands of years to be here. It's not just yesterday, that the cancer shows today. (2:02)

We see specific cancers with a specific food. As I said before, Inertia of the material. We see, we don't see it outside. Certain cancers come from the environment where we live. In Iran, we have a specific cancer, and it's very rare to the rest of the world. It's known as part of the stomach cancer, but, ok, you have a stomach cancer, but what kind it is? In Iran, we are very connected to what we call, walnut. And walnut as a food is part of the national diet. We make all sorts of things for it, it's not just like a fruit, we make dishes with it. The problem is that the walnut picked up in the autumn, stays in its ?? (storage) sacks, some of it gets fungus on it, you see this, what you call, like a spider web on it, they clean it and that's it, it's gone, but it hasn't gone. That, that old spider web on there, walnut will create a specific cancer, and that specific cancer affects, because of the ?? diet of the ingredients, only the stomach of the Iranians. Food cancer connected to one nation, to one specific food, specific fruit. In Iran, I hear you die from stomach cancer, or intestine cancer, different reason in Europe. But in Iran, 90% of the stomach cancer connects to one food, one item, which is a walnut. ?? But we all die of stomach cancer. (2:04)

We have to analyze, we have to become knowledgeable in what is, but doctors nowadays don't have time, they just have to satisfy their pharmaceutical. In our research, in the Space City, this week we are facing a very detailed research in agriculture. And I put them into 'tenders' to find out, but they don't know how they have this problem. They are giving me all the ?? rings, everything, what went wrong, because of the weather, the season, in the whole area and the rest of it. And I keep on saying, "Explain more." And I even give them a hint, but they don't see it, that we specifically created this condition, or

specifically to explore part of the science, and there is no knowledge in the science of the Man today. One day I explain. Creation of condition of the environment. And seeing how the environment uses it to its own way to create condition of manipulation as a cancer. It is one of the current researches in one of the Space City programs.

Any other questions?

Q: ... Mr. Keshe, if a government does not sign the Peace Treaty, can it donate the Keshe Coins to another nation or to the Keshe Foundation? (2:06)

K- No, we keep it in national reserve till the government changes. We have this, we already made the decision, we can't change your national assets or establish an asset.

R: So, the government can't participate in the Keshe Coin program at all, unless they sign the Peace Treaty?

K- Yes, and then we keep, if you are a national of that country, which your nation does not commit itself to peace, we'll keep it in your national reserve, belongs to your nation, but it says in our reserve, it's your national sovereign assets. We are not robbing your bank. One day they will and the assets will be transferred. We offer the money to your government, you ?? as Knowledge Seekers, if they don't take it, they don't respond, it goes into your national sovereign asset ?? It's your nation's. If they don't join in another 50 years, you can imagine how much money they will say, "Oh look how much money we have, we better change our policy because we have a lot of money."

R: The pressure will increase every year.

K- Greed. ... With this Keshe Coin, I have looked at every way to cover as much as possible. Yeah, we don't touch your national assets, we don't touch your ?? sovereign assets. It's the same as your reserve gold. You see what happened the past couple of weeks. Japan is the strongest buyer of American promissory notes, over 1 trillion. (2:08) It's the biggest holder of American assets. And, Yen has gone into a nose dive. If you check how much is the Yen today, two weeks ago, Yen, they knew it was going to take a dive on Friday afternoon. They didn't sell the assets of the nation, they got the Americans to buy Japanese Yen, 50 billion, to support it out. But they will not sell the national asset. Americans held to the Yen, but in American dollar convert, but the Japanese kept the, out of the fear of literally destroying dollars, Americans bought 50 billion (Yen) Japanese money. It's a national asset, you don't change, you don't touch it. I'm not going to rob your Central Bank.

Q: ... Hello Mr. Keshe, thanks so much for your amazing teaching. My question is, is it possible to develop a device that can track in real time where a person's Soul travels in the Universe and what it does while they are asleep.

K- Yes and no. You don't have the tools beyond this atmosphere and even on this planet, you don't have a right tool to track anything. But, on the other hand, yes, it can be done.

And, there are more and more technologies to trace where the Soul goes on this planet. It's becoming more and more common. At the moment, it's in the hand of scientists, research section. (2:10) But, yes, it can be done. It's not something which is, in the future, already is done. Russian scientists are very advanced in this.

Q: ... Professor Keshe, according to the conventional model, the gravitational field becomes zero at the exact center of the Earth because the gravitational contributions from all directions cancel vectorially...

K- Who says that? What a nonsense. ...

Q: While the gravitational potential remains non-zero. Do you consider this explanation physically complete, or could the apparent cancellation of the gravitational field at the center indicate that our conventional understanding of gravity is incomplete?

K- Stand in the traffic light, look the way the cars come, and look on the other way where the cars go. Do the cars disappear when they are right in front of you? Simple answer I can give you. This is the people who don't understand the World of Creation. Gravity is in, is what I call, it's like a ball, circular ball, it's like a donut. Everything comes in it, and it goes out of it, it depends the point of observer. If you tell me it's zero at the center, and you haven't understood it's a continuous of the same, the center happened to be there, Put yourself, you are at the center, at a traffic light, and look at the cars coming and going. (2:12) A car is coming from the left, you see it, and then disappears to the right. Is it zero in front of you, no car exists in front of you? Or do they just jump, and you don't see it? It's the same. This is a nonsense of scientists who never understood magnetic fields. There is no center of ?? zero.

R: So, they're saying a cancellation would be like two cars going in opposite directions right in front of you and crashing into each other right in front of you, and that would be, you know, zero. But they're actually continuing in opposite directions and dynamic, it's a dynamic situation not a stationary cancellation.

K- ?? there is always a gap. When you have, when you are standing at a traffic light, with some cars going, passing north to south, and some going south to north, do they crash into each other? Is that point in the middle doesn't exist? There is a space gap between the magnetic fields. There is no way they can crash. Only crash in the matter state and the minds which can only understand that kind of thing. You as Knowledge Seekers should have passed this point. Nonsense of science only stays in the brain of the Man who is actually nonsense in the science. It does not exist. Such a thing doesn't exist. And should never be asked by Knowledge Seekers at this stage. Because we discussed this in detail. If you tell me, they crash, you put.

There is a beautiful situation in Austria. They tell you on Sundays, don't go out. I didn't know, I just learnt it so very recently, but I heard it before, but I now understand. And what happened, one last week, (2:14) because I got stuck in the traffic jam because of it. They call, it 'Sunday Ghost Riders.' The people go into the motorway in the wrong

direction. You know, you come out the motorway, say, north to south, and then you go out at the junction. They come into the motorway in that junction, the opposite, for a head-on collision to die. They call them the Sunday Ghost Riders. And ?? one happened last week in Austria? And that cannot happen in the world of if you have a car which works with the energy and the plasma. Because they'll reject each other, they get distance from each other. It only happens in the matter state and if the world was made of matter state, the center of the planet would have been a solid things full of crashes and everything else. Maybe that's why the planet is heated up because too many cars crashing the center of the Earth. It doesn't happen. Because this is nonsense. People who don't understand and don't understand the difference between the world of matter and energy, magnetic fields in motion.

Any other questions?

Q: ... Are the recent large earthquakes triggered as a reaction of the Earth to the meteors hitting the atmosphere?

K- These things are planned thousands of years ago. It is the magma of the Earth, which is the creator of all these earthquakes we have. (2:16) It melts, it falls down underneath. We have a what we call, we have a pancake, which is sitting on what I call, a Coca-Cola. And then you want to stand there, let's say, a mouse on top of this pancake. Coca-Cola is dynamic, it always produces gases. And you have a pancake, which at the bottom, this gas keeps on eating into the pancake, and you want to keep the mouse steady and not sinking. It does. As the bottom goes, it folds in. Our earthquakes are planned over thousands of years. Unless, unless it's done by mining, nuclear tests, and other things which affects the vibration and position of the Earth. And these have specialists in it. If you... seismic radiation due to the nuclear is well... It's a technology on its own.

And our scientists train for this job, to measure. And then those create specific earthquake wave, and then if they hit the, what we call, weak point, can generate earthquakes and volcanic eruptions. And it's ?? apparent that there are a few scientists in the world that specialize in this, what we call, nuclear seismology. One of them has just been arrested by the Chinese in China. A Chinese scientist educated at Beijing University, going to America, changing the passport to American, and then coming back to, for the Americans to measure the nuclear, (2:18) what you call it, seismology and testing of the Chinese. And the rest is part of you hear about it more or less sooner or later. He is arrested as a nuclear seismologist, trying to find out for Americans, under being a Chinese coming to his family in Beijing. He is now as part of the spy web of the Americans. Just been arrested very recently. Nuclear seismologist.

Any other questions?

R: ... Antonio mentions that he received the Cosmic Ray Love Resin and gave one to a friend whose young boy has trouble sleeping. So far the two-year-old has become more active during the night and keeping the parents awake. Would it be better to remove the Love Happiness Resin from his bedroom?

K- ?? ?? . These are made for adults, they gave it to the children, what do you expect? These are amazing things, these Resin products are amazing, some of them do funny things. Get him a cat, get him a dog and see what happens with that love. He wants to show love, so he's a hat ?? bag, give him love. If you have one, cuddle one and see what happens to you.

R: Maybe they should put the Love and Happiness Resin into the parents bedroom, and that might end up ... keeping things more quiet afterwards. (2:20)

K- ... It's possible. These are the Resin products from Keshe Foundation. At the moment the store is closed. The sales center maybe opens up next couple of weeks. Um, it's, there are amazing products in what they've been set to do. If you can get your hands on it, people who had it, I had so many funny stories with this Resin product.

Any other question?

R: I had a question or request that you might explain a little more about this emotion of transportation, which is the first time I've heard that, that phrase, and it kind of struck me as something special. You mentioned detachment is part of that. And you also mentioned independence as seems to be associated. And I associate this idea of freedom from gravity or the idea of freedom in general as well. And the emotion of feeling free, of feeling like a skydiver must feel when he's, you know, skydiving free of gravity in that sense. Or someone that goes to Space, or when we go to Space in our dreams, or when we have flying dreams, and we feel like we're free of gravity, and all we have to do is wave our arms and we can float around, and that kind of thing. Is that part of the emotion of transportation?

K- It's part of the transmutation. And when you transmute, you transport. Once you transmute, you transport, (2:22) because the physicality of the Man becomes trapped in the energy of the Soul. So, when you transmute, you transport the physicality with your Soul of Physicality (STP) with you. There is a dimension of matter state in it.

It's very much, I explained this some times ago, you have a galaxy which is going hundreds of thousands of kilometers in the Universe, and then you have a solar system (SS) which is a mass inside this plasma of nothing. The galaxy becomes in transmutation, in what you call, transmutation, it is a conditioned plasma, and the solar system, or that part, is in the matter state, so it is moving with it. So you have a transmutation of the solar system, but the actual galaxy is in transmutation because it moves as a plasma. It doesn't have a wall and restriction of boundaries. If you look at a galaxy, it's in transmutation. If you look at the body of the Man, it's in transportation. But we are still within the ?? transmitted environment of the solar system and the galaxy. It's not a wish, but it's an emotion, and with Man you can create it, you can control your emotion. Man, once he learns how to fully control the emotion of transportation and transmutation, becomes Man of the Universe. No age, no time.

You have to... (2:24) It's very easy, it puzzles me why sometimes Knowledge Seekers don't see it. What you do with the emotion of love? You transfer it into the physicality of love making, you transfer it into the physicality of hugging, you transfer it into the physicality of kissing. You transfer the energy and emotion into physicality. Physical reaction. And not, don't use that emotion to kick, to hit, to destroy. You use it in a positive way. And it's the same with this position of the transmutation, transportation. If you get the right emotion, instead of transferring it into the physical dimension of kissing, or cuddling, or whatever, into the emotion of transferring the energy, which is in the Plasma condition. This is how you make the 'Children of Mitra.' This is how the Child of Mitra was born. Not in the physical dimension, creating, transferring energy, emotion of love, or creating the next generation of Man to be peaceful. And if you understand this, you can do a lot of things. Always you carry transportation, within it with transportation, or you do the transportation like the body of the Man, with what we call, ?? transmutation, which is the STM inside, it goes everywhere.

Any other questions? (2:26)

Q: ... I have a question regarding the fundamental quality inherent in human physical biology and its connection to the plasma and the Soul. Why are we physically structured with dual systems, such as arterial and venous blood, the sympathetic and parasympathetic nervous systems, two lungs and the two brain hemispheres? Is this physical duality encoded at the level of our RNA? Or is it a direct physical reflection of the interaction between the fields of the Soul and the STP? Furthermore ...

K- I am lost.

Q: Furthermore, what specific practice or mechanism of breathing allows us to achieve complete equilibrium between these two dual aspects of physical matter and our inner Soul?

K- Do you know the word called, 'Beam me up Scotty,' I don't understand. I don't know, ?? you have to explain to me.

R: It's a doctor question.

K- We have patience.

R: Are we patient enough to answer?

K- I have to understand.

R: So, it's, what are, let me just start with one. What are the, why are we physically structured with dual systems? Let's just leave it at that.

K- We didn't create a dual system, it's the work of the Creation, and it's the point of transformation of energy to matter. (2:28) Our matter is when the fields are reduced in strength, and they manifest themselves, and then how they interact, God knows.

There is a new puzzle that was given to one of these AI's to sort out. One was that if we consider everything, the life of this planet was supposed to be 4.3 billion, now it's 13 billion, and now it will be trillions very soon. How long will it take to create life on Earth the way we know it? And apparently AI came up with 10 to the power of 200, something like that, years it will take to create everything going perfectly right, the body of a human being. So, two things have happened. Something has reached the 10, 200 zeros in front of it, or something in between has brought life in, a composition, condition, that everything got mixed up and then took the picture we have. There are so many different lives in the Universe that, then the life of the Universe is turned to the power of maybe 400, that after times 200 has managed to create the first cell, that after 200, 10 times of 200, we are where we are as a human being, and the rest of the Universe created.

We are created by, we are just phantoms, even our bodies, we think, "Oh, we get hit by the car." In reality, in different dimensions, we are nothing. The car can go right through, and we carry on what we are doing. And we can do this. (2:30) By a time of huge field strength changes, we can become transparent, we can become translucent. It can be done, it's not something theoretical. One day I'll teach you how to do it. But, is life what we see? Or what we see is an illusion of what fits into our perception of life. And we all agreed, we perceive the same way, because we carry the Inertia of this planet. We all, we perceive, we agreed, and we encoded in our structure, what is green is grass, what it looks like there, we call, it a tree, we call, this a human, we call, this a dog. So, by imprinting in our Soul, we have mirage acceptance of his life. One is a fool not to be shown a fool. It behaves like a fool. Oh, this is a cat, it's actually a carpet. Oh, you're a ?? ?? cat. It doesn't matter if it's a carpet. And we all agree this is a carpet. How our genetic ?? being accepted, that way we created everything else, and we all agree with it.

This is a very deep part of the science of Creation, and it goes beyond ethics, it goes to dimension of Creation, understanding the world of Creation. Why have we created a specific gravitational magnetic field, which becomes a plant? And we all agree this is called a plant, this is all ?? green. And the plant decided to show itself that way, so we agreed with it and it's going to be. (2:32)

The World of Creation has its own dimension of manifestation, and perception of the manifestation and dimension of existence. And then if you go to the dimension of fields, you understand how things are. It's very simple. If you, we say, we take 80% of what we need from our environment, where does that 80% energy come from? And why does it come only to Earth? Why can't we absorb energy strength that, that 80% which created that tree and that leaf, is not created on the Moon or the Mars? Because they could absorb the same. So, if you understand that part, the way your, what you call, blood vessels, blood flowing in your vein, in interaction with the energy which you absorb from the Universe, which then is transferred through control of your nerve system with your lymph's, to your bones, your lungs, the cell of your liver, we absorb specific fields that,

from the Universe, which is created by that absorption by the gravitational field of the Earth in the center, that in the passing through we absorb it and we can convert it into our physicality, then the same thing has happened to the plants and the trees.

So, the gravitational magnetic field of the Earth can absorb specific fields that in interaction with its magnetical field, leads to manifestation of what we call, the plants. (2:34) The life on this planet is not coincidental. If the gravitational magnetic field of the Earth changes slightly, there will be no plants. We see this on the tree lines of the mountains. We see this on the levels of the ocean. How different fishes live in different depths. How different plants are created in different depths. And if you understand this, life cannot be coincidental. If you observe this, then the whole structure of life is totally different and has a different meaning. In a way, our planet Earth, it creates gravitational fields of a specific caliber, that in interaction with this magnetical field, and the field of the Universe, which comes to feed the Soul of the Earth, leads to the manifestation of life, as the trees, plants, Man, and the rest. And other planets don't create that magnetic field gravitation to pull, that their interaction creates the creation of the life on this planet. What it gives through a central position, gravitational fields it create, only absorbs a spectrum of fields from the Universe, can lead to the creation of life, as we see it, which leads to the creation of plants, trees, Man and beast.

And our scientists are in the business of finding neutrinos, that neutrino has already arrived and manifested in the cell of the tree, the body of the Man, and the rest. And as we say, our scientists are still trying to find it. It is there and we see it every day ?? with . (2:36) Because they haven't understood that so much fields of the Earth has become us. We haven't suddenly grown out of the ground. They are looking for something which is there ?? themselves. As I said, you take as much as your intelligence tells you and neutrinos is the manifestation of what I call, American scientists who, more or less, are always after something which is themselves, but they don't see. If you're looking for a neutrino, look at the tree, look at your own body. That energy which came from the Space has become you. You are that pot which they're trying to see. Your Soul is that shining light which they're looking in the buckets, thousands of meters under the Earth. They haven't understood. Ignorance is bliss, and they are blessed with ignorance.

Any other question?

Q: ... Is it written in our souls that we are destined to be travelers of the Universe? The distortion we experience is an interference that surrounds our fractals. To inhabit the Universe we will occupy ourselves with cultivating the stars, gardens of solar systems, stellar seeds, could this be our occupation? Is technology needed to do all this?

K- It is a self-centered question. The reality is that collection of energies has made us or the creation of the STM, and then the rest of it is created so we do something with it. (2:38) You know, you buy a seed, you bought it, you find it somewhere to plant it, you buy a pot for it, or you already had a pot in the house, or you know which part of the garden you're going to seed. And the STM, that's it. It's created, it's where it's been planted, by its destiny or by its fields. So the rest is hypothetical. We are, we are accident

of time with love, and we are creators of life by destiny, and that's how we are. We are totally created by accident, from the love of a man and a woman, or a love of a plant, give to another, or a lion, to another lion, or whatever, and then the child is a manifestation of physicality of that love, and it can be anywhere. We create children from China to South Africa. And the destiny is where we set them. Because we decided we have a child. And it's going to be there, it's going to go to university, it's going to be this, and it's going to be that, and if you are Iranian, 100% you become a doctor or an accountant. And so you can see we plan even the destiny of what the seed will be. And it's nothing, no difference between Man, the STM, and the process of Creation. The only thing is, Man has added into this emotion of love, which the STM is unique in that.

Any other question? Or shall we call it a day?

Q: ... Good morning Mr. Keshe, I've been practicing the breathing exercises, (2:40) and have achieved incredible results in providing immediate relief from pain in my body. Thank you very much for sharing this valuable knowledge.

K- You're welcome, try to see if you can do that with your Soul. Try to breathe with the, not the lung of the Man, but with the energy of the Universe. See what you can take, what you can release, how you can hold. And then you go into the dimension of transmutation, you don't need to use the breathing. Thank you very much.

R: I was going to say, we had a question from Richard about not being able to, having a cold, not being able to breathe through the nose. Do you have any tips for making it easier to breathe, and can you still practice transmutation? I think you answered that before once, that you can still practice transmutation, yes.

K- Yes, you can, but you have to learn in self-breathing how to absorb energy. That's what you do. You don't need a mouth, you don't need a nose. It's very funny, I said, "If you look at the real Aliens, have you seen their nose, the nostrils being open?" No, it's locked, everything is closed, because they don't need to breathe. Absorbing energy it's an art. And if you can do that, then you can transmute much easier. Thank you very much for today. Hopefully we'll be here next week. I'll try to share some more knowledge, but as I usually say, if you understand today's teaching, you moved somehow a very, you've taken a very deep step in knowledge of the transmutation. (2:42) Thank you very much and see you next week.

R: ... (2:44) << Message from the Universal Council >> "Thank you for your support to the Keshe Foundation and the beautiful work to Mr. Keshe and the Universal support now. Thank you and invite all the time. Give freely your Soul to support the work with the Universal Council to support to the all beings present in the Earth. And invite daily 9pm Central European Summer Time for give from our Souls and invite all to the humanity to elevate the Soul of every leader in every nation. Every leader in every community to work as one Soul in one direction to achieve peace as One Nation, One Planet, One Race. At the same time, I invite with invite all communities to ask you Soul is time for you service to the to your community. And please subscribe at

info@keshe.foundation to offer to your Soul to serve in the community to Universal Council, because we need to support the One Nation Network. We need to support the work across the planet. And at the same time, we need more people to support the Universal Council. (2:46) And at the same time, I offered to we offer our Soul to give you to you problems you needs from your community to Universal Council. Now, I invite to you please give you. Would you ?? support in that moment the Colombian people because actually is terrible time. ?? Earthquake in the last Monday quarter. I don't know some ??, but terrible time to our community, and I want is no better time for my ?? city too because it is around my city, with my family and my friends living in. It's ?? no better time now. And thank you so much. Thank you for your opportunity.

655 KSW – August 13th, 2026
