

658th Knowledge Seekers Workshop September 3, 2026

(Transcription, Editing and Proofing done by KF Brazil)

(Auto transcription by Elias)

We are Black Hole - receive fields from U; Fields interacts with plasma creates reflections - by-products - interact with each other further creations; Cosmos fields interact with Earth's plasma - we receive GM fields - radiations, interact with every cell, STP & STM; Radiations missing fields - Man & other creatures kills for; Inertia mass of elements in area we live - Chinese, African, etc; Slight missing energy like adding sugar to dessert; Vertical People - don't kill; Creature with emotions needs additional energy; All teachings to compensate missing energy; CR materials & KF work compensate a little; Elevate STM - receive all energy from environment; Man will learn; Tune energy of STM to Spirit - stronger feeds weaker; Feed P; STM receives CR energy - feeds STP in M fields of heart - secret to stop killing; Energy transfer taught 2014, 129 Tesla Live experiment; Weaker absorbs higher order energies; Prevent brain hemorrhage - transfer energy backwards from heart to fingers, skin; Create demand at extremities - finger tips, etc - dissipate excess energy in heart; Use STM & emotion to reverse energy; Blood flow - electric current & lymph - Eddy Current, reverse direction; Lymph feeds every cell with neural system - not kill; Trees do with CO2 energy to live; Absorb energies through brain for all cells; No mouth; Migraine headaches - pressure on STM to absorb energy & feeds body - reverse flow using lymph; Scientists made up many fallacies - created backwards T; Accepted fallacies of how body works - see wrong things; South Americans used Nano T - burnt vegetation to ash - increased M fields to enlightenment - received knowledge built pyramids, etc, transmuted as group - suddenly abandoned cities; Ash - Black Hole - absorb energy spectrum; Space City - using ash - receive higher energies directly to Soul; Black soil fed Soul - filtered energies passing through Earth - to STM; KF workers saturated with fields - connect to plants in greenhouses - receiving missing energy- elevate Soul; Refracted fields of U interact with Soul of Planet - ash Nano filter; Stainless steel shields Earth's M fields; Fe creates layer of separation; Ash - replication of T - 20 tons in greenhouse - change environment; Workers more intelligent - eat less; CR Balls do same - separate STM & STP from fields of planet; Soul & Spirit - M fields of body; Transmutation easy; Drugs like ash; Takes from T according to intelligence; Higher order energy increase intelligence; One Soul reaches - easier for others - like pieces of magnet - not lose energy, gives, elevates; Gave secret - detach from fields of planet; KF Plasma Mat - detach through CR fields - connect to U fields by thinking - transmute; Deep knowledge coming up; Ready for 666th KSW - you decide to use knowledge - instead of killing; Carry everything within yourself; KF Store & Enlightenment Game connected; Space Center international scientists; AI weaker choice - use STM; Bright future; Change Mankind with ash; Join us - spread T; Open door to U Community - Aliens add to our knowledge & T of STM; Spiral of plasma; Humanity no knowledge of Creation - couldn't understand; Life starts with pulse, not frequency; Heartbeat is pulse - plasma; Gaps in higher & lower heartbeat - plasma; Plasma is DC - interacts on boundary becomes AC - see light, create atmosphere & D; Body not run on frequency - Gases & gases in Nano scale; Pulse hits solid material - reflects back - becomes matter frequency; As pulse remains a plasma of U; When interacts with another spectrum of M fields - becomes frequency and matter state - how heartbeat creates skull,

muscle tissue, body; Secret why re-grow amputated leg; Pulse & frequency different; Pulse created by 2 plasmas interacting - STP & STM; STM - own pulse and life cycle; Why STM feeds Spirit, then P; Man - most ignorant creature of U - thinks he understands - denies everything else; Detailed story of gold creation from fields - top Chinese academician cheated & changed lab report; Historical record of KF; Accepted knowledge relative to people in charge - rather than knowledge itself; Huge block for humanity; KF freely shares knowledge with everyone; Heartbeat converts energy into matter every second - no life without heartbeat - converts U Energy to matter P; Copy how body converts energies of U into ourselves; Fields from Creator - pulse of Me interacting with pulse of Man's heart becomes body - Me; Pulse converts into frequency; Creator never kills own fields; Crimes to His image; Every heartbeats manifestation of His P; Lied to ourselves; We do wrong in His name; Keep questions short; KS wants proof about KF claims to Space travel; KF no longer about manifesting physically - create conditions of fields - transmutation of energy; (Broadcasting from Front Lines); Change from understanding; UFO - can't transmute energy - travel within created resistance; Show me and I will believe - problem - you cannot see it; Western philosophy not understand - discredit; Can't show a stupid man; Open to want to understand; Scientists deny - afraid lose position; KF already shown T - ignore; Military Forces of Mankind have achieved a lot - still matter state - not advancing T; True Space T works with GM fields - extremely advanced; CNN - lies; Shows pictures of KF work in China - producing gold, etc; Space flight - understand what conditions need to create; Don't care what other people say; Depends on what governments decide to release; Picture of created gold; Governments afraid of T; KF treated with respect in China - Belgium & Europe try to kill; Electrical engineer - patents don't work - his understanding - relative; Plasma of heart - not in text books - deny; Belgium ordered post office not to send books; KF was infiltrated; Report of gold produced; Physical proofs of T; How do we know our knowledge is true and correct; Rely on own strength - don't need anybody else to prove things to you.

ENGLISH TRANSCRIPTION

(:19)

K- Thank you very much. Good morning, good day to you as usual wherever and whenever you listen to this series of Knowledge Seekers from Keshe Foundation Spaceship Institute, we welcome you back. Another process of adding more to knowledge, and another process of understanding why we are here the way we are here, and what has brought us here.

As we said, we are more or less a Black Hole in the, what we call, mosaic of the life of the Universe (U), a very, very tiny piece. When we look at all these galaxies, solar systems (SS), planetary systems, moon systems and the systems that we do not even know. But it comes to one thing, we consider what we receive from the fields of the Universe. (:20) But the way we understand interaction of the fields of the Universe, when the fields interacts with any plasma, it has and it creates reflections, it creates what we call, by-products, and these by-products interact. And one of these by-products of the

interaction of the fields of the Cosmos, be the plasma of the Earth, is what we call, what we receive as gravitational magnetical (GM) fields of the planet.

In a way, the magnetic (M) fields, reaction, interaction, of the fields of the Universe with the central core of the Earth, in creating dynamic fields of the plasma of the atmosphere, in the gravitational fields of the planet, creates what we call, radiations, creates effects, that these effects interact with every cell of the body of the Man, and it does with what we call, the Spirit of the Man and the Soul of the Man (STM). And the problem what we have as a race that we kill to live, is something short, something less, a field missing in what is reflected back that we take. We know the Inertia mass of the elements which in the area we live interacts in our physical manifestation. It has a say, that's why we look Chinese in one place and white in another, and blue in another, blue eyes and green eyes and the rest of it, as we have talked many times before. But in fact, what reflects back and what this planet does not receive or absorb or lacks, in absorbing fields from the Universe that reflects back to become in interaction with the STM, (:22) with the Spirit of the Man, the physical cell body of the Man, creates that lack of energy, which pushes Man or being, creatures on this planet, to look for addition, to look for completion. What I call, the dessert, the main food that serves on us, to the systems of the Cosmic Rays (CR). And that dessert, which we take, which is the reflection of the fields of the planet Earth, with Man's Soul, Man's physicality, has something missing, which pushes Man to kill, pushes every being on this planet, which is moving, is not horizontal, on its own, but somehow creates a dimension of the vertical, to have what we call, the Vertical People's life, to kill. It means it's short. It means we don't see this behavior from Vertical People. They have learned how to sustain life, absorb what they need, and they have in a way compensated for not moving, with not killing. But any creature which has emotion on this planet needs that additional, needs that little bit of the dessert which is missing for it not to kill. In a way what we call it, the sweetener, the dessert tastes nice but it's not sweet enough. So we add sugar to it to make it sweet, we kill for it to survive.

Now the whole process of the teaching, all what we've done for past decades, is to compensate with that sweetener, which is what we call, the essence of life, to keep us going with killing. (:24) In the process of the Cosmic Ray production, especially those of you who have Cosmic Ray materials with you, those of you who have learned to process through the, what we call, the Gans technology (T), you have compensated for some of it. And gradually, as we develop this technology further, we compensate for all the energy, that piece of sweetener, that piece of energy which needs to give the taste of life, that Man does not kill. And this is the whole process of creation, it's a whole process of projects and work we've done for decades. And if we have two choices to complete, and if we complete, we can compensate for what this planet has not and cannot provide, for the Man to learn not to kill. For Man or Humanity, or all the animals which are, what we call, horizontal ones, which is going to the dogs, the lions and everything else, learn not to kill. But receive on addition or in addition, to what we receive from Cosmic Rays, which is 80% of the energy of our consumption, on a daily basis, every second, is to create a layer which compensates for this, or elevate the STM, that receives all the energies it needs from the environment.

We can do, many people have managed to do it, we are not unique in it, but we don't understand the process, or we have not understood the process. So, in a way, if Man learns how to tune the energy of the STM, with the energy of the Spirit of the Man, where the Spirit becomes weaker, (:26) that forces the Soul to feed it stronger, that that process feeds the rest of the physicality, then Man has solved this problem. Literally, if we understand the process of the transfer of energy, allowing the STM to receive the energy, from dimension (D) of the Cosmos, then in that process, stronger plasma feeding the weaker plasma, allows the energy to be transferred to the Spirit, what we call, the Magnetic field of the heart of the Man, then we have cracked the code. We have stopped the process of killing, consuming to survive, destroying to exist.

And once we learn this process, this is if you go back to teaching of late, late 19, 2020s, when we explained how we can transfer energies and back to the teaching and the process of the teaching in Desenzano in 2015-14. We understand more and more how we did and how the process began. If you go back to 29 Tesla process testing which went on in Desenzano in 2013-14, we explained many times the structure is that the stronger feeds the weaker, and in that process, when the weaker becomes weaker and in dimension of the fields, the stronger tries to support, it absorbs, it transfers higher order energies. This is how we started with very little and over weeks we managed to make one of the strongest magnetic fields ever known at 29 Tesla. These things need understanding, then we pushed it if you remember to 100, (:28) and then we went higher.

And we understand very simply that the Man needs to train how to transfer energy backwards not upwards. When we receive too much energy from the Soul which is the heart of the Man's operation, Man has a heart attack, Man gets brain hemorrhage. But if the Man learns the process of hand down from energy to lower from the higher, then you feed the reverse, where you feed back through the same channels of the blood of the Man, through top shoulder veins of the lymph of the Man, feeding the body of the Man. This is how the process work. But we have to understand how to create the smallest demand on the extremities of the body of the Man. Which means on the tip of fingers, on the tip of toes, on the skin of the Man, we create reverse condition. Which means instead of absorbing all the energies through the whole structure of the physicality of the Man. We use the STM, we use the emotion to create that condition that feeds the heart and in the reverse order. In a way, if you look at it, the blood flow is the current, and what we call, the lymph of the Man, condition of the flow, becomes the 'Eddy Current,' which is the reverse of, the anticlockwise system. And then, as your lymph's fed your cells, every cell of the body of the Man in conjunction with the neural system, then you don't need to kill, you compensate.

If we look at the structure of the Vertical People, we see this is exactly what they do. They take the energy, we call, it as a CO₂, and with it create a condition of life. (:30) Man has not learned this, and with that, once you achieve this position, you don't need to breathe, you don't need to drink, because you don't need the mouth to digest food. You absorb energies, instead of on the extremities and the whole structure of the skin of the Man, through the brain, through the structure of the cell of the body of the Man.

We see this behavior with many people, when they speak about their migraine, deep migraine conditions. We see them how they start the appetite. They don't eat, but they don't feel hungry either. Which means they have created a pressure on what we call, the dimension of the STM. Which absorbs energy from the environment and feeds through reverse condition of the, what we call, the lymph system through the upper shoulder, which means you don't even need to breathe. We read the structure of the physicality (P), the reverse of what it is, and we have made so much fallacies, and so much reverse technologies, to confirm our own stupidity, that we have believed in our stupidity, to be the truth. They say, if you want to get a nation walking backwards, get bunch of fools around the nation, and say, "This is the way you run the nation." And that nation is every cell of the body of the Man. And we have accepted the fallacies.

If you look at the systems used, especially in South America, in 100, 200, 500 years ago, partially they understood the system. What does this mean? They... there's a pattern we see in South American continent, which never been connected, never been understood. Look at all the natives in South America. Look at the land they lived in. (:32) We know these cities which are empty, as we said last week, and now you understand how it's done. They all carry with them black soil. They all carry. These were not fertile land. These were lands that nothing used to grow on, but, or nothing to be cultivated. What did these people do? They burned the trees, they burned the vegetation, they brought that and they put it on the land. This is the why the land is mainly black.

So what happens? Why these people suddenly achieved this position? When you burn the vegetation, you create ashes, you create Nano technology. Now the land you walk in is a Black Hole. It absorbs energies beyond imagination, and absorbs a spectrum of energies. Which means now, instead of your Soul receiving, becoming, your land become to absorb high order energies which passes through the Soul. So, we understand very rapidly, why these cities are empty. Because these people received knowledge, received energies from the Universe, which brought them to the condition what we try to bring the Man of today. Understanding the work of the Universe, receiving energies at the level that the physicality cannot handle, but the Soul does.

In a way, the soil they made became the feeder of their Soul. The pass-through, the filter which the Earth... << audio breaks >> and its sources, they managed to pass through. We don't see these kind of effects anywhere in the world except ?? America. (:34) Good parts of the lands are black, cultivated in ashes, and in a way created Nano spectrum of the fields, a Black Hole of energies. In a way condition of bringing the Man to the position to receive the fields or the Man the land walks on, creates the condition that brings that energy towards and in that process feeds the STM. It's in a way standing on its way, it has no other way to go. You have to understand, << audio breaks >> they were eating partially themselves, so there was a connection in absorbing these fields from the Universe.

And when we said in the last teaching how these people suddenly vanished and say there was no water and they moved, it shows our lack of understanding. Keshe Foundation's International Space Research Center has started this process. We are deliberately

fertilizing the land. We are deliberately bringing that condition of the ash. We are bringing to understand how the process will affect the plants and in that process affects the condition of the workers in the Space Center. I asked one question on a meeting of the scientists or what we call, the agricultural workers. I asked one question, how many of you have been sick since you start working in this plant. The reaction was very swift. They looked at each other and they said, "No one, no days." And to cover up somebody from the management side says, "Oh, we just moved some days." But they looked at it, "We didn't move any more days." Because they work, they live in greenhouses which is literally saturated with the fields. (:36)

Now in this section, in this part of the work of the, what we call, International Space Center, we have started to add, to repeat the culture of South America, to see how the people within the structure of the greenhouses change. We have deliberately bought a system, which every day converts every single weed, every single fruit, which is not used into ash and back to the land. They eat a tomato from that plant and next day the leaf of that plant becomes the ashes under the plants and the land they work. In a way we have created a closed laboratory which repeats, how Man by creating dimension of the fields, in a way putting a filter between the Earth and itself and absorbing what is short, back to it. And putting the STM, the Spirit of the Man on the way to absorb what is missing, not only we stop the health to deteriorate, we see that they walk away. Would we elevate the Soul of the people in that process? And then this greenhouse, some nearly 4,000 square meter, gives us an answer that how people of South America did not disappear, they did not move out as we made believe, they became enlightened to the Knowledge of the Creation by receiving higher order by us, by themselves, in a way, creating that filter of meters and meters and meters, hectares of land, 10 centimeter, the next season, 20 cm pure Nano technology, MaGrav absorbing materials.

Now you understand how the gap, (:38) which was not provided, the energy which was not given by Earth on the refraction of the fields of the Universe, in the interaction with the Soul of the Planet, now can be done. In a way, we create a filter. This is not something new. If you've been with us, and some of you worked in the laboratories of the Keshe Foundation around the world, especially in Desenzano in Italy, and then in Bari, and you worked in Italy, and Austria, and other places, you have seen we continuously use 300 plus stainless steel to create that separation, to create, breaking through the effect of the Earth's magnetic fields on our system. If we don't use 300 plus, 316 plus, 320 stainless steel systems, the Earth's magnetic field will affect our system. In a way we create a layer separation. We can do that in the matter state, because iron magnetic field is what we call, balance fields of the gravity of this planet, in the condition of the plasma of the field of the body of the Man, the ash become that separation. Replication of the technology.

We are looking to extract some 15 to 20 tons of ashes this year to fill up a 4,000 square meter. We are watching to see how the structure will change in the environment laboratory, what we call, the structure. At the same time, as I said to heads of the agriculture, everything you cut, you burn. Tomatoes, cucumbers, anything which is not used, gets burned. And that, because some of you eat it, connected with the ashes, the

system changes. (:40) We have already started the process, because we understood a long time ago. Now, NASA spends billions (a) year to find out something. We spend a few months, we see the effect. How intelligent the workers become. How independent they become. How they lose the habit of eating, in just one thing. We just added more Nano material, more Cosmic Ray technology into it.

But if you look at your own hands, many of you I know are sitting there and holding the Cosmic Ray Balls, we gave you that Black Hole. You bought it. And if you know how to use it, you can create that separation. You can, step by step, make that barrier that your, what we call, Soul, your Spirit, which is the magnetic field of the body of the Man, becomes separated from the interaction of the fields of the planet. In a way, you carry in your hand the Nano technology of the Universe. And in agriculture, we create the Nano technology of the planet.

In understanding this process, in grasping the concept of the life, compensating for, gives a Man a new chance to understand, to connect to the Universal fields. And then you find out, transmutation becomes easy. You take drugs to go high, you live in the land which the field is saturated with the field of the Universe, then you take off the same way. Separation from dimension of the physical interaction of this planet with the STM. (:42) In time, as the process is on, ?? ... we see how the influence of the ashes of the South American cultural life has been the reason that they disappeared. They got not elevated, but they became to understand more about life. This is why they created so many different structures that today we don't understand. Because they got access to the knowledge by walking on the ash fields by working daily basis with the essence of the Nano layer technology, which separated the fields of the Earth from what they walked on, they ate, and connected to the higher order Black Hole dimension of the fields, which in the process of passing the STM into the Spirit of the Man, and the body of the Man, progressively elevated the knowledge, the insight, the knowledge. As we say, every Man takes from this technology according to his intelligence. When you receive of a higher order energy, your intelligence of course moves in that dimension. You understand more about the process of Creation. And once one Soul reaches that point, it's very easy to elevate the others. As a magnet does not lose energy as it gives to the others, but elevates them to become like itself.

Now today you understood more about the secret of life, and how you can separate yourself at that point of detachment we've been talking about, to be created by. In the coming time, as the Muslims have a prayer mat, Keshe Foundation in coming time will create mats that creates that condition of what we call, South American ash condition, but through Cosmic Ray technology. (:44) And this allows the separation of the energy of the Man to be on his own. Detachment becomes easier. Connection to the fields of the Universe becomes as Man thinks. And in that process, allows Man to become a Passenger of the Universe, what we call, the transmutation through the dimension of energy, and not transportation through the dimension of physicality.

Today you understood in depth the knowledge that is coming up, and how you need to use it, in conjunction with what has been taught in the past weeks. That, in a way, as we

said, by 666, we make you ready, according to your own will and nothing else, to take, to be, and be part of the bigger structure of the World of Creation, than the killing fields of this planet. I hope I brought you home, and I hope you understand now what is done, and what is to be done, for yourself and nobody else. Every Man carries his own suitcase of shame and blame, and knowledge and intelligence. We go for a break, we come back and we'll try to answer, if you understood what was discussed today. Otherwise we carry on with the hullabaloo. Rick, take us for a break please.

>> **BREAK** >> 658 KSW September 3rd ... (:52).

K- Thank you very much. There's not much to say this week. It's just that we hope that this week the Store of the Keshe Foundation will open up, with the same as your Store with what we call, the Enlightenment Game. That we can be connected to each other. And as we develop, as we progress towards the development of the, what we call, Space Center, we look forward to new technologies to be shared. We are bringing in scientists from all over the world, gradually, collectively, over next months and months to come. We've become the center of the intelligence beyond imagination of the Man. From what I see and I see down the line in coming months and years, AI becomes much, much, much, much weaker choice for Man to choose. Where we choose the dimension of the information through the STM, and not through dimension of the mechanical structure of the, what we call, electronics, or what is become fashionable now, as we did, in what we call, the structure of the fields.

We see a bright future for mankind and gradually, as I said to our Knowledge Seekers (KS), those who work with us, looking forward for us to 'sell the soil' for Man to change, and with that to elevate the Man to the levels that the Man can understand the technology of the Creation. (:54) Join us in different fields of technology and create that condition that knowledge can be spread much, much rapid and in a way easier for everybody else to join the race of humanity. In a way, once we open the door of knowledge, we open the door for the Universal Community, not to come to us, but they tell us they are amongst us, and they can add to our knowledge and technology. The only difference is, it's the technology of the STM, and not technology of the, what we call, science of the Man. If there are any questions we try to answer, and if possible, try to understand more about the course of Creation.

Q: ... Good morning Mr. Keshe. I would like to know if the intervals between heartbeats, and the pauses in breathing, are related to the spacing of the expanding spiral of the Soul that you draw. Could though these intervals be like pauses that the physical dimension allows in order to receive Universal Energy? (:56)

K- Translate, please.

R: Sorry, pardon me?

K- Translate.

R: Oh, well, you have talked about the intervals between, or the, the space between heartbeats and in breath, and is that related to when you draw the spiral of the Soul and the physicality with the expanding and contracting spirals that you've commented?

K- Not really, not really, not at all, in so many ways, it's for simplicity to be understood. Humanity, our scientists, as they didn't have the knowledge, they never grasped the Knowledge of Creation. Long, long, long, long, long, long, long time ago, when they thought they have mastered the knowledge of understanding the first steps in the process of the World of Creation, they should have understood. As they didn't have knowledge, they didn't, and even today our scientists does not, do not understand.

We see a pulse and we see life. We don't see frequency to see life. The heartbeat of the Man, that pulse, should have said, should have explained, that it's a different world. It's a World of Plasma. Frequency belongs to the World of Creation, matter state. (:58) Pulse belongs to the World of Plasma. And even today, we keep on talking about the heartbeat, the spaces with the heartbeat, the gaps and higher heartbeat, lower heartbeat and the rest of it. Because we don't have the knowledge, we don't understand, this is the characteristic behavior of a Plasma life.

Go back to the teachings we've done, many times. We tell you that, very interesting, that in plasma everything is DC. And when the boundary of the pulse, which is interaction with the matter state, you get AC, you get the light, creation of atmosphere, creation of the dimension of the plasma. So, if we are scientists, if people really understand, when you talk about the pulse, you talk about the plasma. Our body doesn't run on a frequency, it runs on the pulse, heartbeat. This should have given Man, the scientists of the Man, that we are dealing with a Gans technology, where it's only gases in Nano scale. And this is part of the problem of trying to re-educate the illiterate scientists who call themselves academicians, professors and doctors and specialists. We do not see frequency in a plasma. (1:00) We see only pulses. And where the pulse, the DC changes to AC, is where the boundary is.

So when we are having the heart rate, means our whole structure lives in a plasma condition, what you call, the Gans state. And this is a key to understanding the Knowledge of the Creation, and somehow, Mankind has decided, blip .. we ignore it, it's best to ignore it, or in a way not to ignore it. You never knew. Ignorance is a bliss for humanity. Ignorance of knowledge, ignorance of Creation, ignorance of understanding the world of existence. As a guy said, "Forgive them as they do not understand what they are doing."

So if you understand the process of the Creation, if you Knowledge Seekers have been there, it should have explained to you a long time ago when you have a heartbeat, when you have a pulse. The life within the range of that pulse is in a plasma condition. And still we have problems with our people, with the scientists trying to understand why they have a pulse. You create a pulse. This pulse hits a solid material, reflects back. Now it becomes matter state. (1:02) Because it has a frequency. As long as it's a plasma of the Universe, it has a pulse. The minute it interacts with another frequency, another spectrum of magnetic fields, now it becomes a frequency, it becomes a matter state. And this is how your heartbeat creates the structure of the physicality of your skull, the structure of your muscle tissue, and everything else.

One of the secrets that when I tell you if you have cut your leg, I can grow your leg, is understanding this principle fundamental work in the life of the plasma, in the life of understanding the effect of the pulse and frequency. So when we talk about everything to do with humanity, you're illiterate scientists, who are supposed to be the experts, of ignorance, should have known, we have a heartbeat, we have a pulse, we are dealing with plasma, we are not dealing with a matter state. And then when you have a pulse, why do you have a pulse from your heart? Because you have to deal with another plasma, which is called the STM, he has his own pulse, his own cycle, life cycle. Birds with the birds and dogs with the dogs. When the energy of the bird of the what we call, the Spirit of the Man flies, with that pulse, it can only interact with another Soul, with another plasma condition, which is the STM. This is why the Soul and the Spirit understand and work and create the condition of ?? life. (1:04) And this is why, using the STM, you can feed the Spirit of the Man to feed the physicality of the Man. Now you understand. Ignorance is a bliss. And Man is one of the most ignorant creatures of the Universe. Because not in understanding, if he thinks he understood, then he has to let go, and deny everything else. Because I understood, I'm more ignorant than you.

Typical, we've seen the Chinese academicians, the top man in China, president of the government, swore on him because he's the academician of the, what we call, rare Earth material. And we sat and watched him make a fool of himself in front of the generals, board of governments, because his ignorance brought an end to the knowledge and control of the science by ignorant people like him, when it was put to him that energy can be transferred into matter state. And he said, "it is impossible."

Any other question?

I'll tell you a story about this. It's very interesting because it's part of the history of the Keshe Foundation. Some two years ago, three years ago, (1:06) about this time we were faced with a confirmation of the development of technology which we can change energy into matter. Never been done, impossible to be done. By structure of the offices of the civilian part, what we call, CPC of the China, a team was appointed to show that energy can be changed into matter. We did, we went through all the rigmarole, and the offices of the Prime Minister of China reported to the military side which is run by the President of China, his Excellency President Xi, that such a matter has risen and this guy has shown matter produced from energy in the space out of nowhere. This became a point of interest

to central command of Chinese government. They appointed one of the highest ranking Generals to look into this. We explained, or they explained, they have seen gold being produced, and silver being produced, and gas being produced on the table next to it, and the Central Command decided this is something we don't do.

With the order of his Excellency President Xi of China and Central Command, they decided to bring the highest ever ranking academician to assess. And with him came another academician, a woman, that the decision of these two would have been the decision of the Central Command and the office of the President of China how to handle this part of the Keshe Foundation technology. (1:08) We met with the General and the two academicians on Tiananmen Road opposite what we know as Central Command and opposite the Military Museum of the Chinese Central Command. In the room on the first floor, a slim tiny guy sitting right in the corner, the woman next to it, the Generals on the other side, and Keshe Foundation on this side. Very friendly atmosphere till I opened my mouth. And in very first words that I explained how Nano technology can lead to the creation of energies, this most idiotic man came out with one word, bukha, bukha, means no, it's a lie, it's a lie. And he was, we couldn't stop him. For five minutes, ten minutes, he was going like a rat. The generals couldn't do anything. At least let him explain." The woman said to convince him, "Let him explain." "No, buhka, bukha." It's only word apparently he learned in his womb of his mother, nothing else.

The meeting became literally a ridiculous condition. The Generals reported back to the Chinese Central Command that the brain of China, who everybody swears on rare Earth material, says this is a lie, cannot be done. After a couple of weeks of deliberation, Central Command, Military headquarters, decided on one thing. (1:10) This guy says no, this guy says he can. Let him show. They allocated seven days for us to show the technology. In a convoy of three ranking Generals of Chinese army, the Keshe Foundation, and everything else, we were sent up to northern China, a mountain with 14,000 drill holes confirming it's a gold mine. We arrived, we literally over the fields in a village, and next to a house where there was one of the 14,000 wells most probably highest amount of gold on this spot, we set up camp. We had a yard, we set up camp. And systems were set up. What was needed was brought out.

And we start the system. The condition of Central Command was very simple. Seven days operation. After seven days, we stop, whatever the result. We set up systems. Beautiful sunny day, on the way driving from Beijing to this point in the northeast of China, it was dry, the rivers were dead. And when we stopped for a break somewhere, we were told that it's such a bad drought, it's this year. And rivers were literally, no, they're just sign of rivers, the cavities in the what we call, on the roads. We set up camp. We ran the first system by afternoon. (1:12) We were given a cow shed to connect all our systems in a way, in a hut. << audio breaks >> where we set it up. And I asked that the Sun does << audio breaks >> by afternoon, when the system is set, central command ordered, the whole convoy moves out up to 70 kilometers away. We drove down the hill, military officers on the hill, we don't know how many, many of them were left behind, we saw them. They positioned large number of soldiers around the mountain. By that afternoon we created, which is usual, such a heavy rain. It's a part of producing energy to

matter. They send us pictures, huge storm has started and we cannot operate. The machines are getting flooded in the garden, where it was supposed to be dry and they wanted us to do it in dry air.

The Central Command ?? sent us a house next to the drill hole which was supposedly empty, I think they emptied it in the afternoon, for us to move indoor. Don't forget we did the same thing, exactly the same thing, two or three months before with a CPC operation. We were in a yard of a house and then sunny, hot and started so much rain we had to go inside. (1:14) So it became a pattern, we create rain. We moved in. Actually, we had to come back in, in the afternoon to move everything into the house because of the rain was coming in. And we camped in 20 meters away from the garden into a house next door, which people were told by the military to evacuate. There were tests, military tests going on. That night, by the time we came back to the base again, ?? ... it was raining gold. The rain is not a pure rain, there is gold in the rain. They could see gold dust there, they wouldn't, nobody knew what it is. But this rain, horrendous rain. << audio breaks >>

R: Hello Mr. Keshe, you're breaking up a bit there, we heard, rain, horrendous rain.

K- Yeah, it wouldn't stop. So, as we moved in, into this building and we set up camp again. Inside we moved some of the machines inside, the rest were outside. There were three units moved inside and four units moved inside, and eight or ten were outside working under the rain cover, some damage, whatever. The military command received calls. ... We received the << audio breaks >> There is a rain of gold. (1:16) They are observing gold everywhere. They went into the room and there was gold falling all over the place. We had to drive back up again to the base. Raining .. inside the building. And one of our systems burnt out. On a Tuesday afternoon, the Central Command said, "He's got till Sunday, it's his problem, not ours." And they said, "You have only one system and it's burnt out." But, Keshe Foundation, as you know, is always, we are well saturated with technologies that we have. We shipped the whole system, overnight, 48 hours. We paid the DHL guy to drive it on a Friday afternoon. ... We videoed, gold rain, and everything else. And on Sunday, the two Generals, because we were eating and living together, which was, it was part of the order from Central Command, one had << audio breaks >> away from the center, of the test center. And on a Sunday, last day, the General said we << audio breaks >> gold, what was in the house, outside you can << audio breaks >> (1:18) the General's clothing were dusted with gold, they couldn't see it. When we stopped the machine, the gold was still getting produced.

The decision was that all the Chinese military wear masks, that they don't breathe whatever is in the air. And Keshe Foundation has none of these fears. It's good to eat some gold. And we collected and I put some of the gold in a bottle with a special mixture and it converted to solid gold. And the General said this is impossible. The assistance of the General was taking videos. We were not allowed to take videos. We could do our own, but not when the Generals were present. And later on this lady, by mistake, sent us a video. We see the full face of the Generals. We have a video of them. So, anyway it says we can show these are the Chinese 2 or 3 star Generals sent for what we call, gold mine. And we agreed, it was agreed, now the material... << audio breaks >>

R: Sorry, I couldn't hear that last sentence, now the material...

K- .. Was gold, it was collected. We collected the material in bottles, from the machines, and everything else. And, by the order of the Central Command, went to the laboratories, we didn't have, they didn't give us any of the material. They sent the material for test, in Chinese military operations, laboratories. And the campsite was closed, we removed the systems, (1:20) took us couple of hours, or half a day to pack everything which was outside, inside, everything else. And returned back to Beijing, to Central Command. So, something funny happened. As I said, we were going up the... When we were going up, it was all drought, on the way back it was flood. It was so bad, that so much rain and flood, that the transformers in cities were blown up. And we got caught in one of these transformer changes, and the wires coming down, that the road was blocked, they are bringing new transformers to replace, which the flood and the thunderstorm destroyed. And then the command came, Generals cannot sit in the car waiting for the ?? to be as you cross the line. And arrangement was made that we all came out of our cars, and the batch of cars was sent from the other side, to take us back to the test center. It was a funny job to do, we created our own problems.

Anyway, we came back to Beijing, two weeks, there was no answer. I asked continuously from Central Command, "There must be a test result." A meeting was arranged, again, at the Prime Minister's office side, like 30, 40 chairs around the table, very long boardroom. They said, "We have the test results. There is everything there, except gold and silver." The page was full of the other things, said, "But the academician said you can't do it, so it's not acceptable." I said, "Look at this, very interesting, in the corner the two blocks are empty, what's in these two, what has been in these two?" "No, there is no gold." I said, "Give me back what you have finished with the test, the rest of the material." (1:22) We took it out, we sent it to a laboratory test on a specific test because I knew if it's destroyed it's still energies of it is left behind. The independent laboratory confirmed, yes, there is a gold and silver. The foolish academician tampered with the result taking those two out that he is correct.

I asked for a meeting of the top scientists from the Space Military and Central Command and office of the Prime Minister of China in this meeting back in the same Board room. I said, I want to explain to you something. You are telling us that your academician was correct and he took two numbers out. I want to tell you something, and I know you don't like it. I put on the screen scientific data from American University and American Space Scientists that it confirms, if you see these elements in the ratio which was in the rest of the documents they gave us, this shows the sign of the existence of gold and silver. I said, "Where is the silver? You cheated." Chinese don't like to be told they lie. It's the worst thing you can do to a Chinese. I said, you lied. Your academician, your academician has lied and cheated. He's taken those two out and the material he gave us in your own laboratories now tells us there is a gold actually four times more than the natural way, the data shows. So, what's the position? You're stealing technology or you're lying to us. The meeting had to come to an end because it was obvious that the academician was disgraced. And they could not take it. (1:24) I waited for another one or two weeks. Then

we were told to attend the meeting in a very beautiful special room. I have a picture of it one day I'll show you. And they said there's a special meeting. The head of Chinese Central Command appeared in the meeting. Three Generals who were with us on the mountain and he said to me, "Mr. Keshe, we apologize, you are correct. We have found traces of gold in the first test too. We do not know what to do. He has brought us to shame."

And that point, it came to show that biggest enemy of the Chinese world of science is its academicians. People are supposed to preserve knowledge and technology. It became end of a lot of corporations because everything else was based on lies and cheats of all these people. When the head of Chinese military confirms a lie by their own academician, the people who govern and so on, it brings to you that these people do anything to hide technologies. For them not to lose their position. And we are just one of the many that these people have stolen from.

Converting energy to matter is what your heartbeat does in every second of your life. Without that heartbeat, which converts the energy of the Cosmos to the matter physicality of your body, there is no life. (1:26) And if we understand this, if we comprehend the extent of this, then we understand humanity is in for huge changes in progressive knowledge of transportation and transmutation. Because in fact what happens is we have to learn how our body has learned to convert energies of the Universe into the life cycle of us. And as I said before, that field of the Universe become physicality of the body of the Man, comes from the Creator. Is it true, understanding the work of the pulse of the body of the Man, that when he says, 'I made Man in the image of Myself,' because the pulse of Me in interacting with the pulse of the Man's heart become the body of Me, in the body of the Man. And this brings a lot of, a lot of things home in what they've been trying to teach Man for millions of years, thousands of years. (1:28) That mankind has to understand, with that pulse converting into frequency, they become the essence of manifestation of physicality of the Creator from His field.

And once Man understand this, he needs to ask himself one question, has the Creator ever killed these fields? That me in the image of Him commits such a heinous crime? Then it just takes a pulse to give image into the fields of the Creator in the face of a Man. And then we have to understand how far we live with the reality of the ignoring our own existence in the dimension of our own Creator, as every heartbeat of us is a manifestation of His physicality in the dimension of existence of the Man. Are we the true image of Him or are we a pulse away, a shortcoming of being Him? How much have we lied to ourselves and how much they have lied to us, for us, not to know who we are and how we are created and what we are created out of. (1:30) We are created out of the fields of the Creator and speak wrong in His name, live wrong in His name, we kill in His name as is His light and energy which has become us in the matter of state, of physicality.

Any other question?

R: Thank you Mr. Keshe. We have some questions in the Q&A here from Boz Michael, who's asked questions before. And it's quite extensive. Let me... there's a number of

questions, but I think they all around the same subject. So, I'm just going to read what he's posted and you can answer when I finish. I think it's probably best because individually it gets too...

K- You want me to go to sleep and wake me up and then give me a brief...

R: Yeah, that's the problem with the really long... this is... it's a bit too long. So, maybe I'll just make it succinct. Let me just skip through here. Basically, the idea is that, we have NASA and they describe missions to Space, and Boz Michael is interested to hear what the Keshe Foundation is actually progressed with in its own Spacecraft Technology, as of 2026. In the past you've described technologies that could be far superior to conventional rocket propulsion, technologies that could make interplanetary travel significantly easier and faster. (1:32) So, if so, how would such a Spacecraft function technically? What principle generates the propulsion? How is the necessary energy supplied? And how does the system fundamentally differ from chemical or nuclear electric propulsion? Above all however, I am no longer interested in what might be possible at some point in the future, but rather what already exists today. Is that short enough for you? It's much longer. That was the short version.

K- I think he knows everything, so let him tell us. He knows what it is, or wants to update, or let him tell us what he knows and then we'll learn from him. The process, the reality of the work is we heard that NASA, what we call, launched one of the biggest lenses ever in the past few days, it's going to come operational in the next, God knows, three months apparently, we'll see a thousand times more, better than before. The Space technology of today is not any more manifestation of technology. Is in being able to create a condition of the fields, which creates transmutation of energy, and not any more physicality. (1:34) And once we achieve to understand this, then we have entered in the next step. ... (Loud bangs in background) (We have to stay quiet. ... Unexpected, but you see what we live with). (Silence)

R: Are you still there Mr. Keshe?

K- Yes, we are safe. (Just wait a few seconds if he enters ??).

K- (1:36) The process of change ... (It's too close, isn't it?) The process of change comes from understanding. As I said many times, if you see a UFO, means they have not managed to reach understanding of transmutation of energy. They have understood the process of transferring, and this is part of what we call, 'progress in knowledge.' When we see an object, doesn't matter from a Man or from a, what you call, object, UFOs. It means the knowledge is still in the matter state, but they have... or they have discovered a way to be able to create this resistance or travel within the structure. (1:38) (pause ... Too close to the line of fire). And if you don't see, but see the effects, then it's deniable, because you haven't seen anything. And the mankind then it talks about magic. So, the process comes down to, if we tell you we have achieved this, and then (you) say show me, but we cannot show you, because that state of knowledge is invisible to the eye of the Man so it doesn't count. It's what they call Western philosophy to discredit anything which I don't want you to get a hang of, 'show me.' Show me, for me to believe, and I say

you're so stupid you can't see it. What can I show to a stupid Man? You go to any professor, any university, what they call, 'show me to believe.' If your intelligence was there, you would have shown me. So you have to believe what I show you.

This structure of work is the pattern of today's science. I'm ignorant, I'm stupid, and for me to show, to cover my stupidity, I say, "Show me." You prove to me, "No, no, you try to understand me, that's your problem, not me trying to show you." (1:40) So, when we talk about where it is the science and what level we are, the science is at the point that the Mankind cannot even understand, tested, verified. But, as I said, it's like the academician. I don't need to tell you where the technology is. You want to find out, you had enough chance. I showed you every possible way to, what do you call, for you to be able to replicate, at least what you believe in. And this is the reality of time.

Something nice, come up. Now you want to see how true it is. Rick, I send you a video. Play this video, and then I tell you where this video is. You can play the sound behind it. It's getting transmitted to you. I hope you receive it in the next half an hour, an hour.

<< Mr. Keshe try to send a video to Rick >>

K- ... So, tell you what's the update. (1:42) If we show you what's the update and what is achieved and you can't see it. Is it our lack of technology, or is it your ignorance and stupidity? Or would it not you being able to see what we show, we're saving your face, that you're not stupid? So, the update is Mankind, especially military forces have achieved a lot. Seen a lot of it, but still playing games, and still happy to fly something and land it back on. As we saw very recently, past week or so, how they launched a telescope and they are very proud they could land, sit back on. And it was like hundred years ago when a plane went and you were lucky if you landed and you were alive. We are more or less the same thing but now we do it with rockets.

The Space technology of today under the gravitational magnetic field is extremely advanced. But governments even themselves who are involved in that are scared of doing it, but they are doing everything ?? other way. Chinese, the Iranian and the other side, concentrating not on military but on advancement in technology. Americans, every piece of scrap has to become a weapon to make money out of. And as one of the, what you call it, guys told us once, 'when it's in CNN, I believe.' And we've seen all the lies appears on the CNN. So what is the technology which you believe in or we can explain to you is all on the same basis. (1:44) I'm trying to send you a video but it's not uploading. Let me see what I can send you. I'll send you a picture, maybe this picture will give you, and then I tell you. I have to... Just one second please, this is a problem with the live teaching. If you remember, sorry I had to take this video, it's not loading up for you. So I'm going to send you a picture. I try to see if I can get a video loaded. Where are you Mr. Crammond? Even the picture takes a long time to load.

R: I think you have some bandwidth issues today. You've faded in and out a couple of times.

K- We are in a safe place. Everything is okay. It's just trying to get the bandwidth. Even a simple picture is taking time. Let's see what come up if it ?? because we are online ?? another server. Let me see if I can do something else. Okay, let's see if it works this way now. I cannot move from here. Let me just do another one. (1:46) Try again. It's part of a video. So, I want to try again and send you something. Maybe it's part of the video. We'll do it today. Let's do Rick Crammond. There we are. Yes, we got through. Have you received the...

<< Rick prepare and shows a picture on the screen >>

K- ... I told you three years ago. This is, this picture what you see is one of these Generals, is a Chinese General, two star general, and somewhere between their legs you should see one reactor. And this is the mountain north of China and you can see 20th of July 2023. We spent a week in this location, in this area. (1:48) And all these plastic sheets were put around and the plastic cover on top. And then you see it's a clear sky more or less. And by evening, running the system, we had to literally run away from the flood the next day. This is how things work. They wanted to see, and they could not ?? was that, "Are you digging gold from the ground up because we are in a gold mine region?" I said, "No, we're converting the gold which is coming from the Creator to you lot." And this is how I told you, they took us into the northern part of, northeast part of China. And this is how a week of my life goes. Do we believe the academician, or do we accept the test results?

And it's the same with your flight. You want to know what is the condition that, what would it be? And this is how scientifically it works. This is how things take shape. And this is how many things we do, we don't need to answer. We don't need to question. We don't literally care what people say, because if an academician trusted by President Xi can tamper with figures for him not to lose his face, (1:50) then you can imagine what happens to the scientists who don't have the strength of us, and cannot stand this kind of slaughter. Then we tell you what the future of the science would be, then you say, "Oh, it's a game. I want to know what is now." This is now. This is three years ago, July, you see the date on top. And what we tell you does not matter. What happens in the future is what the governments decide to release, and to oblige by it. I send you another one with another test with Chinese military. And the picture tells you a story. Just look at the time and look at what's on the machine.

This is not deniable because you saw these machines two years later, in 2025, the same machines working in Beijing. What we showed in Beijing was already two years old history. I'll send you another picture, Rick. But I told you, this is another test. You see it with the gold on the machines. The technology is extremely advanced, that even the governments 'shake in their boots.' (1:52) Now you tell me, what is the present position? If we can ?? gold and show it this way, Space technology and where Mankind is, is far, far ahead of you. Far, far ahead of what you can even imagine. I show you something you have to see to understand. I try to crop some of the faces that cannot be seen. Then you see, I'll explain to you. So, for security reasons, I cover some faces, but look at the picture. Did you receive a picture?

R: Only the last picture I just showed.

K- This is again shows gold on the machine. This picture again is part of the history of the Keshe Foundation. (1:54) You see the picture? Wait, don't show till I check something is correct. Yes, you can show the picture you just received. Okay, have you received the new picture?

R: Yes, let me show that now.

K- You see the date. In this building, as you see, this is how we are treated in China. In Belgium and in Europe, they chase us like rats, because they want to abuse the humanity and this is one of the highest places in China, the man on the right, he's an extremely well-known, influential person. This is how you get treated in China. And in this building, behind this wall, is where I met, after a meeting, three Generals came in to sit, they explained that they found out that the gold was in the list and they asked us to move behind with the head of the Chinese military, Central Command came and he said the mistake was made. Exactly in this building, in this day, 11th of August, 2023. Three years ago. (1:56) And they set these scenes for, as you've seen, the ?? presidents and realities of Chinese structure. Now what do you believe is today? Do you want to believe an academician or do you want to believe the Head of the Central Command of Chinese forces accepting a lie has been done? Disgrace to Chinese military. But they're good. They don't send people to kill you. Now you tell me where is the Space technology of the Keshe Foundation and you want to know reality now, now what's in the future on ?? line ?? or might be.

Any other question?

Q: ... A friend of mine, he was an electrical engineer and I put him on onto the patent online to do with the MaGrav, I think it was, and he looked at it and he said it doesn't work. (1:58) Now, is that because they're looking at it in a physical materialistic way? And I mean, how do you convince someone who's an expert in engineering and he finds that he's telling me, "Oh, nah, what the patent says doesn't work." So...

K- No, it's to his understanding. To his understanding it doesn't work. The Man who the president of a nation swears on, and he is God, has to end up with cheating. To say it doesn't work, who cares? If he doesn't understand, to him it doesn't work. You understand? This is, so, so be it. Knowledge seekers are making these systems at their homes, in their garages, and they are selling it because people are saving money, and they're making a living out of it. London, Holland, Africa, Indonesia, Australia, they're all at it. So when I hear such a thing, I always look at one thing. That is to his stupidity, that's all it is. That's as much as he understands. Why should I even bother?

So I look at a patent, to me it doesn't work, it's not. Doesn't mean that just because I say so is what it is. Many, many Knowledge Seekers are making money out of selling MaGravs which people says is ?? many in seven or ten years down the line, (2:00)

they're still selling MaGrav. There are Knowledge Seekers who make their living out of Keshe Foundation, today, who have found out how and they do all sorts ... , and they become Keshe Foundation resellers. Some of them buy from us and add things of their own knowledge into it. And so, if all the fools say something is right, then the rest of the fools agree too.

Q: Yeah, I even have trouble trying to explain the function of the heart from your understanding versus, you know, being like a, most people look at a heart being like a mechanical pump and I say, well it's not exactly that.

K- It's not in the book because it's not in the book. You got to realize in 2009, 2010 we sold hundreds, thousands of books. And many Knowledge Seekers, some of you are listening, could be amongst them, said they're not receiving their books. They paid for it. We start asking questions. Belgium authorities were ordered, the post office, that no books of this gentleman can be sent out of the Belgium. The guy we went there, he says, "We have all your books piled here, we're not allowed to send them out."

Q: So what happened? What happened to the books? They've still got them?

K- I don't know, they burned it, they used it. We have 11,000 books sitting with a printer in Belgium. 24,000 Euro paid for it. And the guy says, "No, you want to get it? Come here, we kill you." (2:02) So we said, "No, leave it as that, we keep it there." This is the nature of the theft. This is what they are. And many books which, especially what the guy showed us, is most of the books which have signed, which shows, comes directly from us. Many, many signed books, all deliberately was kept.

Q: I'm lucky to have a couple them.

K- Some people still have some people kept. But, in principle, yes. If you're going to rely on somebody who just because he knows electric shock has bit ?? him and he had a tinkle with it, he's a god of electronics and whatever, so let it be. I tell you one day a story about the picture which you see on the scene. And how Keshe Foundation was infiltrated by the enemies of the state of China. I want to tell you something else you see, it's very, very interesting. This is pictures, very interesting. I have to delete part of it because it's Chinese Central Command document. And then I tell you why I show you this, and then you understand what I told you. Rick, I'm sending you another picture. Where are you? Have a look at this picture. This picture coming up. (2:04) It's before we get to the meeting you see here. Have you received it?

R: Yes, there's two of them actually. One's a blow up.

K- What?

R: One's a bigger version of the first one, I think.

K- Just wait, let me have a look what you've received.

R: One has the date and one is just the image of the...

K- Just wait, just wait, just wait. Let me see.

R: Probably you want the second one without the date, because I think there's some images on it.

K- Yes, there's some. Okay, can put that image as the stamps of the Central Command of Chinese Military Headquarters.

R: Right. So, okay. I got that one. Let's put that up.

K- Now, have a look at this, this is the interesting part. Look at the... you see these elements, it gives you percentages, whatever. But look at something very interesting. Go to the right hand corner, you see two blank, gray spaces. Have you brought it up, can you see it?

R: Oh, just, I think you should be able to see it there.

K- If you, yeah, if you focus on the... on the stamp. You see two blank corners, gray? This is where the criminal academician deleted the gold and the silver. By international law, by scientific data, (2:06) when you see these elements, especially at the ratios you see, it's a sign, 'tale tell' sign of gold mine. Especially in these combinations, 100% exists. And the guy has actually deleted gray 2, that's silver and gold. Says there is what, no silver, no gold, he's talking rubbish. This is the highest academician in the Chinese world of science. You don't see, delete, anything else, because this test was supposed to show, show gold and silver, and they collected, they could see the silver and gold on their clothing, in their hand. This academician had to delete these two. You can see it.

Is that, I can, I can, does he still have a job?

K- Most probably.

R: Maybe that was his job, to delete things.

K- This is a Man who President of China swears on, when it comes to rare Earth material. And I put you on the board, and I put scientific papers one after another. How scientists recognize gold, even in deep Space in some places, when they see this sign of this combination. And how come only in China there is no gold? And only two blocks are gray? Now you understand? What do you want me to show you, who do you want to believe? These are proof, physical proofs of the, what we call, technology. (2:08) Don't tell us what you know now, because what we tell you now to you is nothing, otherwise what's going to be in the future?

Q: Thank you Mr. Keshe.

K- You're quite welcome. Shall we call, it a day?

R: Okay, sure, thank you.

K- Thank you very much, I hope you learned a lot, to rely on your own strength, and nobody else's to prove to you. If it's right, or if it's right to do. And if it's right to do, it's right for you to think of it the right way. Thank you very much for today. And hopefully see you soon.

R: Okay, thank you Mr. Keshe. I think you broke off at the very end there, but...

K- I said, thank you very much and hopefully see you soon.

R: Yes, right.

K- Bye.

R: ... (2:10) ... (2:12) << Message from Universal Council >> (2:14) “Thank you for the opportunity. For say thank you so much beautiful Soul. Wish you be part very important part to the support to all work to the Keshe Foundation of course all work to the Universal Council. Please give you need to ask for support to from our Souls and invited daily all the time and daily at 9 PM central is summertime, and in our wishes we the Universal Council give from our Souls, and invite all humanity to elevate the Soul of every leader and every nation in every community to work as one Soul, in one direction to achieve peace as One Nation, One Planet, One Race. (2:16) Thank you beautiful Souls. Please give your Soul freely, permanently to unify for the peace. Thank you so much. Thank you Rick again for the opportunity... I please invite all communities to give your Soul for serve to the humanity because we need represent all communities across the world, across the planet Earth. Thank you, thank you to be part of the Universal Council. Like Swetha said, dancing traps all the time for the new, new world, to you, new planet. Thank you, thank you.”
